Demand No.26
Housing and Urban Development
Department
Chennai Metropolitan Development
Authority
Policy Note 2025-2026

Introduction

The Chennai Metropolitan Development Authority (CMDA) is the premier urban planning and development agency for the Chennai Metropolitan Area. Established with the goal of fostering organized urban growth, CMDA is responsible for coordinating and regulating the development of the city and its surrounding regions. It plays a pivotal role in urban planning and infrastructure development, ensuring that the growth of the Chennai metropolitan area adheres to sustainable, orderly, and efficient urbanization principles.

Established as an ad-hoc body in 1972 and transformed into a statutory Authority in 1975, CMDA is tasked with the formulation and implementation of master plans, building regulations, development schemes, and works to streamline the development of Chennai Metropolitan Area (CMA). CMDA is also entrusted with responsibilities such as decongesting urban areas, preserving environmental resources, and promoting economic growth in line with modern urban standards.

Budget Estimate 2025-2026
--

Rupees in Thousands (Gross)

Sl. No.	Departments		Revenue	Capital	Loan	Total
1.	Chennai Metropolitan Development Authority	Voted	400,00,03	7,40,01	4,413,50,02	4,820,90,06

1.1 Organisational Set-up

The Chennai Metropolitan Development Authority (CMDA) is headed by the Hon'ble Minister for Hindu Religious and Charitable Endowments who is also the chairperson of CMDA. Operational functioning is overseen by a team of executive functionaries including the Vice-Chairperson, Member Secretary, and Chief Executive Officer. Besides this executive group, CMDA also consists of members from various Government Departments, academic institutions, trade and commerce sectors and elected representatives. This diverse composition ensures that CMDA has a broader outlook and varied perspective on planning initiatives.

1.2 Major units of CMDA

The following key units carry out the functions of CMDA:

- i. Administrative Unit
- ii. Master Plan Unit

- iii. Area Development Unit
- iv. Area Plans Unit
- v. Regularization Unit
- vi. Road and Rail Unit

1.2.1 Administrative Unit

The Administrative Unit handles all the establishment matters related to the officers and employees of CMDA.

1.2.2 Master Plan Unit

The Master Plan Unit is tasked with overseeing a range of critical functions that guide urban development and planning within the Chennai Metropolitan Area (CMA). These responsibilities include:

1. Preparation of Master Plan.
2. Preparation of New Town/ Detailed Development Plan.
3. Review and amendments to Development Regulations.

4. Policy matters and studies relating to Urban Development and Metropolitan Planning as tasked by the Government.
5. Conservation of Heritage Buildings/Areas.
6. Implementation and revision of Master Plan.
7. Stakeholder engagement for the different sub-sectors of Master Plan.
8. Preparation of Land-use plan using Geographical Information System (GIS).
9. Incorporation of variations in the Master Plan and Detailed Development Plans.
10. Preparation of any other spatial plans as may be directed by the Government.

1.2.2.1 Preparation of Third Master Plan for Chennai Metropolitan Area 2027-2046

The First Master Plan for the Madras Metropolitan Area (now the Chennai Metropolitan Area, CMA) was formulated in 1976 with the goal of decongesting the city, boosting

the regional economy, and providing adequate housing and infrastructure for the growing population. This effective implementation of the first Master plan was foundational in the creation of the Second Master Plan (SMP) 2008-2026, which aimed to create a more compact city while addressing key environmental and sustainable development challenges, including flood mitigation, pollution control, increasing green cover and conservation of water bodies. The SMP also includes provisions for ecologically sensitive areas and establishes regulations for catchment and aquifer recharge zones, thereby limiting development and discouraging high-density construction within these regions. Furthermore, the SMP implements various regulatory measures and instruments, including the Premium Floor Space Index (FSI) and Transferable Development Rights (TDR) to effectively attain its stated objectives.

In 2021, the Government authorized the Chennai Metropolitan Development Authority (CMDA) to review the Second Master Plan in accordance with the rules and initiate preparations for the Third Master Plan for the Chennai Metropolitan Area. CMDA has started the preparation of the Third Master Plan (2027-2046) under the World Bank-assisted Tamil Nadu Housing and Urban Habitat Development Project (TNHHDP), and it is taking shape.

As an initial step, CMDA has drafted a "Vision Document for the Third Master Plan 2027-2046." Extensive public consultations took place across all the 15 zones of the Greater Chennai Corporation (GCC) and 14 other locations outside GCC between December 2022 and January 2023. Additionally, sectoral meetings covering Urban Growth, Housing, Economic Development, Infrastructure, Social Infrastructure, Environment, Traffic and Transportation, Heritage, Tourism and

Technology were held with stakeholders from various departments in October and November 2023.

CMDA has also commissioned 18 sectoral studies addressing critical issues such as land value distribution, economic growth, housing demand, infrastructure planning, and environmental management, all of which are in advanced stages of progress. Some significant studies include:

- a) Review and Recommendations for Strengthening of TNCDBR-2019,
- b) Land value and density distribution in the CMA,
- c) Comprehensive Shoreline Development Plan,
- d) Study on Urban heat islands effect in Chennai,
- e) Integrating Blue-green infrastructure for flood disaster and risk reduction in Urban

Planning and management in Chennai Metropolitan Area,

- f) Study on Demand and Supply pattern of Housing in Chennai Metropolitan Area for Chennai Third Master Plan 2027-2046,
- g) Spatial distribution of employment and income categories and agglomeration economies in Chennai Metropolitan Area,
- h) Development of sustainable Economic Growth Strategic Plan for the Chennai Metropolitan Area, and
- i) Strategic Institutional strengthening assessment and Action plan for CMDA

Apart from this, the Chennai Metropolitan Development Authority (CMDA) has initiated several key studies, including the Open Space Guidelines, Urban Design Guidelines, the Social Facilities Plan for the Chennai Metropolitan Area (CMA), Neighbourhood Planning within the CMA and the formulation of the Gender-Inclusive

Third Master Plan for the Chennai Metropolitan Area (2027-2046).

To integrate the outcomes of these sectoral studies and develop comprehensive strategies for the sustainable development of the Chennai Metropolitan Area, CMDA has undertaken a project on "Undertaking Multi-sectoral Analysis and Strategy Development to Support CMDA's Multi-sector Approach for Promoting Resilient, Green and Inclusive Land Use Planning for the Chennai Metropolitan Area." The draft analysis is in the final stages of preparation and, various intensive stakeholder consultations are planned across the CMA.

CMDA is also in the process of preparing a base map using Geographic Information System (GIS) technology. This map includes survey parcels as the foundational layers, supplemented by high-resolution satellite imagery and Differential Global Positioning System (DGPS) surveys. It encompasses key features such as

road networks, railway lines, water bodies, hills, forests, and major landmarks. This base map will serve as the foundation for the development of additional thematic maps that will inform the Third Master Plan.

CMDA is also undertaking studies such as the "Impact of Urban Development on Coastal Aquifer and Measures for Protection in the Villages from Kottivakkam to Mahabalipuram, between the Bay of Bengal and Buckingham Canal" and the "Impact of Urbanization on Redhills Catchment Area, with Measures for its Conservation and Protection from Urbanization".

1.2.2.2 Grid of Roads Plan

To address the growing transportation demands of the rapidly expanding Chennai Metropolitan Area (CMA), the Chennai Metropolitan Development Authority (CMDA) has developed a comprehensive Grid of Roads network plan, covering 201 villages. This plan outlines a hierarchical road system aimed at

enhancing connectivity and accessibility within currently undeveloped regions.

The Tamil Nadu Town and Country Planning Act, 1971, grants the authority to prepare Detailed Development Plans (DDPs) at the micro level, focusing on improvements to existing roads and streets, the creation of new roads, and the provision of essential social infrastructure. Acknowledging the critical need to establish a well-structured circulation system prior to the onset of development, CMDA's Grid of Roads plan is designed to seamlessly integrate with future DDPs. This forward-thinking approach ensures that emerging large-scale developments on the periphery of Chennai City will be adequately supported by an efficient and hierarchical road network. Specifically, the plan proposes the widening of 399 existing roads and the creation of 439 new roads.

To encourage public participation, CMDA published a notice in local newspapers inviting

objections and suggestions from the general public regarding the proposed road widening as a first phase.

All objections and suggestions received were carefully reviewed and addressed individually. Based on these inputs, and in consultation with the Highways Department, a revised draft road widening proposal has been made ready. This updated proposal seeks to incorporate the 399 road widening projects into the Grid of Roads Plan as a variation to the Second Master Plan, under Section 32(4) of the Tamil Nadu Town and Country Planning Act, 1971.

In the second phase, the 439 new roads proposed in the Grid of Roads Plan will undergo a detailed scrutiny. Following this, the CMDA will invite further objections and suggestions from the public regarding these new roads and then initiate the notification process.

1.2.2.3 Preparation of New Town Development Plans

The Hon'ble Minister for Housing and Urban Development Department, while moving the Demand No.26 in the Legislative Assembly for the Financial Year 2022-2023, had made the following announcement:

"In order to develop urban growth centers such as Thirumazhisai, Minjur, Thiruvallur, Chengalpattu, and Kancheepuram and their respective surrounding areas as satellite towns, separate New Town Development Plans for each will be prepared by the Chennai Metropolitan Development Authority (CMDA)."

This initiative aims to foster balanced urbanization and decongestion of the core metropolitan area by establishing well-planned satellite towns in these regions. CMDA will undertake the preparation of comprehensive development plans for each of these identified areas, focusing on infrastructure development,

residential and commercial zoning and sustainable urban growth.

The New Town Development Plans will outline strategic measures to enhance urban liveability, connectivity, and accessibility, thereby promoting economic growth and improving the quality of life for residents in these towns.

1.2.2.3.1 Thirumazhisai New Town

Thirumazhisai New Town is located at the interchange of the Outer Ring Road (ORR) and the Chennai-Bangalore Highway (NH-48), making it a strategic location for both residential and economic growth. The proposed Thirumazhisai New Town Development Area spans 34.21 sq. km, including villages from Thirumazhisai Town Panchayat, Poonamallee Panchayat Union, and Poonamallee Municipality.

The “Preparation of Thirumazhisai New Town Development Plan 2025 – 2045” is underway. As per the conceptual plan prepared

for Thirumazhisai New Town, a Loop Road is proposed at the periphery of the delineated Thirumazhisai New Town Area connecting the Chennai Outer Ring Road and NH 48. The Loop Road is to be implemented through the Land Pooling Area Development schemes (LPADS) within the proposed Thirumazhisai New Town Development Area.

The Government had accorded approval for notification of declaration of the intention to notify the seven Land Pooling Area Development Schemes for the implementation of Loop road proposal. Based on this, CMDA has notified the declaration of the intention to notify the seven Land Pooling Area Development Schemes for a total extent of 1605.75 acres for which, preparation of draft Land Pooling Area Development Schemes is under process.

1.2.2.3.2 Mamallapuram Satellite Town

Mamallapuram, situated on the eastern coast of the Chennai Metropolitan Area, has

significantly contributed to the region's history and economy, primarily driven by its thriving tourism industry. In order to have sustainable and planned growth in this region, a satellite town was proposed in 2023 to be created near Mamallapuram along East Coast Road, through the land pooling model by CMDA following the new growth cluster. Subsequently, the Government had directed the CMDA to prepare the New Town Development Plan for Mamallapuram New Town with a horizon period from 2025- 2045.

The Mamallapuram New Town Development Plan (NTDP) 2025-2045 aims at promoting sustainable urban growth and preserving the rich heritage & culture of the region while serving as a satellite town for Chennai. This plan will not only improve the tourism infrastructure but also create a new economic hub for the Chennai Metropolitan Area, with a focus on tourism, and related sectors.

This New Town area spans 25 villages over 123.48 sq. km., around Mamallapuram village. The Authority has approved the preparation of a Mamallapuram New Town Development Plan to transform Mamallapuram New Town into a Tourism and MICE centre. The work on preparation of the plan is currently underway.

1.2.2.3.3 Kancheepuram New Town

In 2023, the Government delineated Kancheepuram New Town, encompassing 18 villages over an area of 62.78 square kilometers.

Pursuant to this, the Chennai Metropolitan Development Authority (CMDA) has initiated the "Preparation of New Town Development Plan for Kancheepuram New Town and Detailed Development and Heritage Revitalization Plan for Kancheepuram Town (2025 – 2045)." The primary objective of this initiative is to position Kancheepuram Town as a world-class heritage town, while transforming the surrounding areas into a vibrant industrial town.

1.2.2.3.4 Chengalpattu New Town

The Chengalpattu New Town has been delineated to include 62 surrounding villages, covering an area of 181.11 square kilometers.

In this regard, the Chennai Metropolitan Development Authority (CMDA) has initiated the preparation of the "New Town Development Plan for Chengalpattu (2025-2045)." The plan envisions holistic growth, focusing on the physical, social, economic, and environmental development of the region, while leveraging the existing potential for sustainable progress.

1.2.2.3.5 Minjur New Town

Minjur, located on the northern fringe of the Chennai Metropolitan Area (CMA) has had a huge impact on the economy of the Chennai city as it is largely driven by industrial and port-related activities. In order to have a sustainable and planned growth in this region, the Government have directed CMDA to prepare the New Town Development Plan for Minjur New

Town with a horizon period from 2025-2045. The Minjur New Town has been delineated with 12 villages around Minjur village, covering 111.62 sq. km. Envisioned as an economic hub, the Authority has approved the preparation of a comprehensive New Town Development Plan to transform Minjur New Town into an urban industrial growth centre. The preparation of the New Town Development Plan for Minjur is currently underway.

1.2.2.3.6 Thiruvallur New Town

The area designated for the development of the proposed New Town at Thiruvallur includes 11 contiguous villages with an extent of 37.74 sq.km. The Authority has decided to approve the preparation of a detailed economic/business plan and New Town Development Plan for Tiruvallur.

In 2023, the Government announced its intention to notify eleven villages which were included within the delineated boundary as the

proposed New Town at Thiruvallur. As a part of development of urban growth centres in the CMA, Periyapalayam and its surrounding villages in Thiruvallur district were identified for development as Thiruvallur New Town.

The preparation of the New Town Development Plan for Tiruvallur to transform the area into a Knowledge and Research Hub is currently underway.

1.2.2.3.7 Maraimalai Nagar New Town

Considering the economic growth potential, the development of Maraimalai Nagar New Town was conceived to foster balanced and organized development.

Maraimalai Nagar, with its diverse mix of residential, commercial and industrial opportunities, is ideally positioned for substantial future growth. The proposed Maraimalai Nagar New Town Development Area spans 138.9 sq. km, including the Municipalities of Maraimalai

Nagar and Nandhivaram-Guduvancheri along with surrounding villages.

The Authority has approved the preparation of New Town Development Plan for Maraimalai Nagar. The Government has declared its intention to notify forty-two villages which were included within the delineated boundary as the proposed Maraimalai Nagar New Town. The process of engaging a consultant to prepare the New Town Development Plan for Maraimalai Nagar is currently underway.

1.2.2.3.8 Sriperumbudur New Town

The Government, recognising the need to enhance the role of Sriperumbudur as an industrial hub by upgrading infrastructure, fostering economic growth and providing better support to industries, announced its intention to notify Sriperumbudur town and 49 surrounding as the Sriperumbudur New Town area spanning 265.57 sq.km.

This New Town has been delineated to provide improved transportation networks, planned growth and infrastructure to attract investments while simultaneously ensuring the provision of affordable housing, urban amenities, and employment opportunities. It is imperative that industrial growth is balanced with environmental sustainability and the needs of the community to foster continued industrial and economic development, not only in Chennai but across Tamil Nadu. In order to achieve this, the process of engaging a consultant for preparation of New Town Development Plan for Sriperumbudur New Town, is underway.

1.2.3 Area Development Unit

The Area Development Unit (ADU) of CMDA is a key division responsible for the planning, coordination, and execution of urban development projects within the Chennai Metropolitan Area. The ADU focuses on the systematic development of various urban zones,

ensuring that infrastructure, housing, and public amenities are aligned with the city's overall growth vision. By working on both planned and regulated developments, the ADU plays a crucial role in shaping sustainable, well-organized communities and improving the quality of life for the residents of Chennai and its surrounding areas.

i. Planning Wing:

The Planning Wing handles the formulation of projects, acquisition of lands, and development of the projects proposed.

ii. Construction Wing:

The Construction Wing executes all the projects devised by CMDA.

iii. Estate Management Wing:

The Estate Management Wing oversees the asset management including acquired lands and the marketing of assets generated within the development projects.

iv. Finance Wing:

The Finance Wing is entrusted with securing project financing and determining pricing strategies.

The Area Development Unit currently handles the following projects:

1.2.3.1 Kalaigiar Centenary Bus Terminus

The Kalaigiar Centenary Bus Terminus at Kilambakkam, constructed by the Chennai Metropolitan Development Authority (CMDA) at a cost of Rs. 393.74 crores sprawling over 88.52 acres, was inaugurated by the Hon'ble Chief Minister of Tamil Nadu on 30.12.2023. Built to reduce congestion in Chennai and overcrowding at the Koyambedu Mofussil Bus Terminus, this state-of-the-art facility caters to south-bound Mofussil buses and offers world-class amenities. The terminus accommodates 215 buses in bays, 320 in idle parking, with additional space for 3,146 two-wheelers and 482 four-wheelers. It houses 105 commercial outlets, Transport

Corporation offices, ticket counters, dormitories for 340 bus crew members and 140 passengers and toilets for all genders and differently-abled persons. The infrastructure includes uninterrupted power supply, a sewage treatment plant, a six-acre fountain park and accessibility enhancements. Declared a one-time-use plastic-free zone, the facility also offers a 24x7 medical centre, ambulance services, battery-operated shuttle vehicles, lactation rooms, purified drinking water, escalators and lifts. Around 1,100 State Transport Corporation buses and 550 private omni buses operate from the terminus on a daily basis, with 781 Metropolitan Transport Corporation (MTC) buses ensuring city connectivity. On an average, 50,000 passengers use the terminus daily, rising to 75,000 on weekends and over 1 lakh during festive seasons. This modern transport hub exemplifies Tamil Nadu's commitment to enhance public transportation infrastructure while prioritizing

passenger convenience, safety and environmental sustainability.

The Kalaingar Centenary Bus Terminus (KCBT) has undergone a series of significant improvements by Chennai Metropolitan Development Authority since its inauguration, designed to improve the passenger experience and promote sustainability. A sprawling 16-acre climate park and archaeological interpretation center, which has been developed at a cost of Rs. 15.20 crores, provides much-needed green space and recreational opportunities for the public. Commuters can now utilize the "KCBT Mobile App," which offers real-time information on platform details, destinations, timings, and estimated travel times, as well as a convenient platform for feedback and grievance submission. To streamline operations and enhance the comfort of long-distance travellers, a dedicated Omni bus parking facility, located near the Outer Ring Road, provides space for 120 buses and

includes modern amenities like a dormitory for drivers and conductors. Efforts are also underway to improve multi-modal integration, with a new suburban railway station under construction. A skywalk is being built to connect this station to the KCBT. Considering the security of the passengers, a new G+3 storied police station is being constructed within the KCBT premises. Inside the terminal, digital display boards are being installed to provide clear and accessible information to commuters. Sustainability is a key focus, with a dedicated on-site garbage processing and recycling facility planned, aiming for zero waste disposal by processing wet waste into manure for the terminal's gardens. Finally, a new covered pathway with ramps has been created to minimize the walking distance between MTC buses and the main terminal building. These initiatives have met with positive feedback from a diverse range of passengers, including

international travellers, solidifying KCBT's role as a modern and efficient transportation hub.

1.2.3.2 New Mofussil Bus Terminus at Kuthambakkam

To ease the congestion at Koyambedu and provide a well-equipped and modern facility that serves as a central hub for intercity and inter-district bus services for westbound buses, a bus terminus at Kuthambakkam was proposed at an estimated budget of 414 crores. Construction work is under an advanced stage of progress at the site of 24.79 acres and once operational, this terminus will facilitate efficient and convenient transportation for commuters traveling westward.

1.2.3.3 New Bus Stand at Chengalpattu

The Chengalpattu bus stand will enhance public transport coverage in the southern parts of the CMA while alleviating traffic congestion within the Chengalpattu city center. The work on the bus terminus on 9.95 acres commenced in

October 2023 at an estimated budget of 97 crores and is progressing at a swift pace to be soon opened for public.

1.2.3.4 New Bus Stand at Mamallapuram

Mamallapuram is one of the 8 towns identified for New Town development. To help Mamallapuram meet the growing local and tourist demands for connectivity and stimulate local economic development, a bus stand is being constructed on 6.9 acres at an estimated cost of Rs 90.50 crores. This terminus will be a critical addition to Mamallapuram's transportation infrastructure when operational.

1.2.3.5 Koyambedu Wholesale Market Complex (KWMC)

The Chennai Metropolitan Development Authority (CMDA) established the Koyambedu Wholesale Market Complex as one of Asia's largest market places for perishable goods, extending over 86 acres in 1996 as part of the First Master Plan. The administration of the

market is overseen by the Market Management Committee established under the Tamil Nadu Specified Commodities Markets (Regulation of Location) Act, 1996.

Apart from the existing public utilities, in the last 4 years, in order to modernize the market complex, works like establishment of solar power plants, installation of a modern control room with additional CCTV cameras, installation of additional high mast lights and renovation of damaged clinic have been completed and dedicated for public usage.

Further, works like establishment of arches at prominent entry gates, painting of common areas, provision of cold storage facility in the Food Grain Market, development of a park in the Open Space Reservation (OSR) area adjacent to the Flower Market, revamping of stormwater drains and sewage pumping station and

provision of two passenger lifts in the Flower Market are underway.

These efforts are in line with the Government's commitment to enhance the infrastructure, sustainability and services at the Koyambedu Wholesale Market Complex, ensuring a seamless and modern experience for traders and customers alike.

1.2.3.6 Modernization of Iron and steel market at Sathangadu

The Chennai Metropolitan Development Authority (CMDA) established the Iron & Steel Market (I&SM) at Sathangadu in 1991, located near the Ennore Expressway, covering an area of 203 acres, as outlined in the Master Plan. The market has been successfully operating for over 30 years with comprehensive infrastructural facilities designed to alleviate congestion in the George Town area. A dedicated police station is situated within the market to maintain law and order.

Out of the 850 plots in the market, 717 have already been allotted to various allottees, with efforts underway to allocate the remaining plots. Notable public sector units, including SAIL, VSP, IOCL and HPCL, are also among the allottees.

As part of the ongoing modernization initiative, the market has been equipped with surveillance cameras for comprehensive monitoring, with footage being overseen from a central control room. Essential services such as drinking water, electricity and road infrastructure are being continuously provided to the allottees.

Chennai Metropolitan Development Authority continues to modernize the Iron and Steel Market to ensure continuous growth, safety and improved service to all stakeholders.

1.2.3.7 Madhavaram Truck and Bus Terminal

Chennai Metropolitan Development Authority has established a Truck Terminal at Madhavaram in an extent of 80 acres at a cost of Rs.6 crores to promote trade and economy in Chennai City. This terminal is located at the junction of Inner Ring Road and GNT Road with good connectivity, easy access to the city, port and railway stations, making it a major contributor to the commercial and economic development of the city.

For the benefit of transport workers, freight agents, the public, and commercial establishments, the terminal has warehouse and loading / unloading areas, vehicle repair yards, parking, office building and other facilities. Space has also been earmarked for Vehicle Repair, Administrative Building, Electrical Substation, Fire Station, Post Office, Police Station, Fuel Bunk, Storage Godown, Truck

Parking, Telephone Exchange, Weigh Bridge and other facilities. A sum of Rs.30.30 crores has been sanctioned in 2023-24 by Chennai Metropolitan Development Authority and released to Greater Chennai Corporation for taking up improvement works in this terminal.

In order to decongest the Koyambedu Mofussil Bus Terminus, Chennai Metropolitan Development Authority has constructed the Madhavaram Mofussil Bus Terminus at a cost of Rs.95 crore at Madhavaram Truck Terminal for the buses plying from Chennai to North via GNT Road.

1.2.3.8 Manjambakkam Truck Parking Yard

Considering the requirement of heavy vehicles coming from other places and other states, Chennai Metropolitan Development Authority has taken up the construction of Heavy Vehicle Parking at Manjambakkam in an extent of 14 acres along the Inner Ring Road in 2014. The parking yard can accommodate about

400 heavy vehicles and has been provided with facilities such as drinking water facility, public conveniences, shops, CCTV surveillance, uninterrupted power supply.

1.2.3.9 Vada Chennai Valarchi Thittam

North Chennai, a vibrant and historically significant region within the bustling metropolis of Chennai, India, is a microcosm of the city's multifaceted identity. From its humble beginnings as a trading hub to its present-day challenges and aspirations, North Chennai carries a rich legacy that continues to shape its character.

Historically, North Chennai has played a pivotal role in the city's evolution. Its proximity to the Chennai Port, one of India's busiest, has fostered a strong maritime tradition.

However, North Chennai also faces contemporary challenges. Rapid urbanization and industrialization have led to increased population density and put a strain on

infrastructure. Issues like inadequate housing, limited access to quality healthcare and education, and environmental concerns are prevalent.

To ensure equitable and comprehensive growth across Chennai, the rapid development of North Chennai is a must. The Government announced the “Vada Chennai Valarchi Thittam” at an initial outlay of Rs. 1000 crores in 2023-2024, over the next 3 years. Subsequently, a Socio-Economic survey was carried out to identify growth opportunities and potential development projects across sectors including healthcare, education, physical infrastructure, utilities, employment opportunities, housing and slum redevelopment, social infrastructure and safety & security, covering 11 different Government departments/ organisations.

Under this initiative, Chennai Metropolitan Development Authority has taken up 41 own

projects at a cost of Rs.928.65 crores and is funding 94 projects of other departments at a total cost of Rs.1063.06 crores, contributing to 135 projects at a total cost of Rs.1,991.71 crores. The projects of CMDA are under various stages of implementation and are being sped up to bring most of the projects to public use by the end of this year.

1.2.4 Area Plans Unit

The Area Plans Unit of the Chennai Metropolitan Development Authority (CMDA) is responsible for regulating development (buildings constructions and layouts) within the CMA. This function, under the Section 49 of the Tamil Nadu Town & Country Planning Act, 1971 entails enforcing land-use plans and Development Regulations established by the Government as part of the Master Plan or Detailed Development Plans. CMDA fulfills this role by issuing Planning Permissions for various building projects and layouts, ensuring

compliance with the current Development Regulations, the Tamil Nadu Combined Development and Building Rules, 2019. The CMDA's planning permission process encompasses a range of development types, including Non-High-Rise Buildings (NHRB), High-Rise Buildings (HRB), Industrial and Institutional Buildings, and Layouts/Sub-divisions. Additionally, CMDA handles applications for the reclassification of land use for individual sites.

1.2.4.1 Online Planning Permission System

The Planning Permission Application (PPA) process at the Chennai Metropolitan Development Authority (CMDA) has been significantly improved with the introduction of an efficient online application system, which became operational in May 2022.

CMDA launched the "Web Enabled Single Window System for Online Submission, Processing and Disposal of Planning Permission Applications," offering a wide range of benefits,

such as increased convenience, time efficiency, and improved transparency in the approval process. This user-friendly portal allows for electronic submission of applications, pre-verification of drawings to reduce errors, integrated online payment processing, and real-time tracking of application status. Notably, the system enables complete end-to-end online processing of planning permission applications, thereby improving both efficiency and transparency.

The Online Planning Permission Portal is also integrated with 19 No Objection Certificate (NOC) issuing agencies, including key departments such as Chennai Metro Rail Limited (CMRL), Public Works Department (PWD), Water Resources Department (WRD), Tamil Nadu Housing Board (TNHB), Electronics Corporation of Tamil Nadu (ELCOT), Forest Department, Geology and Mines Department, Small Industry Development Corporation (SIDCO), State and

National Highways, Southern Railways, Collectorates (Chennai, Thiruvallur, Kancheepuram, and Chengalpattu), Directorate of Fire & Rescue Services (DFRS), Airports Authority of India (AAI), Archaeological Survey of India (ASI), and the Indian Air Force (IAF). This integration streamlines the approval process, ensuring a seamless and coordinated approach to planning permissions. Also, the Government has fixed a certain number of days for each NOC issuing department as the maximum number of days admissible for processing and issuance of NOC. Thereafter the NOCs will be deemed to have been given. The prescribed timeline for issuing the NOC, is being added to the existing online NOC process in the Single Window Portal, and this is currently under progress.

The Chennai Metropolitan Development Authority (CMDA) has delegated powers to urban and rural local bodies to issue planning

permissions for developments with a FSI area of less than 10,000 square feet and a height up to 14 meters. This system has been developed online, with CMDA's portal integrated into the portals of the Greater Chennai Corporation (GCC), the Commissionerate of Municipal Administration, the Department of Rural Development and Panchayat Raj, and the Directorate of Town Panchayats through a Single Window Portal, which became operational in November 2023. This integration enables applicants to apply online for building permissions directly through local bodies.

Additionally, the portal features a module that allows users to verify the authenticity of ownership documents via the Department of Survey and Settlements (DOSS) database, as well as a module for users to check Encumbrance Certificates (EC) and Guideline Values (GLV) against the database of the Inspector General of Registration (IGR).

The Single Window Planning Permission Application (PPA) Portal has also been enhanced with modules for CMDA's layout & reclassification approvals, as well as completion certificates. The layout module is also live, and applications for layout approvals are now being accepted exclusively through the online platform. On the reclassification module of the Online PPA system, live file testing is being done.

CMDA plans to streamline the existing workflow to continuously reduce the time required for issuing planning permissions, while simultaneously increasing the volume of planning permissions issued.

Through the end-to-end Online Planning Permission system, CMDA is issuing planning permissions more efficiently, with a processing time ranging from 60 to 90 days. For High-Rise Buildings (HRB), the number of planning permissions issued annually has increased

significantly. In the past year, CMDA issued 135 HRB applications, a two-fold increase compared to the 65 HRB applications typically received each year. Notably, more than 100 planning permissions have been issued for High-Rise Buildings, marking an unprecedented achievement.

In the year 2024 in Non-High Rise Building Category, 862 applications were received out of which 664 planning permissions were issued. This demonstrates the increased efficiency and capacity of the online system in managing and processing applications for both HRB and NHRB developments.

1.2.4.2 Review Team and Appeal Division

To facilitate quick disposal of Planning Permissions and empowerment of the Local Bodies, CMDA delegated powers to issue Planning Permission for certain category of buildings to Greater Chennai Corporation and Local Bodies within Chennai Metropolitan Area

i.e., (i) Greater Chennai Corporation, (ii) Avadi Municipal Corporation, (iii) Tambaram Municipal Corporation, (iv) Municipalities [5 Nos.], (v) Town Panchayats [3 Nos.] and (vi) Panchayat Unions [10 Nos.].

The Local Bodies are reviewed periodically by the Review Team and Appeal Division on various aspects with reference to Planning Permission to check whether the planning parameters have been properly examined while issuing Planning Permission; to check whether the charges and fees collected are in order; whether the delegation of powers are exercised properly as given by CMDA; whether the details of Planning Permission issued and the charges collected are properly entered in the Register maintained with Local Bodies and whether enforcement action is initiated on the cases where Planning Permission is rejected.

1.2.4.3 e-Governance

CMDA is in the process of transforming into a paperless office. CMDA has implemented e-Office to streamline file processing and make the system paperless. This will improve efficiency, reduce the response time for various requests such as RTI applications, Ungal Thoguthiyil Muthalvar (UTM), Grievances and other official processes.

By processing files digitally, CMDA can enhance transparency, accountability, and speed in decision-making.

Moreover, a mobile Application for the Kalaignar Centenary Bus Terminus (KCBT) at Kilambakkam has been developed and is now live for public use. This application is designed to ensure passengers' comfort, safety, and convenience, offering them real-time information and easy access to services.

The development of a website for Koyambedu Wholesale Market Complex(KWMC)

is underway. This website will benefit the vendors and traders and create transparency in issuing traders' licence. Also, it streamlines the paperless functioning and ease of doing work.

The Chennai Metropolitan Development Authority (CMDA) has received a highly positive response to the Online Planning Permission Portal and other IT initiatives. Moving forward, all functions of CMDA will be transitioned to an online platform and necessary measures are being undertaken to ensure seamless implementation.

1.2.4.4 Transferable Development Rights (TDR)

The Government has approved the implementation of Transferable Development Rights (TDR) in the Development Regulations of Second Master Plan for Chennai Metropolitan Area in 2008. Further, the TDR is incorporated in the Tamil Nadu Combined Development and Building Rules, 2019 and are in force for the

entire state. The concept of transferable development rights was introduced to obtain the land required for public infrastructure projects, such as road widening, formation of new roads, bus stops / stands, Metro Rail, MRTS and any other urban infrastructure developments notified by the State Government department or Government agency or local body. The TDR in the form of Development Rights Certificate (DRC) is issued to the developers/owners, who gift their land portion for these purposes. CMDA has issued 137 DRCs in lieu of the land given for road widening and 44 Special Transferable Development Rights to the Tamil Nadu Urban Habitat Development Board (TNUHDB). The online process for the issuance of digitally e-signed Transfer of Development Rights (TDR) certificates has been successfully implemented. This facilitates paperless work, enhances efficiency, ensures authenticity, and reduces processing time.

1.2.4.5 Enforcement Cell

The Enforcement Cell of the Chennai Metropolitan Development Authority (CMDA) plays a critical role in ensuring the compliance of building regulations within the Chennai Metropolitan Area, exercising its authority under Sections 56 and 57 of the Tamil Nadu Town and Country Planning Act, 1971.

The key functions of Enforcement Cell are:

➤ **Enforcement of Planning Regulations:**

Ensures compliance with building regulations for structures constructed based on CMDA-approved building plans.

➤ **Delegation of Enforcement powers:**

The Enforcement Cell has delegated its powers under Sections 56 and 57 of the Tamil Nadu Town and Country Planning Act, 1971, to all the Local Bodies within the Chennai Metropolitan Area to ensure widespread compliance.

➤ **Issuance of Completion Certificates:**

Completion Certificates are issued for buildings that strictly adhere to the approved CMDA building plans and the Completion Certificate guidelines as prescribed by the Tamil Nadu Combined Development and Building Rules, 2019 (TNCDBR).

➤ **Enforcement Action against Unauthorized Constructions:**

The Enforcement Cell takes stringent action against unauthorized constructions by issuing Locking & Sealing Notices and Demolition Notices for properties that deviate from the CMDA-approved plans. The Cell also undertakes the Locking & Sealing process and demolition of illegal structures.

The following are the key activities performed by the Enforcement Cell in the previous year.

- **Completion Certificates Issued:** A total of 426 Completion Certificates were issued in the year 2024 for buildings meeting the approved CMDA plans and TNCDBR norms.
- **Locking & Sealing and Demolition Notices:** 55 Locking & Sealing and Demolition Notices were issued in the year 2024 for unauthorized constructions.
- **Locking & Sealing:** 25 buildings were locked and sealed in the year 2024 as part of enforcement actions against non-compliant structures.
- **Demolitions:** 6 buildings were demolished in the year 2024 due to significant deviations from CMDA-approved plans or for unauthorized construction activities.

1.2.5 Road and Rail Unit

1.2.5.1 MRTS Phase II Extension

The extension of the MRTS Phase II, covering a stretch of approximately 5 kilometers from Velachery to St. Thomas Mount, is

currently under implementation at a total cost of Rs. 732.89 crore. The Government of Tamil Nadu has released its full contribution of Rs. 488.62 crore to Southern Railways for the execution of the project. This initiative, undertaken by the Metropolitan Transport Projects (Railways), is nearing completion. The project is expected to be fully operational by 2025, significantly enhancing transportation infrastructure and connectivity in the region.

1.2.5.2 Master Plan for Outer Ring Road Growth Corridor

The Chennai Outer Ring Road (ORR), originally envisioned in the First Master Plan for Chennai, spans a total length of 62.3 km from Vandalur to Minjur. To foster sustainable urban development and minimize Chennai's ecological footprint, as well as to address the city's growing developmental and economic needs, a Detailed Development Plan (Master Plan) is being drafted for the region within a 1 km radius on either side

of the ORR. This plan will outline the proposed land use, regulatory framework, and future road network for the area, facilitating better access to these lands and unlocking their full development potential. The plan aims to promote high-density, high-rise constructions with a minimal ground footprint, land amalgamation and land pooling initiatives, with a primary focus on meeting the future urban development demands of the Chennai Metropolitan Area (CMA).

The Chennai Metropolitan Development Authority (CMDA) owns a 50-meter-wide land strip along the eastern side of the ORR, designated for commercial development. To catalyze development along this corridor, CMDA has allocated portions of this land to key entities, including the Tamil Nadu Industrial Development Corporation (TIDCO), the Fire Department, the Metropolitan Transport Corporation (MTC), the State Industries Promotion Corporation of Tamil Nadu (SIPCOT),

Indian Oil Corporation (IOCL) and the Central Warehousing Corporation (CWC). These land allocations are designed to initiate seed development projects that will drive further growth in the area. Furthermore, CMDA has developed an idle parking facility for Omni buses at Mudichur and is in the process of completing the establishment of four fitness parks at Minjur, Vellanur, Thirunageswaram, and Varadharajapuram to support the overall development and well-being of the region.

1.3 New Initiatives

1.3.1 Chennai Waterfront Development Projects Limited

Chennai's coastline and its vast network of lakes are invaluable natural assets and their potential for sustainable development has been untapped for decades. These waterfronts are ecological treasures and support economic activities like fisheries, tourism and recreation. However, their integration into urban life has

been limited, leaving opportunities for creating vibrant public spaces, underutilized.

To address this, the Government of Tamil Nadu has established the Chennai Waterfront Development Projects Limited, a Special Purpose Vehicle, to drive sustainable shoreline and lakefront revitalization across the city. CWDPL has begun revitalising 13 lakes across Chennai and 4 beach stretches this year to pave the way for transformative urban integration of these blue assets while creating vibrant community spaces that underscore the importance of environmental stewardship at a cost of more than Rs.250 crores.

1.3.2 Shoreline Development

The project 'Integrated Coastal Community Development for Kasimedu, Thiruvotriyur, Injambakkam and Akkarai' has been envisioned as a community development project that would aid in the development of coastal communities, improve access and safety

for beach users and support the livelihood of coastal communities. The design instils minimal interventions that can support revitalization of the coastal commons. The project components include pedestrian and cycling facilities at Injambakkam and Akkarai and pedestrian facilities at Kasimedu and Thiruvotriyur user amenities, and ecologically sensitive landscaping of the project areas. The four projects have been undertaken as pilot initiatives to sensitise local communities, spread awareness, prevent encroachment and degradation of the environment. Additionally, three more beaches—Ennore, Kovalam, and Besant Nagar—are being integrated into the project, with Detailed Project Reports (DPRs) currently under preparation.

1.3.3 Lakefront Development

As part of its commitment to environmental stewardship, CMDA has initiated the Lakefront Development Project to conserve and enhance Chennai's lakes while prioritizing

water quality improvement, sustainable development and minimal concretization.

A total of 12 lakes have been identified for development. At present, work is under progress for Perumbakkam, Velachery, Mudichur, Puzhal, Retteri, Ayanambakkam, Kolathur, and Seekanan lakes. Also, works are to be commenced in Sembakkam, Porur, Perungudi, and Madambakkam lakes.

The project envisions transforming these lakefronts into vibrant public spaces that reflect the local community's character, address stakeholder needs, and respect the ecological integrity of the sites. The design approach emphasizes the use of permeable surfaces, sustainable landscaping, and nature-based urban design, ensuring the preservation of natural contours and lake ecology.

In addition to infrastructure enhancement and stakeholder collaboration, the initiative aims to improve water quality, support groundwater

recharge and serve as an educational space for children to learn about water conservation and ecological balance. With a strong focus on sustainability, the project promotes a “cement-free” approach to development.

1.3.4 Ornamental Fish Market in Kolathur

CMDA is constructing an Ornamental Fish Market in Vada Chennai. Planned in an extent of 3.94 acres of land, the market will facilitate and promote the informal ornamental fish trading sector in Chennai and will benefit a number of vendors and the public, besides improving the livelihood of the people.

1.3.5 Citizen Service Center

CMDA is setting up a Citizen Service Center in Vada Chennai. Being constructed in 0.82 acres, the center will house a Tahsildar Office, a Sub-Registrar Office, an Anchor Store, Co-working Space, and general office spaces.

1.3.6 Mudhalvar Padaippagam

To help students belonging to middle- and low-income groups aim for various competitive examinations, especially for the use of people in North Chennai, a state-of-the-art 'Mudhalvar Padaippagam', a coworking and learning space, was initiated as the first of its kind and was inaugurated by the Hon'ble Tamil Nadu Chief Minister on 04.11.2024, in Vada Chennai. The Mudhalvar Padaippagam provides affordable co-working and e-learning spaces, conference facility with amenities for entrepreneurs and students preparing for various competitive examinations. The air-conditioned Mudhalvar Padaippagam facility has various features such as a spacious reading room, library, cafeteria, plug and play co-working space with free wi-fi facilities, conference and meeting rooms, safe drinking water and toilets. More than 6,000 students and youth from low-income families are

benefitting from the Mudhalvar Padaippagam every month and it has been welcomed by the public.

1.3.7 Wetland Eco Park in Porur

CMDA has developed a sprawling Wetland Eco Park and Playground at Porur, on 16.63 acres of OSR land.

This park has been developed incorporating various components/ facilities like children's play area, entrance gallery, wetland and sponge ponds & water play, Open Air Theatre and community gathering space, play courts, lake plaza, pollinator garden, toilet blocks and kiosks.

This park has been named as "Dr. M.S.Swaminathan Wetland Eco Park", in recognition of the services of Dr. M.S.Swaminathan, who is known as the "Father of India's Green Revolution" and was

inaugurated by the Hon'ble Chief Minister on 07.03.2025.

1.3.8 Development Projects in CMA

In line with the Chennai Metropolitan Development Authority's (CMDA) ongoing efforts to improve urban infrastructure, a comprehensive development initiative has been undertaken for each Legislative Constituency within the Chennai Metropolitan Area (CMA), by taking into account the basic needs of the people. This initiative is being carried out through collaborative consultations with the Members of the Legislative Assembly (MLAs) representing each constituency. For the fiscal year 2024-2025, CMDA has launched several projects under this program, which are detailed below:

(Rs. in crores)

S. No.	Type of Project	No of Projects	Estimate
1	Bus Stands	5	138.99
2	Education Development	2	60.81
3	Social Development	13	317.65
4	Parks	5	42.82
5	Sports Complexes/ Playgrounds	5	49.89
6	Urban Design Projects	3	14.00
7	Market Development	4	70.75
8	Waterfront Development	4	34.15
Total		41	729.06

The Chennai Metropolitan Development Authority (CMDA) remains committed and takes significant steps to foster sustainable urban development and enhance public infrastructure across the Chennai Metropolitan Area. Through implementation of strategic initiatives such as the upcoming mofussil bus terminus at Kuthambakkam, Dr. M.S. Swaminathan Wetland Eco Park in Porur, the digital transformation of

planning approvals and the development of North Chennai through Vada Chennai Valarchi Thittam, CMDA continues to improve urban mobility, streamline governance and enhance the quality of life for citizens.

In the last year, CMDA has prioritized infrastructure expansion, digital integration, and environmental sustainability considering the region's growing urban demands. With a focus on smart initiatives, efficient transportation systems, and citizen-centric services, CMDA is taking initiatives to drive Chennai's growth as a modern and well-connected metropolis. Moving forward, efforts will continue to ensure seamless urban planning, technological advancements, and inclusive development for all.

**"முறைசெய்து காப்பாற்றும் மன்னவன் மக்கட்கு
இறையென்று வைக்கப் படும்" – குறள் 388.**

P.K. SEKARBABU
Minister for Hindu Religious and
Charitable Endowments

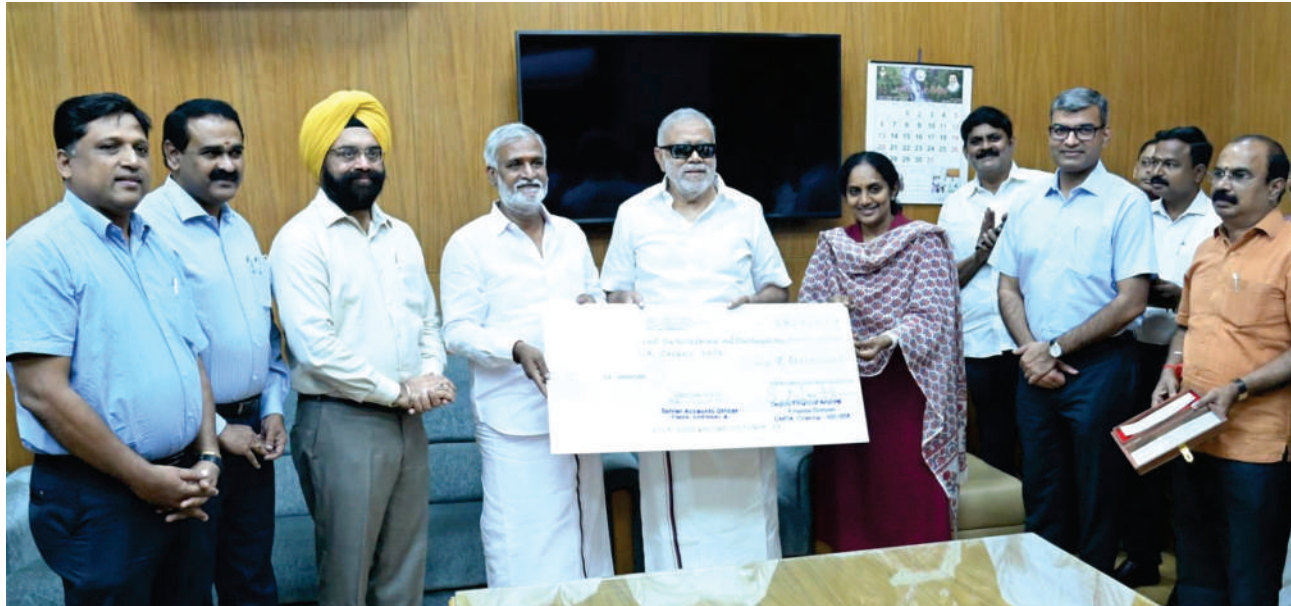

The Hon'ble Chief Minister of Tamil Nadu launched 6 new projects at an estimated cost of Rs.115.58 crores to be implemented by the CMDA, under the Vada Chennai Valarchi Thittam scheme on 26.08.2024.

The Hon'ble Chief Minister of Tamil Nadu, launched the Kolathur Ornamental Fish Trade Centre being developed by CMDA at an estimated cost of Rs.53.50 crores in 3.93 acres under the Vada Chennai Valarchi Thittam scheme and reviewed the model design of the facility on 26.08.2024.

As per the guidance of the Hon'ble Chief Minister of Tamil Nadu, Rs.43.33 crore of CMDA funds were handed over to the Sports Development Authority of Tamil Nadu on 18.09.2024, in the presence of the Hon'ble Deputy Chief Minister and the Hon'ble Minister for HR&CE and Chairman, CMDA.

As per the guidance of the Hon'ble Chief Minister of Tamil Nadu, Rs.66 crore of CMDA funds were handed over to the Department of Rural Development and Panchayat Raj on 07.10.2024, for the improvement of roads in village panchayats within the Chennai Metropolitan region, in the presence of the Hon'ble Minister for Rural Development and Panchayat Raj and the Hon'ble Minister for HR&CE and Chairman, CMDA.

The Hon'ble Chief Minister of Tamil Nadu, launched 6 new projects undertaken by the CMDA at an estimated cost of Rs. 98.21 crore, on 29.10.2024.

The Hon'ble Chief Minister of Tamil Nadu, inaugurated the "Mudhalvar Padaippagam" on 04.11.2024, at Jagannathan Street, Kolathur, jointly developed by the CMDA and the Greater Chennai Corporation, at a total cost of Rs.5 crore under the Vada Chennai Valarchi Thittam Scheme.

The Hon'ble Chief Minister of Tamil Nadu, inaugurated the “Mudhalvar Padaippagam” at Kolathur on 04.11.2024 and interacted with the students.

The Hon'ble Chief Minister of Tamil Nadu, launched 79 projects and inaugurated 29 projects implemented by 5 departments at a total estimated cost of Rs.1,383 crores under the Vada Chennai Valarchi Thittam scheme (which include 15 projects at a cost of Rs.421 crores being implemented by CMDA). The Hon'ble Chief Minister also inspected the models of 2 Housing tenement projects benefiting 1,476 households at a cost of Rs.273.06 crores, being implemented by CMDA.

The Hon'ble Deputy Chief Minister of Tamil Nadu, inspected the proposed sites for the Library Development Project and the Multi-Purpose Centre to be established in Royapettah and Triplicane areas of Chennai, on 21.12.2024.

As per the guidance of the Hon'ble Chief Minister of Tamil Nadu, the Hon'ble Minister for HR&CE and Chairman, CMDA, launched the "Kalaingar Centenary Bus Terminus Mobile App (KCBT Mobile App)" on 21.01.2025.

The Hon'ble Chief Minister of Tamil Nadu, inspected the construction works of the Kolathur Ornamental Fish Trade Centre, being implemented under the Vada Chennai Valarchi Thittam scheme, by the CMDA, at an estimated cost of Rs.53.50 crore at 3.93 acres, on 31.01.2025.

A fund of Rs.84.17 crore from CMDA funds were handed over to the Tamil Nadu Medical Services Corporation for the procurement of medical equipment for the Government Hospital at Periyar Nagar, Kolathur, Chennai, under the Vada Chennai Valarchi Thittam scheme in the presence of the Hon'ble Minister for Health and Family Welfare and the Hon'ble Minister for HR&CE and Chairman, CMDA.

The Hon'ble Chief Minister of Tamil Nadu, inaugurated development works carried out at a total cost of Rs. 39.75 crore undertaken by the CMDA, including the Dr. M.S. Swaminathan Wetland Eco Park in Porur, the modernization works of Koyambedu Wholesale Market Complex and the Sathangadu Iron and Steel Market Complex, and launched 10 new development projects at an estimated cost of Rs.70.70 crore, on 07.03.2025.

The Hon'ble Chief Minister of Tamil Nadu, inspected the ongoing construction works of the Exhibition Centre being developed at an estimated cost of Rs.113 crore at Island Grounds, Chennai, by CMDA, on 07.03.2025.

The Hon'ble Minister for HR&CE and Chairman, CMDA, inspected various development projects being undertaken by the CMDA across the Chennai Metropolitan Area.
