

MUNICIPAL ADMINISTRATION AND WATER SUPPLY DEPARTMENT

POLICY NOTE 2025-2026

Demand No. 34

K.N. NEHRU

Minister for Municipal Administration

GOVERNMENT OF TAMIL NADU
2025

TABLE OF CONTENTS

Sl. No.	Title	Pages
	Vision Statement	1
1.	Preamble	2
	1.1 Departments	9-10
	1.2 Urban Local Bodies	10-12
2.	Directorate of Municipal Administration	13
	2.1 Administration	13-16
	2.2 Functions of Urban Local Bodies	16-20
	2.3 Infrastructure development	20-29
	2.4 Other Infrastructure	29-36
	2.5 Urban Health Infrastructure	36-38
	2.6 Underground Sewerage Scheme and Faecal Sludge Management	38-40
	2.7 Modern Libraries (Library cum Knowledge Centres)	41-43
	2.8 Flagship Schemes	43-47
	2.9 Union Government Schemes	47-57
	2.10 National Urban Livelihood Mission (NULM)	58-59
	2.11 State Schemes	59-63
	2.12 Externally Aided projects	63-65
	2.13 Financial Management	66-74
	2.14 15 th Finance Commission	74-79

Sl. No.	Title		Pages
	2.15	Tamil Nadu Institute of Urban Studies (TNIUS)	79-82
	2.16	State Special Schemes	82-85
	2.17	Town Planning - Single Window Portal and Self Certification Scheme	85-87
	2.18	The Financial position of Corporations and Municipalities	87-89
	2.19	Corporations under the administrative purview of Directorate of Municipal Administration	89-168
3.	Greater Chennai Corporation		169
	3.1	Infrastructure	170-195
	3.2	Health and Sanitation	195-220
	3.3	Revenue	220-226
	3.4	Education	226-233
	3.5	Vada Chennai Valarchi Thittam	233-234
	3.6	Singara Chennai 2.0	234-237
4.	Commissionerate of Town Panchayats		238
	4.1	Administration	239-243
	4.2	Functions of the Town Panchayats	243-253
	4.3	Sanitation	254-261
	4.4	Gasifier Crematoriums	261-262

Sl. No.	Title		Pages
	4.5	Environmental Improvement through Urban Greening	262-266
	4.6	Union Government Schemes	266-272
	4.7	State Government Schemes	272-285
	4.8	e-Governance in Town Panchayats	285-288
	4.9	Financial Management	288-292
5.	Chennai Metropolitan Water Supply and Sewerage Board		293
	5.1	Water Supply Management	296-304
	5.2	Water Supply Schemes	304-314
	5.3	Sewerage Management	314-320
	5.4	Sewerage Schemes	321-326
	5.5	Recycle and Reuse	326-331
	5.6	Capacity Building	331-332
	5.7	Use of Technology	332-336
	5.8	Chennai City Partnership Programme	336-341
	5.9	Monitoring Consumers Grievances	342-343
	5.10	Employees' Welfare	343-348
	5.11	Financial Position	348-351
6.	Tamil Nadu Water Supply and Drainage Board		352
	6.1	Vision of TWAD Board	355-356
	6.2	Functions of TWAD Board	356

Sl. No.	Title		Pages
	6.3	Schemes completed by TWAD Board during 2024-25	357-359
	6.4	Schemes under Implementation	360-366
	6.5	Ongoing Underground Sewerage Schemes	366-369
	6.6	Operation and Maintenance of Combined Water Supply Schemes	370-376
	6.7	Special Scheme	376-377
	6.8	New Combined Water Supply Schemes	378-379
	6.9	Research, Design, Training and Project Management Centre	380-386
	6.10	Material Testing and Quality Control Laboratory	386-387

DEMAND NO.34
MUNICIPAL ADMINISTRATION AND
WATER SUPPLY DEPARTMENT
Policy Note – 2025-2026
VISION STATEMENT

Provide a decent quality of life, clean, green and sustainable environment, quality basic amenities, vibrant public spaces, induce economic growth, generate employment and mitigate poverty through responsive city governance leading to a decent quality of life for all by following a comprehensive, inclusive, integrated, transparent and participatory approach of urban development.

1. PREAMBLE

Urbanization refers to the shift of populations from rural to urban areas, leading to city expansion and an economic transition from agrarian to industrial economies. While this process has occurred for centuries, globalization and industrialization have significantly accelerated urban growth in recent decades. Understanding these trends in urbanization is crucial for sustainable and balanced urban planning.

As a key indicator of development, urbanization is closely linked to economic growth and quality of life.

India, one of the world's largest urban systems, had 37.70 crore (31.14%) urban residents in 2011, surpassing many highly urbanized nations. Urban growth is driven by natural population increase, migration and rural re-classification. However, uneven urbanization leads to socio-economic disparities while highly urbanized areas prosper, whereas less urbanized regions face economic stagnation. Addressing these inequalities is essential for inclusive and sustainable development. Strategic investments

in infrastructure and economic opportunities can ensure balanced urban growth across regions.

Urban Development in India

India, the world's most populous country, had 140 crore people in 2023 and the second-largest urban system globally. In 1901, only 2.6 crore people lived in urban areas. Urbanization in India has been gradually increasing due to the slow re-classification of rural areas. By 2011, the urban population reached 37.70 crore (31.14%), growing significantly from 11% in 1901. The highest growth rate was recorded between 1971–1981, driven by industrialization. Despite economic growth, urban expansion slowed in the 2000s. The number of towns and cities increased from 1,827 in 1901 to 7,935 in 2011.

Urbanization in Tamil Nadu

Tamil Nadu has emerged as India's second-largest economy, propelled by industrialization, trade, and urban growth. In recent years, liberalization, a thriving IT sector, and a technology driven workforce have accelerated economic development, driving

urban expansion. Urbanization serves as a key indicator of economic progress, with expanding cities playing a crucial role in contributing to national GDP.

Over the decades, Tamil Nadu has shown consistent urban growth, with its urban population increasing from 89.90 lakh (26.99%) in 1961 to 3.495 crore (48.45%) in 2011. The number of towns has also increased significantly, from 339 in 1961 to 1,097 in 2011.

This rapid urban expansion brings forth many opportunities and various challenges. While urban areas drive economic growth, they also require significant investment in infrastructure, housing, transportation, and environmental sustainability. As Tamil Nadu continues to urbanize, balanced development policies will be crucial to ensuring sustainable urban growth while maintaining economic momentum.

Key Areas of Infrastructure Development

In the water supply sector, Tamil Nadu faces a growing demand for safe drinking water, with a urban population of approximately 3.8

crore and 93 lakh households. The current urban water demand is 6,400 MLD, whereas the existing supply is 4,400 MLD, resulting in a shortfall of 2,000 MLD. Tamil Nadu addresses this challenge through targeted household water supply connections to the tune of 73.87 lakh, with ongoing implementation of various schemes. The AMRUT 2.0 projects of the State include 24x7 water supply for 5.5 lakh service connections in pilot towns.

Similarly, in the sanitation sector, the used water generation is 3,500 MLD, while the combined capacity of sewage treatment facilities is 2,656 MLD, leaving a significant gap of 844 MLD. Further, 60% of households have sewer and septage connections and the challenge becomes more difficult with city/town expansions underway.

Another key area of infrastructure development is Solid Waste Management. The daily waste generation in the urban local bodies account for close to 14,600 TPD which is taken care of through Integrated waste management with emphasis on segregation, recycling, and waste-to-energy projects.

An emerging area in the realm of infrastructure development over the recent years has been water reuse and sustainability, wherein Tamil Nadu as of now, has a tertiary treatment capacity of 100 MLD of wastewater paving the way for its reuse for industrial purposes, reducing pressure on availability of water for drinking and domestic purposes. This is supplemented with the ongoing efforts in rainwater harvesting and groundwater recharge.

Urban Roads and Mobility are a key factor in economic growth, accessibility and quality of life, etc. Tamil Nadu Government is undertaking several appropriate responses such as roads widening and upgrading to enhance traffic flow and reduce congestion. In the last four years Tamil Nadu Government has undertaken development of 18,900.87 km of roads, apart from modernisation of bus stands and public transport through establishment of integrated bus stands in major towns. 134 bus stands have been taken up for implementation in the last four years.

A key challenge in urban development in the current era has been ensuring a more

sustainable, resilient and livable cities for the future, balancing growth and sustainable environment. Addressing these concerns, Tamil Nadu has been providing a significant thrust on blue-green infrastructure development over the past few years so as to effectively meet the urban challenges such as climate change, water resources management and public health. This process has been essentially integrating a natural system into the urban landscape. Tamil Nadu Government is undertaking creation/revamping of 1,034 parks, rejuvenation of 34 lakes and multiple biodiversity corridors in urban areas. Restoration and conservation of 1,224 water bodies for flood resilience, investment of Rs.28,174.64 crore in sustainable urban initiatives is some of the far-reaching initiatives in this regard.

Tamil Nadu, through well planned and strategic investments in the areas of urban development, with sustained focus on infrastructure upgradation and modernization, is striving to ensure its long-term growth and development, economic and environmental resilience and sustainability, and future proofing.

The department of Municipal Administration and Water Supply with its commitment to pioneering urban planning and infrastructure development, responsibility towards environmental concerns, take pride in its significant contribution to achieving the lofty ideal of inclusive socio-economic growth of the State, as envisioned in the Growth Model.

In the process, the State continues to consolidate its position as a leader in urban development in India.

Human Resources Development

Knowledge centres and Libraries are being built to improve the knowledge and the skills of students studying in schools and colleges in corporations and municipalities, students preparing for competitive exams and all the public.

Recruitment of Engineers and Technical staff

Steps have been taken to fill up 613 Assistant Engineer, 168 Assistant Engineer (Planning), 427 Work Inspector, 205 Overseer, 177 Draughtsman, 24 Junior Engineer,

153 Junior Engineer (Planning), 102 Town Planning Inspector, 257 Technical Assistant, 443 Sanitary Inspector posts totaling 2569 vacant posts in the Municipal Administration, Town Panchayats Administration, Greater Chennai Corporation, Tamil Nadu Water Supply and Drainage Board and Chennai Metropolitan Water Supply and Sewerage Board under the control of Municipal Administration & Water Supply Department and appointments orders are to be issued soon.

1.1 Departments

In Tamil Nadu, the following departments are functioning under Municipal Administration and Water Supply department to implement various schemes in effective manner in the Urban Local Bodies.

1. Directorate of Municipal Administration (DMA)
2. Greater Chennai Corporation (GCC)
3. Commissionerate of Town Panchayats (CTP)
4. Chennai Metropolitan Water Supply and Sewerage Board (CMWSSB)

5. Tamil Nadu Water Supply and Drainage Board (TWAD)
6. Tamil Nadu Urban Infrastructure Financial Services Limited (TNUIFSL)
7. Chennai Rivers Restoration Trust (CRRT)
8. Tamil Nadu Urban Finance and Infrastructure Development Corporation Limited (TUFIDCO)
9. New Tirupur Area Development Corporation Limited (NTADCL)
10. Tamil Nadu Water Investment Company Limited (TWIC)

1.2 Urban Local Bodies

25 Municipal Corporations including Greater Chennai Corporation, 137 Municipalities and 487 Town Panchayats are functioning under the administrative control of the Department of Municipal Administration and Water Supply Department in Tamil Nadu.

During the demand for grant of Municipal Administration and Water Supply Department for the year 2023-24, the Hon'ble Minister for Municipal Administration had announced that

Karaikudi, Tiruvannamalai, Pudukkottai and Namakkal Municipalities will be upgraded as Corporations.

Accordingly, orders have been issued upgrading the said Karaikudi, Tiruvannamalai, Pudukkottai and Namakkal Municipalities as Corporations, vide G.O.(Ms) No.102, 103, 104 and 105, dated 10.08.2024.

District wise details of Urban Local Bodies are given in table 1.1.

Table 1.1

Sl. No.	Districts	Corporations	Municipalities	Town Panchayats	Total
1.	Ariyalur	-	2	2	4
2.	Chennai	1	-	-	1

2. DIRECTORATE OF MUNICIPAL ADMINISTRATION

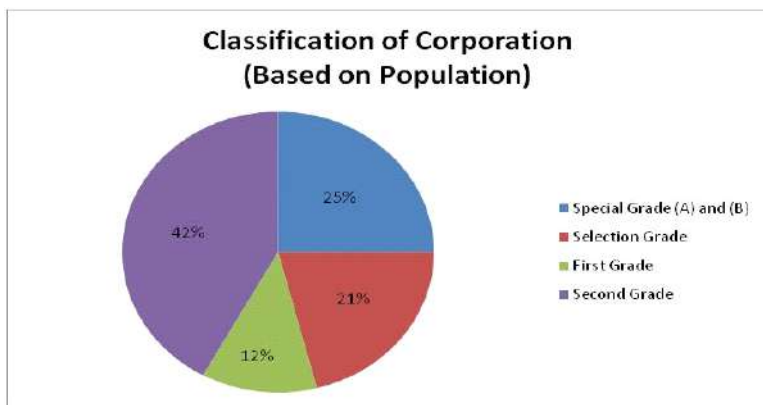

2.1 Administration

24 Municipal Corporations and 137 Municipalities are functioning under the administrative purview of the Directorate of Municipal Administration.

As per rule 3(a) of the Tamil Nadu Urban Local Bodies Rules, 2023, the 24 municipal corporations in the State (except Greater Chennai Corporation) are classified into different grades based on population. The details are as follows:

Table 2.1

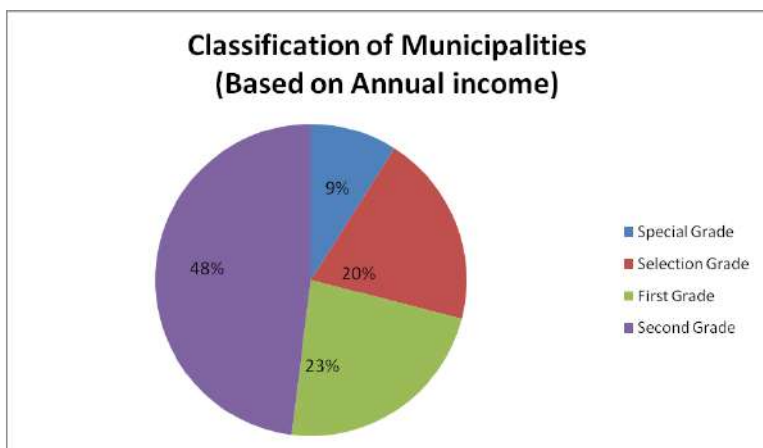

Sl. No.	Classification	Population (in lakh)	No. of Corporations
1	Special Grade (A) and (B)	Above 10.00	6
2	Selection Grade	5.00-10.00	5
3	First Grade	3.00 - 5.00	3
4	Second Grade	Below 3.00	10
Total			24

Similarly, as per rule 3(b) of the Tamil Nadu Urban Local Bodies Rules, 2023, the 137 Municipalities in the State are classified into different grades based on the annual income. The details are as follows:

Table 2.2

Sl. No.	Classification	Annual Income (Rs. in crore)	No. of Municipalities
1	Special Grade	15.00 and Above	13
2	Selection Grade	9.00-15.00	28
3	First Grade	6.00-9.00	31
4	Second Grade	Below 6.00	65
Total			137

2.1.1 Creation and Regularisation of Posts

The Corporations and Municipalities have been classified into different grades, based on population and annual income respectively and new posts have been created as well as sanctioned posts have been rationalized in accordance with the said grades of Corporations and Municipalities, vide G.O.(Ms)No.152, dated 20.10.2022 and G.O.(Ms)No.10, dated 23.01.2023 of Municipal Administration and Water Supply Department.

Necessary action has been taken to fill up the vacancies of these posts meant for direct

recruitment, out of the total posts sanctioned in the said two orders of the Government and the process of recruitment is in final stage.

2.2 Functions of Urban Local Bodies

2.2.1 Expansion of limits of Corporations and Municipalities

Based on various factors, including, urbanization and the recommendations of the respective District Collectors, Government Orders have been issued declaring the intention to merge the adjoining town panchayats and village panchayats with municipal corporations and municipalities, expanding their boundaries.

G.O.(Ms)No.201, Municipal Administration and Water Supply Department, dated 31.12.2024 has been issued declaring the intention to expand the boundaries of 16 municipal corporations viz., Greater Chennai, Coimbatore, Cuddalore, Dindigul, Erode, Karur, Hosur, Madurai, Salem, Tiruchirappalli, Tiruppur, Avadi, Kumbakonam, Thanjavur, Thoothukudi, and Sivakasi. It is proposed to include 4 municipalities, 5 town panchayats and

149 village panchayats with 16 municipal corporations.

G.O.(Ms)No.202, Municipal Administration and Water Supply Department, dated 31.12.2024 has been issued declaring the intention to expand the boundaries of 41 Municipalities, viz. Ariyalur, Pallapatti, Pallipalayam, Rasipuram, Komarapalayam, Krishnagiri, Mayiladuthurai, Perambalur, Ramanathapuram, Keelakkarai, Paramakudi, Udumalaipettai, Dharapuram, Kodaikanal, Mettupalayam, Pollachi, Chidambaram, Panruti, Dharmapuri, Bhavani, Gobichettipalayam, Punjaipuliyampatti, Sivagangai, Kovilpatti, Musiri, Lalgudi, Thuraiyur, Tiruvallur, Ponneri, Tiruttani, Arani, Tiruvathipuram, Vandavasi, Mannargudi, Tiruvarur, Virudhunagar, Aruppukkottai, Rajapalayam, Theni-Allinagaram, Periyakulam and Nagapattinam. It is proposed to merge 1 Town Panchayat and 147 Village Panchayats with 41 Municipalities.

2.2.2 Constitution of New Municipal Corporations

As per the announcement made by the Hon'ble Minister for Municipal Administration during the demand for grant of this department for the year 2023-24, 4 new municipal corporations have been constituted *vide*, G.O.(Ms)Nos.102, 103, 104 and 105, Municipal Administration and Water Supply Department, dated 10.08.2024, respectively, as detailed below:

- (i) Karaikudi municipality has been constituted as municipal corporation by merging with 2 town panchayats and 5 village panchayats;
- (ii) Tiruvannamalai municipality has been constituted as municipal corporation by merging with 18 village panchayats and Adi Annamalai forest area;
- (iii) Pudukkottai municipality has been constituted as municipal corporation by merging with 11 village panchayats and Kaspa forests (west) area; and

- (iv) Namakkal municipality has been constituted as municipal corporation by merging with 12 village panchayats.

2.2.3 Constitution of New Municipalities

The Hon'ble Minister for Municipal Administration made an announcement on the floor of the Legislative Assembly during 2023-24 that the 7 town panchayats namely, Sriperumbudur, Mamallapuram, Perundurai, Avinashi, Kothagiri, Sankagiri and Thiruvaiyaru will be upgraded as municipalities. Now, orders have been issued constituting the 3 town panchayats such as Sriperumbudur, Mamallapuram and Thiruvaiyaru as municipalities *vide* G.O.(Ms)No.15, Municipal Administration and Water Supply Department, dated 05.02.2025.

Further, based on population and three years average annual income, the intention to constitute 13 new municipalities viz., Perundurai, Avinashi, Kothagiri, Sangagiri, Harur, Kavundapadi, Polur, Chengam, Kanniyakumari, Sulur, Mohanur,

Naravarikuppam and Veppampattu through stand-alone upgradation or through merger of adjoining village panchayats/town panchayats, has been declared *vide* G.O.(Ms)No.203, Municipal Administration and Water Supply Department, dated 31.12.2024.

2.3 Infrastructure development

2.3.1 Water Supply

Due to the expansion of corporations and municipalities, increasing households and population, the demand for drinking water supplied to the public is increasing. The policy of the Government is to provide protected drinking water supply to all the people in urban areas and floating population, by increasing the duration of drinking water distribution through integrating drinking water projects which are completed in different timelines and to rejuvenate the water supply schemes, identifying new water sources and to complete new water supply schemes in a timely manner.

The details of drinking water supply in corporations and municipalities are as follows:

Table 2.3

Urban Local Bodies	Litres Per Capita Daily (LPCD)	No. of ULBs
Corporations	Above 135	7
	110-134	7
	70-109	9
	Below 70	1
Municipalities	135 and Above	9
	110-134	18
	70-109	98
	Below 70	12
Total		161

In order to provide 135 LPCD of potable drinking water in municipal corporations and municipalities where underground sewerage scheme is operational and 90 LPCD in other urban local bodies, the following steps have been taken to provide piped water supply connection to every household:

- Under AMRUT 2.0, 42 number of works in 28 municipalities and 14 corporations have been taken up at an estimated cost of Rs.3,087.87 crore. 1 work in Chinnamanur municipality has been

completed and 39 works are in progress. Tenders have been invited for the remaining 2 works in Madurai and Salem corporations.

- Under Kalaingar Nagarpura Mempattu Thittam 2023-24, drinking water projects have been sanctioned to 4 municipalities and 1 corporation at an estimated cost of Rs.216.66 crore and the works are in various stages of progress.
- Under Tamil Nadu Climate Resilient Urban Development Program (TNCRUDP), 24x7 water supply projects have been taken up for implementation in 11 corporations and 1 municipality at an estimated cost of Rs.319.91 crore and works are in various stages of implementation. Further, under this programme, water supply augmentation works have been taken up in Avadi and Kancheepuram corporations at an estimated cost of Rs.391.80 crore and the works are in various stages of implementation.

- Detailed project reports are under preparation for the implementation of water supply augmentation works sanctioned to Karur corporation and Thiruverkadu municipality at a total estimated cost of Rs.223.20 crore under KfW funding.

2.3.2 Rejuvenation of Water Bodies

The details of water bodies located in the corporations and municipalities as per the State level survey are given in the following Table:

Table 2.4

Sl. No.	Urban Local Bodies	No. of Water Bodies
1	Corporations	603
2	Municipalities	1,874
Total		2,477

The projects are executed in such a way that more water can be stored by proper implementation of works such as prevention of waste water polluting the water bodies, reconstruction of channels, desilting of water bodies and recycling of used water.

During the years from 2021-22 to 2024-25, 369 water body improvement works at an estimated cost of Rs.332.42 crore have been taken up under Kalaignar Nagarpura Mempattu Thittam, Namakku Naame Thittam, Capital Grant Fund, 15th Finance Commission Grants and Atal Mission for Rejuvenation and Urban Transformation 2.0. Out of the total 369 works, 259 works have been completed and the remaining 110 works are in various stages of implementation.

2.3.3 Streetlights

A total of 9.50 lakh streetlights are being maintained in 24 corporations (other than Greater Chennai Corporation) and 137 municipalities. Further, additional streetlights are being provided wherever required, to meet the norms of one streetlight for every 30 metres. Considering the LUX value of the lamp, the wattage category, safe transportation, minimum maintenance charges and environmental safety, action has been taken to install Energy efficient LED streetlights in

ULBs to reduce energy consumption charges by 40%.

As announced in the 2021-22 budget, the conversion of 3,31,895 existing streetlights into LED lights at an estimated cost of Rs.374.09 crore and the installation of 77,667 new streetlights at an estimated cost of Rs.118.35 crore are being implemented across 16 corporations and 119 municipalities under SUIDF and 15th Finance Commission Grants (2021-22 & 2022-23).

Additionally, under SUIDF Rs.64.81 crore has been allocated for installing 33,660 new LED streetlights in 6 corporations, while Rs.20.41 crore has been sanctioned for conversion of 17,704 existing streetlights into LED lights in 10 newly upgraded municipalities.

So far, 4,37,067 LED streetlights have been installed and the remaining works are in progress.

2.3.4 Roads

In corporations and municipalities, a total of 32,364 km of roads are being maintained. Funds

have been allocated under various schemes for restoration of roads which are laid before 5 years, on priority basis.

Details of urban roads are given in the following table:

Table 2.5

Sl. No.	Classification of Roads	Total Length (in km)	Percentage
1	Cement Concrete Roads	7043	22
2	BT Roads	20581	64
3	WMM Roads	207	1
4	Earthen roads	2471	7
5	Paver blocks and other roads	2062	6
Total		32364	100

During the financial years from 2021-22 to 2024-25, 65,184 roads with a length of 11,177.23 km have been taken up under Kalaigiar Nagarpura Mempoatu Thittam, Capital Grant Fund, Tamil Nadu Sustainable Urban Development Project and State Finance Commission Grant etc., in which 63,149 number of road works with a length of 10,877.93 km

have been completed and remaining 2,035 number of road works with a length of 299.30 km are in progress.

2.3.5 Flood Mitigation Works

In order to prevent the risk of flooding in Greater Chennai Corporation area and Chennai suburbs and to find a permanent solution to the same, a Flood Management Advisory Committee headed by Dr.V.Thirupukazh, I.A.S., (Retired) was appointed, *vide* G.O.(D)No.362, Municipal Administration and Water Supply Department, dated 22.10.2021. Hon'ble Chief Minister held number of consultation meetings with this committee.

To prevent flood damage in suburban areas of Chennai viz., Tambaram and Avadi corporations and Mangadu, Kundrathur and Tiruverkadu municipalities, sanction was accorded for taking up 30.31 km of stormwater drains in 21 locations at an estimated cost of Rs.82.15 crore, *vide* G.O.No.214, Revenue and Disaster Management Department, dated 17.05.2022. All the sanctioned works have been completed.

Further, as per G.O.No.305, Revenue and Disaster Management Department, dated 21.06.2023, taken up 53 numbers to a length of 69.56 km storm water drains in Tambaram, Avadi and Cuddalore corporations, Mangadu, Kundrathur, Nandivaram-Guduvancheri, Poonamallee, Ponneri and Tiruverkadu municipalities, have been approved for Rs.145.24 crore, out of which 37 works are completed and the remaining works are nearing completion.

In order to prevent floods in Thoothukudi corporation, a detailed project report has been prepared to avoid flooding by constructing storm water drains and the works have been taken up in four phases.

Out of this, the first phase of work has been taken up under the Tamil Nadu Sustainable Urban Development Project for a length of 25.386 km at an estimated cost of Rs.230.90 crore and the second phase and the third phase of works for a length of 56.359 km at an estimated cost of Rs.124.68 crore have

been taken up under smart cities mission and all works have been completed.

Under Infrastructure and Amenities Fund (2022-23), construction of 43.094 km of storm water drains at an estimated cost of Rs.42.55 crore has been sanctioned and works for a length of 42.154 km have been completed and the balance works are nearing completion.

Apart from this, 36.38 km length of stormwater drain work at an estimated cost of Rs.82.98 crore in four packages under Asian Development Bank funding and 3.70 km length of stormwater drain at an estimated cost of Rs.12.00 crore have been sanctioned under State Disaster Mitigation Fund during the year 2023-24 and all works are in progress.

2.4 Other Infrastructure

2.4.1 Modern Bus Stands

A total of 184 bus stands are being maintained in various corporations and municipalities, as given in Table 2.6 below:

Table 2.6

Grade	Number of Bus Stands		
	Corporations	Municipalities	Total
A	21	14	35
B	11	42	53
C	5	63	68
D	6	22	28
Total	43	141	184

The Government has taken necessary steps to modernize all the bus stands in urban areas to provide adequate facilities to the public.

As per the Budget announcement for the year 2021-22, administrative sanction has been accorded to Tiruchirappalli corporation for the construction of an integrated bus terminus with a commercial hub at an estimated cost of Rs.492.55 crore, of which Rs.140.00 crore was earmarked under the Infrastructure and Amenities fund, vide G.O.(D)No.497, Municipal Administration and Water Supply Department, dated 28.12.2021. The works are nearing completion.

Further, as per G.O.(Ms)No.20, Municipal Administration and Water Supply Department,

dated 25.01.2022, administrative sanction has been accorded for taking up bus stand works at a total estimated cost of Rs.266.76 crore, with an allocation of Rs.139.14 crore under Infrastructure and Amenities Fund. The works in Namakkal corporation have been completed and the modern bus stand works in the corporations of Erode, Karur and Tiruvannamalai and in 7 municipalities such as Thiruthani, Tindivanam, Mayiladuthurai, Mannargudi, Ranipet, Sankarankoil and Tirumangalam are in progress.

As per the Budget announcement for the year 2022-23, *vide* G.O.(Ms)No.173, Municipal Administration and Water Supply Department, dated 18.12.2022, administrative sanction has been accorded for the construction of modern bus stand in 2 corporations viz., Tiruppur and Hosur and in 8 municipalities viz., Gudalur (T), Ariyalur, Vadalur, Vedaranyam, Melur, Pattukottai, Colachel and Pollachi and an amount of Rs.57.05 crore has been allocated under the Infrastructure and Amenities Fund, out of a total estimated cost of Rs.115.37 crore. 3 works have

been completed and the remaining works are in progress.

Administrative sanction has been accorded vide G.O.(Ms)No.28, Municipal Administration and Water Supply Department, dated 22.02.2023, for the construction of new modern bus stands in 7 municipalities viz., Mettur, Arcot, Edappadi, Ramanathapuram, Thiruvallur, Chidambaram and Usilampatti. Out of the total estimated cost of Rs.93.40 crore, an amount of Rs.46.70 crore has been earmarked under the Infrastructure and Amenities Fund for construction of these new bus stands. Among these works, Mettur bus stand work has been completed and the remaining works are in progress.

In addition to the above, construction of 18 new bus stands at an estimated cost of Rs.176.27 crore and improvement of 45 number of bus stands at an estimated cost of Rs.146.53 crore have been sanctioned under Kalaignar Nagarpura Mempoattu Thittam, Capital Grant Fund and Operation and Maintenance Deficit Grant Fund during 2022-23 to 2024-25,

out of which 13 works have been completed and the remaining works are in various stages of progress.

2.4.2 Parks

Parks and Playgrounds are being maintained in urban local bodies for the benefit of the public, especially children. There are 8,575 parks and playgrounds in corporations and municipalities as mentioned below:

Table 2.7

Sl. No.	Urban Local Bodies	No. of Parks
1	Corporations	4337
2	Municipalities	4238
Total		8575

During the years from 2021-22 to 2024-25, 466 number of parks have been improved under Kalaigiar Nagarpura Mempoitu Thittam, Namakku Naame Thittam, Capital Grant Fund, 15th Finance Commission Grants and Atal Mission for Rejuvenation and Urban Transformation 2.0 at a total estimated cost of

Rs.182.13 crore and 372 number of works have been completed and 94 works are in progress.

2.4.3 Crematorium

To ensure that all corporations and municipalities have access to modern crematorium facilities, a plan has been initiated to establish atleast one state-of-the-art LPG gasifier crematorium in each corporation and municipality. The following details outline the construction of new LPG gasifier crematoriums and the modernization of existing gasifier crematoriums sanctioned from 2021-22 to 2024-25:

Table 2.8

Work Type	2021-22	2022-23	2023-24	2024-25	Total
New Crematorium	52	21	19	4	96
Modernization of existing Crematorium	-	16	16	3	35
Total	52	37	35	7	131

The Government has decided to gradually convert all conventional gasifier crematoriums

into LPG gasifier crematoriums. As per the budget announcements for the years from 2021-22 to 2024-25, 96 new LPG gasifier crematoriums have been sanctioned at an estimated cost of Rs.150.58 crore and modernization of 35 existing gasifier crematoriums at an estimated cost of Rs.13.59 crore have been sanctioned across various corporations and municipalities under various schemes. Out of the total works sanctioned, 97 works have been completed and the remaining 34 works are in progress.

2.4.4 Markets

The role of markets is essential in selling and buying goods for the daily needs of the public. Markets are a major contributor to the revenue of corporations and municipalities. Improvement and modernization of daily and weekly markets is essential.

As per the Budget Announcements for the years from 2021-22 to 2024-25, 80 number of new markets are being constructed at an estimated cost of Rs.443.87 crore in municipal corporations and municipalities and development

of 39 existing markets at an estimated cost of Rs.159.71 crore has been sanctioned. Out of the total works sanctioned, 41 works have been completed and the remaining works are in progress.

2.5 Urban Health Infrastructure

2.5.1 National Urban Health Mission

The National Urban Health Mission was approved as a sub-mission of the National Health Mission (NHM) during the year 2013. With focus on the urban poor, the mission aims to meet the health needs of the urban population, by providing essential primary health care services at low cost of treatment. It is implemented in State capitals, district headquarters and other cities with a population of 50,000 and above. It is primarily set up to cater to the needs of the marginalized groups, such as slum dwellers, street vendors, homeless people, etc.

Under this mission, during the year 2022-23, construction of new buildings for 43 existing urban primary health centers in

municipalities and corporations at an estimated cost of Rs.51.60 crore and upgradation of 4 health centres in 2 corporations and 1 municipality at an estimated cost of Rs.2.40 crore have been taken up. 15 works have been completed and other works are in progress.

2.5.2 15th Finance Commission Health Grant

The 15th Finance Commission, in order to strengthen the public health infrastructure and service delivery for rural and urban population, provides component specific grants.

With a focus on comprehensive primary health care, 15th Finance Commission has sanctioned grants for diagnostic infrastructure and additional buildings. The following works have been sanctioned for the financial years from 2021-22 to 2024-25, of which 644 works are completed and the remaining works are in various stages of progress.

Table 2.9

Sl. No.	Components	No. of works sanctioned	Estimate amount (Rs. in crore)	Works completed	In progress
1	Wellness Centres	508	127.00	506	2
2	City Public Health Lab	28	5.60	28	-
3	Health Sub Centres and Block Public Health Units	187	58.55	89	98
4	Buildings for Urban Primary Health Centres and Government Hospitals	135	195.30	21	114
Total		858	386.45	644	214

2.6 Underground Sewerage Scheme and Faecal Sludge Management

2.6.1 Municipal Corporations

Out of 24 municipal corporations (except Greater Chennai Corporation), 22 municipal corporations have completed underground sewerage works and put into public use. Underground sewerage work has been taken up

in Hosur corporation at an estimated cost of Rs.582.54 crore and Faecal Sludge Treatment Plant work is in progress in Sivakasi corporation.

The first phase of the UGSS has been completed in 17 municipal corporations viz. Madurai, Coimbatore, Tirunelveli, Salem, Erode, Tiruppur, Thoothukudi, Vellore, Thanjavur, Dindigul, Nagercoil, Avadi, Tambaram, Kancheepuram, Kumbakonam, Karur and Cuddalore. The 2nd and 3rd phase of UGSS work in the said 17 municipal corporations have been taken up and are in progress at various stages.

The Government is committed to extend the facility to the remaining areas in all the cities. To ensure 100% coverage of the entire city where the sewerage scheme is implemented, work has been taken up under AMRUT, Smart Cities Mission and Asian Development Bank funded schemes. These initiatives are aimed at providing sewerage network in the newly added and omitted areas in 10 municipal corporations. The works are in progress at various stages.

2.6.2 Municipalities

Out of the total 137 municipalities, in 37 municipalities underground sewerage facility is available in certain specific parts of the towns.

Underground sewerage work is currently being taken up in Rameswaram, Ambur, Tindivanam and Ponneri municipalities.

Also, underground sewerage scheme is being taken up in the left-out areas of Mettur municipality at an estimated cost of Rs.10.78 crore; in the newly added areas of Villupuram municipality at an estimated cost of Rs.263.00 crore; in Maraimalainagar and Mayiladuthurai municipalities at an estimated cost of Rs.299.86 crore and Rs.83.03 crore, respectively.

Further, underground sewerage scheme is being taken up in Chengalpattu, Mannargudi, Aruppukottai and Palani municipalities at a total estimated cost of Rs.834.50 crore and are in progress.

2.7 Modern Libraries (Library cum Knowledge Centres)

In corporations (except GCC), municipalities and town panchayats, 100 Library cum Knowledge Centres have been sanctioned in three types of designs at an estimated cost of Rs.193.56 crore. These centres help in enhancing the skills of students and job aspirants and cater the needs of the public interested in intellectual pursuits. These centres act as vital gateways to local, national and international information, empowering the public and students with knowledge.

The Hon'ble Chief Minister of Tamilnadu inaugurated 71 number of Library cum Knowledge Centres through video conference as first phase on 05.01.2024. At present, 84 number of Library cum Knowledge Centres are functioning effectively and balance 16 centres are under construction.

These centres are well-equipped with a comprehensive collection of 2,754 books sourced from 244 publishers, as recommended by the Department of Public Libraries and all books are

available in all centres. This curated selection is specifically designed to support the students and aspirants in their preparation for competitive examinations, assisting them in achieving their goals. This includes the books relevant for competitive examinations conducted by the Tamil Nadu Public Service Commission (TNPSC), Tamil Nadu Uniformed Services Recruitment Board (TNUSRB), the Union Public Service Commission (UPSC), the Staff Selection Commission (SSC) and other relevant recruitment agencies.

To handle the books, retired staff acting as mentors and outsourced librarians have been employed in each centre.

All Library cum Knowledge Centres are equipped with computers with internet access and have training rooms with facilities for efficient training of the students. Currently, special online classes for various competitive exams are being conducted by Anna Administrative Staff College on weekends. Further, a committee headed by the respective

District Collector has been formed to monitor the functioning of these centres.

2.8 Flagship Schemes

2.8.1 Kalaigiar Nagarpura Mempattu Thittam

The Kalaigiar Nagarpura Mempattu Thittam is being implemented to improve the infrastructure facilities in municipalities and town panchayats at an estimated cost of Rs.1,000.00 crore allocated for each year from 2021-22 to 2024-25. Under this scheme, works such as water supply, streetlights, laying of roads/streets and lanes, construction of community halls, markets, modern library cum knowledge centres and other essential infrastructure works like construction of bus stands, improvement to existing bus stands, rejuvenation of water bodies, solid waste management activities, construction and improvement of crematoriums, shandies, community halls, parks and play fields are taken up in municipalities and town panchayats.

Under this scheme, during 2021-22 and 2022-23, 986 number of works have been sanctioned at an estimated cost of Rs.1,067.08 crore, out of which 939 works have been completed and the remaining 47 works are nearing completion.

The details of works taken up under KNMT are as below:

Table 2.10

(Rs. in crore)

Sl. No.	Sector	2023-24		2024-25	
		No. of Works	Estimate cost	No. of Works	Estimate cost
1	Library cum Knowledge Centres	10	19.14	-	-
2	Markets – New/Improvements	31	142.33	19	120.55
3	Bus Stand – New/Improvements	21	133.86	17	115.22
4	Parks	46	19.28	48	17.89
5	Water Bodies	27	18.21	32	26.08
6	Crematorium – New/Renovation	16	26.98	4	5.90
7	Roads	122	128.23	128	124.93
8	Water Supply	6	120.91	12	36.47
9	Reading Room	-	-	10	2.52
10	Commercial Complex	1	22.69	33	61.21
11	Others	1	2.10	7	20.82
Total		281	633.73	310	531.59

Out of the 591 works mentioned in the above list, 283 works have been completed and the remaining works are in various stages of progress.

2.8.2 Namakku Naame Thittam (Urban)

In order to improve the self-support mechanism of public and to enhance increased public participation in creating and maintaining community infrastructure, the Government has introduced Namakku Naame Thittam (Urban). In this scheme, 1/3rd of estimate cost is fixed as public contribution and the balance amount will be borne by Government.

Under this scheme, for the benefit of the public and to create assets to urban local bodies, infrastructure works such as renovation of water bodies, formation and improvement of parks and play grounds, installation of traffic islands, fountains, streetlights and CCTV cameras, planting of trees with installation of tree-guards, construction of buildings for schools, colleges, shopping complexes and any other building of public benefit, roads and bridges are taken up.

Further, the public contribution amount for Scheduled Castes and Scheduled Tribes has been fixed as one fifth of the estimate amount so that the people belonging to Scheduled Castes and Scheduled Tribes could be much benefitted under this scheme.

A sum of Rs.150.00 crore for the year 2021-22, Rs.200.00 crore for the year 2022-23, Rs.100.00 crore for the year 2023-24 and Rs.100.00 crore for the year 2024-25 has been allocated for implementing the scheme. The details of works sanctioned in municipalities and corporations from 2021-22 to 2024-25 are given below:

Table 2.11

(Rs. in crore)

Sl. No.	Urban Local Bodies	2021-22		2022-23		2023-24		2024-25	
		No. of Works	Estimate cost	No. of Works	Estimate cost	No. of Works	Estimate cost	No. of Works	Estimate cost
1	Corporations	240	67.06	357	135.68	307	54.28	38	23.38
2	Municipalities	686	81.07	590	73.25	272	44.11	36	6.78
Total		926	148.13	947	208.93	579	98.39	74	30.16

During 2021-22, all the 926 sanctioned works have been completed. During 2022-23, out of 947 sanctioned works, 869 works have been completed and the remaining works are nearing completion. During 2023-24 out of 579 sanctioned works, 443 works have been completed and remaining works are in various stages of progress. During 2024-25, so far 74 works have been sanctioned and all works are in various stages of progress.

2.9 Union Government Schemes

2.9.1 Smart Cities Mission

The Smart Cities Mission was launched by the Government of India in 2015 with the objective of upgrading the sustainable infrastructure, clean and sustainable environment and giving solution for continuous growth and quality life of all citizen in cities. This scheme provides smart solutions for service delivery on sustainable and inclusive growth of cities. An area of city is selected and the works implemented in that area will be a replicable

model and act as a light house project to other cities.

The 11 cities viz., Chennai, Coimbatore, Madurai, Salem, Thanjavur, Vellore, Thoothukudi, Tirunelveli, Tiruppur, Tiruchirappalli and Erode have been selected for implementation of smart cities mission. Water supply improvement works, underground sewerage system works, bus stand improvements, rejuvenation of water bodies, solar streetlights, improvement of parks are taken up for implementation at an estimated cost of Rs.1,000 crore for each city in the ratio of 50:50 by Union Government and State Government. Under this mission, a total of 682 works have been taken up in 10 corporations (except Chennai Corporation) at a cost of Rs.9,656.71 crore, out of which 653 works have been completed at an estimated cost of Rs.8,289.66 crore and other works are in progress at various stages. The project period has been extended upto March 2025.

2.9.2 Atal Mission for Rejuvenation and Urban Transformation (AMRUT)

Atal Mission for Rejuvenation and Urban Transformation (AMRUT) was launched on 25.06.2015. This scheme is implemented with the contribution of the Central Government and State Government. In Tamil Nadu, 28 cities viz., Chennai, Coimbatore, Madurai, Thiruchirappalli, Salem, Tirunelveli, Tiruppur, Thoothukudi, Thanjavur, Dindigul, Erode, Vellore, Nagercoil, Avadi and Hosur corporations and Pallavapuram, Tambaram, Cuddalore, Kancheepuram, Thiruvannamalai, Kumbakonam, Rajapalayam, Pudukkottai, Ambur, Karaikudi, Nagapattinam, Rameswaram municipalities and Velankanni town panchayat have been selected for implementation of AMRUT.

Under AMRUT, 18 water supply projects, 18 underground sewerage schemes and 409 parks have been implemented at an estimated cost of Rs.11,441.42 crore.

Out of 445 projects, 433 projects have been completed and 12 projects are in progress at various stages. The mission period is

extended by Union Government upto December 31, 2025.

Tamil Nadu, which is the pioneer in implementing all schemes, is implementing AMRUT also in an effective manner.

2.9.3 Atal Mission for Rejuvenation and Urban Transformation 2.0 (AMRUT 2.0)

With the consideration of the need for implementing AMRUT in all towns, the Atal Mission for Rejuvenation and Urban Transformation 2.0 was launched on 01.10.2021. In Tamil Nadu 25 corporations (including Greater Chennai Corporation), 137 municipalities and 487 town panchayats are benefitting under AMRUT 2.0. The scheme implementation period is 5 years commencing from October 2021. The important components of AMRUT 2.0 are water supply to all households, underground sewerage scheme and septage management, reuse of the used water through tertiary treatment, rejuvenation of water bodies and green parks development.

Under AMRUT 2.0, the Union Government allocation for Tamil Nadu is Rs.4,942 crore;

Government of Tamil Nadu allocation is Rs.3,713.41 crore and the contribution of Urban Local Bodies is Rs.5,354.83 crore.

A total of 446 projects have been taken up at an estimated cost of Rs.6,655.80 crore so far. This includes 42 water supply projects and combined water supply projects at an estimated cost of Rs.3,087.87 crore; 14 underground sewerage projects at an estimated cost of Rs.3,360.65 crore; 186 projects of water bodies' improvement at an estimated cost of Rs.131.67 crore; 204 green parks at an estimated cost of Rs.75.59 crore.

Out of 446 projects, 315 projects have been completed and the remaining projects are in progress at various stages.

2.9.4 Swachh Bharath Mission (Urban)

The main objective of SBM(U) is to make all the cities garbage free and open defecation free. Under SBM(U), 161 ULBs have been declared as Open Defecation Free (ODF). The Government is committed to make all the cities truly open defecation free by providing universal access to toilets.

Under the Mission, 5,07,143 Individual House Hold Latrines (IHHL), and 22,337 seats of Community toilets and Public Toilets have been constructed so far. Under this mission procurement of vehicles such as battery operated vehicles, light commercial vehicles and tipper lorries for primary collection / solid waste managaemt activities along with works for scientific processing of solid waste, construction of wet and dry waste processing centres such as Micro Composting Centres, Resource Recovery Centres and other infrastructure works have been taken up and completed.

2.9.5 Swachh Bharath Mission 2.0

Swachh Bharat Mission 2.0 was launched on 1st October 2021 with a vision to convert all the cities Garbage Free by 2026. The Mission period is 5 years, i.e. upto October 2026.

The fund sharing pattern under the Swachh Bharat Mission (U) 2.0 is as follows:

Table 2.12

City / Town Population	GOI grant on the project fund	State Contribution	ULB Contribution
More than 10 lakh	25%	16%	59%
1 lakh to 10 lakh	33%	22%	45%
Less than 1 lakh	50%	33%	17%

(a) Sanitation

ULB wise action plan has been prepared for the requirement of sanitation and solid waste management based on the existing and projected population for the year 2026, as per the SBM 2.0 guidelines.

To sustain the Open Defecation Free status in all statutory towns, 8,981 number of Individual House hold Latrines have been sanctioned since 2021-22, of which 8,213 nos. have been completed and the remaining 768 numbers are in various stages of construction.

Community Toilets are constructed for providing sanitation facilities to the house holds without land for the construction of IHHL. Under

SBM 2.0, from 2021-22 to till date 466 numbers of community toilets, 342 numbers of public toilets and 230 numbers of urinals have been sanctioned at an estimated cost of Rs.220.03 crore. The works are in various stages of implementation.

(b) Solid Waste Management

In 24 corporations and 137 municipalities in the State, around 8,000 MT of solid waste is generated daily. Out of this, nearly 54% is wet waste and 46% is dry waste. Scientific management of solid and liquid waste in an environment friendly manner is an important duty of the Urban Local Bodies. The wet waste is scientifically processed through micro composting centres, bio methanation plants, windrow composting and on-site composting centres and converted into manure. Similarly, the dry waste is collected and transported to Resource Recovery Centres (RRC) and the recyclable waste is disposed through the identified vendors for recycling. The non-recyclable and combustible waste is

separated and transported to nearby cement plants, for use it as RDF in co-processing.

Based on the SBM 2.0 guidelines, City Solid Waste Action Plan (CSWAP) has been prepared for all the 161 ULBs and gap has been arrived at for the projected waste generation till the year 2026. The State High Powered Committee of SBM (U) 2.0 has approved the City Solid Waste Action Plan to establish various infrastructure facilities like 154 micro compost centres, 6 bio-methanation plants, 6 bio-CNG plants, 213 manual material recovery facilities, 5 Transfer stations, 3 fully automatic material recovery facilities and 2 waste to energy plants for processing both wet and dry waste.

To prevent the dust and air pollution, road sweeping machines have been procured for 5 corporations viz, Coimbatore, Madurai, Tiruchirappalli, Salem and Thoothukudi and are put to use. During 2023-24, 3 numbers of road sweeping machines have been sanctioned for Avadi and Thoothukudi Corporations. During 2024-25, 2 numbers of road sweeping machines

have been sanctioned for Tambaram corporation.

(c) Bio-mining of Legacy Waste

Reclamation of dump yards filled with legacy waste through bio mining is under progress in various ULBs. The total quantity of legacy waste accumulated in 76 ULBs under the administrative purview of Directorate of Municipal Administration is 43 lakh cu.m.

So far, bio mining works have been completed in 41 ULBs and 9 lakh cu.m of legacy waste have been remediated and 179.22 acres of land has been retrieved. In 39 ULBs, bio-mining works are in various stages.

A part of the retrieved land in various cities will be used for setting up solid waste processing facilities and remaining land will be used for public purposes, which include developing parks and urban green spaces.

(d) Used Water Management

Under SBM 2.0, 17 Sewage Treatment Plants for underground sewerage schemes with capacity of 269.19 MLD at an estimated cost of

Rs.1,094.28 crore, 54 Sewage Treatment Plants/Sewage Treatment cum Faecal Sludge Treatment Plant with interception and diversion structures, with a capacity of 211.16 MLD at a cost of Rs.647.06 crore have been sanctioned and works are in different stage of implementation. To desludge and transport the faecal matter to treatment plants, 115 cesspool tankers have been procured for 95 ULBs at a cost of Rs.49.73 crore and put into use.

(e) Organic Manure – Sezhippu

All the wet waste generated are converted into organic manure in the micro compost centres and on-site compost centres. The manure is scientifically analysed for N.P.K contents and presence of heavy metals as per the specification of Fertilizer Control Order, 1985, to ensure supply of quality manure. The analysed quality manures is being distributed under the common brand name 'Sezhippu' in all the urban local bodies in the State. So far, 1.58 lakh MT of manure has been distributed to farmers and for kitchen gardens.

2.10 National Urban Livelihood Mission (NULM)

Under the National Urban Livelihood Mission, the components of Shelter for Urban Homeless (SUH) and Support to Urban Street Vendors (SUSV) are implemented by the Directorate of Municipal Administration.

2.10.1 Shelter for Urban Homeless (SUH)

It is the policy decision of the Government to provide permanent shelters with all basic infrastructure facilities like water supply, sanitation, safety and security to the street dwellers in the corporations and municipalities. Under this component, with Government of India contribution, 177 shelters have been constructed at an estimated cost of Rs.97.70 crore in 23 corporations and 67 municipalities and all are functional. Further, during 2023-24, 11 new shelters have been sanctioned and all works are under progress.

2.10.2 Support to Urban Street Vendors (SUSV)

Vending carts are provided at free of cost to the street vendors, doing vending activities in

the street sides of corporations and municipalities. Under this component, with Government of India contribution, sanction has been accorded for procurement of 4,577 vending carts at an estimated cost of Rs.35.28 crore and the same have been procured and distributed to the street vendors.

Further, at an estimated cost of Rs.1.45 crore, 10 vending markets have been developed in 10 municipalities during 2023-24 and made functional for the benefit of the street vendors and general public.

2.11 State Schemes

2.11.1 Capital Grant Fund

Based on the recommendation of the Sixth State Finance Commission, from the financial year 2022-23, capital grant fund of Rs.500.00 crore is being allocated to Municipal Corporations (31%), Municipalities (36%) and Town Panchayats (33%) and the allocation is increased by Rs.50.00 crore, annually. This fund is used for taking up capital works in urban local bodies.

Under this fund, Rs.335.00 crore has been allocated for the financial year 2022-2023 and 62 infrastructure works have been sanctioned to municipalities and corporations (except GCC), of which 29 works have been completed and the remaining works are in various stages of progress.

For the financial year 2023-24, a sum of Rs.368.50 crore has been allocated and 61 infrastructure works have been sanctioned and 18 works have been completed and the remaining works are in various stages of progress.

For the financial year 2024-2025, a sum of Rs.186.00 crore has been allocated and 7 water supply infrastructure works have been sanctioned and the works are in progress. Further, a sum of Rs.216.00 crore has been tied up for water supply and UGD works which are in progress under TNCRUDP, AMRUT and KfW.

2.11.2 Operations and Maintenance Deficit Grant Fund

Based on the recommendations of the Sixth State Finance Commission, from the

financial year 2022-23, Operations and Maintenance Deficit Grant Fund of Rs.200.00 crore is being allocated to Municipal Corporations (31%), Municipalities (36%) and Town panchayats (33%) with an annual increase of Rs.20.00 crore. This fund is distributed to urban local bodies for operation and maintenance of basic facilities such as drinking water supply, underground sewers, roads, etc., and payment of outstanding water charges and electricity dues of ULBs.

Under this fund, Rs.134 crore has been allocated for the financial year 2022-23 and Rs.98.03 crore has been paid as outstanding electricity bill of corporations and municipalities and Rs.33.69 crore as outstanding water charges. Further, Rs.2.28 crore has been sanctioned for 20 number of water supply infrastructure works and all works have been completed.

For the Financial year 2023-24, a sum of Rs.147.20 crore has been allocated, out of which Rs.25.15 crore has been paid to the Tamil Nadu Water Supply and Drainage Board (TWAD Board)

towards water charge dues of corporations and municipalities. Rs.48.92 crore has been dovetailed as Government contribution for various drinking water and underground sewerage projects and Rs.1.96 crore was allocated for remitting electricity dues of corporations and municipalities and Rs.0.79 crore for other works. Also 4 number of bus stand development works costing Rs.3.76 crore, 1 number of bridge and road work costing of Rs.1.54 crore, 7 number of underground sewerage project maintenance works costing Rs.19.29 crore and 21 number of drinking water works costing Rs.28.70 crore have been taken up.

For the financial year 2024-25, a sum of Rs.160.80 crore has been allocated and 10 number of bus stand improvement works, 18 number of water supply improvement works, 3 number of market improvement works, 10 number of underground sewerage works and 50 number of slaughter houses and 28 other works totalling 119 works have been sanctioned. Out of this, 18 works are completed and the

balance 101 works are under various stages of progress.

2.12 Externally Aided projects

The Government of Tamil Nadu is implementing various infrastructure projects in urban local bodies through external funding.

2.12.1 German Development Bank (KfW) assisted Sustainable Municipal Infrastructure Financing – Tamil Nadu - III (SMIF-TN-III)

Under the KfW assisted Sustainable Municipal Infrastructure Financing - Tamil Nadu - III (SMIF-TN-III) 14 projects at an estimated cost of Rs.3,522.25 crore have been taken up. All the projects are in progress at various stages. Government is expediting the project implementation and all the projects will be completed at the earliest and put into public use.

2.12.2 World Bank assisted Tamil Nadu Climate Resilient Urban Development Program (TNCRUDP)

In continuation to Tamil Nadu Sustainable Urban Development Project, with the financial assistance of World Bank, the Tamil Nadu

Climate Resilient Urban Development Program (TNCRUDP) has been sanctioned. The total outlay for Tamil Nadu Climate Resilient Urban Development Program is Rs.3,838.65 crore. This project is being implemented from 2024-25 to 2029-30.

Under Tamil Nadu Climate Resilient Urban Development Program, underground sewerage scheme and water supply projects have been taken up in 12 corporations and 9 municipalities. The details of projects are tabulated below:

Table 2.13

Sl. No.	Corporation/ Municipality	Details of the works	Estimated cost (Rs. in crore)
1.	Avadi Corporation	WSIS	59. 92
		UGSS	98. 59
2.	Tambaram Corporation	24x7 Water Supply	20. 29
3	Kancheepuram Corporation	WSIS	331. 88

21.	Thiruvavarur Municipality	UGSS	29.46

2.13 Financial Management

2.13.1 Sixth State Finance Commission

In accordance with the recommendations of the Sixth State Finance Commission, orders have been issued regarding the distribution of 6th State Finance Commission grants to urban local bodies and the implementation of schemes *vide* G.O.(Ms)No.60, Finance Department, dated 28.02.2023. The main features are as follows:

- 10% of the total own tax revenue of the state should be distributed to urban local bodies.
- Funds should be distributed to urban local bodies and rural local bodies in the ratio of 49:51.
- 16% of the urban share should be distributed to the metropolitan city i.e. the Greater Chennai Corporation and the Chennai Metropolitan Water Supply and Sewerage Board.
- The remaining 84% of the urban share should be distributed to other corporations, municipalities and town panchayats.

- Funds should be distributed to the corporations (excluding Greater Chennai Corporation), municipalities and town panchayats in the ratio of 31:36:33
- The Sixth State Finance Commission has approved the distribution of funds to urban local bodies based on the following weightages:

Table 2.14

Sl. No.	Corporations (31%)		Municipalities (36%)	
	Weightage factor	Percentage	Weightage factor	Percentage
(i)	Population as per 2011 Census	65	Population as per 2011 Census	60
(ii)	Area	15	Area	20
(iii)	Slum Population	20	Slum Population	20

2.13.2 Sixth State Finance Commission special grants (2023-24 & 2024-25)

The grants allocated and released to the corporations and municipalities based on the recommendations of the Sixth State Finance Commission are as follows:

Table 2.15

(Rs. in. crore)

Classification	2023-24		2024-25	
	Assigned	Released	Assigned	Released
Corporations				
SFC Devolution Grant	1,676.69	1,676.69	1,755.11	1,755.11

School Improvement Grant – Operations and Maintenance Works	66.00	66.00	72.00	35.43

2.13.3 Office buildings

Construction of new office buildings in 20 newly upgraded municipalities have been sanctioned at an estimated cost of Rs.71.32 crore. Construction work has been completed in 12 municipalities and remaining 8 works are in progress.

2.13.4 Other Development Works under Special Fund (2022-23)

Administrative sanction has been given for 9 works for the construction of overhead water tanks, commercial complexes, community and marriage halls in the municipalities of Ponneri, Kundrathur, Madukkarai, Manamadurai, Pugalur, Kalakkad and Surandai at an estimated cost of Rs.10.46 crore and the works are nearing completion.

2.13.5 Sixth State Finance Commission Special Grant for newly upgraded urban local bodies (2023-24 & 2024-25)

In the newly upgraded municipal corporations of Karur, Kumbakonam and Sivakasi, administrative sanction has been accorded for taking up commercial complexes

and water supply works at an estimated cost of Rs.8.15 crore.

In newly upgraded municipalities, administrative sanction has been accorded for the construction of commercial complexes in 11 municipalities at an estimated cost of Rs.14.58 crore; construction of community halls in 5 municipalities at an estimated cost of Rs.7.04 crore; construction of overhead water tanks in 6 municipalities at an estimated cost of Rs.9.39 crore and storm water drain works in Pallapatti municipality at an estimated cost of Rs.1.46 crore.

For 2024-25, a sum of Rs.60.00 crore has been sanctioned under which implementation of infrastructure development works in 9 newly upgraded municipal corporations of Avadi, Hosur, Nagercoil, Tambaram, Sivakasi, Kancheepuram, Kumbakonam, Cuddalore and Karur have been taken up.

2.13.6 School Infrastructure Improvement Grant

As per the recommendation of the Sixth State Finance Commission, from the financial

year 2022-23 onwards, funds are being allocated for construction of new school buildings, additional class rooms, new toilets, repairing dilapidated school buildings and toilets in order to improve the basic infrastructure of schools in corporations (except GCC), municipalities and town panchayats. Guidelines on Urban School Infrastructure Development Scheme (USIDS) was issued *vide* G.O.(D) No.646, Municipal Administration and Water Supply Department, dated 20.11.2023. School infrastructure, various capital and repair works taken up and and implemented on the basis of above said Guidelines.

2.13.7 Capital Works

During the financial year 2022-23, construction of 72 number of new classrooms and toilets for corporation schools at an estimated cost of Rs.36.00 crore and construction of 79 number of new classrooms and toilets in municipal schools at an estimated cost of Rs.30.43 crore have been approved. Out of 151 number of works, 83 number of works

have been completed and balance 68 number of works are in various stages.

During the financial year 2023-24, construction of 72 number of new classrooms and toilets in corporation schools at an estimated cost of Rs.35.25 crore have been sanctioned. Of these, 31 works have been completed and balance 41 number of works are in various stages. Further, construction of 86 number of new classrooms and toilets in Municipal schools at an estimated cost of Rs.38.94 crore have been sanctioned of which 50 number of works have been completed and balance 36 number of works are in progress.

During the financial year 2024-25, construction of 84 number of new classrooms and toilets in corporation schools at an estimated cost of Rs.37.20 crore have been sanctioned and 116 new classrooms and toilets in municipal schools at an estimated cost of Rs.43.20 crore have been sanctioned. All works are in progress.

2.13.8 Renovation Works

During the financial year 2022-23, renovation of 109 number of class rooms and toilets in corporation schools at an estimated cost of Rs.22.02 crore and renovation works of 133 number of class rooms and toilets in municipal schools at an estimated cost of Rs.18.11 crore have been sanctioned. Out of 242 works sanctioned, 204 works have been completed and balance 38 works are in various stages of progress.

During the financial year 2023-24, renovation of 139 number of classrooms and toilets in corporation schools at an estimated cost of Rs.20.47 crore and 155 number of classrooms and toilets in municipal schools at an estimated cost of Rs.25.40 crore have been sanctioned. Out of 294 number of works, 212 number of works have been completed and balance 82 number of works are in progress.

During the financial year 2024-25, renovation of 117 number of classrooms and toilets in corporation schools at an estimated cost of Rs.18.19 crore and 118 classrooms and

toilets in municipal schools at an estimated cost of Rs.17.66 crore have been sanctioned. All works are in progress.

2.14 15th Finance Commission

The 15th Finance Commission was constituted under Article 280 of the Constitution of India, so as to make recommendations for devolution of central taxes to State Governments and local bodies. The award period of the 15th Finance Commission is from 2020-21 to 2025-26.

Based on population, the 15th Finance Commission has divided ULBs into two categories viz., Million Plus Cities and Non-Million Plus Cities. The Greater Chennai Corporation, Coimbatore, Madurai and Tiruchirappalli Corporations are under the category of Million Plus Cities and other corporations, all municipalities, town panchayats and Cantonment Boards, namely, St.Thomas Mount and Wellington are under the category of Non-Million Plus Cities.

The Union Government is providing tied and untied grants to Non-Million Plus ULBs on the basis of 15th Finance Commission recommendations. For Million Plus Cities, funds for solid waste management and ambient air quality are being provided.

The 15th Finance Commission has recommended grants on the basis of population to Cantonment boards also. The details of funds released for the years from 2022-23 to 2024-25 are furnished below:

Table 2.16

(Rs. in crore)

Type of Grant	2022-23		2023-24		2024-25	
	Allocation	Received	Allocation	Received	Allocation	Received
Million plus cities Ambient Air Quality (GCC, Madurai and Tiruchirappalli)	122.00	122.00	129.00	12.00	137.00	-
Million plus-cities Solid Waste Management (including GCC)	313.00	313.00	331.00	325.20	350.00	-
Non Million plus cities (Tied) (including, DMA, and DTP)	555.00	555.00	586.80	576.26	621.60	291.87

Cantonment Boards)						
Non Million plus cities (Untied basic grants) (including, DMA, DTP and Cantonment Boards)	370.00	370.00	391.20	384.18	414.40	194.58
Total	1360.00	1360.00	1438.00	1297.64	1523.00	486.45

2.14.1 Million Plus Urban Agglomeration Cities

Larger cities will have tendency to grow faster and grants are provided with special emphasis on meeting the challenges of improving the measures of ambient air quality, improving conservation of ground water and efficient solid waste management and sanitation. Fifteenth Finance Commission has recommended only tied grants for million plus cities, which are disbursed on fulfilling certain criteria.

Government of India has appointed the Ministry of Housing and Urban Affairs (MoHUA) and Ministry of Environment Forest and Climate Change as the nodal ministries for recommending the grants for water, sanitation, solid waste management and ambient air

quality. These ministries have fixed service level benchmarks and certain criteria for recommending disbursement of grants to such cities.

Under the solid waste management component, as per MoU, the eligible works like water bodies rejuvenation, waste water treatment, water supply, procurement of vehicles, solid waste management through outsourcing and other works have been taken up at an estimated cost of Rs.126.20 crore during the financial year 2023-24 and funds tied up for 19 works in the financial year 2024-25.

During 2023-24, under Ambient Air Quality Fund, laying of end-to-end roads and 25 number of other works at an estimated cost of Rs.22.56 crore have been sanctioned. For the year 2024-25, 5 works have been taken up at an estimated cost of Rs.18.68 crore.

2.14.2 Non-Million Plus Cities

60% of the basic grants are tied and can be used for the basic services of (a) sanitation and maintenance of open defecation free (ODF) status and (b) supply of drinking water, rain

water harvesting and water recycling. As far as possible, the local bodies shall earmark one half of these tied grants to each of these two critical services. However, if any local body has fully saturated the needs in one category, fund can be utilized for other category.

Balance 40% of the basic grants are untied, which may be used for any component, which are location-specific development like regulation of land use, urban planning, fire services, water supply, public health and sanitation, roads, drains and culverts, improvements of burial grounds, slaughter houses and tanneries regulation, public amenities including streetlighting, parking spaces, bus stops, etc., except for salary or other establishment expenditure.

Under Tied Grant, for financial year 2023-24, water supply, urban forest, procurement of vehicles and solid waste management works through outsourcing have been taken up. A total of 611 works have been taken up at an estimated cost of Rs.216.07 crore.

Under Untied Grant component, for the financial year 2023-24, laying of roads and other works have been taken up. A total of 435 works have been taken up at an estimated cost of Rs.254.58 crore.

Under Tied Grant, for the financial year 2024-25, water supply, procurement of vehicles and solid waste management through outsourcing have been taken up. A total of 103 works have been taken up at an estimated cost of Rs.89.18 crore.

Under Untied Grant for financial year 2024-25, laying of roads and other works have been taken up. A total of 127 works have been taken up at an estimated cost of Rs.177.45 crore.

2.15 Tamil Nadu Institute of Urban Studies (TNIUS)

The Tamil Nadu Institute of Urban Studies (TNIUS), Coimbatore was established in 1981, with a view to achieve greater efficiency in the functioning of the administration of urban local bodies. The following are the objectives of the Institute:

- To create awareness on latest management techniques in various branches of municipal administration.
- To disseminate knowledge on urban issues and urban development through training programmes, seminars, conferences, publications, etc.
- To conduct research studies and consultancy services in urban development, municipal administration and related disciplines.
- To assist in the development of urban infrastructure.

The annual contributions collected from the municipal corporations, municipalities and town panchayats constitute a major source of revenue for the operation of Tamil Nadu Institute of Urban Studies.

2.15.1 In-service and Special Training Programme

During the year 2024, the Institute conducted 5 batches of one month residential 'Foundation Training Programme' for the Junior

Assistants of corporations in order to enhance job role through developing their hard and soft skills.

The Institute conducted three days pre-retirement training program in four batches, tailored for officials nearing retirement, so as to ensure smooth transition and knowledge transfer, while providing guidance on post-retirement opportunities and challenges.

2.15.2 Councillors' Training Programme

The Institute is conducting Training Programme to the councillors of corporations, municipalities and town panchayats on Tamil Nadu Urban Local Bodies Act, 1998 and Rules, 2023 and matters relating to council functions, duties and responsibilities, revenue collections, municipal services, including town planning and human resource development.

2.15.3 Infrastructure Development at Institute

In order to enhance the infrastructure facilities of the institute, it is proposed to construct additional class rooms, seminar halls,

labs etc., at an estimated cost of Rs.35.00 crore through Coimbatore municipal corporation as a deposit work. It is proposed to complete the works in two years time.

2.16 State Special Schemes

2.16.1 Chief Minister's Breakfast Scheme

The Morning Breakfast Scheme was launched by the Hon'ble Chief Minister on 15.09.2022 in Madurai corporation to provide morning breakfast to students from 1st standard to 5th standard. Initially implemented in 15 corporations and 23 municipalities, then this scheme has been extended to the remaining 5 corporations, 115 municipalities and 62 town panchayats on 25.08.2023.

As on date, the scheme is under implementation in 2,256 schools within the jurisdiction of 220 urban local bodies (municipalities, corporations and town panchayats) in which food is served to 2,00,472 students. Rs.118.89 crore has been sanctioned from the financial year 2022-23 to till

date and the activities of the scheme are monitored through a mobile application.

Table 2.17

Total No. of ULBs	Total No. of Common kitchens	G.O.(Ms)No.33, Dated 07.06.2023			
		No. of Schools in Corporations and Municipalities	No. of Schools in Town panchayats	Total No. of Schools	Total No. of Students
220	163	2,039	217	2,256	2,00,472

Due to the successful implementation of the scheme, the attendance of the students in all schools has increased, which in turn resulted in increase in literacy percentage of poor students. The huge success of Hon'ble Chief Minister's breakfast scheme has impressed the neighbouring and other states in the country which led to seek advice from the Government regarding implementation of the prestigious scheme in the respective states.

Under this scheme, by 5.00 a.m. preparation of food begins in common kitchens and completed by 6.30 a.m. The cooked food is filled in covered hot boxes and sent to schools through a safety vehicle. Food vehicle will depart from kitchen by 7.00 a.m. and the hot boxes are

handed over to the school incharge by 8.30 a.m. Food is distributed to students before 9.00 a.m. daily.

2.16.2 Sanitation Workers' Development Scheme

The Sanitation Workers' Development Scheme is a flagship scheme launched by the Hon'ble Chief Minister on 09.12.2022 for the enhanced safety and security of the sanitation workers, for the socio economic development and alternative livelihood of the sanitation workers and their dependents.

The scheme aims to provide skill development training to the workers and their dependents of all the formal and informal workers who are in touch with faecal matters in Urban Local Bodies and also in the private sector and institutions.

An enumeration was conducted in all urban local bodies with the technical support of Urban Management Centre, Ahmedabad and as on date, 95,077 sanitation workers have been enumerated.

The identified core sanitation workers will be given appropriate training and action is being taken for the converge by the eligible schemes available in other departments of the Government.

2.17 Town Planning - Single Window Portal and Self Certification Scheme

In order to address the needs of common public and to ease the process of building plan approval, the Government has introduced online services for submission of building application by simplifying the process for submission of documents related to approval of building plans through online. As soon as the building application file is approved, the demand for payment of fees is generated and sent to applicant directly through SMS and e-mail and the applicant is expected to remit such fee also through online mode only. Since, the building plan approval is an end to end online service without human intervention, there is no need for public to visit the offices of municipality/corporation under any circumstances.

A Common Single Window Portal has been developed for issue of planning permission by Directorate of Town and Country Planning and Chennai Metropolitan Development Authority for the construction of buildings exceeding the powers delegated to the local bodies and subsequently to issue building permits by local bodies through online, has been implemented from 21.08.2023.

As a result of this, service system delays in issuing building permits are avoided and issue of final orders are ensured within the stipulated time.

Further, G.O.(Ms)No.94, Municipal Administration and Water Supply Department, dated 18.07.2024 has provided the way for obtaining building permissions online quickly by the citizens themselves on self-certification basis.

Following this order, a new module integrated in the single window system has been introduced on 19.07.2024 to facilitate sanction of building permissions based on

self-certification, without requirement of completion certificate.

As per this scheme, plot sizes upto 2,500 sq.ft. and built-up area upto 3,500 sq.ft. for construction of residential structures having ground or ground plus one floor are eligible for instant approval. So far, 10,286 buildings in corporations and 4,770 buildings in municipalities, totally 15,056 buildings have been given approval through the online portal upto 18.03.2025.

Application and procedure for obtaining planning permission for residential structures has been simplified. Also, delays in obtaining planning permission are avoided to a large extent.

2.18 The Financial position of Corporations and Municipalities

The abstract of Income and Expenditure of corporations and municipalities, is given in the table 2.18 and 2.19

Table. 2.18**(Rs. in crore)**

2.19 Corporations under the administrative purview of Directorate of Municipal Administration

2.19.1 Madurai Corporation

Madurai Corporation was constituted on 01.05.1971 and the extent of the corporation is 147.99 sq.km. As per 2011 census, the population was 15,73,616 and current population is 20,40,000 approximately. The corporation has 100 wards. For administrative convenience, the corporation area is divided into 5 zones.

Water Supply

The total water requirement of the city is 265 MLD and currently 160 MLD of drinking water is supplied once in every two days to 86 wards and once in every 3 days to the remaining 14 wards.

Underground Sewerage

Out of 100 wards, 72 wards have underground sewerage facility. In 22 wards of the newly added vaigai vadakarai area, 44,974 connections have been provided under smart cities mission. Further, administrative sanction has been accorded at an estimated cost of Rs.471.89 crore for underground sewerage work in left out areas and the works are in progress.

Solid Waste Management

Out of the total 870 MT of solid waste generated daily, 522 MT of wet waste is composted at vellakkal solid waste mangement centre, 38 micro composting centres and Onsite Composting Centres.

Streetlights

Madurai Corporation has a total of 60,729 streetlights. 53,282 of them are LED streetlights. At present 7,447 numbers of other streetlights have been converted as LED lights. Also, 451 new LED streetlights are being installed at high traffic roads.

Roads

The city has a total of 11,149 number of roads for a length of 1,686.80 km. During the last 3 years, 4,680 number of road works at an estimated cost of Rs.427.21 crore were sanctioned under various schemes covering 802.89 km. Out of which, 779.54 km works have been completed and the remaining works are in progress.

At present, 398 damaged roads for a length of 69.72 km have been taken up for restoration at a cost of Rs.44.98 crore and the works will be commenced soon.

Gasifier Crematorium

Construction of 7 new gasifier crematoriums at an estimated cost of

Rs.9.10 crore has been completed and put into public use.

Library cum Knowledge Centre

Library cum Knowledge Centre at Tamukkam Ground at an estimated cost of Rs.2.50 crore has been completed and put into use for the students and public.

Parks

Madurai Corporation has a total of 118 parks, out of which 37 parks have been developed and put into public use. 10 parks are under construction at an estimated cost of Rs.4.93 crore.

Bus Stands

The corporation has 4 operating bus stands, namely, M.G.R. integrated bus stand (class – A) in Mattuthavani area, Omni bus stand in Mattuthavani, Periyar bus stand and Arappalayam bus stand which are in use for city buses.

Bio-Mining

Under Swachh Bharat Mission 2.0 the work of processing 4,86,523 metric tons of

accumulated solid waste at vellakkal landfill site using Bio-Mining method at an estimated cost of Rs.34.95 crore is in progress.

2.19.2 Coimbatore Corporation

Coimbatore Corporation was constituted on 01.05.1981. The present area of the Corporation is 257.04 sq.km. The population as per 2011 census was 16,04,925 and the present population is 22,88,052. There are 100 wards in the Corporation.

Water Supply

In this Corporation, 5 drinking water schemes have been designed to extract 447.75 million litres of water daily from the Siruvani, Aliyar and Bhavani rivers. The city's daily water demand is approximately 308.46 million litres and water supplied per day is 290 million litres. Out of 5,77,553 households, 3,16,394 house service connections have been provided.

Underground Sewerage

There are 4 sewage treatment plants with a total capacity of 200.53 MLD in the corporation. A total of 1,14,074 sewerage

connections have been provided so far out of the total 5,77,553 number of households. Out of the total 100 wards, 38 wards have sewerage facilities. Additionally, underground sewage works are being carried out in 47 wards.

Solid Waste Management

The total solid waste generated in the city daily is 950 to 1100 TPD. Of this, 605 MT is wet waste, and the rest is dry waste. The Corporation has 22 micro compost centres to process wet waste and 19 resource recovery centres to handle dry waste.

Roads

The city has a total of 3,212 km of roads. During 2022-23 and 2023-24, 328.77 km and 335.05 km of road works have been completed. During 2024-25, 1,269 roads with a length of 196.87 km have been taken up at an estimated cost of Rs. 100.95 crore, and 1,200 roads with a length of 182.86 km have been completed and the remaining road works are in progress.

Streetlights

The corporation areas are provided with 1,04,160 streetlights. Additionally, detailed project report has been prepared for the sanction of 5,497 new LED streetlights under the Nirbhaya Scheme, at an estimated cost of Rs.23.00 crore.

Major Works in Progress

➤ Semmozhi Poonga

The details of the works taken up are given in the following table:

Sl. No.	Name of the work	Estimate cost (in crore)	Present stage (work completion %)
1	Semmozhi poonga	97.04	45
2	Convention centre	26.54	76
3	Pipeline to Semmozhi Poonga from Ukkadam STP	8.13	95
4	Surface Car Parking	7.30	50
5	Additional works in Botanical garden	20.14	54
6	Additional works in the Convention Centre	8.10	Work soon to be commenced

➤ **15th Finance Commission Grant (2023-24)**

Under the 15th Finance Commission grant (2023-24), construction of 4 urban health centres at an estimated cost of Rs.6.28 crore have been sanctioned and the works are in progress.

➤ **AMRUT 2.0 works**

Administrative sanction has been accorded for the construction of underground drainage in the left-out areas of Ondiputhur at an estimated cost of Rs.185.00 crore. 35 percent of the work has been completed and the remaining works are in progress.

Administrative sanction has been accorded for the construction of underground drainage in Chinnavedampatti, Saravanampatti and Vellakinaru at an estimated cost of Rs.318.90 crore and the works are in progress.

➤ **Infrastructure and Amenities Fund**

Administrative sanction has been accorded for the reconstruction of Sangapur Pallam at an estimated cost of Rs.49.00 crore under the

Infrastructure and Amenities Fund. 52 percent of the work has been completed and the remaining work is in progress.

➤ **State Finance Commission – School Improvement Grant**

Under the state finance commission grants, administrative sanction has been accorded for taking up additional development works for 8 municipal schools, maintenance and repair works for 19 schools at an estimated cost of Rs.11.55 crore. Out of the sanctioned works, 20 works at an estimated cost of Rs.5.96 crore have been completed and the remaining 7 works are in progress.

➤ **Swachh Bharat Mission 2.0**

For construction of 6 community toilets and 5 public toilets under Swachh Bharath Mission 2.0 administrative sanction has been accorded for a total of 11 works at an estimated cost of Rs.1.95 crore, 7 works have been completed and the remaining works are in progress.

New Projects to be implemented

➤ Bio-Mining

Under Swachh Bharat Mission 2.0, administrative sanction has been accorded for the removal of 7,43,287 metric tons of legacy waste at the Vellalur landfill site at an estimated cost of Rs.58.54 crore through Bio-Mining and the work is in progress.

➤ Bio-CNG

Administrative sanction has been accorded for setting up of 250 TPD capacity Bio-CNG as part of solid waste management under Swachh Bharat Mission 2.0 at an estimated cost of Rs.68.79 crore and the works are in progress.

Work on construction of 3 waste transfer stations at Kaundampalayam, Peelamedu and Ukkadam at an estimated cost of Rs.29.92 crore have been taken up and the works are in progress.

2.19.3 Tiruchirappalli Corporation

Tiruchirappalli corporation was constituted on 01.06.1994 and the extent of the corporation as on date is 167.23 sq.km. The population as

per 2011 census was 9,15,569 and present population is estimated as 10,81,234. The corporation has 65 wards and divided into 5 zones for administrative purposes.

Water Supply

The daily water requirement for the current population is 146 MLD and is being supplied daily.

Underground Sewerage

The city has a sewage treatment plant with a capacity of 58.64 MLD. 55.00 MLD of sewage generated daily is treated in this plant and discharged into Korai river. So far, a total of 69,671 house service connections have been provided out of the total 2.74 lakh households. Underground drainage facility has been provided for 26 wards out of the total 65 wards. Works are being carried out for providing underground drainage network in the remaining wards under AMRUT Phase II, III and IV.

Further, under AMRUT 2.0 underground drainage works are being carried out in the left

out 8 wards (Phase IV) at an estimated cost of Rs.230.61 crore.

Construction of 100 MLD capacity sewage treatment plant using modern SBR Technology in Panjappur at an estimated cost of Rs.233.87 crore is in progress.

Solid Waste Management

Out of the 470 MT of solid waste generated daily, 256 MT of wet waste is composted at 40 composting centers. 5 resource recovery centers are functioning for collection and processing the remaining 214 MT of dry waste.

Streetlights

Under the smart cities mission 8,264 sodium metal halide/CFL lights have been replaced with LED lights at a cost of Rs.23.40 crore and 816 new LED lights have been installed. Further, works are in progress to install 6,264 new LED lights in the left out places with funding under the State Urban Infrastructure Development Fund (SUIDF). All 43,284 streetlights in the corporation have been converted in to energy-saving LED lights.

Roads

The city has 1,352.811 km of roads. Out of these, 1,494 number of roads with a length of 165.10 km damaged due to underground sewerage projects, drinking water improvement works and natural calamities are being restored in 2024-25 at an estimated cost of Rs.95.06 crore. 1,425 number of works have been completed and the remaining 69 works are in progress.

Parks

Under Namakku Naame Thittam 2023-24, beautification of park at Warnes road in ward no.53 was taken up at an estimated cost of Rs.1.00 crore. The work is completed and put into public use.

Bus stands

In Tiruchirappalli Corporation, Central Bus Stand (Class-A) and Chathiram Bus Stand (Class-B) are in use.

In Panjappur, the Integrated Bus Terminus along with Multipurpose Complex as well as Truck Terminus and other infrastructure works

have been taken up at an estimated cost of Rs.492.55 crore are nearing completion. The bus terminal complex will be brought into public use soon.

Construction of Srirangam Bus Stand is being carried out at an estimated cost of Rs.11.10 crore under Capital Grant Fund (2022-23).

Construction of Mary's railway flyover connecting Uraiyur Chathiram bus stand at an estimated cost of Rs.34.10 crore under Infrastructure and Amenities fund (2022-23) is underway.

2.19.4 Tirunelveli Corporation

Tirunelveli Corporation was constituted on 01.06.1994. The population as per 2011 census was 4,74,838 and the present population is estimated as 5,77,546. The corporation consists of 55 wards with an extent of 108.65 sq.km and divided into 4 zones for administrative convenience.

Water Supply

The drinking water supply demand of the city for the current population is 83 MLD.

Underground Sewerage

The corporation has a sewage treatment plant with a treatment capacity of 24.2 MLD in which 12.00 MLD of sewage generated daily is being treated. So far, 27,464 house service connections have been provided out of a total of 1,73,031 households. Out of the total 55 wards, 10 wards have underground drainage facility. Further, underground drainage works are being carried out in all the remaining wards under AMRUT.

Solid Waste Management

Of the total 200 to 222 MT of solid waste generated, 133 MT of wet waste is composted at 47 micro-composting centers and the remaining 89 MT of dry waste is collected and processed at the Ramayanpatti landfill.

Streetlights

The city has a total of 31,214 LED streetlights. Under 15th Finance Commission

grant (2022-23) installation of 1,968 new streetlights have been taken up, of which 1,661 have been installed. The work of installing the remaining 307 new streetlights is in progress.

Roads

The city has a total of 935.66 km of roads. During 2023-24, 511 number of roads with a length of 94.069 km have been taken up at an estimated cost of Rs.42.80 crore and 84.608 km of road works have been completed. The remaining 9.461 km of road works are in progress.

During 2024-25, 386 roads with a length of 82.639 km have been taken up at an estimated cost of Rs.43.90 crore and 40.36 km of road works have been completed and the remaining 42.279 km of road works are in progress.

Crematorium

Modernisation of 2 gasifier crematoriums at a cost of Rs.1.00 crore has been completed and are functional. Work on construction of one more gasifier crematorium at an estimated cost of Rs.2.10 crore is in progress.

Library cum Knowledge Centre

A Library cum Knowledge Centre at an estimated cost of Rs.1.87 crore has been completed and put into use.

Parks

So far, 93 parks have been taken up at a cost of Rs.74.32 crore under various schemes and all the works have been completed and put into use.

Bus Stands

M.G.R. Bus Stand (Class-A) and Periyar Bus Stand (Class-B) are in use.

Market

A daily market has been constructed under the Smart Cities Mission at a cost of Rs.51.56 crore.

2.19.5 Salem Corporation

Salem Corporation was constituted on 01.06.1994 and the extent of the corporation is 91.34 sq.km. The population as per 2011 census was 8,29,267 and the present population is around 10,83,625. There are 60 wards in the

corporation and for administrative convenience, the corporation area is divided into 4 Zones.

Water supply

147.00 MLD of water is drawn from the Cauvery River, the city's drinking water source. The city's total water requirement is 146.28 MLD. Out of total 2,12,261 households, 1,17,963 households have been provided with drinking water connections.

Underground Sewerage

The city has 4 Sewage treatment plants with a treating capacity of 98 MLD. 46 MLD of sewage generated daily is treated and discharged into Thirumanimuthar river. Out of 84,222 households, 13,833 households have been provided with sewage connections. Out of 60 wards, 27 wards have underground sewerage facility. Underground sewerage scheme work has been taken up in 4 packages under AMRUT 2.0 and TNCRUDP at an estimated cost of Rs.557.65 crore and the works are in progress.

Solid Waste Management

Total solid waste generated in the city is 550 TPD, out of which 319 TPD are wet waste and rest are dry waste. There are 29 micro composting centres for processing wet waste and 5 resource recovery centers for processing dry waste.

Roads

The total road length of the city is 1037.17 km. Road works for a length of 163.269 km have been carried out during 2021-22 and 2022-23 and 145.280 km of roads have been improved during 2023-24. During 2024-25, 72.660 km of roads for a length of 92.430 km have been completed. The remaining road works are in progress.

Streetlights

A total number of 43,986 streetlights in the city have been converted to LED lights and are in use.

Major on-going works

- Construction of a new Animal Birth Control Centre in the Chettichavadi area at an

estimated cost of Rs.2.20 crore under 15th Finance Commission Grant (Un-Tied) (2024-25) has been taken up and the work is in progress.

- Construction and maintenance of a Bio CNG plant (PPP mode) at an estimated cost of Rs.50.00 crore is in progress.
- Bio-mining works at an estimated cost of Rs.7.94 crore under Swachh Bharat Mission 2.0 are in progress.
- Improvement of drinking water treatment plant (4 works) of the dedicated water supply scheme has been taken up at an estimated cost of Rs.15.00 crore under the Operation and Maintenance Deficit Fund (2024-25).
- Improvement of the drinking water treatment plant (4 works) of the Nangavalli project has been taken up at an estimated cost of Rs.10.00 crore under the Operations and Maintenance Deficit Fund (2024-25).

New projects

Under AMRUT 2.0, administrative sanction for the project of 24x7 drinking water supply

(PPP mode) has been accorded at an estimated cost of Rs.758.13 crore and is in process.

2.19.6 Erode Corporation

Erode Corporation was constituted on 01.01.2008 and the extent of the corporation is 109.52 sq.km. The population was 4,98,121 as per 2011 census and present population is 6,13,000. There are 60 wards in the corporation and for administrative convenience, the corporation area is divided into 4 Zones.

Water Supply

The requirement of 83.00 MLD of drinking water is being supplied as per the current population. 36 wards have daily water supply and 24 wards are supplied with drinking water every other day.

Underground Sewerage

Underground sewerage works have been completed in all wards and the work of providing household connections has been commenced. Out of the total 30,000 connections to be provided, 27,152 connections have been

provided and the remaining works are in progress.

Solid Waste Management

Out of the total 204 MT of solid waste generated, 64 MT of wet waste is composted at 18 composting centres. The remaining 140 MT of dry waste is collected by the resource recovery centre.

200 saplings have been planted and maintained at the Vairapalayam dumping yard cleared through bio-mining.

Streetlights

A total of 23,881 LED streetlights were in use during the financial year 2021-22. Also, additionally 5,431 new LED streetlights have been installed under the 15th Finance Commission Grant (2022-23).

Roads

Out of the total roads of 841.79 km in the city during 2021-22, 202 roads with a length of 38.43 km were taken up at an estimated cost of Rs.20.00 crore. During 2022-23, 282 roads with a length of 51.53 km were taken up at an

estimated cost of Rs.38.89 crore and during 2023-24, 1,482 roads with a length of 240.16 km were taken up at an estimated cost of Rs.97.28 crore. All the works have been completed.

Crematorium

Two functional gasifier crematoriums are in use.

Library cum Knowledge Centre

A Youth Development Centre has been constructed at an estimated cost of Rs.6.17 crore under the Smart Cities Scheme and is in use.

Bus Stand

A bus stand is currently in use. Construction of a new bus stand at an estimated cost of Rs.63.50 crore in Solar area is nearing completion.

Daily Market

As per the announcement of the Hon'ble Chief Minister, works are in progress to set up daily vegetable shops, grocery and wholesale

market complex in the solar area at an estimated cost of Rs.18.48 crore.

2.19.7 Tiruppur Corporation

Tiruppur Corporation was constituted on 01.01.2008 and the extent of the Corporation is 159.35 sq.km. As per the 2011 census the population was 8,77,778 and the current population is 13,99,700. There are 60 wards in the corporation. For administrative convenience, the Corporation is divided into 4 Zones.

Water Supply

While the daily water requirement for the current population is 189 MLD, at present, 165 MLD is being received and water is being supplied once in 3 to 6 days. The construction of a dyke wall in the middle of the Bhavani river by the Water Resources department is nearing completion.

Underground Sewerage

The first phase of the sewerage project was completed (2008) and 14,656 household connections were provided. In the second phase, out of 62,835 connections planned under AMRUT

(2017-20), 35,633 connections were provided and currently, steps are being taken to provide 16,708 connections under the AMRUT 2.0 project. So far, the work has been completed in 38 wards and partially in 12 wards.

Solid Waste Management

Out of the total 700 MT of solid waste generated, 315 MT of wet waste is converted into manure at 28 composting centres. The remaining 385 MT of dry waste are handled in 5 resource recovery centres. Action is being taken to establish a 200 MT Bio-CNG processing centre.

Streetlights

Out of the total 35,950 streetlights, 4,755 lights have been replaced with LED streetlights under the 15th Finance Commission Grants. Further, out of 8,681 streetlights taken up for replacement, installation of 4,625 LED streetlights have been completed, while installation of the remaining 4,056 new streetlights is in progress.

Roads

Out of the roads with a total length of 1,523.69 km, 4,465 roads with a length of 744.37 km have been taken up during 2022-23 to 2024-25 at an estimated cost of Rs.418.11 crore and the works are nearing completion.

Gasifier Crematorium

A gasifier crematorium at an estimated cost of Rs.1.50 crore has been completed and put into public use. Construction of another gasifier crematorium was taken up at an estimated cost of Rs.1.50 crore and which is nearing completion.

Library cum Knowledge Centre

A library cum knowledge center constructed at a cost of Rs.2.59 crore has been put into public use. Construction of a new library in Aandipalayam S.R.Nagar has been taken up at a cost of Rs.0.22 crore in which 75 percentage of the works are completed and the balance works will be completed soon.

Parks

A science park in Iduvai village under Namakku Naame Thittam has been constructed at an expenditure of Rs.4.06 crore and the maintenance of the parks for 10 years is done by a private charitable organization.

Bus Stands

Two bus stands (Class- A) are currently in use. The construction of another bus stand (Class-B) (on Kovilvazhi) will be completed soon.

Daily Market

Construction of daily market at an estimated cost of Rs.31.88 crore has been completed and is set to be open for public use.

2.19.8 Thoothukudi Corporation

Thoothukudi corporation was constituted on 05.08.2008 and the extent of the corporation is 90.66 sq.km. The population of the corporation as per 2011 census is 3,72,408 and present population is around 4,90,362. The corporation is functioning with a total of 60

wards. For administrative convenience, the corporation has been divided into 4 zones.

Water Supply

For the current population, the daily water requirement is 66.20 MLD. At present water is supplied daily to 38 wards and once in alternative days to 22 wards.

Underground Sewerage

Out of 60 wards in corporation, underground drainage work has been completed in 35 wards. Out of the total 35,000 house service connections, 34,948 connections have been provided. Steps are being taken to provide the remaining connections.

Solid Waste Management

Out of the total 180 MT waste generated, 97 MT of wet waste is composted at 17 micro composting centers. For handling the remaining 83 MT dry waste, 2 resource recovery centres are operational. A new resource recovery centre is being constructed at an estimated cost of Rs.2.55 crore.

The land under legacy waste has been fully reclaimed through bio-mining. 60,000 tree saplings at an estimated cost of Rs.0.30 crore have been planted in this land and are being maintained.

Streetlights

The city has a total of 21,759 streetlights. All streetlights have been converted to LED lights and are in use.

Roads

Out of the total road length of 691.98 km, 253 roads with a length of 45.04 km have been taken up and completed in 2021-22 at an estimated cost of Rs.31.19 crore.

Further, during 2022-23, 583 roads with a length of 109.84 km have been taken up and completed at an estimated cost of Rs.72.33 crore, during 2023-24, 839 roads with a length of 146.14 km have been taken up and completed at an estimated cost of Rs.82.13 crore and during 2024-25, 409 roads with a length of 83.66 km have been taken up

and completed at an estimated cost of Rs.42.85 crore.

Crematorium

The modernisation of gasifier crematorium at an estimated cost of Rs.0.12 crore has been completed and is put in use.

Library cum Knowledge Centre

A Library cum Knowledge Centre has been completed at a cost of Rs.2.09 crore and is in use. Furthur, a new library is being constructed at an estimated cost of Rs.0.45 crore.

Parks

28 number of Parks have been taken up at an estimated cost of Rs.66.60 crore and all the works have been completed.

Bus Stands

Two bus stands (Class- A & B) are in use.

Daily Market

Daily market at an estimated cost of Rs.26.74 crore has been constructed and put into use.

2.19.9 Vellore Corporation

The Vellore Corporation was constituted on 01.08.2008. The present extent of the corporation is 87.915 sq.km. The population of the city as per 2011 census is 5,04,079 and the current population is estimated as 6,57,842. The Vellore Corporation has 60 Wards and for administrative convenience, the corporation is divided into 4 Zones.

Water Supply

The daily water requirement for the current population is 88.70 MLD, of which at present 76.17 MLD is being supplied.

Underground Sewerage

The underground sewerage system in all wards have been completed and the work of providing house service connections has been commenced. Out of the total 68,875 connections to be provided, 67,210 house service connections have been provided.

Solid Waste Management

Out of the total 241 MT of solid waste generated, 128 MT of wet waste is composted in

50 micro composting centers and a resource recovery centre is currently operational to handle the remaining 113 MT of dry waste. Further, 10 new resource recovery centres are under construction.

Streetlights

Out of total 28,816 streetlights, 27,949 streetlights have been converted into LED lights. Also 3,164 new streetlights have been sanctioned for the leftout areas, of which 2,590 street lights have been installed. Also, the work of erecting electric poles for 574 street lights through TANGEDCO is in progress.

Roads

Out of the total roads of a length of 891.91 km, 906 roads with a length of 113.66 km have been taken up at an estimated cost of Rs.60.51 crore during 2023-24 and 92.62 km of work has been completed.

During 2024-25, 880 roads with a length of 111.15 km have been taken up at an estimated cost of Rs.54.85 crore and works are in progress.

Crematorium

A gasifier crematorium at Katpadi at an estimated cost of Rs.1.50 crore has been completed and is in use.

Library cum Knowledge Centre

Library cum Knowledge centre has been constructed at an estimated cost of Rs.2.50 crore.

Major works in progress

Under Nagarpura Salai Mempattu Thittam 2024-25, 92 road works covering a length of 11.85 km are being taken up at an estimated cost of Rs.5.43 crore. Under TURIP 2024-25, 550 road works covering a length of 71.89 km are being taken up at an estimated cost of Rs.32.32 crore. Under State Finance Commission – URDF 2024-25, 233 road works covering a length of 27.44 km have been taken up at an estimated cost of Rs.17.10 crore.

2.19.10 Thanjavur Corporation

Thanjavur corporation was constituted on 19.02.2014 and the extent of the corporation is 36.31 sq.km. The population as per 2011 census

was 2,22,943 and the present population is approximately 2,69,450. There are 51 wards. For administrative convenience the corporation is divided into 4 zones.

Water Supply

The daily water requirement for the current population is 30.50 MLD, and at present 30.50 MLD of water is being supplied daily.

Underground Sewerage

The underground sewerage system has been completed in all wards and the work of providing household connections is being carried out. Out of the total 30,000 connections to be provided, 28,467 connections have been provided.

Solid waste management

Out of 107 MT, wet waste is 64.2 MT and balance is dry waste. The city has 14 micro composting centres for processing wet waste and 5 number of material recovery facility for the disposal of remaining 42.8 MT dry waste. Out of 5 resource recovery centres, 3 centres are completed and 2 are under construction.

Streetlights

A total of 13,986 streetlights have been converted into LED streetlights.

Roads

Out of the total roads of 365.226 km, during 2021-22, 78 roads with a length of 15.867 km were taken up at an estimated cost of Rs.13.24 crore and all road works were completed.

During 2022-23, 261 roads with a length of 47.939 km were taken up at an estimated cost of Rs.27.53 crore and all works were completed.

During 2023-24, 625 roads with a length of 96.33 km were taken up at an estimated cost of Rs.40.48 crore and all road works were completed.

During 2024-25, 228 roads with a length of 35.08 km were taken up at an estimated cost of Rs.16.64 crore and all road works were completed.

During 2024-25, 29 roads with a length of 4.366 km have been taken up at an estimated cost of Rs.1.99 crore under the SFC-URDF.

Crematorium

A gasifier crematorium at an estimated cost of Rs.4.40 crore has been constructed under Smart Cities Mission and put into use.

Library cum Knowledge centres

Construction of a Library cum Knowledge Centre at an estimated cost of Rs.2.61 crore has been currently completed and put into use.

Parks

Development of 26 parks at an estimated cost of Rs.23.09 crore were taken up and all the works have been completed and put into use.

Bus Stands

Two bus stands (Class- A & B) are in use.

Daily Market

A new fish market at an estimated cost of Rs.9.58 crore is being constructed under the Operations and Maintenance Deficit Grant Fund (2024-25).

2.19.11 Dindigul Corporation

Dindigul Corporation was constituted on 19.02.2014 and the extent of the corporation is 14.01 sq.km. The population as per 2011 census is 2,07,225 and present approximate population is 2,49,944. The corporation has 48 wards and for administrative purpose, the corporation is divided into 4 Zones.

Water Supply

The daily water requirement for the current population is 30.64 MLD. At present 23.13 MLD of water is being supplied to 30 wards daily and 18 wards on alternative days. In the first phase, 24x7 water supply project in areas 2 and 10 (ward nos. 2, 3 and 9) is being taken up on a pilot basis at an estimated cost of Rs.9.67 crore and the works will be commenced soon.

Underground Sewerage

Underground drainage works have been fully completed in 13 wards and partially in 13 wards. Out of the 13,996 house service connections to be provided, 13,562 connections have been provided. In the remaining 22 wards,

construction of underground sewerage system has been taken up at an estimated cost of Rs.130.64 crore and work is in progress. Construction of 14.60 MLD capacity sewage treatment plant has been taken up at an estimated cost of Rs.58.59 crore.

Solid Waste Management

Out of the total 92 MT of solid waste generated daily, 46 MT of wet waste is composted in 9 micro-composting centres. The resource recovery centre is operational to collect and process the remaining 46 MT of dry waste. At present, construction of 3 material recovery facilities is in progress.

Out of the 12.23 acres of land that was filled with legacy waste, 10.25 acres of land has been reclaimed through bio-mining. Work is in progress to remove the waste in the remaining 1.98 acres of land.

Streetlights

A total of 6,577 streetlights have been converted to LED streetlights. Additionally, 869 LED streetlights have been installed.

Roads

Out of the total roads of 266.92 km, during 2021-22, 47 roads with a length of 7.47 km were taken up at an estimated cost of Rs.5.00 crore and all works have been completed. During 2022-23, 207 roads with a length of 29.23 km were taken up at an estimated cost of Rs.10.61 crore and all works have been completed. During 2023-24, 32 roads with a length of 7.58 km were taken up at an estimated cost of Rs.3.74 crore and all works have been completed. During 2024-25, 83 roads with a length of 23.60 km were taken up at an estimated cost of Rs.11.58 crore and all works have been completed.

Library cum Knowledge Centre

A Library cum Knowledge Centre has been established at an estimated cost of Rs.2.50 crore and put into use.

Market

A daily vegetable market with 109 shops at an estimated cost of Rs.15.00 crore has been sanctioned and the work is in progress.

2.19.12 Hosur Corporation

The Hosur Corporation was constituted on 28.02.2019 and the extent of the corporation is 72.41 sq.km. According to the 2011 census, the population is 2,45,354 and it is estimated that the current population is about 3,79,720. For administrative purpose, 45 wards of the corporation are divided into 4 Zones.

Water Supply

The daily drinking water requirement for the current population is 34.00 MLD. At present, 31.50 MLD of drinking water is being supplied once in every three days.

Underground Sewerage

Construction of underground sewerage system has been taken up at an estimated cost of Rs.582.54 crore. The project is being executed through the Tamil Nadu Water Supply and Drainage Board and the work is in progress.

Solid Waste Management

Out of the total 135 MT of solid waste generated, 60 MT of wet waste is composted at 11 micro composting centers. 6 recovery centres

are operational for collection and handling of the remaining dry waste. Currently, construction of 2 additional resource recovery centres are in progress.

The land filled with legacy waste has been completely reclaimed through bio-mining and 1,574 saplings have been planted at an estimated cost of Rs.4.53 lakh and maintained in the reclaimed land.

Streetlights

Out of 13,234 streetlights, conversion of 9,806 streetlights with LED lights and installation of 3,000 new streetlights are in progress.

Roads

Out of the total roads of 539.62 km, during 2021-22, 28 roads with a length of 6.05 km were taken up at an estimated cost of Rs.4.75 crore and all works have been completed. During 2022-23, 236 roads with a length of 50.62 km were taken up at an estimated cost of Rs.31.40 crore and all works have been completed. During 2023-24, 79 roads with a length of 6.98 km were taken up at an

estimated cost of Rs.4.56 crore and all works have been completed. During 2024-25, 207 roads with a length of 31.95 km were taken up at an estimated cost of Rs.13.41 crore and all works have been completed.

Crematorium

Construction of new gasifier crematorium at an estimated cost of Rs.1.50 crore has been completed. At present, the work of construction of compound wall at an estimated cost of Rs.0.81 crore is in progress.

Library cum Knowledge centre

A Library cum Knowledge Centre has been constructed at an estimated cost of Rs.2.50 crore and put into use.

Bus Stands

A bus stand (Class -A) is in use. Further, construction of a new bus stand at an estimated cost of Rs.32.95 crore is underway.

Market

Construction of new vegetable market at M.G.R. market has been completed at an

estimated cost of Rs.5.88 crore. Further, a fish market is being constructed at an estimated cost of Rs.3.98 crore in M.G.R. Market.

2.19.13 Nagercoil Corporation

Nagercoil corporation was constituted on 01.03.2019 and the extent of the corporation is 63.15 sq.km. The population as per 2011 census was 2,89,916 and the present population is approximately 4,22,759. There are 52 wards in Nagercoil Corporation. The corporation area is divided into 4 zones for administrative convenience.

Water Supply

The daily water requirement for the current population is 49.88 MLD and at present, 47.00 MLD of water is being supplied to 14 wards daily, once in alternative days to 3 wards, and once to 3 days to 35 wards.

Underground Sewerage

Out of 52 wards, 18 wards are fully covered with underground sewerage system, while 17 are partially covered. Out of a total

15,575 house service connections, so far 8,050 have been provided.

Solid Waste Management

Out of the total 127.92 MT of solid waste generated, 22.44 MT of wet waste is composted at 11 micro-composting centres. 3 resource recovery centres with a capacity of 3 MT are operational for collection and handling the remaining dry waste. Construction of 6 material recovery facilities are under progress.

Reclamation of land filled with legacy waste at an estimated cost of Rs.10.07 crore through bio-mining is in progress.

Streetlights

Out of 20,857 streetlights in the city, 14,259 have been converted to LED lights and 1,046 new LED streetlights have been installed.

Roads

Out of the total roads of 905.49 km, 186 roads with a length of 67.51 km were taken up during 2021-2022 at an estimated cost of Rs.37.14 crore, during 2022-23, 294 roads with a length of 94.974 km were taken up at an

estimated cost of Rs.50.99 crore, during 2023-24, 570 roads with a length of 156.49 km were taken up at an estimated cost of Rs.78.91 crore and during 2024-25, 123 roads with a length of 28.129 km were taken up at an estimated cost of Rs.11.90 crore and all works have been completed.

Crematorium

Two gasifier crematoriums have been modernized at an estimated cost of Rs.0.89 crore and are currently in use.

Library cum Knowledge centre

A Library cum Knowledge Centre has been constructed at an estimated cost of Rs.2.50 crore and in use.

Parks

9 projects have been taken up at an estimated cost of Rs.1.33 crore. All works are completed and put into public use.

Daily Market

The Vadasserri Kanakamoolam market is operating as a daily market.

2.19.14 Avadi Corporation

Avadi Corporation was constituted on 17.06.2019 and the extent of the corporation is 65.00 sq.km. Total Population as per 2011 census was 3,45,996 and the present population is approximately 5,63,343. The corporation is divided into 48 wards for administrative convenience, which are further divided into 4 zones.

Water Supply

The work of providing house service connections to 13,916 leftout households and laying of 137.74 km long distribution pipelines has been taken up at an estimated cost of Rs.59.92 crore under the TNCRUDP and works are in progress.

Underground Sewerage

Providing house service connections and laying of distribution pipes to 17,000 left out areas have been sanctioned at an estimated cost of Rs.98.59 crore as Phase-1 under the TNCRUDP.

Solid Waste Management

The total solid waste generated in the city is upto 180 TPD. Out of which 90 MT is wet waste and rest is dry waste. There are 15 micro composting centre for handling wet waste and one resource recovery centre for processing dry waste. Further, 2 material recovery facilities have been constructed and put into use.

Roads

The city has roads for a total length of 718.68 km. During the years 2021-22 and 2022-23, 70.48 km of road works, during 2023-24, 63 road works with a length of 15.79 km at an estimated cost of Rs.8.84 crore and during 2024-25, 490 road works with a length of 86.71 km at an estimated cost of Rs.48.96 crore have been completed and put into use.

Streetlights

The total number of street lights in the city is 21,538. The work of converting 18,292 electric lights to LED lights has been completed during 2022-23. Further, during

2023-24, installation of 4,445 new LED lights has been taken up and is in progress.

Major ongoing works

- During the year 2024-25, a total of 5 road works with a length of 1.22 km have been taken up under the 15th finance commission grant, out of which 3 road works have been completed and the remaining works are in progress.
- Further, 13 road works with a length of 3.93 km under the Tamil Nadu Urban Roads Infrastructure Project have been taken up.

2.19.15 Tambaram Corporation

Tambaram Corporation was constituted on 03.11.2021 and the extent of the Corporation is 87.64 sq.km. Population as per 2011 census is 7,23,017 and the current population is 11,79,884. The Corporation is divided into 70 wards for administrative convenience, which are divided into 5 zones.

Water supply

The corporation's own water source is Palaru basin, which provides 13.50 MLD of

drinking water; Chennai Metropolitan Water Supply and Sewerage Board (CMWSSB) provides 14.50 MLD of drinking water; Tamil Nadu Water Supply and Drainage Board provides 8.06 MLD of drinking water; local water sources such as open wells provide 8.34 MLD of drinking water; and mini power pumps and water treatment plant provide 24.60 MLD, making a total of 72.00 MLD of drinking water which is supplied at the rate of 73 LPCD. The total water requirement of the city is 159.28 MLD. Out of a total of 2,94,791 households, 1,83,472 households have been provided with house service connections.

Underground Sewerage

Out of the total 70 wards in the corporation, 38 wards have underground sewerage facilities. Underground sewerage work is being carried out in 11 wards. A sewage treatment plant with a capacity of 30 MLD is in operation in West Tambaram area, in which 16 MLD of sewage generated daily is treated and discharged into the Adyar River. In Pallavapuram area, 12 MLD of sewage generated daily is treated at the Perungudi sewage

treatment plant by the Chennai Metropolitan Water Supply and Sewerage Board. 85,650 households have been provided with underground sewerage connections.

Solid Waste Management

The total solid waste generated in the city is 350 to 400 TPD. Of this, 160 TPD is wet waste and the rest is dry waste. There are 32 micro-composting centres for processing wet waste and 5 resource recovery centres for handling dry waste. Further, setting up of a 150 MT capacity compressed biogas (Bio CNG) tank has been taken up at Venkatamangalam landfill.

Streetlights

The city has a total of 46,536 streetlights. Of these, 37,803 non-LED streetlights have been converted to LED lights. With this, all the lights have been converted to LED streetlights.

Roads

The total length of roads in the city is 980 km. During 2021-22, 2022-23 and 2023-24, a total of 247.27 km of roads were taken up. During 2024-25, 81.20 km of roads have been

taken up. During 2025-26, it is proposed to take up road works for a length of 210 km at an estimated cost of Rs.142.00 crore.

Crematorium

A total of 10 gasifier crematoriums are located within the limits of the corporation. In addition, works are in progress to construct two gasifier crematoriums under Kalaingar Nagarpura MEMPATTU Thittam (2024-25) at an estimated cost of Rs.2.94 crore.

Library cum Knowledge Centre

2 Library cum Knowledge Centres constructed at an estimated cost of Rs.4.00 crore are functioning since 2024.

Parks

Corporation is maintaining 206 parks. Under AMRUT 2.0, 8 works have been taken up at an estimated cost of Rs.2.03 crore, 7 works have been completed and 1 work is nearing completion.

Daily Market

3 daily markets are functioning in the corporation. Further, under Kalaingar Nagarpura Mempattu Thittam, one daily market is being constructed at an estimated cost of Rs.0.71 crore.

2.19.16 Kancheepuram Corporation

Kancheepuram Corporation was constituted on 21.10.2021 and the extent of the corporation is 36.14 sq.Km. Population is 2,32,816 as per 2011 census and current population is 2,76,360. The corporation is divided into 51 wards for administrative convenience, which are further divided into 4 zones.

Water Supply

The current daily water requirement of the city is 37.31 MLD, and at present 23 MLD of water is being supplied. Drinking water is supplied daily to 18 wards and alternate days to 33 wards.

Underground Sewerage

The Underground Sewerage work has been implemented in 33 wards out of the total of 51 wards. The sewerage project is being implemented in the remaining 18 wards under the TNCRUDP 2023-24 at an estimated cost of Rs.254.00 crore. Further, under the above project, construction of a modern sewage treatment plant has been taken up at an estimated cost of Rs.68.25 crore. Currently, there are 21,828 sewage connections.

Solid Waste Management

Out of the total 94 MT of solid waste generated, 38.50 MT of wet waste is composted in micro composting centres out of 51 MT. 4 resource recovery centres are currently operational for the collection and handling of the remaining 43 MT of dry waste. Further, construction of 3 more new resource recovery centres is to be commenced soon.

The land filled with legacy waste has been completely reclaimed through bio-mining, and 500 saplings are planted and maintained in the land.

Streetlights

A total of 12,985 streetlights have now been converted to LED streetlights. Additionally, installation of 800 new streetlights is being taken up.

Roads

Out of the total roads of 361.76 km, during 2021-22, 11 road works with a length of 4.89 km were taken up at an estimated cost of Rs.3.37 crore and all works have been completed. During 2022-23, 178 road works with a length of 26.55 km were taken up at an estimated cost of Rs.11.14 crore and all works have been completed. During 2023-24, 42 road works with a length of 10.78 km were taken up at an estimated cost of Rs.4.46 crore and all works have been completed.

Crematorium

There are two functional gasifier crematoriums in the corporation. Further, under Namakku Naame Thittam, construction of a new gasifier crematorium at an estimated cost of Rs.2.07 crore has been taken up and which is nearing completion.

Library cum Knowledge Centre

A Library cum Knowledge Centre at an estimated cost of Rs.2.50 crore has been completed and put into public use.

Bus Stands

Anna Bus Stand (Class-C) in the central part of the city is in use by the public. A project proposal is being prepared to set up a bus stand (Class-A) at an estimated cost of Rs.35.00 crore.

Daily Market

Two markets have been taken up under Kalaingar Nagarpura Mempattu Thittam at an estimated cost of Rs.11.60 crore and completed. One market (Rajaji Market) has been brought to public use. Steps are being taken to bring the other market (Jawaharlal Nehru Market) to public use soon.

Marriage Hall

Construction of Annai Anjugam Wedding Hall, at an estimated cost of Rs.8.77 crore and covering an area of 2431.32 square meters, is in progress.

Storm Water Drain

Reconstruction of the Manjal Neer Canal for a length of 5.88 km at an estimated cost of Rs.40.00 crore under the Infrastructure and Amenities Fund is in progress.

Office Building

Construction of a new office building with an area of 4,642 square meters at an estimated cost of Rs.10.00 crore is in progress.

Water Supply

A water supply project has been sanctioned at an estimated cost of Rs.318.52 crore under TNCRUDP 2023-24 and work is in progress. At present, there are 32,713 house service connections.

2.19.17 Cuddalore Corporation

Cuddalore corporation was constituted on 08.10.2021 and the extent of the corporation is 27.69 sq.km. The population as per 2011 census was 1,73,636 and the present population is approximately 1,98,987. The corporation has 45 wards. For administrative convenience, further divided into 4 Zones.

Water Supply

The current daily drinking water requirement is 24.98 MLD and at present 20.70 MLD of drinking water is being supplied daily.

Underground Sewerage

Underground Sewerage System has been completed in all wards and the work of providing house service connections is being carried out. Out of the total 49,513 households, 14,800 house service connections have been provided.

Solid Waste Management

Out of the total 59.41 MT of solid waste generated, 14.50 MT of wet waste is composted at 3 micro-composting centres. 3 resource recovery centres are operational for collection and handling the remaining dry waste. At present, construction of 8 resource recovery centres with a capacity of 34.91 MT is in progress.

The land filled with legacy waste was completely reclaimed through bio-mining and 250 saplings are planted and maintained.

Streetlights

Out of the total 8,570 streetlights, 8,418 have been converted into LED lights. Further, sanction has been accorded for installation of 1,287 new streetlights.

Roads

The total length of the roads in the city is 351.05 km. 438 roads with a length of 129.15 km have been taken up from 2021-22 to 2024-25 at a cost of Rs.64.35 crore. Out of this, 119.57 km of work has been completed and the remaining works are in progress.

Crematorium

Two gasifier crematoriums have been upgraded at a cost of Rs.1.00 crore and are in use.

Library cum Knowledge Centre

A Library cum Knowledge Centre has been sanctioned at a cost of Rs.1.15 crore and the work has been completed.

Parks

3 works have been taken up at a cost of Rs.2.05 crore, 2 works have been completed and put into use. One work is in progress.

Daily Market

3 daily markets have been sanctioned at a cost of Rs.17.90 crore and work is in progress.

2.19.18 Kumbakonam Corporation

Kumbakonam Corporation was constituted on 24.12.2021 and the extent of the corporation is 14.89 sq.km. The population as per 2011 census was 1,55,482 and the present population is 1,71,013. There are 48 wards in the corporation. For administrative convenience, the corporation is divided into 4 Zones.

Water Supply

20.47 MLD of water is being drawn from the Kollidam River, the main source of drinking water. The total water requirement is 20.58 MLD and the daily supply is 135 LPCD. Out of the total 38,676 households, 17,804 households have been provided with house service connections.

Underground Sewerage

The corporation maintains a sewage treatment plant with a capacity of 17 MLD. 13 MLD of sewage generated daily is treated and

discharged into the irrigation canal. 21,119 sewage connections out of the total 38,676 households have been given. Out of the total 48 wards, 43 wards have sewerage facilities.

Solid Waste Management

The total solid waste generated in the city is 75 TPD, of which 46 TPD is wet waste and the rest is dry waste. Wet waste is composted in 5 micro composting centres. There are 4 resource recovery centres to handle dry waste.

Roads

The city has a total of 185.965 km of roads. During 2021-22 and 2022-23, 55.53 km of road works were taken up. During 2023-24, 15.136 km of road works were taken up. During 2024-25, 17.779 km of roads have been improved.

Streetlights

The total number of LED streetlights in the city is 6,428. Additionally, 223 new LED streetlights were installed during 2023-24.

Major Ongoing works

- Construction of Olaipattinam irrigation canal at an estimated cost of Rs.13.00 crore under the Infrastructure and Amenities Fund (2022-23) is in progress.
- Under Kalaingar Nagarpura Mempattu Thittam (2023-24) construction of a commercial complex at an estimated cost of Rs.22.69 crore in ward no.24, old bus stand (Sambasivam bus stand) is in progress.
- Construction of a commercial complex near Pidarikulam at an estimated cost of Rs.10.70 crore under Capital Grant Fund 2023-24 is in progress.
- Water supply improvement work in Dharasuram area at an estimated cost of Rs.10.94 crore under Operations and Maintenance Deficit Grant Fund, 2024-25 is under implementation.

2.19.19 Karur Corporation

Karur Corporation was constituted on 20.10.2021. The extent of corporation is 53.26 sq.Km. As per 2011 census, the

population of the city was 2,14,412 and the approximate present population is 2,76,985. Corporation has 48 wards and for administrative convenience it has been divided into 4 zones.

Water Supply

The current daily drinking water requirement is 37.39 MLD and at present 28.14 MLD of drinking water is supplied once in every 4 days.

Underground Sewerage

Underground sewerage network has been completed in 31 wards and providing house service connections has been commenced. Out of the total 23,669 connections to be provided, 23,420 connections have been provided.

Solid Waste Management

Out of the total 110 MT of solid waste generated, 62 MT of wet waste is composted at 11 micro-composting centres. 3 recycling centres are operational for collection and handling of the remaining 48 MT of dry waste. Currently, construction of 2 additional recycling centres are in progress.

The land filled with legacy waste has been completely reclaimed through bio-mining and 1,700 saplings were planted at an estimated cost of Rs.7.60 lakh and being maintained.

Streetlights

A total number of 13,252 LED streetlights are maintained in the corporation.

Roads

Out of the total roads of 441.20 km, during 2021-22, road works for a length of 62.51 km have been taken up at an estimated cost of Rs.28.85 crore and all works have been completed. During 2022-23, road works with a length of 34.83 km have been taken up at an estimated cost of Rs.27.75 crore and works have been completed. During 2023-24, roads with a length of 16.87 km have been taken up at an estimated cost of Rs.6.44 crore and all works have been completed.

Crematorium

Work on gasifier crematorium has been completed and made operational.

Library cum Knowledge Centre

A Library cum Knowledge Centre at an estimated cost of Rs.2.50 crore has been completed and put into use.

Parks

4 works are taken up at a cost of Rs.7.04 crore and are in progress.

Bus Stand

One bus stand (Class-A) is operational.

Daily Market

2 daily markets have been sanctioned at a cost of Rs. 8.30 crore.

2.19.20 Sivakasi Corporation

Sivakasi Corporation was constituted on 21.10.2021 and the extent of the corporation is 19.89 sq.km. Population as per 2011 census is 1,26,402 and current population is approximately 2,70,006. There are 48 wards in this corporation which are divided into 4 zones.

Water Supply

The daily drinking water requirement for the current population is 18.99 MLD and at

present 13.73 MLD of drinking water is supplied once in 3 days.

Underground Sewerage

Detailed project report for implementation of underground sewerage project in all wards is under preparation.

Solid Waste Management

Out of the total 52.7 MT of solid waste generated, 29 MT of wet waste is composted in micro-compost centres. One resource recovery centre is operational for collection and handling of the remaining dry waste. Further, construction of 3 resource recovery centres are in progress.

The land filled with legacy waste has been completely reclaimed through bio-mining and 1,500 saplings are planted on the reclaimed land and maintained.

Streetlights

Out of the total 4,876 streetlights, 4,423 streetlights have been converted into LED streetlights. Additionally, sanction has been

accorded for the installation of 638 new streetlights.

Roads

Out of the total roads of 177.753 km, during 2021-22, 38 roads with a length of 4.39 km were taken up at an estimated cost of Rs.3.19 crore and all road works have been completed. During 2022-23, 272 roads with a length of 29.47 km were taken up at an estimated cost of Rs.15.18 crore and all works have been completed. During 2023-24, 49 roads with a length of 7.23 km have been taken up at an estimated cost of Rs.2.84 crore and work is in progress. During 2024-25, 119 roads with a length of 8.33 km have been taken up at an estimated cost of Rs.4.00 crore and works are in progress.

Crematorium

Construction of a gasifier crematorium at an estimated cost of Rs.1.50 crore has been completed and is in use.

Library cum Knowledge Centre

One Library cum Knowledge Centre is under construction at an estimated cost of Rs.2.61 crore.

Parks

4 works have been taken up at an estimated cost of Rs.1.55 crore and are in progress.

Bus Stands

Two bus stands (Class - B and C) are in use.

2.19.21 Karaikudi Corporation

Karaikudi Corporation was constituted on 12.08.2024 and the extent of the corporation is 13.75 sq.km. Population as per 2011 census is 1,06,714 and current population is approximately 1,28,152. There are 36 wards in this corporation.

Water Supply

The daily drinking water requirement is 17.02 MLD and currently 12.03 MLD water is being provided daily.

Underground Sewerage

Underground sewerage network has been completed in all wards and work has been commenced to provide house service connections. A total of 7,250 connections have been provided.

Solid Waste Management

Out of the total 46.70 MT of solid waste generated, 25 MT of wet waste is composted in 5 micro composting centres. 5 resource recovery centres are operational for collection and handling the remaining 21.70 MT of dry waste. Land that was previously filled with legacy waste has been reclaimed through bio-mining and 4,424 saplings are planted in that land and maintained.

Streetlights

Out of the total 4,492 streetlights, 4,290 have been converted to LED streetlights. Moreover, 600 new streetlights have been installed.

Roads

Out of the total roads of 186.161 km, during 2021-22, 110 roads with a length of 14.428 km have been taken up at an estimated cost of Rs.11.17 crore and the work has been completed. During 2022-23, 46 roads with a length of 6.65 km have been taken up at an estimated cost of Rs.5.65 crore and 6.648 km of work has been completed. During 2023-24, 12 roads with a length of 3.46 km were taken up at an estimated cost of Rs.1.71 crore and completed. During 2024-25, 3 roads with a length of 0.51 km were taken up at an estimated cost of Rs.0.20 crore and completed.

Crematorium

One gasifier crematorium has been completed at an estimated cost of Rs.1.45 crore.

Library cum Knowledge Centre

A Library cum Knowledge Centre has been completed at an estimated cost of Rs.1.85 crore and is in use.

Bus Stands

One bus stand (Class - B) is in use and construction of one bus stand (Class - C) at an estimated cost of Rs.3.95 crore is in progress.

Daily Market

A daily market building has been completed at an estimated cost of Rs.6.19 crore.

2.19.22 Namakkal Corporation

Namakkal corporation was constituted on 12.08.2024 and the extent of the corporation is 145.31 sq.km. Population as per 2011 census is 1,70,084 and current population is approximately 2,11,328. There are 39 wards in this corporation.

Water Supply

The daily drinking water requirement is 18.68 MLD and currently, 19 MLD is being supplied daily to 24 wards and once in two days to 15 wards.

Underground Sewerage

Out of the total 39 wards, underground sewerage works have been completed in 18

wards. Providing house service connections has been commenced and currently, 10,129 connections have been provided.

In the remaining 21 wards, the work of implementing the new underground sewerage project with operations and maintenance for 5 years is implemented under TNCRUDP (2023-24) at an estimated cost of Rs.211.23 crore.

Solid Waste Management

Out of the total 54 MT of solid waste generated, 29.70 MT of wet waste is composted in 4 micro-composting centres. 4 resource recovery centres are operational for collection and handling the remaining 24.30 MT of dry waste. Currently, 2 additional resource recovery centres are being constructed.

The work of separating and disposing 1,02,319 cubic meters of old solid waste through bio-mining has been completed at an estimated cost of Rs.7.15 crore.

Streetlights

Out of the total 8,499 streetlights, 6,263 streetlights have been converted to LED

lights. Furthermore, 724 streetlights are to be converted into LED lights. Out of 892 new street lights approved for installation, 537 lights have been installed and the remaining 355 lights are to be installed.

Roads

Out of the total length of roads of 431.42 km, during 2021-22, 208 road works with a length of 47.550 km were taken up at an estimated cost of Rs.27.83 crore and all road works were completed. During 2022-23, 31 road works with a length of 7.17 km were taken up at an estimated cost of Rs.5.31 crore and all works were completed. During 2023-24, 259 road works for a length of 40.92 km were taken up at an estimated cost of Rs.1.74 crore and all works were completed. During 2024-25, 51 road works for a length of 23.20 km were taken up at an estimated cost of Rs.1.39 crore and all works were completed.

Crematorium

Construction of a gasifier crematorium has been taken up at a cost of Rs.1.50 crore and completed.

Library cum Knowledge Centre

Construction of a Library cum Knowledge Centre has been completed at a cost of Rs.2.00 crore and is in use.

Parks

6 works have been taken up at a cost of Rs.3.38 crore and 5 works have been completed and are in use by the public. 1 work is in progress.

Bus Stand

A new bus stand (Class - A) has been sanctioned at a cost of Rs.19.50 crore under the Infrastructure and Amenities Fund (2021-22). The work is completed and put into use.

Daily Market

Construction of a daily market has been completed at a cost of Rs.5.69 crore and is in use.

2.19.23 Tiruvannamalai Corporation

Tiruvannamalai Corporation was constituted on 12.08.2024 and the extent of the corporation is 102.94 sq.km. Population as per 2011 census is 1,45,278 and current population

is approximately 1,59,808. There are 60 wards in this corporation.

Water Supply

Water is being supplied to the nearby wards once in 2 days through 3 drinking water projects at Ulagalapadi, where the main water supply station for the corporation is located. The Annanagar water pumping station – I, II and Somavara Kulam water pumping stations supply water to the nearby wards. The current requirement of water is 22.50 MLD.

Underground Sewerage

Under AMRUT 2.0, underground sewerage project has been taken up in the leftout areas at an estimated cost of Rs.105.82 crore is underway.

Solid Waste Management

Under SBM 2.0, bio-mining of 1,25,784 cubic meter of legacy waste in the Isanyam area has been taken up at an estimated cost of Rs.8.20 crore.

Further, 15 tons of garbage is being segregated, recycled and composted in 11 micro-composting centres.

Streetlights

The work of converting a total of 5,613 streetlights into LED lights at an estimated cost of Rs.9.25 crore under the SUIDF funding (2022-23) has been carried out. All the lights have been converted into LED lights and are currently in use.

Roads

Under the SFC-Urban Road Development Fund and 15th Finance Commission Grant, road works for a length of 21.51 km have been taken up at an estimated cost of Rs.6.67 crore. Works for a length of 18.024 km have been completed and the remaining are in progress.

Crematorium

Construction of a new modern gasifier crematorium on Chengam road at an estimated cost of Rs.1.50 crore was sanctioned under Kalaingar Nagarpura Mempattu Thittam (2021-22) and the work has been completed.

Library cum Knowledge Centre

A new Library cum Knowledge centre has been constructed under Kalaingar Nagarpura Mempoitu Thittam (2021-22) at an estimated cost of Rs.1.99 crore.

Bus Stands

Construction of a new bus stand on Tindivanam Road at an estimated cost of Rs.30.15 crore under the Infrastructure and Amenities Fund (2021-22) is nearing completion. The work will soon be completed and put into use. Further, additional works to the new bus stand complex at an estimated cost of Rs.14.75 crore under Kalaingar Nagarpura Mempoitu Thittam (2024-25) is in progress.

Market

Construction of new vegetable and flower market in Gandhinagar area at an estimated cost of Rs.32.16 crore under Kalaingar Nagarpura Mempoitu Thittam (2022-23) has been taken up and 85% of the work has been completed. The remaining work will be completed soon and put into use.

Important work in progress

Laying of new drinking water pipelines at an estimated cost of Rs.55.49 crore under Kalaignar Nagarpura Mempattu Thittam (2023-24), has been taken up and completed from Ulakalapadi to Radhapuram and the remaining works are in progress.

2.19.24 Pudukkottai Corporation

Pudukkottai Corporation was constituted on 12.08.2024 and the extent of the corporation is 21.95 sq.km. Population as per 2011 census is 1,43,748 and current population is 1,71,500. The corporation has 42 wards.

Water Supply

The daily drinking water requirement is 23.00 MLD, of which 14.00 MLD is currently being supplied to 37 wards once in 5 days and in 5 wards daily.

Underground Sewerage

Underground sewerage project work has been completed in 37 wards. The work of providing house service connections has been

commenced and 10,836 connections have been provided.

Under AMRUT 2.0, underground sewerage project has been sanctioned at an estimated cost of Rs.101.34 crore for left-out areas of 5 wards and the works are in progress.

Solid Waste Management

Out of the total 70 MT of solid waste generated, 42 MT of wet waste is composted in 18 micro composting centres. 5 resource recovery centres are operational for collection and handling the remaining 28 MT of dry waste. Currently, construction of 2 additional resource recovery centres is underway.

The land filled with legacy waste has been completely reclaimed through bio-mining and 1,000 saplings have been planted at the site and maintained.

Streetlights

All the total 8,663 streetlights in the city have been converted into LED lights.

Roads

Out of total road length of 283.822 km, during 2021-22, 42 roads with a length of 4.887 km were taken up at an estimated cost of Rs.3.05 crore and all the works have been completed.

During 2022-23, 141 roads with a length of 22.26 km were taken up at an estimated cost of Rs.7.47 crore and all the works were completed.

Crematorium

A gasifier crematorium has been constructed in Bose Nagar area of ward no.31, and is currently in use. Further, construction of a gasifier crematorium in Chengai Thoppu area in ward no.41, at an estimated cost of Rs.1.41 crore under Kalaingar Nagarpura Mempattu Thittam (2022-23) is in progress.

Library cum Knowledge Centre

Library cum Knowledge Centre at an estimated cost of Rs.1.94 crore taken up under Kalaingar Nagarpura Mempattu Thittam

(2022-23) has been completed and put into use.

Parks

Two works taken up at an estimated cost of Rs.0.80 crore under Kalaingar Nagarpura Mempattu Thittam (2022-23) and both the works have been completed.

Bus Stand

Construction of a new bus stand (Type A) at an estimated cost of Rs.18.90 crore under Kalaingar Nagarpura Mempattu Thittam (2023-24) is in progress.

Markets

A daily market with 160 shops sanctioned at an estimated cost of Rs.6.42 crore under Kalaingar Nagarpura Mempattu Thittam (2022-23) has been completed.

3. Greater Chennai Corporation

As the second oldest Municipal Corporation in the world, the Greater Chennai Corporation has a history of 337 years. The Chennai Corporation through vibrant growth during various periods of time has developed into an modern and highly developed urban local government in India.

Chennai is a pioneer city with a blend of classical heritage and modern innovations. Chennai is a leader in most of the key advancement areas such as education, health, sanitation, technology, manufacturing etc., and is a growth icon of the country.

The population of Chennai metropolitan city which spreads over an area of 426 sq.km is 66.72 lakh as per the 2011 census. The current population is estimated to be around 91 lakh.

The Greater Chennai Corporation, rich in diverse specialties, is divided into 200 divisions for administrative purposes and is managed under 15 zones.

Some important/basic details of the Greater Chennai Corporation are as follows:

Table 3.1

Area	Population	House holds	Zones	Wards/ Divisions	Sanctioned staff
426 sq.km	66.72 lakh (as per 2011 Census) 91 lakh* (2024)	13,45,804	15	200	18,435
Roads	Bridges	Storm water Drains	Street lights	Schools	Parks
5,688 km	291	3,041 km	3.01 lakh	417	908
Play-fields & Children Play ground	UPHC/ HWC	UHC/ Maternity centers	ICDS/ Balwadis/ Anganwadis	Community toilets	Crematorium / Burial grounds
542	140/140	16/3	1,806	1,379	201
*Estimated figure					

3.1 Infrastructure

3.1.1 Roads

(i) Bus Route Roads and Interior Roads

Greater Chennai Corporation maintains 35,128 no. of roads with a length of 5,688.57 km, which includes 488 bus route roads with a length of 418.57 km and

34,640 interior roads with a length of 5,270 km.

The maintenance of bus route roads and interior roads is taken up with the capital funds of the Greater Chennai Corporation and the grants provided under Tamil Nadu Urban Road Infrastructure Programme (TURIP), Singara Chennai 2.0, Nagarpura Salai Mempoattu Thittam (NSMT) and State Finance Commission (SFC) grants.

During the financial year 2023-24, 6,517 number of bus route roads and interior roads to a length of 1,100.03 km have been taken up at an estimated cost of Rs.707.21 crore under Singara Chennai 2.0, TURIP, NSMT and SFC grants. Out of these, 6,072 number of road works are completed and the balance works are under progress.

During the financial year 2024-25, 3,276 number of bus route roads and interior roads to a length of 580.62 km have been taken up at an estimated cost of Rs.408.86 crore under various schemes. Out of these,

2,715 roads are completed and the balance works are under progress.

(ii) Bus Shelters and Bus Terminus

Greater Chennai Corporation maintains 1,558 bus shelters, built under various schemes, including 637 bus shelters set up under a Build, Operate, Transfer (BOT) model. During the financial year 2024-25, 765 no. of bus shelters will be improved and potential advertisement space will be created through Public Private Partnership (PPP) mode on Rehabilitate, Operate, Transfer (ROT) basis for a period of 8 years. Further, the bus bays at Ekkattuthangal, Guindy Race Course, West Saidapet and bus terminus at Manali, IOCL, Saligramam, Toll Gate and Kolathur Kumaran Nagar will be renovated under Member of Parliament Local Area Development Scheme and Greater Chennai Corporation capital funds.

3.1.2 Bridges

Greater Chennai Corporation is maintaining 14 flyovers, 13 railway over bridges, 18 vehicular subways, 5 pedestrian subways, 5 foot over bridges, 1 sky walk and 235 minor

bridges. The details of major ongoing 14 projects taken up at a total estimated cost of Rs.647.82 crore, under Infrastructure and Amenities (I & A) fund, Capital Grant Fund (CGF), GCC Capital fund, CRRT fund and Railway Deposit fund are given in table 3.2.

Table 3.2

Sl. No.	Name of the work	Source of fund	Estimated cost (Rs. in crore)
1.	Construction of flyover over the existing subway at Ganesapuram in Div - 45 & 71, Zone - 4 & 6	I & A Fund and GCC Capital fund	226.55
2.	Construction of flyover along South Usman road and CIT Nagar 1st main road in Div - 136 & 141, Zone - 10.	I & A Fund and GCC Capital fund	164.92
3.	Construction of ROB in lieu of existing LC No. 2B at Manali road in Div - 41, Zone - 4	I & A Fund	96.04
4.	Construction of high level bridge across Cooum river connecting Poonamallee high road and Union road at Chinna Nolumbur in Div - 143 & 144, Zone - 11	I & A Fund	42.71
5.	Construction of high level bridge across Cooum river connecting Poonamallee High road and Union road at Sannathi 1st cross street in Div - 143 & 144, Zone - 11	I & A Fund	31.65

6.	Bridge across Puzhal surplus water canal at Vadaperumbakkam in Div-17, Zone-2	CMCDM and GCC Capital fund	22.41
7.	Construction of limited use subway at the level crossing (LC) No.11A at Bojaraja Nagar in Div-53, Zone-5	CGF	30.13
8.	Construction of cable stayed suspension skywalk connecting Phase I & II of Tholkappia Poonga in Div-171, Zone-13 (EPC)	CRRT Deposit Fund	9.35
9.	Construction of Pre-cast Triple cell Box culvert in lieu of existing pipe culvert across Dr.D.G.S Dinakaran Salai in Div-171, Zone-13 (EPC)	CRRT Deposit Fund	5.07
10.	Bridge across Virugambakkam Canal connecting Railway Colony 3rd Street and Madha Kovil Street, Choolaimedu in Div-107, Zone-8	GCC Capital fund	1.60
11.	Construction of Two-Wheeler cum Pedestrian Subway in lieu of existing Level Crossing No.6 at Ambattur in Div-81&85, Zone-7	Railway Deposit Fund	11.40
12.	Collection tank and relaying of wearing coat at existing Manickam nagar subway in Div-5, Zone-1	GCC Capital fund	1.42

13.	Demolition and Reconstruction of bridge at Indira Gandhi 2nd Street, Choolaimedu in Div-106, Zone-8	GCC Capital fund	2.32
14.	Demolition and Reconstruction of bridge at Kannagi Street, Choolaimedu in Div-106, Zone-8	GCC Capital fund	2.25
Total			647.82

To facilitate the free flow of traffic and provide sustainable traffic management for future, Greater Chennai Corporation has proposed to construct ROB/ Bridge in 10 locations at an estimated cost of Rs.132.66 crore under the Infrastructure and Amenities (I & A) fund and Greater Chennai Corporation capital fund. The details are given in the table 3.3.

Table 3.3

Sl.No.	Name of work	Source of fund	Estimate cost (Rs. in crore)
1.	ROB in lieu of existing LC No. 2A at Ennore High Road in Div-38, Zone-4	I & A Fund	75.00
2.	Demolition and reconstruction of bridge across Kodungaiyur canal connecting Tondiarpet High Road and Kadumbadi Amman Koil Street in Div-34, Zone-4	GCC Capital fund	7.67

3.	Demolition and reconstruction of bridge at Tamizhar veedhi, Choolaimedu in Div-106, Zone-8	GCC Capital fund	4.97
4.	Demolition and reconstruction of bridge across B-Canal connecting ECR and OMR at Venkatesapuram - Elango Nagar, Kottivakkam in Div-181, Zone-14	GCC Capital fund	7.04
5.	Demolition and reconstruction of bridge across B-Canal connecting ECR and OMR at Kamaraj Salai - Veeramani Salai, Palavakkam in Div-182&183, Zone-14	GCC Capital fund	7.00
6.	Demolition and reconstruction of bridge across B-Canal connecting ECR and OMR at Pandian Street - Anna Nagar, Thoraipakkam in Div-192 & 193, Zone-15	GCC Capital fund	6.98
7.	Demolition and reconstruction of bridge across Otteri Nullah at New Farrance road in Div-73, Zone-6	GCC Capital fund	9.00
8.	Demolition and reconstruction of bridge across Virugambakkam Canal at Thirukumarapuram, Choolaimedu in Div-105, Zone-8	GCC Capital fund	5.00
9.	Demolition and reconstruction of bridge across Virugambakkam Canal at Ko.Su.Mani Salai, Choolaimedu in Div-106, Zone-8	GCC Capital fund	5.00
10.	Demolition and reconstruction of bridge across Virugambakkam Canal at Kamaraj Nagar 3rd Street, Choolaimedu in Div-106, Zone-8	GCC Capital fund	5.00
Total			132.66

3.1.3 Disaster management

3.1.3.1 Stormwater Drains

Chennai city has been facing the challenge of urban flooding during monsoon periods. To mitigate the floods, the Greater Chennai Corporation has been constructing stormwater drains under various schemes viz., Singara Chennai 2.0, Infrastructure and Amenities fund, Flood Relief Fund, State Disaster Mitigation Fund, etc. Further, construction of integrated stormwater drains has been taken up under Externally Aided Projects funded by the World Bank, Asian Development Bank (ADB) and the German Development Bank (KfW).

The Greater Chennai Corporation maintains 11,769 numbers of stormwater drains for a length of 3,041 km.

Table 3.4

Sl. No.	Zone No.	Zone Name	No. of SWDs	Length of existing SWDs (km)
1.	I	Thiruvotriyur	361	144.02
2.	II	Manali	561	167.83
3.	III	Madhavaram	801	238.28
4.	IV	Tondiarpet	380	128.40

3.1.3.2 Kosasthalaiyar Basin

The Kosasthalaiyar Basin Integrated Stormwater Drain (ISWD) project, which is funded by Asian Development Bank, has been taken up to address the long-standing need for stormwater drains in North Chennai. The primary objective of this project is to mitigate the hazard of flooding during monsoons. The project involves the construction of integrated stormwater drains in the Kosasthalaiyar basin,

for a length of 769 km. at an estimated cost of Rs.3,059 crore. Work is in progress. So far, 88.39% of the works have been completed. The remaining works will be completed soon. Upon completion of the project, 30 lakh people living in Ambattur, Manali, Madhavaram, and Thiruvotriyur will benefitted.

3.1.3.3 Kovalam Basin

Construction of integrated stormwater drain in the kovalam basin has been taken up in three phases at an estimated cost of Rs.1,715.25 crore. In the first phase, integrated stormwater drain works for a length of 41.42 km at an estimated cost of Rs.150.45 crore have been taken up. So far, 91.62% of the works have been completed. In Phase II, integrated stormwater drain works have been taken up for a length of 120.09 km at an estimated cost of Rs.447.03 crore. So far, 85.49% of the works have been completed. In Phase III, works for a length of 140.10 km at an estimated cost of Rs.760.10 crore have been taken up. On completion of this project, 20 lakh

people residing in Perungudi, Sholinganallur and part of Alandur zones will be benefitted.

3.1.3.4 Construction of stormwater drain under Greater Chennai Corporation Capital Fund

Construction of stormwater drain has been taken up for a length of 22 km at an estimated cost of Rs.110.67 crore and the works are in progress. Further, 31.57 km length of stormwater drain works at an estimated cost of Rs.124.61 crore will be taken up.

3.1.3.5 Improvements to Canals

As North-East monsoon preparedness, the Greater Chennai Corporation has to enhance flood protection in 35 out of 44 canals. For this, the existing retaining walls will be raised with a 1.5 m chain link fencing. New retaining walls will also be built wherever needed. The total estimated cost of this initiative will be Rs.256.17 crore.

3.1.3.6 Restoration of waterbodies

Works for restoration and rejuvenation of water bodies under the control of Greater

Chennai Corporation are taken up under various scheme viz., restoration of 5 water bodies under AMRUT 2.0 at an estimated cost of Rs.14.84 crore, restoration of 20 water bodies under Singara Chennai 2.0 (2023-24) at an estimated cost of Rs.9.25 crore, restoration of 19 water bodies under capital fund at an estimated cost of Rs.24.51 crore and restoration of biodiversity and ecosystem services in kadapakkam lake at an estimated cost of Rs.58.33 crore. All 45 works are in progress.

3.1.4 Special Projects

3.1.4.1 Operation and Maintenance of Toilets under Public Private Partnership (PPP) mode

This project is one of the iconic projects of Hon'ble Chief Minister. Following the success and learnings of the pilot project done in 372 locations with 3,270 seats in zones 5, 6 and Marina, the public toilets in the remaining zones are being taken up for comprehensive operation and maintenance work, as follows:

Table 3.6

Package	Zones	No. of Locations	No. of Seats
2	1, 2, 3 & 4	285	2301
3	7, 8, 9 & 10	395	2760
4	11, 12, 13,14 & 15	322	2105
Total		1002	7166

It is a 9-year “Design, Build, Finance, Operate and Transfer” (DBFOT) project, in which 1 year will be given for designing, building and commissioning and 8 years for operation and maintenance. The project is structured as a Hybrid Annuity Model – Public Private Partnership, monitored by third party agency (Independent Engineers).

3.1.4.2 Blue Flag Beach

The Blue Flag Beach programme promotes sustainable development in freshwater and marine areas. It challenges local authorities and beach operators to achieve high standards in the four categories, viz. water quality, environmental management, environmental education and safety. Over the years, the Blue Flag has become a highly respected and recognized eco-label, working to bring together

the tourism and environmental sectors at local, regional and national levels. This project is proposed at Marina.

3.1.4.3 Integrated Sponge Park

The project upgrades the Manali MMDA colony football grounds into an 1.9 acre Integrated Sponge Park with a design strategy that combines blue-green infrastructure and social infrastructure.

3.1.5 Buildings

Greater Chennai Corporation maintains 3,910 number of buildings like schools (417), Public convenience (1379), Emergency Obstetric Care (3), Burial grounds (201), UPHC (140), Health and Wellness Centers (140), UCHC (16), Night Shelters, Zone / Division / Unit / Electrical Office Buildings, Community halls, Shopping Complex, Anganwadis, Dobikhana, Gym building, Auditorium, etc.,

Under Singara Chennai 2.0, during the year 2021–22 to 2023–24, 137 no. of works were taken up at an estimated cost of Rs.283.86 crore, out of which 86 no. of works were completed at an estimated cost of

Rs.141.20 crore. Balance 51 works are in progress.

In the year 2024-25, under GCC's Capital Fund, renovation and upgrading of 142 school buildings at an estimated cost of Rs.34.81 crore are in progress. Under the state finance commission grant and GCC's capital fund, the additional classroom constructions in 19 schools at an estimated cost of Rs.27.75 crore are in progress.

It has been proposed to take up construction of the New Council Hall (Kalaingar Centenary Building) in the Ripon Building Complex at an estimated cost of Rs.75 crore under the capital fund and preliminary works are underway.

Under the capital fund, the work of 7 LPG crematoriums is being carried out at an estimated cost of Rs.12.00 crore and improvements for 26 Crematoriums have been taken up at an estimated cost of Rs.30.68 crore.

Apart from these, work is underway on 10 Animal Birth Control centres at an estimated

cost of Rs.18.00 crore and 14 cattle pounds (cow sheds) at an estimated cost of Rs.20.00 crore.

Further, modernization of the slaughterhouse at an estimated cost of Rs.45.00 crore located in the Pulianthope area in Zone 6 is being carried out.

Furthermore, the work of installing view cutters around 1,220 transformers are underway at an estimated cost of Rs.45.00 crore and the work of installing view cutters for transformers is to be carried out at a cost of Rs.66.00 crore.

Under the Singara Chennai 2.0, work order has been issued for construction of vegetable market in Saidapet at a cost of Rs.23.97 crore and work is about to commence.

3.1.6 Streetlights

The Greater Chennai Corporation provides and maintains 3.01 lakh uniform LED street lighting in all the roads. 480 high mast lights have been erected at vital locations such as major road junctions, beaches and parks. The

details of the streetlights are as given in the table 3.7.

Table 3.7

Sl. No.	Zone	Name of the Zone	No. of streetlights	No. of high mast lights
1.	I	Thiruvotriyur	13,910	23
2.	II	Manali	12,619	19
3.	III	Madhavaram	19,019	36
4.	IV	Tondiarpet	19,515	34
5.	V	Royapuram	15,692	40
6.	VI	Thiru-Vi-Ka-Nagar	18,819	40
7.	VII	Ambattur	27,723	55
8.	VIII	Anna Nagar	21,371	28
9.	IX	Teynampet	23,271	59
10.	X	Kodambakkam	24,435	34
11.	XI	Valasaravakkam	20,730	16
12.	XII	Alandur	15,756	21
13.	XIII	Adyar	24,548	53
14.	XIV	Perungudi	23,964	17
15.	XV	Sholinganallur	19,862	5
Total			3,01,234	480

Under the Nirbhaya Scheme, which is intended for the safety of women in public

places, 13,579 Nos. of street light post and 12,213 LED Fittings have been installed in dark spots identified in collaboration with Greater Chennai Police at an estimated cost of Rs.68.99 crore.

3.1.7 e-Governance

Greater Chennai Corporation provides the following services to the public through its website and digital communication platforms:

- Property tax payment
- Birth and death certificate issuance
- Urban planning-related information
- Public grievance redressal system
- WhatsApp services
- 1913 Call Center, and
- Services related to the Namma Chennai mobile application

Additionally, the Enterprise Resource Planning (ERP) system of Greater Chennai Corporation facilitates the following administrative functions:

- Finance – Digital financial management

- Project management
- Legal case management
- General administration
- Pension management
- Revenue management

The ERP software is integrated with the corporation's online services, Namma Chennai app, and the 1913 control room. Currently, Greater Chennai Corporation's online payment services are available through more than ten banks and also through digital payment methods such as BBPS and UPI.

Furthermore, the corporation's data is linked with the Guidance Tamil Nadu Single Window Portal, Chennai Metropolitan Water Supply and Sewerage Board, and Tamil Nadu Registration Department for land ownership, name transfer, and other related services.

Enterprise Resource Planning (ERP 2.0)

Since 2008, Greater Chennai Corporation has been using a comprehensive Enterprise Resource Planning (ERP) software. Considering the increasing usage of online services, data-

sharing needs and technological advancements, the ERP 2.0 project is proposed. This upgrade aims to provide faster service, simpler processes, enhanced transparency, and cost and time efficiency.

The Greater Chennai Corporation is taking necessary measures to streamline tax collection and revenue generation. ERP 2.0 will significantly expand business operations to improve user experience and operational efficiency.

Key Features of ERP 2.0

- Microservices-based digital infrastructure – Developed in accordance with modern technological standards.
- Enhanced applications for public and corporation officials/employees to improve usability.
- Geo-based revenue management system - To enhance revenue collection and identify and rectify revenue losses with a user-friendly interface.

- Upgraded security, efficiency, and accessibility using the latest technology.
- Improved service efficiency for the public through modern technological advancements.
- Inter-departmental data-sharing framework to integrate with other government departments.
- Dedicated online services for corporation officials, pensioners, contractors, legal service providers handling Chennai Corporation cases, and licensed surveyors.
- AI/ML-based real-time dashboard for data analysis and monitoring.
- Disaster recovery facility to ensure data security and operational continuity.

3.1.8 Parks and Playfields

Greater Chennai Corporation maintains 908 Parks. Out of these 908 parks, 625 parks are maintained by private contractors, 191 parks are maintained by Greater Chennai Corporation through park labourers and 87 parks are maintained by way of adoption by citizen

groups. Greater Chennai Corporation also maintains 542 playgrounds and children's playgrounds, 3 Swimming Pools, 185 Gym and other sports facilities. Apart from the park and playfields, Greater Chennai Corporation maintains 118 center medians and 111 traffic islands, as given in Table 3.8

Table 3.8

Zone	Name of the Zone	No. of Parks	No. of Playfields and Children Playground	No. of Gym Buildings	No. of Swimming Pools
I.	Thiruvotriyur	14	17	2	1

TOTAL		908	542	185	3

3.1.8.1 Parks and Playfields - New Developments (OSR Lands)

During the financial year 2024-25, development of new parks in the vacant open space reservation (OSR) lands vested with Greater Chennai Corporation has been taken up. All the newly developed parks are designed as differently-abled friendly. Further, the new parks will have minimal use of concrete and plentiful greenery so that they act as sponge parks in the rainy season.

Under Singara Chennai 2.0 from 2021-22 to 2024-25, a total of 206 parks and 110 playfield works have been sanctioned at an estimated cost of Rs.80.66 crore and Rs.45.36 crore, respectively. Out of which, 186 park and 97 playfield works were completed at an estimated cost of Rs.65.10 crore and Rs.38.37 crore, respectively. Balance works are in progress.

3.1.8.2 Urban Greening

Greater Chennai Corporation is making sustained efforts to increase the green cover in Chennai city by planting native tree saplings in various parts of the city. Greater Chennai Corporation has planted over 3,74,082 trees between the year 2022 to 2024. It is proposed to plant 1 lakh tree saplings with community participation and Resident Welfare Associations.

3.2 Health and Sanitation

3.2.1 Solid Waste Management

On an average, 6,150 MT of solid waste is generated daily in Greater Chennai Corporation. It is collected at the household level. The source-segregated wet and dry wastes are channelized to the decentralized processing facilities and the remaining waste is transferred to the dumping sites at Perungudi and Kodungaiyur.

At present, solid waste management activities are being carried out in 5 out of 15 zones by Greater Chennai Corporation and in

the remaining 10 zones through private concessionaires.

3.2.1.1 Infrastructure

Solid Waste Management involves the collection of waste at the point of waste generation, transportation to the respective processing centers, and further processing.

For carrying out these activities, the Greater Chennai Corporation operates 2,457 battery- operated vehicles (BOVs), 172 HMV/LMV compactors, 54 HMV/LMV tippers, 14 Mechanical sweepers etc. Likewise, the private concessionaires operate 3,529 BOVs, 148 HMV/LMV compactors, 147 HMV/LMV tippers, and 45 mechanical sweepers.

In Greater Chennai Corporation 4,060 permanent employees, 424 temporary workers and 4,989 self help group workers are engaged for Solid Waste Management activities. Further, the private operators have engaged 12,249 workers for carrying out these conservancy operations.

3.2.1.2 Wet and Dry Waste Processing

In line with Solid Waste Management Rules, 2016, the Greater Chennai Corporation initiated decentralized facilities to process the source- segregated wet and dry waste.

At present, 28 wet waste processing facilities such as micro composting centers, windrow composting centers, Bio-CNG plants, and Garden waste processing centers have a capacity of handling 576 metric tons per day of wet waste. From the wet waste processing units, presently, 720 tons of manure is produced every month and 2,428 MT Bio CNG gas has been produced from till date.

Two Bio-CNG plants of 100 MT capacity each, are in operation at Chetpet and Madhavaram. Additional five Bio-CNG plants, with a total capacity of 500 MT are being set up to process the wet waste and are under various stages of construction. The details of the wet waste processing facilities are as given in Table 3.9.

Table 3.9

Sl. No.	Description	Total Numbers	Capacity (in MT)
1.	Micro compost yards	22	116
2.	Windrow method	2	100
3.	Garden waste processing centers	2	160
4.	Bio-CNG plants	2	200
	Total	28	576

Further, there are 57 Dry waste processing centers, such as material recovery facilities, resource recovery centers, incinerators, etc., having a capacity of 260 MT.

In addition to this, 50 MT of non-recyclable combustible dry waste is sent to cement industries for co-processing every week from baling centers available at five locations, viz. Madhavaram, Mint, Otteri, Menambedu and Pallikaranai.

The dry waste processing facilities available with Greater Chennai Corporation are as given in Table 3.10.

Table 3.10

Sl. No.	Method Of Processing	Total Number	Capacity in MT
1.	RRC/MRF	49	140
2.	Incinerator	3	65
3.	Baling Centre	5	55
	Total	57	260

3.2.1.3 Disposal of legacy waste (Bio-Mining)

(a) Perungudi

The Perungudi site located in the southern part of the city is spread over an area of 225.16 acre and has been in use for more than 35 years as a disposal site. Solid waste from Zones 9 to 15 is sent to the Perungudi site.

The estimated volume of legacy waste above ground level is around 30.61 lakh cubic meters. The Greater Chennai Corporation has initiated reclamation of the Perungudi site through the bio-mining process under 6 packages, at a project cost of Rs.350.65 crore, under the Swachh Bharat Mission (SBM). Bio-mining work is in progress. So far, around

24.34 lakh cubic meters of legacy waste have been processed; this is expected to be completed soon. Further, an additional quantity of 2.5 lakh cubic meters of waste will be taken up for bio-mining under the Swachh Bharat Mission 2.0 fund. After completion of the project, 200 acre of land will be reclaimed. The reclaimed land is proposed to be used for setting up of Integrated Waste Processing Facilities (IWPF)

(b) Kodungaiyur

The Kodungaiyur site located in the northern part of the city, has an extent of 342.93 acre and has been in use for more than 40 years. Zones 1 to 8 use this facility. The estimated quantity of legacy waste, above ground level and 2 meter below the ground level, is around 66.52 lakh MT. Bio-mining work is started at Kodungaiyur dumping ground at a cost of Rs.648.38 crore under Swachh Bharat Mission and KfW funds and is in progress. So far, around 5,39,280 MT of legacy waste has been processed.

3.2.1.4 Construction and Demolition (C & D) Waste Management

Presently, the Construction and Demolition waste collection in Chennai is around 800 MT. To improve the service delivery, the collection and transportation of construction and demolition waste has been outsourced and operations have commenced. And also 15 designated locations has been allotted by Greater Chennai Corporation to dump construction and demolition waste.

Greater Chennai Corporation has installed two facilities for processing construction and demolition waste on Public-Private Partnership (PPP) mode, one at Kodungaiyur and another one at Perungudi, which have started the processing. So far 4,84,066 MT of construction and demolition waste has been processed with an average of 250 MT in each location daily. Final products such as coarse and fine aggregates are used in construction work.

3.2.1.5 Mechanical Infrastructure

The Mechanical Engineering Department has a total fleet strength of 3,355 vehicles, which include vehicles for transportation of solid waste and construction and demolition waste, such as battery-operated vehicles, Compactor, HMV/LMV tippers, Frontend loaders, Bulldozers and Hydraulic excavators, etc.

Greater Chennai Corporation also has special equipments such as 2 numbers of amphibian vehicles, 6 numbers of Robotic Multipurpose excavators, 3 numbers of Mini amphibians for clearing floating garbage and water hyacinth in canals, and 7 numbers of Vehicle-mounted high capacity Suction cum Jetting machines with water recycling facility for clearing storm water drains. 9 numbers of hydraulic-operated tree-pruning machines are also deployed to remove overhanging tree branches on a need basis and to clear fallen trees, poles etc., during disasters. To clear the sandy area in beaches, and make it litter- free, 9 numbers of tractor-driven beach cleaning machines are deployed at Marina Beach, Elliots

Beach at Besant Nagar, Palavakkam Beach, and other beaches in the Greater Chennai Corporation area.

Further, 59 numbers of Mechanical Sweepers (including concessionaire vehicles) are used to clean the sand accumulated on the roads.

To increase the efficiency of door-to-door collection of garbage, a huge fleet containing 5,966 numbers of battery – operated vehicles (including concessionaire vehicles) are being deployed in Zones I to XV.

3.2.2 Public Health

3.2.2.1 Public Health Services

The Public Health Department provides comprehensive public health, preventive and treatment services to the people of Chennai city including healthcare services, vector control and implementation of various National programs, registration of births and deaths. Public Health Department also maintains shelters for the urban homeless. It has the regulatory function to implement the Tamil Nadu Urban Local Bodies

Act, 1998 and the Tamil Nadu Public Health Act for disease prevention.

3.2.2.2 Primary Health Care services

The Greater Chennai Corporation has a well-established health infrastructure that provides comprehensive health care services, such as Antenatal and Postnatal care, Child health care, Basic diagnostics and treatment for communicable and non-communicable diseases under one roof. The health care services are provided through a network of 140 Urban Primary Health Centres (UPHC), 140 Urban Health and Wellness Centers, 16 Urban Community Health Centres (UCHC) and 3 Maternity hospitals (EOC).

Table 3.11

Details of OPD Attendance in UPHCs

Sl.No.	Year	No.of Patients (in lakh)
1	2017-18	64.64
2	2018-19	70.15
3	2019-20	74.33
4	2020-21	53.91
5	2021-22	94.36
6	2022-23	108.32
7	2023-24	106.34
8	2024-25	103.98

3.2.2.3 Urban Health and Wellness Centres

The Fifteenth Finance Commission has provided grants of Rs.88.30 crore to establish Health and Wellness Centers. In the 1st Phase, 140 Urban Health and Wellness Centres (UHWCs) have been established. The Health and Wellness Centers were inaugurated by the Hon'ble Chief Minister on 06.06.2023. These Centers function from 8.00 AM to 12.00 Noon and 4.00 PM to 8.00 PM. 29,50,378 number of patients benefited till date.

3.2.2.4 National Quality Assurance Standards (NQAS)

In order to strengthen the quality of services provided in the Urban Primary Health Centers, it is proposed to get National Quality Accreditation Certification from the Government of India. So far, 25 Urban Primary Health Centers have been certified under National Quality Assurance Standards.

3.2.2.5 Dialysis Centers

At present 9 Dialysis Centers are functioning under Chief Minister Health Insurance Scheme in Greater Chennai Corporation. From

01.04.2024 to 28.02.2025, 108 Dialysis machines are functioning and 410 patients have been dialysis in rotation basis. And 44,411 dialysis cycle in rotation were done.

3.2.2.6 Polyclinics

Polyclinics are “Outpatient Specialty Clinics” established in Urban Primary Health Centers. The GCC is operating 40 Polyclinics. They provide specialty services on fixed days. The services include Consultation and Lab Investigations. The services are provided from 4.30 p.m. to 8.30 p.m. Total number of beneficiaries during January 2024 to December 2024 is 1,72,344.

3.2.2.7 Communicable Diseases Hospital

The Communicable Diseases Hospital at Tondiarpet is an exclusive hospital for communicable diseases. This hospital has been functioning since 1914. This is a 360-bedded hospital with out-patient and in-patient services functioning 24 hours.

The details of in-patient and out-patient who have been treated from 2021 to 2024 are as follows:

Table 3.12

Sl. No	Year	No. of in patients	No. of out patients
1	2021	7,043	68,797
2	2022	5,829	84,719
3	2023	6,935	99,302
4	2024	6,883	81,047

Emergency Care and Recovery Centre (ECRC), a 50 bedded facility is functioning within the premises where mentally challenged persons are rescued and treated. De-addiction centre, a 50 bedded facility is functioning in the hospital. The beneficiaries are not only from Chennai but also from other States and Districts of Tamil Nadu. MDR TB ward 30 bedded facility is functioning in the Hospital, to provide nutrition, medical care, counseling to patients and patients' family members.

The hospital is providing training for undergraduate and postgraduate medical as well as paramedical students. The courses provided in the institution are Medical Laboratory Technician Course (DMLT-Two Years) and Auxiliary mid-wife Training (for female students only) (ANM-Two years)

3.2.2.8 Disease Control Programme

(a) Makkalai Thedi Maruthuvam

"Makkalai Thedi Maruthuvam" (MTM) scheme was launched by the Government of Tamil Nadu on August 5, 2021 in Zone 6 and subsequently to all the remaining 14 zones of Greater Chennai Corporation. This program offers comprehensive "Home Based Health Care Services" to ensure continuity of care and meet the health needs of beneficiaries.

Field teams comprising Women Health Volunteers (WHVs), Palliative Staff Nurses and Physiotherapists deliver services at the doorsteps. WHVs provide screening, follow-up including Drug Box Delivery, referrals and community health meetings. Physiotherapists and palliative care nurses offer home-based services to various beneficiaries, including the elderly, cancer patients and those with chronic illnesses including end stage renal disease.

Screening and treatment for oral, breast, and cervical cancers have been conducted. The number of patients identified and treated with oral cancer, breast cancer and cervical cancer

are 5 cases (Oral), 35 cases (Breast) and 20 cases (Cervical) in March, 2022 has increased to 482 cases (Oral), 829 cases (Breast) and 295 cases (Cervical) of cancer, respectively, in 2023-24.

Physiotherapy and palliative care services are provided to a significant number of beneficiaries. From January 2024 till January 2025, 15,859 patients received physiotherapy treatment. 9,370 patients received palliative care and 78 patients received CAPD bags.

(b) District Blindness Control Society

Greater Chennai Corporation has been providing eye screening services in 43 UPHCs to identify cataract, refractive error, glaucoma and diabetic retinopathy. The details are given in the following table:

Table 3.13

Sl. No	Year	Cataract surgeries	Glaucoma surgeries	Diabetic retinopathy	Eye balls collected	Free spectacles issued
1.	2022-23	15,963	303	1,358	2,090	7,461
2.	2023-24	18,342	356	1,856	1,841	8,419
3.	2024-25	14,123	457	2,317	1,218	10,070

A Tele V-Care center is functioning in Semmancherry UPHC for eye care services. During the year of 2022-23, 148 cataract patients; 2023-24, 43 cataract patients and 2024-25, 29 cataract patients were identified and surgery was done in Government Hospital.

During 2022-23, five optometrists were appointed under NUHM to do screening in UPHCs and in schools. The Optometrists and NGOs identified 4,526; 4,921 and 5,448 cataract patients in the year 2022-23, 2023-24 and 2024-25, respectively in UPHCs and referred to Government hospitals for cataract surgery.

(c) National Tuberculosis Elimination Programme

The Greater Chennai Corporation has 36 TB units, 165 Designated Microscopic Centers, 18 CBNAAT and 39 Truenat testing labs and 7 Mobile diagnostic units with X-Ray facilities for diagnosis and management of Tuberculosis cases. Facilities are available to treat both Drug Sensitive TB (DS-TB) and Drug Resistant TB (DR-TB) in Greater Chennai

Corporation. The details are given in the following table:

Table 3.14

Sl. No.	Year	No. of tests done	No. of patients notified
1	2021	60,898	10,093
2	2022	2,70,561	14,658
3	2023	3,25,240	14,805
4	2024	3,09,751	14,504

TB Preventive Treatment (TPT) has been initiated for the Household Contacts (HHC) of sputum positive Tuberculosis patients from January 2022. During the year 2024, out of the 6,295 Household Contacts, 4,467 (72%) were given TB Preventive Treatment.

Greater Chennai Corporation owns 7 Mobile vans with X-ray facility for screening the population vulnerable for TB. In 2024, 47,402 were screened, 20,507 X-rays were taken and 123 cases identified as TB.

(d) AYUSH Clinics

Three integrated AYUSH Clinics (Ayurveda, Yoga & Naturopathy, Unani, Siddha, Homeopathy) are operational in GCC. Further,

GCC has 9 standalone Ayush clinics across the city. The total number of beneficiaries during the period from January 2024 to December 2024 is 2,47,813.

3.2.2.9 Birth and Death Registration

Birth and death certificates have been made available online and free of cost (www.chennaicorporation.gov.in) since 07.09.2008. All the birth and death records, since the year 1930, have been computerized in GCC. Birth / Death certificates are made available online in the official website of GCC (www.chennaicorporation.gov.in) and can be downloaded at free of cost. During the year 2022, 42,46,751 birth certificates and 15,82,041 death certificates; during the year 2023, 46,04,976 birth certificates and 14,92,284 death certificates; during the year 2024, 43,01,961 birth certificates and 12,57,807 death certificates have been generated.

A total of 201 burial grounds are functioning under the control of the Greater Chennai Corporation in Zones 1 to 15. Out of these, burial services only are available in 93 burial grounds and Cremation services only are available in 51 burial grounds.

Burial and cremation services done in these burial grounds are provided free of cost.

3.2.2.10 Vector Control Activities

Controlling Mosquito borne diseases and Zoonotic diseases

In order to control Mosquito borne and Zoonotic diseases 1,044 permanent workers and 2,446 temporary workers, totally 3,490 workers are engaged to carry out the mosquito control activities. About 17 lakh houses in chennai city are divided into sectors, with about 500 houses per sector.

To carryout anti-mosquito activities, logistics were deployed using 94 vehicle-mounted fogging machines, 324 portable fogging machines. For anti-larval activity 322 compression sprayers, 156 battery

sprayers, 2 mini fogging machines and 54 power sprayers and 15 vehicle mounted sprayers are used to spray larvicide in stormwater drains, open drains and canals. Drones are deployed to spray larvicide in major waterways like Cooum river, Adyar river and Buckingham canal.

Amphibian, Mini Amphibian and Robotic Excavators are used in rivers and canals for desilting and removing of water hyacinth plants for mosquito larval control activities. 9 Fiber boats are used for removing floating materials and water hyacinth plants followed by spraying of larvicides.

3.2.2.11 Shelter for Urban Homeless

In order to provide shelter to the homeless, the Greater Chennai Corporation runs 49 night shelters. Out of these, 37 shelters are for the urban homeless and 12 are for attenders of in-patients in Government Hospitals (special shelters). Details of beneficiaries under shelters for homeless are given in table 3.15.

Table 3.15

Categories	2022-23	2023-24	2024-25
Total no. of homeless beneficiaries (rescued and accommodated in shelters)	3,679	3,297	2,926
Total no. of special shelter beneficiaries (since 2021)	11,215	9,495	11,006
Total no of beneficiaries in the shelters at present	14,894	12,792	13,932
Old age Pension	63	30	37
Voter ID	21	15	27
Aadhar Card	60	47	88
Driving License	38	12	7
Disability Pension	11	4	24
Disability ID Cards	10	12	43
School Admission	194	100	81
No of residents reintegrated	346	262	453
No of residents rehabilitated	653	498	710
Bank Account	30	10	115

3.2.2.12 Veterinary Activities

The population of stray dogs in Greater Chennai Corporation areas is kept under control by conducting Animal Birth Control Rules, 2023. Complaints from general public are attended by catching stray dogs and transporting the dogs to Animal Birth Control centers which are located at

Pulianthope, Lloyds colony, Kannammappet, Meenambakkam and Sholinganallur. The dogs undergo animal birth control surgery and after post-operative care and Anti Rabies vaccination stray dogs are released in the same area from where they were caught. During 2023-24 and 2024-25 (upto February 2025) 41,392 numbers of stray dogs were caught and 30,847 numbers of stray dogs were sterilized and vaccinated against Rabies. Pet clinics are functioning at TVK Nagar, Nungambakkam, Kannamapettai, Meenambakkam, Llyods colony and Pulianthope to provide free treatment and Anti Rabies vaccination of pet animals. From the year 2023 and upto February 2025, 65,168 numbers of pet animals have been treated and 9,304 numbers of Pet licenses have been issued to pet owners.

In order to control stray cattle in Greater Chennai Corporation, each zone is allotted with trained catchers and cattle vehicle for catching and transportation of stray cattle caught to pounds functioning at Pudupet and Perambur. The cattle caught and are impounded at pounds are tagged and maintained until release. The impounded cattle are released to the owners

after being fined. From the year 2023 and upto February 2025, 5,885 number of stray dogs and 300 number of cattles were impounded.

Modern cow sheds for the use of cattle owners at all Zones, except Zones 6,7 and 13 is being constructed. Modern cow shed construction at Division 53 of Zone 5 is nearing completion.

3.2.3 Medical Services Department

Medical Services Department renders secondary care to the people of 15 zones in Greater Chennai Corporation 24x7 through 16 UHCs and 3 EOCs (30 bedded facility in 9 hospitals, 100 bedded facility in 7 hospitals) and 140 Greater Chennai Corporation UPHCs which are fully equipped with good infrastructure.

(a) Treatment given from Urban Community Health Centers

- EDD Clinics are conducted to screen the third trimester antenatal mother for detection of high risk, early referral and for safe confinement.

- Treatment is given for all minor ailments of all age groups.
- Outpatient services are provided for women and children, irrespective of age.
- Safe medical termination of pregnancy services are provided.
- New born screening is done for new borns immediately after birth.
- Treatment for minor ailments for females is rendered round the clock
- Antenatal and Postnatal care is given for all mothers.
- Temporary family welfare methods are provided for spacing.
- Nutritious food is provided for delivered mothers during their stay in the hospital.
- Disposable Delivery kits are used to conduct normal and caesarean sections.
- Baby Care Kits are provided for all mothers delivered in UCHC which contains 16 products inclusive of soap, powder, dress, towel and bed for the newborn babies.
- Laboratory Services
- Ultra Sonogram

(b) Child Care

- New Born Stabilisation Unit is functional in all UHCs
- All babies are vaccinated as per National Immunisation Schedule.
- Growth monitoring is carried out for all new borns.
- Oto Acoustic Emission Screening Test is being done for detection of deafness in new born.
- Treatment for minor ailments for babies is done and if needed specialised care are referred to higher centers.

(c) Speciality Services

Obstetrician, Paediatrician, Surgeon and Orthopaedician speciality services are available in UHCs. Details relating to deliveries and sterilization are given in the following tables:

Table 3.16

Year	Normal	LSCS	TOTAL
2021-2022	6,590	5,980	12,570
2022-2023	6,829	5,560	12,389
2023-2024	5,249	3,998	9,247

3.3.1 Revenue Department

Revenue Department is undertaking the collection of property tax, profession tax, company tax, entertainment tax, trade license fee and rent on shopping complexes.

Table 3.19

Sl.No.	Category	Target for the Financial Year 2024- 25 (Rs. in crore)
1.	Property tax	2000
2.	Profession tax	575
3.	Company tax	5
4.	Entertainment Tax	60
5.	Trade License fee	25
6.	Rent on shopping complexes	25
	Total	2690

General Revision of Property Tax was implemented in the 1st half - year of 2022-23 in respect of all the 13.19 lakh assesseees after a gap of 24 years in core city areas of Greater Chennai Corporation prior to 2011 and a gap of 14 years in extended areas with following increase factors.

Table 3.20

Category	Increase factor	
	Core Zones	Added Zones
Residential (Area in sq.feet)		
Below 600 sq. feet	1.5	1.25
601 Sq.ft to1200 sq. ft.	1.75	1.50
1201 sq.ft. to 1800 sq.ft	2.00	1.75
1801 sq.ft. and above	2.50	2.00
Non – Residential	2.50	2.00
Educational Institutions	2.00	1.75
Industrial Categories	2.00	1.75

The details of Property Tax collection during the past financial years are given below:

Table 3.21

Sl. No.	Financial year	Property Tax Collection (Rs. in crore)
1.	2020-21	471.69
2.	2021-22	775.24
3.	2022-23	1520.60
4.	2023-24	1755.00
5.	2024-25 (till 05.03.2025)	1811.63

3.3.2 Increasing the revenue of Greater Chennai Corporation by improving tax collection efficiency through technology

After implementation of General revision of property tax in the limits of Greater Chennai Corporation, efforts have been taken to improve tax collection efficiency through new and innovative solutions.

The Geographical Information System (GIS) and Drone Survey Project (Phase-I) was initiated by Greater Chennai Corporation under the World Bank assisted TNSUDP, at a cost of Rs.6.44 crore (Phase-I). Nearly 78,212 Property Tax assessments have been, revised generating and additional annual demand of Rs.154.00 crore. The work of enhancement of under assessed the properties is going on. The core objective is to identify un-assessed and under-assessed buildings within the limits of the Greater Chennai Corporation, for which Drone survey is completed for 200 wards. The work of identifying the un-assessed properties is under process.

The Greater Chennai Corporation has made efforts to integrate data from other Government Departments such as the Goods and Services Tax Department, Employees' Provident Fund Department, and Registrar of Companies which has generated a revenue of Rs.54.00 crore as on date from the newly identified Trades, Professional Tax, Company Tax and Trade Licenses.

3.4 Education

The Education Department of Greater Chennai Corporation strives to provide quality education, enriched with life skills to children through Chennai schools.

During the academic year 2024-25, the Greater Chennai Corporation oversees 417 schools 3,739 teachers, and 140 permanent non-teaching staff under its administration, catering to 1,12,788 students. Among these schools, 272 Primary & Middle schools have Kindergarten sections and 12,621 students are receiving kindergarten education from these schools.

Table 3.22

Sl. NO.	Type of school	Number of Schools 2024-25
1.	Primary school	206
2	Middle school	130
3	High school	46
4	Higher secondary school	35
Total		417

3.4.1 Students Enrolment and Attendance

During the academic year 2024-25, the total enrolment of the students in the Chennai schools stands at 1,12,788. To improve students attendance, various initiatives, such as the Chief Minister's Breakfast Scheme and Happy Classrooms have been implemented. To improve students' attendance, every year cash award of Rs.1,000/- is given to students who secure 100% attendance in the academic year.

To increase the students' enrolment in Greater Chennai Corporation, the following initiatives were introduced:

- Students studying in standards 1 to 12 are given ID cards to ensure their safety and to enhance the self confidence among the students.
- Students studying in 4th and 5th standards were taken to significant sites as an educational tour to make them know their city Chennai well and feel proud about it.

In order to develop the students' interest in sports and to motivate them to participate in various sports competitions, all the Primary, Middle, High and Higher Secondary Schools were given sports materials.

3.4.2 Areas of Special Focus

The goal of the 'Ennum Ezhuthum' mission is to ensure that by 2025, all students of classes 1 to 5 in government schools in Tamil Nadu can read with comprehension and possess basic arithmetic skills. Hence, the Greater Chennai Corporation has taken significant steps to implement the Ennum Ezhuthum program in all its Primary and Middle Schools with the aim of enhancing the quality of teaching and learning.

To enhance the ambience of the classrooms and to keep the classrooms dust free, all Greater Chennai Corporation Primary and Middle Schools are provided with green boards.

In Greater Chennai Corporation schools, Girls students studying from 6th standard to 9th standard are being trained in Karate in order to groom them with confidence and courage.

In Greater Chennai Corporation schools, as an appreciation, the first 50 rank-holding students in 10th standard Public Examination in across all Chennai schools were taken on an educational tour to ISRO Mahendragiri and Nuclear Power Plant – Kudankulam. This was a great learning experience for these students.

Greater Chennai Corporation has introduced bridge courses to the students in all Chennai schools across all subjects during the first two months of every academic year to address learning gaps that arise due to summer vacation.

Greater Chennai Corporation schools effectively utilize the libraries, encouraging

students to borrow books to take home. Students are motivated to draw, speak, extempore and write about the topics they read in the library books.

3.4.3 Community Colleges and ITI

The Greater Chennai Corporation runs two community colleges from the Educational year 1999 – 2000.

(a) Community College East (Alwarpet)

In this Community College, training offered to the students under the following categories in 2024-25:

- Computer Software
- GST Tally
- Bakery and Confectionery
- Diploma in Health Assistant
- Diploma in Lab Assistant.
- Diploma in Dialysis
- Diploma in Theater Assistant

(b) Community College (Purasaiwalkam)

Three-month training courses are offered to the women under the following categories in 2024-25,

- Computer Software
- Tailoring
- Beautician

Additionally, the Greater Chennai Corporation operates an Industrial Training Institute (ITI) in Zone-9, affiliated with the National Council of Vocational Training (NCVT). This institute offers various skill development courses such as Plumber, Fitter, Mechanic, Electrician, Motor Mechanic, computer operator and programming assistant. After completion of these courses, trainees are provided with job opportunities in various industries through the institutes placement support.

3.4.4 Vocational Training Center for Mentally Retarded Students

A vocational training center for mentally retarded children above 18 years of age has been started at Avadhana Pappaiya Road, Chennai Middle School, Choolai, Chennai from the year 2015-16.

At this center, training in skills such as making mats, weighing, and basket weaving

have been provided to at least 20 students every year since the 2015-2016 academic year.

3.4.5 Chennai Special School for the Students with Muscular Dystrophy

In Thousand Lights, Chennai Special School for the students affected by Muscular Dystrophy, 14 students are receiving multidisciplinary training in painting and music along with their regular education.

3.4.6 Gender clubs

The Gender and Policy Lab (GPL) is an initiative by the Greater Chennai Corporation (Greater Chennai Corporation) aimed at making the city safer for women and promoting gender mainstreaming. The Gender and Policy Lab's goal is to improve women's access to opportunities by enhancing safety and gender responsiveness in public spaces and transportation. Gender clubs are an extension of this initiative, train the students on topics such as gender roles, adolescence, healthy relationships, gender equity, gender-based violence etc. The program has been launched in all Middle, High and Higher secondary schools

with each club consisting of 30 students per school.

3.4.7 Community outreach and Student counseling

In 2024-25, 10 dedicated psychological counselors have been appointed to provide necessary psychological counseling to students to address their psychological problems.

3.5 Vada Chennai Valarchi Thittam

The Tamil Nadu Government has launched ambitious Scheme "Vada Chennai Valarchi Thittam", aimed at ensuring balanced and equitable development across all regions of Chennai city to uplift the underdeveloped areas and integrate them into the city's growth trajectory. The infrastructure projects are under implementation in the North and Central Region of the Greater Chennai Corporation.

Under "Vada Chennai Valarchi Thittam", the Greater Chennai Corporation has taken up 105 projects at a estimated cost of Rs.1,159.60 crore, out of which, 66 projects at a estimated cost of Rs.921.43 crore are under various stages of implementation with funds tied

up under various schemes, namely, Singara Chennai 2.0, National Clean Air Program, Namakku Naame Thittam, AMRUT 2.0, Member of Parliament Local Area Development Fund, CITIIS, Swachh Bharat Mission , Infrastructure and Amenities Fund, Member of Legislative Assembly Constituency Development Scheme Fund and the own funds of Greater Chennai Corporation. Further, 39 projects at a cost of Rs.238.17 crore have already been tied-up under Chennai Metropolitan Development Authority funds.

Out of the total of 105 number of works, 27 works have been completed at an estimated cost of Rs.35.78 crore and the balance works are under progress.

3.6 Singara Chennai 2.0

During the year 2021-22, the Government of Tamil Nadu launched the "Singara Chennai 2.0" scheme to provide modern civic infrastructure and services in Greater Chennai Corporation. A sum of Rs.500 crore was allocated each year during the years 2021-22,

2022-23, 2023-24 and 2024-25. The abstract of the projects taken up in Greater Chennai Corporation under the scheme during the three financial years, are given in tables 3.23, 3.24, 3.25 and 3.26.

Table 3.23

4. Commissionerate of Town Panchayats

Town Panchayats are medium and small towns under Municipal Administration and Water Supply Department. According to Section 243 Q of the Indian Constitution, these towns are categorized as Town Panchayats in Tamil Nadu. These Town Panchayats play a significant role in the economic development of nearby villages, such as providing market facilities, employment etc.

Moreover, people working in big cities often seek their residence in these medium towns. Many Town Panchayats serve as economic hubs, tourist places and significant temple towns with heritage importance. Therefore, it is essential to develop these medium and small towns with proper basic amenities and robust infrastructure as a key economic activity.

Tamil Nadu has a total of 487 Town Panchayats, covering an area of 5,948.291 square kilometers, with a total of 7,576 wards. The current population of these Town Panchayats is approximately 78,87,523.

The primary responsibilities of Town Panchayats include developing basic infrastructure, providing essential services like drinking water and sanitation to the public and ensuring an improved quality of life by creating and enhancing a healthy environment.

4.1 Administration

There are 487 Town Panchayats in the 37 districts excluding Chennai district. The Head of the Department is the Commissioner of Town Panchayats. The Town Panchayats in 37 districts are divided into 17 zones and each zone is administered through the Assistant Director of Town Panchayats. The activities of the Town Panchayats are overseen by the Executive Officers of Town Panchayat. The concerned District Collectors provide necessary guidance and monitor the functioning of the Town Panchayats.

(*As per G.O.(Ms)No.15, Municipal Administration and Water Supply Department, dated 05.02.2025, three Town Panchayats namely Sriperumbudur, Mamallapuram and Thiruvaiyaru have been upgraded to Municipalities.

Accordingly, 29 Village Panchayats have been proposed to be upgraded as 25 Town Panchayats vide G.O.(Ms)No.204, Municipal Administration and Water Supply Department, dated 31.12.2024 and 29 Village Panchayats have been proposed to be merged with existing nearby 25 Town Panchayats vide G.O.(Ms)No.205, Municipal Administration and Water Supply Department, dated 31.12.2024.

As per G.O.(Ms)No.142, Municipal Administration and Water Supply Department, dated 21.11.2014, the Town Panchayats have

been classified into 4 categories based on the annual income of the Town Panchayats and the details are provided in the following Table 4.2.

Table 4.2

Classification	Annual Income	Number of Town Panchayats
Special grade	Above Rs.2 Crore	60
Selection grade	From Rs.1 Crore upto Rs.2 Crore	178
First grade	From Rs.50 Lakh upto Rs.1 Crore	190
Second grade	Below Rs.50 Lakh	59
	Total	487

4.1.1 Posts Creation in Town Panchayats

As per the norms fixed for all the Town Panchayats vide G.O(Ms)No.23, Municipal Administration and Water Supply Department, dated 21.02.2024, 1891 new posts were created. In order to fill up the following 428 posts, including vacancies and newly created posts in the Town Panchayats, competitive examinations have been conducted by the Anna university for direct recruitment and the results of the examination have been published and steps are being taken to issue the

appointment order by following due procedure and the details are provided in the following Table 4.3.

Table 4.3

Sl. No	Name of the Post	No. of vacancies to be filled by direct recruitment
1	Assistant Engineer	25
2	Overseer	113
3	Work Inspector	60
4	Junior Engineer (Planning)	153
5	Sanitary Inspector	77
	Total	428

4.2 Functions of Town Panchayats

The 74th Constitutional Amendment Act was introduced in 1992. Accordingly, the following 18 functions are defined for Urban Local Bodies. Some of these functions are carried out directly by the Town Panchayats, while some are executed by other related departments.

1. Regulation of Land use and construction of buildings.
2. Roads and bridges.
3. Water supply for domestic, industrial, and commercial purposes.

4. Public health, sanitation conservancy and solid waste management.
5. Urban forestry, environmental protection and enhancement of environmental features.
6. Protection of the welfare of marginalized sections of society, including persons with disabilities and mentally challenged individuals.
7. Provision of urban amenities such as parks, gardens and play grounds.
8. Provision of Cremation shed, burial grounds, cremation platforms and Modernised Gasifier Crematoriums.
9. Key statistical details, including birth and death registrations.
10. Street lighting, vehicle parking spaces, bus stands and other public amenities.
11. Regulation of slaughter houses and tanneries.
12. Urban planning / Town planning.
13. Planning for economic and social development.
14. Fire services.
15. Slum improvement.

16. Urban poverty alleviation.
17. Promotion of cultural, educational and aesthetic features.
18. Animal Feed, Prevention of cruelty to animals.

4.2.1 Revenue Sources

The most significant source of revenue for the Town Panchayat is property tax. Additionally, revenue is generated through sources like professional tax, non-tax, water charges, surcharges on stamp duties. State Government devolution funds and grants from the Central Finance Commission are equally important.

4.2.2 Water Supply

Town Panchayats are taking various efforts to provide protected water supply to all households in their jurisdiction. These include regulating the water supply, ensuring the provision of prescribed quantity of water to all, augmentation of additional water sources, construction of overhead tanks for sufficient storage, replacing the damaged pumping main

and distribution pipelines and extension of water supply pipelines in Town Panchayats.

In all Town Panchayats, water is supplied to the public at the rate of 70 litre per capita per day (LPCD), while in Town Panchayats with Under Ground Sewerage Systems (UGSS), action is being taken to provide water supply at the rate of 135 liters per person per day. Out of the total 487 Town Panchayats, 325 are supplied with drinking water through the Combined Water Supply Schemes maintained by TWAD Board. The remaining Town Panchayats provide water supply through local sources. Currently, 42% of households have their household water connections. The goal is to provide functional household tap connections to all households, ensuring universal access to drinking water.

Key activities of Town Panchayats include augmenting and maintaining water sources, restoring ponds and wells, reusing of recycled treated water and also establishment of new rainwater harvesting arrangements and restoration of existing rain water harvesting structures etc., in all types of buildings through

community contributions are important for achieving sustainable water economics.

Major water-related reforms envisaged in Town Panchayats include accessing 20% of water requirements from treated and recycled water, reduction of non revenue water below 20% and restoring water bodies.

Under the AMRUT 2.0, 157 water supply projects at a total estimated cost of Rs.3482.92 crore are being implemented. Additionally, 21 water supply improvement projects at a total estimated cost of Rs.132.80 crore are being taken up under Kalaingar Nagarpura Mempoattu Thittam for the year 2024-25. Once these projects are completed, the number of household connections in Town Panchayats will increase significantly.

4.2.3 Roads

Roads are important not only for transportation but also plays a key role in connecting cities and villages and play a significant role in enhancing the economy of these areas. Improved surface of the road is

necessary for making them suitable for use by vehicles and pedestrians.

Further, most of the roads were damaged due to execution of water supply schemes, under ground sewerage schemes, gas pipes, telecom cables and also natural calamities. Particularly in Town Panchayats, transitional body from rural to urban acting as the market hub for selling agricultural produce of the adjoining rural areas using the roads. Hence, conversion of earthen road to all weather roads by formation and restoration and improvement of roads damaged is necessary for improving the quality of urban community.

Town panchayats in the State is maintaining various types of roads with a total length of 20,306.14 kilometers. The types of roads are provided in Table 4.4.

Table 4.4

Types of Road	Length
BT Roads	11,156.31 km
Cement Roads	5,121.16 km
Paver Block Roads	1,037.27 km
Earthen Roads	2,807.05 km
Metal Roads	127.26 km
Gravel Roads	57.09 km
Total	20,306.14 km

In the year 2021-22, 998.78 km of roads were upgraded with an estimated cost of Rs.658.06 crore under various schemes and about 1,261.37 km of roads were upgraded with an estimated cost of Rs.819.21 crore during the year 2022-23. In the year 2023-24, 1,463.84 km of roads have been taken up for improvement with an estimated cost of Rs.859.68 crore and in the year 2024-25, 1,149.64 km of roads are being upgraded with an estimated cost of Rs.720.79 crore. The remaining roads will be gradually upgraded in a phased manner.

In the last four years, 1,789.21 km of earthen roads are converted and upgraded into all weather roads with an estimated cost of Rs.1,306.14 crore. Additionally, 3,084.41 km of existing damaged roads have been taken up for the restoration and improvement with an estimated cost of Rs.1,751.61 crore. The details are provided in Table 4.5.

4.2.4 Street Lighting

Street lights in Town Panchayats play a crucial role in ensuring public safety and preventing accidents. In 487 Town Panchayats across Tamil Nadu, about 4,12,128 street lights are maintained.

To preserve the environment and reduce the maintenance costs for street lights, steps have been taken to convert the existing conventional street lights with energy-efficient LED lights in the Town Panchayats. Under the State Urban Infrastructure Development Fund, Rs.155.56 crore has been allocated for the conversion of 2,66,953 lights into energy efficient LED lights. As of today, 2,60,222 lights have been converted and the remaining works are in progress.

4.2.5 Bus Stands

Bus Stands in small and medium towns like Town Panchayats not only facilitate public transportation but also boost local business activities. In Town Panchayats, about 203 Bus Stands of different classification like B, C and D types are maintained. These Bus Stands are

either newly constructed or renovated under various schemes such as the Kalaingar Nagarpura Mempattu Thittam, Capital Grant Fund and Operation and Maintenance Gap Filling Fund.

Under Kalaingar Nagarpura Mempattu Thittam (KNMT) in the year 2021-22, 10 Bus Stands at an estimated cost of Rs.44.69 crore were sanctioned and 21 Bus Stands were improved under the Operation and Maintenance Gap Filling Fund, for Rs.5.44 crore.

During the financial year 2022-23, 13 Bus Stands have been sanctioned for Rs.22.13 crore under KNMT and Capital Grant Fund. In addition to that, 15 Bus Stands have been taken up under Operation and Maintenance Gap Filling Fund, costing Rs.6.79 crore. In the year 2023-24, 7 Bus Stands at an estimated cost of Rs.12.28 crore under KNMT was sanctioned.

During 2024-25, 14 Bus Stands have been taken up at an estimated cost of Rs.39.25 crore under Kalaingar Nagarpura Mempattu Thittam (KNMT) and 3 Bus Stands under Operation and Maintenance Scheme at an estimated cost of Rs.1.81 crore for improvement.

In the past four years, 83 new Bus Stands and improvement works to the existing Bus Stands have been undertaken at a cost of Rs.132.39 crore.

4.2.6 Shandies

Markets are very essential in facilitating the availability of essential commodities at lower prices, locally produced goods and enabling farmers from nearby villages to market their agricultural products. These markets not only serve as places for buying and selling goods, but also contribute to the economic vitality, social and cultural development of Town Panchayat areas.

Thus, the economy of Town Panchayats and surrounding rural areas is enhanced. Every year, new markets are established under the Kalaigiar Nagarpura MEMPATTU Thittam and Capital Grant Fund. Similarly, existing markets are being renovated under the Operation and Maintenance Fund. In the past four years, a total of 83 Market Development Works have been taken up at a cost of Rs.160.93 crore.

4.3 Sanitation

Creating and maintaining a clean and healthy environment in Town Panchayats is a core responsibility. Various measures have been taken to create a healthy community.

To achieve the goal of eliminating open defecation, funding has been provided for the construction of Individual Household Latrine, community toilets and public toilets. Till date, 36,581 individual toilets have been sanctioned under the Swachh Bharat Mission 2.0. Of these, 31,999 individual toilets have been completed and put into use, with the remaining works in various stages of progress. In areas where individual toilets could not be built due to lack of available land, community toilets (CTs) have been constructed. A total of 3,404 seats have been sanctioned for the construction of 378 community toilets, of which 220 have been completed and functional. Remaining works are in progress at various stages. Additionally, 50 public toilets with 385 seats have been sanctioned for construction in the year 2022-23, of which 49 have been completed and are

operational, while the remaining 1 is nearing completion.

Under 15th CFC grants, Rs.9.27 crore has been sanctioned for renovation of 204 community toilets in 160 Town Panchayats and all the works have been completed. Special attention is given for maintaining community and public toilets which are equipped with QR codes to address their feed back and other grievances of the public.

In the year 2024-25, Rs.15.40 crore has been sanctioned for renovation of 235 community toilets. An additional amount of Rs.3.31 crore has been allocated for the renovation of 48 public toilets.

4.3.1 Battery Operated Vehicles

Sanitation workers are facing difficulty in using the manually operated push carts and tricycles and also a challenge in efficient waste collection mechanism. To address the shortfall in primary waste collection, sanitation workers sometimes need to increase their workload, including extra trips. To improve the operations on Solid Waste Management (SWM) and

enhance workers' confidence and dignity, Town Panchayats have decided to purchase Battery Operated Vehicles (BOVs) with higher capacity. These electric vehicles are being purchased in place of manual push carts and tricycles due to their higher lifespan and minimum repair requirements.

A total of 3,069 Battery Operated Vehicles have been sanctioned of which 2,995 have been purchased and put into use. The remaining vehicles are in the process of procurement.

4.3.2 Solid Waste Management

Solid Waste Management plays a significant role in maintaining environmental cleanliness and protecting human health. As per the Solid Waste Management Rules, 2016, all Town Panchayats are carrying out Solid Waste Management activities. In support of this effort, the Government has prioritised for improvement in existing infrastructure.

Across 487 Town Panchayats, approximately 1,840 metric tons of waste is generated daily, including 998 metric tons of wet

waste, 709 metric tons of dry waste and 133 metric tons of inerts. 59 Town Panchayats that produce 5 metric tons and above quantity of waste per day have received necessary consent from the Tamil Nadu Pollution Control Board for processing their solid waste.

At present, most of the Town Panchayats use Battery Operated Vehicles (BOVs) for carrying out door-to-door collection of solid waste. Route charts have been prepared and structured for every vehicle for efficient waste collection. At present, 96% of households in Town Panchayats have been covered under the door-to-door collection. Efforts are focused on increasing the home composting to the remaining gaps. Recyclable dry waste is sold to vendors, while non-recyclable waste is sent to cement factories for co-processing. A total of 14,583 outsourced workers and 4,975 sanitation workers are involved in waste collection including segregation of waste to ensure the efficient cleaning of streets and solid waste collection.

Between the financial years 2022 and 2025, Rs.83.38 crore has been allocated to 409 Town Panchayats for managing 725 metric tons of wet waste and Rs.30.92 crore for 391 Town Panchayats to handle 547 metric tons of dry waste. Of which 338 dry waste processing projects (597.5 metric tons) have been completed and remaining 71 (127.5 metric tons) are in progress. 288 composting centers (409.50 metric tons) have been completed and the balance 103 are (137.50 metric tons) in progress at various stages.

4.3.3 Organic / Vermi Composting

Waste collected from Town Panchayats is transported to Composting Centres and Resource Recovery Parks where it is segregated further. Organic waste such as fruits, vegetables and leaves are converted into manure and vermi compost. On an average, daily about 100 to 150 metric tons of organic compost is produced, and 249 Town Panchayats produce 15 to 20 metric tons of vermi-compost daily. Revenue

of approximately Rs.40 to 45 lakh is generated annually from the sale of the compost.

4.3.4 Used Water Management

Town Panchayats places great importance on Water Management to preserve the environment. To ensure that untreated sewage and effluent waste are not discharged into open areas, Sewage Treatment Plants (STPs) and Fecal Sludge Treatment Plants (FSTPs) are being established. These treatment centers focus on safe waste collection, transportation, and increased reuse.

To expand the usage of STPs and FSTPs across the state, Town Panchayats are working on identifying land and preparing Detailed Project Reports (DPRs).

4.3.5 Underground Sewerage Schemes (UGSS)

Underground Sewerage Schemes in Orathanadu, Vallam, S.Kannanoor, Velankanni, Perundurai, Palanichettipatti, Thirumazhisai, Mannachanallur, Melachokkanathapuram and Thiruporur have been successfully completed and are operated in 10 Town panchayats.

4.3.6 Faecal Sludge and Waste Water Management

Currently, 10 Faecal Sludge Treatment Plants (FSTPs) are operational in Town Panchayats and FSTPs at Karunguzhi and Periyanaickanpalayam have proven to be successful, serving as models for other Urban Local Bodies (ULBs). These Treatment Plants are visited by faculties, students from educational institutions, officials from other States and also the public for improving their technical knowhow.

An integrated approach is being followed to establish Waste Water Treatment Plants in the State. The Town Panchayats have been divided into clusters and this scheme is being implemented. So far, approval was obtained for 9 Sewage Treatment Plants and 43 Sewage Treatment Plants cum Faecal Sludge Treatment Plants under the Swachh Bharat Mission 2.0. Furthermore, it involves coordinating Urban Local Bodies and Rural Local Bodies for highly efficient operations. Additionally, efforts to identify land are continuously being carried out across the state in various districts. To prevent

manual cleaning of septic tanks, 185 Town Panchayats have been granted permission to procure 185 cess pool vehicles and the procurement process is underway.

4.3.7 Toll-Free Helpline (14420)

The Toll-Free Helpline Number 14420 has been established in Tamil Nadu to report sanitation-related complaints and services such as cleaning of septic tanks, maintaining underground drainage systems and any manual cleaning operations.

4.4 Gasifier Crematoriums

Since traditional cremation methods involve the use of firewood in cremation grounds, which increase the carbon levels in the atmosphere, leading to environmental damage, gasifier crematoriums are being established in Town Panchayats to preserve the environment.

25 Modern Gasifier Crematoriums have been established and are operational. Additionally, in the year 2021-22, 34 Gasifier Crematoriums were sanctioned with an estimated value of Rs.50.35 crore and all works have been completed. In the year 2022-23,

37 Gasifier Crematoriums were established with an estimated value of Rs.51.95 crore. Out of these, 34 projects have been completed and the remaining works are ongoing. For the year 2023-24, 28 Gasifier Crematoriums have been sanctioned with an estimated value of Rs.44.70 crore. Out of these, 23 projects have been completed and the remaining works are under progress. Furthermore, for the year 2024-25, Rs.38.22 crore was allocated for establishing 25 Gasifier Crematoriums. These Gasifier Crematoriums are maintained through Trusts, NGOs / Charitable Organizations as well as by some Town Panchayats.

4.5 Environmental Improvement through Urban Greening

A healthy, green environment plays a crucial role in human well-being. Therefore, managing and maintaining the environment efficiently is an essential task for everyone. To improve and protect the environment, various measures are being taken including tree plantation by the Town Panchayats.

Encouragement is being given for planting traditional trees such as Mango, Jackfruit,

Guava. Steps are being taken to plant valuable trees like Teak, Ebony and Tamarind in Town Panchayat, to strengthen the banks of water bodies such as lakes and ponds, the planting of palm trees around the banks is being encouraged. So far, 5,85,567 saplings have been planted in Town Panchayats.

4.5.1 Renovation of Water Bodies

Water bodies play an important role in water management within Town Panchayats. Therefore, restoration by renovating the existing water bodies in Town Panchayats is a crucial task. Renovating water bodies involves desilting, cleaning, restructuring the pathways and channels for rain water to enter, planting trees along the banks and fencing to prevent encroachments. Through this process, the quality of water improves and the depletion of groundwater is also prevented.

2,212 water bodies are maintained by Town Panchayats in which 1,182 have already been renovated. Efforts have been made to renovate 830 out of the remaining 1,030 water bodies. Among these 830, the renovation of 658 water bodies have been completed and

brought into use. The remaining works on the 172 water bodies are in progress at various stages. The remaining 200 water bodies will be renovated gradually. Details are provided in Table 4.6.

Table 4.6

(Rs. in crore)

S. No.	Year	Project Name	Number of Works	Estimated Amount
1	2021-22	Kalaigiar Nagarpura Mempoitu Thittam (KNMT)	11	14.83
2		Namakkii Name Thittam (NNT)	6	0.37

14		Kalaingar Nagarpura Mempattu Thittam (KNMT)	34	14.52
		Total	830	259.16

4.5.2 Parks

The urban parks created in Town Panchayats serve as indicators of the quality of life for the local population. These parks offer various benefits such as improving air quality, controlling noise and air pollution, enhancing biodiversity and mitigating climate change on a smaller scale.

Out of 536 parks in Town Panchayats, improvement works in 160 parks have been completed in 2022-23. In 2023-24, development works for 202 parks were undertaken, with 151 of those completed, while the remaining works are in progress at various stages.

4.5.3 Rainwater Harvesting

Under the Urban Local Bodies Act, 1998 and Building Regulations, Rainwater Harvesting has been made mandatory in every building. This has had a significant impact on replenishing groundwater levels across the state. Efforts are focused on refurbishing existing rainwater harvesting structures in Government and private buildings and creating new ones. Town Panchayats continue to take various steps to raise awareness among the public regarding the importance of rainwater harvesting.

4.6 Union Government Schemes

4.6.1 Swachh Bharat Mission 2.0 (SBM 2.0)

Under the Swachh Bharat Mission 2.0 for the financial year 2021-22, a total of 7,295 Individual Household Latrines (IHHLs), 100 community toilets with 847 seats and 75 urinal toilets with 450 seats have been approved. Additionally, for the 2022-23 financial year, a total of 27,900 individual household latrines, 90 community toilets, 50 public toilets and 38 urinal toilets have been approved. In 2023-24, 1,386 individual household toilets

(IHHL) and 73 community toilets were approved. For the 2024-25 financial year, 115 community toilets and 72 urinal toilets were approved.

Of these, 31,999 individual household toilets, 220 community toilets, 49 public toilets, 113 urinals, 108 retrofitting of the existing community toilets and 27 retrofitting of existing public toilets have been completed and the remaining works are in progress.

4.6.2 Bio-Mining of Legacy Waste at Dumping Sites

The process of recovering waste-filled dumps is currently being carried out through Bio-Mining. In 131 Town Panchayats, a total of 147 projects have been identified to recover old and abandoned waste dumpsites through bio-mining remediation. These sites cover an area of 257 acres and contain approximately 11.4 lakh cubic meters of legacy waste. The total estimated cost for removal of legacy waste is Rs.76.32 crore. Bio-mining activities have been successfully completed in 86 Town Panchayats (covering 96 projects), resulting in the removal of 7.68 lakh cubic meters of legacy waste and the reclamation of 149 acres of land.

The remaining 51 bio-mining projects are in progress at various stages. The Centre for Environmental Studies at the Anna University campus in Chennai provides technical guidance for bio-mining activities.

4.6.3 Pradhan Mantri Awas Yojana (Urban) [PMAY (U)]

The Pradhan Mantri Awas Yojana is being implemented with the funding from both the Union and State Governments to benefit the marginalized and middle-class sections of the Town Panchayats. Under the Pradhan Mantri Awas Yojana, the fourth component, which is for beneficiaries to build their own houses, is being carried out by the Town Panchayats. Each selected house under this scheme is allocated Rs.2.10 lakh, with Rs.1.50 lakh provided by the Union Government and Rs.0.60 lakh by the State Government. Any additional costs above the subsidy for construction of house will be borne by the beneficiary. At the State level, the Tamil Nadu Urban Habitat Development Board functions as the Nodal agency for coordinating this scheme.

A total of 89,790 houses have been approved under this scheme, out of which 70,578 houses have been completed. The remaining 19,212 houses are in various stages of progress and will be completed soon.

4.6.4 National Urban Livelihood Mission (NULM)

Under NULM's seven components, the Town Panchayats Department is only involved in two aspects: Shelters for the Homeless in Urban Areas (SUH) and Support to Urban Street Vendors (SUSV).

1. Homeless Shelters

38 shelters have been sanctioned for construction and all shelters have been completed and put into beneficial use. Out of which, 3 regular shelters and 35 special shelters for use of attendants of in-patients in Government hospitals.

2.(a) Support to Urban Street Vendors (SUSV)

A new census regarding street vendors in Town Panchayats has been conducted to create

an environment for smooth business operations and upto date 51,153 identity cards have been issued. An amount of Rs.2,57,18,340/- has been allocated for conducting the census, issuing identity cards and forming street vendor groups. Additionally, 228 mobile carts have been provided to street vendors in Velankanni Town Panchayats at an estimated cost of Rs.1,88,34,000/-.

(b) PM-SVANidhi

The Pradhan Mantri Street Vendors Atmanirbhar Nidhi (PM-SVANidhi) Scheme was launched to provide financial assistance to Street Vendors. By providing an unsecured capital loan of Rs.10,000/- to Street Vendors, this Scheme has contributed to their immediate finances and business improvement.

Under this scheme, till date, 1,08,359 loan applications have been uploaded on the portal. Of these, 78,193 loan applications have been approved and loans have been provided to 76,292 applicants. Additionally, Town Panchayats in collaboration with Banks, regularly

organize Meetings at the Regional level to help beneficiaries avail the loan assistance.

4.6.5 15th Finance Commission – National Health Mission Grant

Funds are being allocated for the construction of Primary Health Centres, Block Public Health Unit and Health Sub Centres in urban areas, as per the recommendations of the 15th Finance Commission.

In 2021-22, 42 works were sanctioned with an allocation of Rs.21.00 crore and all works have been completed.

In 2022-23, Rs.11.10 crore was allocated for 24 works out of which 12 works have been completed and 12 works are in progress at various stages.

During the year 2023-24, 69 works were approved with an allocation of Rs.38.45 crore, with 20 completed and the remaining 49 works are in progress at various stages.

In the financial year 2024-25, administrative approval has been accorded for 57 works with a budget of Rs.40.15 crore and all

these works are being carried out at various stages.

4.7 State Government Schemes

4.7.1 Kalaingar Nagarpura Mempoitu Thittam (KNMT)

The aim of this scheme is not only to create basic infrastructure facilities in Town Panchayats but also to create capital assets such as Bus Stands, Markets, and Knowledge Centers in Town Panchayats.

Every year Rs.500 crore is allotted for Town Panchayats under the scheme. In 2021-22, various works including the conversion of Earthen Roads to BT, Cement and Paver Block Roads, Bus Stands, Markets and other public facilities have been taken up at an estimated cost of Rs.473.42 crore. Out of 800 works, 798 works were completed with the remaining 2 works in progress at various stages.

Sanction has been accorded for the year 2022-23 to take up 15 Shandies, 11 Bus stands, 35 Crematoriums, 3 Water Bodies, 1 Park improvement work, 1 Community Hall and 223 Road Works at a total estimated cost of

Rs.495.84 crore, including fund tie-up for water supply projects taken up under AMRUT 2.0. Out of these, 285 works have been completed and the remaining 4 works are in progress at various stages.

During the year 2023-24, sanction has been accorded for taking up 9 shandies work, 7 bus stands, 26 crematoriums, 50 water bodies, 63 park improvement works, 74 storm water drains & culverts, 208 road works, 2 knowledge centers and battery-operated vehicles, at a total estimated cost of Rs.495.00 crore, including fund tie-up for the water supply projects taken up under AMRUT 2.0 schemes. Out of these, 391 works have been completed and the remaining 49 works are in progress at various stages.

Sanction has been accorded for the year 2024-25 to take up 30 shandies work, 14 bus stands, 25 crematoriums, 34 water bodies, 1 park improvement work, 5 storm water drains, 1,269 road works, 6 Bridges, 21 water supply works and 3 Padithurai works at an estimated cost of Rs.497.50 crore. Out of these, 626 works have been completed and the remaining

782 works are in progress at various stages. In the forthcoming years, more infrastructure works will be taken up.

4.7.2 Namakku Namme Thittam (Urban)

In urban areas, public participation is essential for creating and maintaining infrastructure facilities. Therefore, Town Panchayats are effectively implementing this scheme which encourages public contribution and fosters a sense of self-reliance.

In 2021-22, 522 works were taken up in Town Panchayats, with an estimated value of Rs.57.28 crore, with public contributions of Rs.20.03 crore and Government contributions of Rs.37.25 crore. All projects were completed. In 2022-23, 429 works were undertaken at an estimated cost of Rs.49.58 crore, with public contributions of Rs.16.34 crore and Government contributions of Rs.33.24 crore. 426 works were completed and 3 works are ongoing.

In the year 2023-24, 337 projects have been undertaken at a total cost of Rs.41.44 crore, with a public contribution of Rs.11.98 crore and Government contribution of

Rs.29.46 crore. Among these, 304 works have been completed and the remaining 33 works are at various stages of implementation.

4.7.3 Tamil Nadu Urban Employment Scheme

The aim of this scheme is to provide employment opportunities to the marginalized communities in Town panchayat areas and through this, create public assets. As a result, the livelihoods of these people improve and gain social security.

This scheme was implemented as a pilot project in 37 Town Panchayats in Tamil Nadu. Under this scheme, every household in these 37 Town Panchayats was surveyed and eligible beneficiaries were identified. Job cards were issued to the identified beneficiaries on behalf of the respective Town Panchayats.

Under this scheme, 192 projects were carried out, including the renovation of ponds, planting of saplings, construction of drains and the creation of rainwater harvesting systems. So far, 8,43,951 man days have been generated and 66,312 beneficiaries have benefited from it.

Due to the successful implementation of this scheme in Town Panchayats, in the year 2023-2024, the Government expanded the scheme to an additional 50 Town Panchayats. Currently, the scheme is being implemented in 87 Town Panchayats and administrative sanction has been accorded for 315 projects costing Rs.35.75 crore. Of these, 133 projects have been completed and the remaining projects are in progress.

4.7.4 NABARD – National Bank for Agriculture and Rural Development

With the assistance of NABARD, the Roads and Bridges constructed in Town Panchayats not only connect rural areas but also provide livelihood opportunities for the local people. These Roads and Bridges help in the swift marketing of agricultural produce, thereby creating opportunities and an environment for economic development.

In the financial year 2021-22, 191 Roads and 11 Bridges, with an estimated value of Rs.200.70 crore was taken up and all the works have been completed.

In 2022-23, approval was given for 159 Road works at an estimated cost of Rs.200.70 crore in 150 Town Panchayats. Of these, 158 projects have been completed and the remaining 1 work is in progress.

For the year 2023-24, 164 projects at an estimated cost of Rs.200.70 crore have been taken up in 134 Town Panchayats. All the works have been completed.

In the year 2024-25, Administrative Sanction has been accorded for 10 Bridges in 9 Town Panchayats at an estimated cost of Rs.16.66 crore and 136 Road works in 135 Town panchayats at an estimated cost of Rs.183.34 crore totalling to Rs.200 crore.

4.7.5 Capital Grant Fund

The goal of this scheme is to reduce the financial burden on Town Panchayats for creating infrastructure facilities. Under this scheme, infrastructure facilities such as Bridges, Culverts, Storm Water Drains, Modernization of Bus stands and parks are being developed.

In the year 2021-22, Rs.223.16 crore was allocated for 172 works and all works were

completed. In the year 2022-23, 156 works were taken up with an estimated value of Rs.178.87 crore and Rs.182.88 crore was allocated for 133 works in the year 2023-24 of which 105 works have been completed and the remaining 28 works are in progress at various stages. For the year 2024-25, 146 works have been sanctioned at a cost of Rs.198.00 crore of which 21 works have been completed and the remaining 125 works are in progress.

4.7.6 Operation and Maintenance Gap Filling Fund

Taking into account the financial burden in the Operation and Maintenance of Capital Infrastructure in Town Panchayats, Gap Filling Funds are allocated under this scheme.

In the financial year 2021-22, 366 works were undertaken with an estimated value of Rs.74.39 crore and all the works have been completed. In the year 2022-23, 153 works with an estimated value of Rs.66.16 crore were undertaken of which 150 works were completed and the remaining 3 works are in progress. In the year 2023-24, 151 works at an estimated cost of Rs.72.60 crore were undertaken, with

150 works completed and the remaining 1 work is in progress. In the year 2024-25, 102 works at an estimated cost of Rs.79.20 crore were undertaken, of which 5 works have been completed and the remaining 97 works are in progress at various stages. Additionally, funds are earmarked for water and EB charges due to the Tamil Nadu Water Supply and Drainage Board and the Tamil Nadu Electricity Board for the financially weak Town Panchayats.

4.7.7 Tamil Nadu Urban Road Infrastructure Fund (TURIF)

The roads get damaged due to natural calamities as well as during activities like drainage and water supply works. Therefore, it is essential to repair the damaged roads to ensure smooth traffic flow.

In the year 2021-22, 175 Road works were carried out over a length of 122.72 km, with an estimated cost of Rs.82.99 crore. All the works were completed and are put into use.

In the year 2022-23, 144 Road works were initiated over a length of 154.991 km, with an

estimated cost of Rs.105.48 crore. All the works were completed. Additionally, 107 Road works under the savings and interest fund of this project were carried out over a length of 110.02 km with an estimated cost of Rs. 74.26 crore. All the works were completed.

In the year 2023-24, 168 Road works were taken up over a length of 218.37 km with an estimated cost of Rs.105.48 crore. All the works were completed.

In the year 2024-25, 595 Road works were undertaken over a length of 139.26 km, with an estimated cost of Rs.103.96 crore. Of these, 141 works have been completed and the remaining 454 works are in progress. Under the savings fund for the year 2023-24 and 2024-25, 191 Road works were taken up for a length of 44.168 km with an estimated cost of Rs.32.686 crore. All these works are in progress at various stages.

4.7.8 Nagarpura Salaigal Mempattu Thittam (NSMT)

Roads are not only essential for transportation but also serve as a key factor in connecting cities and villages, thereby boosting their economic development. In 487 Town Panchayats, various types of roads spanning approximately 20,306.14 kilometers are being maintained.

Roads face damage due to various factors like wear and tear, road age and natural calamities such as floods, cyclones and heavy rainfall. Roads are also damaged by water supply schemes and underground sewerage schemes carried out by Urban Local Bodies and the Tamil Nadu Water Supply and Drainage Board. Roads are essential to enhance the economic activities of the urban areas. Hence, to ensure the road infrastructure facilities the damaged roads are to be necessarily repaired.

In the year 2022-23, 196 Road works were taken up over a length of 378.201 km with an estimated cost of Rs. 154.00 crore and all works have been completed. In the year 2023-24, 223 road works were initiated over a length of 375.84 km with an estimated cost of

Rs. 152.00 crore and all works have been completed.

In the year 2024-25, 1,630 Road works have been taken up for a length of 375.33 km with an estimated cost of Rs. 150.00 crore. Of these, 406 works have been completed and the remaining 1,224 works are in progress.

4.7.9 State Finance Commission – Urban Road Development Fund

Under the recommendations of the 6th State Finance Commission, a separate allocation is made every year for improving the roads under the Urban Road Development Fund. In the year 2022-23, 60 Road works were initiated over a length of 101.660 km with an estimated cost of Rs.66.00 crore. All the works have been completed.

In the year 2023-24, 105 Road works were initiated over a length of 154.83 km with an estimated cost of Rs.72.00 crore. All works have been completed.

In 2024-25, 559 Road works were undertaken over a length of 122.331 km with an estimated cost of Rs.79.52 crore. Of these,

97 works have been completed and the remaining 462 works are in progress at various stages.

4.7.10 Iyothee Thass Pandithar Habitation and Development Scheme

Under the Iyothee Thass Pandithar Habitation and Development Scheme, funds are allocated to provide basic infrastructure facilities in the Adi Dravidar Residential Areas and to renovate the existing public properties in those regions. Under this scheme, Rs.51.81 crore has been allocated for the year 2023-24. Under this scheme, 336 works were undertaken, of which 326 works have been completed. The remaining 10 works are in progress at various stages. For the year 2024-25, Rs.63.18 crore has been allocated. Under this scheme, 327 works were undertaken, of which 153 works have been completed and the remaining 174 works are in progress at various stages.

4.7.11 Tourism Grants

In some Town Panchayats of Tamil Nadu, traditional festivals and special events are held annually. To reduce the financial burden on such

Town Panchayats, Tourism Grants are allocated. For 12 Town Panchayats, a fixed annual grant of Rs.6.00 crore and for 28 Town Panchayats, a variable annual grant of Rs.1.50 crore have been allocated for the years 2022-23, 2023-24 and 2024-25 by the Common Project Sanctioning and Monitoring Committee.

4.7.12 Improvement of School Infrastructure in Town Panchayats

Funds are allocated based on the recommendation of the Sixth State Finance Commission annually for improving the infrastructure in schools located in Town Panchayats. Construction of additional buildings, toilets etc are taken up. Similarly, Annual Grant is given for maintenance works separately for these schools.

Based on the aforementioned recommendation and financial norms, Capital Works worth Rs.62.72 crore have been undertaken for 214 works in the year 2022-23 and 2023-24 with 125 works completed and the remaining 89 works are in progress at various stages. Maintenance works at an estimated cost of Rs.39.51 crore have been undertaken for

169 works with 147 works completed and 22 works in progress.

For the year 2024-25, Capital Works worth Rs.46.17 crore for 160 works are undertaken with 2 works completed and the remaining 158 works in progress at various stages. Maintenance works costing Rs.25.98 crore for 245 works are taken up and out of which 13 works have been completed and the remaining 232 works are in progress.

4.7.13 Establishment of New Libraries in Town Panchayats

New libraries are being established in Town Panchayats to help students prepare for competitive exams and to foster reading habits among children. A total of Rs.37.08 crore has been allocated for setting up 168 libraries. Administrative approval has been granted to all 168 works of which 44 have been completed, while the remaining works are in progress.

4.8 e-Governance in Town Panchayats

4.8.1 Online Tax Payment

The primary revenue sources of Town Panchayats include tax and non-tax categories.

Currently, a computerized receipt payment system is in place through the Town Panchayats website. Citizens can pay their tax and non-tax dues using various payment methods such as debit cards, credit cards, net banking, UPI, and QR codes. In addition to that the public can pay their dues from anywhere by accessing <https://dtp.tn.gov.in>.

4.8.2 Online Building Permission

According Planning Permission for buildings in Town Panchayats was previously processed manually. Now, Online services for approval of layouts and building permission have been implemented by simplifying the process for use of the public.

Through this, people can apply and obtain permission for layout and building permits online. This service is available across all 487 Town Panchayats (website address: <https://onlineppa.tn.gov.in>).

Additionally, from 22.02.2024 permission for construction of building up to 3,500 square feet area for Ground plus First Floor on plots up

to 2,500 square feet can be obtained via self-certification, with uploading of relevant documents and payment of fees through online.

4.8.3 Online Grievance Redressal

Currently, public grievances in Town Panchayats are received through the “Mudhalvarin Mugavari Website”. The public can register their grievances through the Toll-Free Number 1100 or the website and seek redressal. The grievances registered online are addressed within a specified time frame and the status of each grievance is communicated to the public via SMS.

4.8.4 Online Scheme Monitorin System CM Dash Board

All Capital and Maintenance Works in Town Panchayats are uploaded to the Chief Minister's Dash Board which is monitored regularly. This helps senior officials to track the current status and progress of all works and provides useful insights for evaluation.

4.8.5 UTIS (Urban Tree Information System)

All the projects and progress of works in Town Panchayats are uploaded to the UTIS website which allows the monitoring of the work status. Through this platform, the current status and photos of ongoing works are uploaded, helping senior officials to evaluate and provide guidance to their subordinates. Additionally, by uploading and maintaining work-related data, human effort and time spent on repetitive data entry are minimized. UTIS services are being implemented in all Town Panchayats in line with the services available at the Directorate of Municipal Administration.

4.9 Financial Management

4.9.1 Sixth State Finance Commission

Based on the recommendations of the Sixth State Finance Commission, G.O.(Ms) No.60, Finance Department, dated.28.02.2023, ensures the allocation of funds for 2022-23 to 2026-27. The details for the financial year 2024-25 and the allocation for the financial year 2025-26 are listed in Table 4.7.

Table 4.7

(Rs.in crore)

Sl. No	Type of Grant	Financial Year 2024-25		Allocation for Financial Year 2025-26
		Allocation	Released	
1	SFC Grant	1868.34	1868.34	2107.79
2	Capital Grant Fund	198.00	198.00	214.50
3	O&M Gap Filling Fund	79.20	79.20	85.80
	Total	2145.54	2145.54	2408.09

4.9.2 15th Finance Commission Grant

The 15th Finance Commission has recommended grants under two categories: "Untied Grant" and "Tied Grant."

Untied Grant: The Untied Grant can be utilized by Town Panchayats for works deemed necessary, excluding salaries and institutional expenses related to the 18 items listed in the 12th Schedule of the Indian Constitution. In the financial year 2022-23, 1,119 works were taken up under the Untied Grant, with an estimated value of Rs.98.40 crore. Of these, 1,105 works were completed and 14 works are in progress at

various stages. Additionally, for the financial year 2023-24, 1,379 works were proposed under the Untied Grant with an estimated value of Rs.131.57 crore. Of these, 1,184 works were completed and remaining 195 works are in progress at various stages. Rs.70.93 crore has been allocated under Untied Grants for 715 projects for the financial year 2024-25. Out of these 41 works have been completed, remaining works are in progress at various stages.

Tied Grant: In the Tied Grant, 50% is allocated for sanitation, solid waste management and 50% for drinking water, rainwater harvesting and water recycling. In the financial year 2022-23, Rs.141.05 crore was released for 2,155 works under the tied grant. Out of these, 2,116 works were completed and the remaining 39 works are in progress at various stages. Additionally, for the financial year 2023-24, 2,064 works were proposed under the Tied Grant with an estimated value of Rs.167.70 crore. Of these, 1,230 works were

completed and the remaining 834 works are in progress at various stages.

In the financial year 2024-25, 1,169 works were proposed under the Tied Grant with an estimated value of Rs.102.09 crore. Out of these, 61 works have been completed, remaining works are in progress at various stages.

4.9.3 Details of Town Panchayats' Revenue and Expenditure

Table 4.8
Revenue

(Rs. in crore)

Sl. No.	Description	2023-24	2024-25
1	Tax Revenue	376.59	412.24
2	Non-Tax Revenue	298.02	328.83
3	Assigned Revenue	210.96	230.65
4	SFC/CFC Grants	2169.34	2210.22
5	Capital Receipts	784.17	860.50
	Total	3839.08	4042.44

Expenditure

(Rs. in crore)

Sl. No.	Description	2023-24	2024-25
1	Establishment/ Administrative Charges	1360.87	1592.22
2	Capital Expenditure	858.67	1042.50
	Total	2219.54	2634.72

4.9.4 Loans and Outstanding Charges

The details of loans and charges to be paid as on 31.03.2024 are provided in Table 4.9 below.

Table 4.9

(Rs. in crore)

Sl. No.	Description	Amount
1	LIC Loan and Outstanding with Interest	42.77
	Total	42.77

5. Chennai Metropolitan Water Supply and Sewerage Board

Chennai city and the area contiguous to it were notified as Chennai Metropolitan Area (CMA) in 1974. Subsequently, with the objective of exclusively attending to the growing needs and for planned development and appropriate regulation of water supply and sewerage services in the Chennai Metropolitan Area with particular reference to the protection of public health and for all matters connected therewith, Chennai Metropolitan Water Supply and Sewerage Board (CMWSSB) was established as a statutory body under Tamil Nadu Act 28 of 1978 during the year 1978. Apart from the above basic service, Board is now providing several on-line services in vogue with the growing Information-technology development.

The Board is managed by a full time Managing Director. The constitution of the Board of CMWSSB is as below:

Board of Directors

CHAIRMAN	
1	Hon'ble Minister for Municipal Administration
DIRECTORS	
2	Principal Secretary to Government, Finance Department
3	Principal Secretary to Government, Municipal Administration & Water Supply Department
4	Commissioner, Greater Chennai Corporation
5	Managing Director, CMWSS Board
6	Member Secretary, Chennai Metropolitan Development Authority
7	Managing Director, TWAD Board
8	Executive Director, CMWSS Board
9	Finance Director, CMWSS Board
10	Engineering Director, CMWSS Board

Providing safe drinking water and ensuring safe disposal of sewage is mandatory for a healthy environment and good quality of life for people. CMWSSB, since its formation, has been providing these services to the citizens of Chennai city. At present, CMWSSB is providing

services directly to 91 lakh people (approximately) spread over 426 sq.km in Chennai city through 15 Area offices and 200 Depots. It also caters to the needs of few urban nodes adjacent to the city and industries.

Vision for the future

- Provide functional water and sewerage connection to every household in Chennai city.
- Address the demand-supply gap through source augmentation and infrastructure strengthening.
- Harness rainwater by implementing and monitoring rainwater harvesting structures in each and every premise in Chennai city and prepare an Aquifer Management Plan.
- Recycle / reuse at least 20% of used water.
- Reduce non-revenue water (NRW) to less than 15%.

- Provide water supply and underground sewerage facilities to all the left out streets in Chennai city.
- Build adequate sewage treatment capacity by constructing new STPs and rehabilitating existing sewage treatment plants (STPs).
- Prevent sewage outfalls into the city water ways viz Adyar, Cooum and Buckingham canal and their associated drains through short term interception and diversion arrangements and long term infrastructure strengthening works.

5.1 Water Supply Management

5.1.1 Sources of Water Supply

Providing safe drinking water in adequate quantity to the people of Chennai city and to meet the water requirements of industries, is the primary and consistent endeavor of the Board. The water requirement is met by drawing water from surface sources, ground water sources, reuse of water, desalination plants and tertiary treatment reverse osmosis (TTRO) plants.

i. Surface Water Sources

Surface water is the main source of water supply to Chennai city. Water is drawn from lakes around Chennai city such as Poondi, Puzhal, Cholavaram, Chembarambakkam, Kannankottai-Thervoykandigai; and Veeranam in Cuddalore district besides water received from the Kandaleru reservoir under Krishna Water Supply Project.

ii. Ground Water Sources

About 10 MLD of ground water is drawn from the aquifers at Tamaraipakkam, Poondi and Minjur and 20 MLD from own sources in added areas.

iii. Desalination Plants

The Chennai city's water sources are dependent on monsoon since there are no perennial water sources for city. Whenever monsoon fails, the city faces drought. Further, urbanisation of the surrounding areas and the rapid growth of the industries led to drastic increase in demand for water exerting pressure on scarce water resources. Therefore, as part of drought-proofing measure and for the long term

drinking water requirements of the city, Government has invested in desalination plants. Desalination plants play a vital role in fulfilling the city's water supply requirements.

a) Desalination Plant - Minjur

The first desalination plant with a capacity of 100 MLD at Minjur on Design, Build, Own, Operate and Transfer (DBOOT) basis was inaugurated on 31.07.2010 by the then Chief Minister, Dr.Kalaignar Karunanidhi. This plant caters to the needs of the northern parts of Chennai city viz., Manali, Madhavaram, Ennore, Kathivakkam and Thiruvottiyur benefiting a population of about 9 lakh.

b) Desalination Plant - 100 MLD - Nemmeli

Another desalination plant with a capacity of 100 MLD has been constructed at Nemmeli at a cost of Rs.914.42 crore (GoI grant of Rs.871.24 crore and Rs.43.18 crore from GoTN). The foundation stone for the construction of this plant was laid on 23.02.2010 by the Hon'ble Chief Minister when he was Deputy Chief Minister and Minister for Local Administration.

The plant became operational in 2013 and water from this plant is being supplied to the southern parts of Chennai viz., Akkarai, Ezhil Nagar, Kannagi Nagar, Sholinganallur, Neelangarai, Injambakkam, Karapakkam, Semmancherry, Thoraipakkam, Perungudi, Kottivakkam, Palavakkam, Thiruvannamiyur and Pallipattu, benefiting a population of about 10 lakh.

Now the capacity of this plant is enhanced from 100 MLD to 110 MLD.

c) Desalination Plant - 150 MLD - Nemmeli and laying of product water pipeline from desalination plant to Pallavaram

Construction of another 150 MLD capacity desalination plant was taken up at Nemmeli to address the demand-supply gap in water supply in Chennai city. The Government of Tamil Nadu has accorded revised administrative sanction at a cost of Rs.1,516.82 crore to implement the project under AMRUT scheme and financial assistance from KfW (German Development Bank).

The project has been completed and inaugurated by Hon'ble Chief Minister on 24.02.2024. Water produced from this plant is being supplied to the public living in Velachery, Uthandi, Alandur, Pallikaranai, Jalladiyanpettai, Madipakkam, Pallipattu, Ullagaram – Puzhuthivakkam and MRC Nagar - Nandanam under the administrative purview of Greater Chennai Corporation and Pallavaram under the administrative purview of Tambaram Corporation, benefiting nearly 9 lakh people.

iv. Tertiary Treated Water

CMWSS Board has constructed two tertiary treatment reverse osmosis (TTRO) plants of 45 MLD capacity each at Koyambedu and Kodungaiyur, including pipeline to convey the treated used water to the industries in Irungattukottai, Sriperumbudur and Oragadam and in Manali–Ennore corridor and Manali–Minjur corridor, in order to cater to the needs of industries in and around Chennai city. Both the plants are operational. At present, 23 MLD of TTRO water is being supplied to Industries from

Kodungaiyur and 15 MLD from Koyambedu TTRO plant.

5.1.2 Water Treatment Plants

The century old city's first Water treatment plant located at Kilpauk is functioning till now catering to the water needs of the city.

The existing water treatment capacity of the CMWSS Board is 1,670 MLD as detailed in table 5.1 below.

Table 5.1

Sl. No.	Location of the plant	Capacity (MLD)	Year of establishment
1.	Kilpauk	270	1914
2.	Redhills	300	1996
3.	Veeranam	180	2004
4.	Chembarambakkam	530	2008
5.	Surapet	14	1965 (Taken over from TWAD Board in 2009)
6.	Minjur desalination plant	100	2010
7.	Nemmeli desalination plant	110	2013
8.	Porur	6	2022
9.	Kolathur	10	2023
10.	Nemmeli desalination plant	150	2024
	Total	1,670	

5.1.3 Water Distribution

Treated water is being distributed from 16 major water distribution stations and 105 subsidiary head works through a pipeline network of 6,222.17 km. The details are given in table 5.2.

Table 5.2

Sl. No.	Water distribution station	Quantity supplied (MLD)
1.	Patel Nagar	30
2.	Anna Poonga	22
3.	Kannappar Thidal	25
4.	Vyasarpadi	35
5.	Kolathur	25
6.	Kilpauk	105
7.	Choolaimedu	50
8.	Triplicane	15
9.	Southern Head works	50
10.	Valluvar Kottam	20
11.	K.K.Nagar	32
12.	Ekkattuthangal	10
13.	Mylapore	40
14.	Nandanam	20
15.	Pallipattu	35
16.	Velachery	35
17.	Direct supply & other small head works	231

	Piped supply in core areas	780
18.	Piped supply in added areas	195
19.	Through lorries (core+added areas)	30
20.	Bulk consumers	35
	Total domestic supply	1,040
21.	Industries	
	1. Treated water to Industries	25
	2. Secondary treated used water	23
	3. TTRO water	38
	Total supply to industries	86
	Total supply	1,126

5.1.4 Quality Assurance

To ensure quality water supply to the people of Chennai, continuous surveillance, assessment and monitoring of the water quality is essential. To ensure the quality of water supply, a separate quality assurance wing is functioning in CMWSS Board. Water samples are collected daily from surface and ground water sources, water treatment plants, desalination plants, water distribution stations, subsidiary head works and the city distribution system. These samples are tested for physical, chemical and bacteriological parameters by the quality assurance wing of CMWSSB to ensure that water

quality conforms to IS Standard 10500-2012. Currently, 300 water samples are taken daily by the quality assurance laboratory and tested for water quality.

A new water and wastewater testing laboratory with a built-up area of 12,000 sq ft. comprising separate water and used water laboratory sections, with advanced instrumentation and infrastructure facilities has been set up by the Board at an estimate of Rs.7.05 crore. These sections include separate Physio chemical analysis and micro biological analysis facilities. The laboratory was inaugurated by the Hon'ble Chief Minister on 22.11.2022 and NABL accreditation obtained for the laboratory on 25.07.2024.

5.2 Water Supply Schemes

5.2.1 Schemes under Implementation

(i) Desalination Plant - 400 MLD - Perur

Chennai city's present water supply is 1,126 MLD whereas, demand is 1,407 MLD. This leaves a gap of 281 MLD. In order to bridge this gap, it is essential to augment the water supply by identifying additional sources.

Accordingly, Government has accorded administrative sanction for setting up a 400 MLD capacity desalination plant at Perur along East Coast Road, product water transmission main from the desalination plant to the city, at a cost of Rs.6,078.40 crore, with financial assistance from JICA, TNIDF and state budgetary support.

The work in this project involves construction of 400 MLD capacity SWRO Desalination plant, construction of Pumping station & Reservoirs, Installation of Product water transmission main, Improvement of existing water distribution networks and Power Transmission Line.

Hon'ble Chief Minister laid the foundation stone for this project on 21.08.2023 and work is in progress.

The Construction of the Plant is expected to be completed and commissioned by February 2027.

On completion of this project, people living in Greater Chennai Corporation, Tambaram

Corporation and 20 panchayats in the vicinity of Chennai Corporation, namely, Kulathur, Moovarasampet, Nanmangalam, Perundhavakkam, Thirisoolam, Kovilancherry, Maduraipakkam, Mappedu, Mulachery, Ottiyambakkam, Perumbakkam, Chithalapakkam, Thiruvanchery, Vengaivasal, Vengapakakkam, Nedungundram, Putthur, Kilambakkam, Vandalur, Kolapakkam areas will be benefited by receiving adequate water supply.

(ii) Water supply schemes under progress in added areas

For the added areas of Chennai, namely, Uthandi, Manapakkam, Ramapuram, Okkiyam-Thoraipakkam, Madhavaram, Nerkundram and Madipakkam, water supply schemes have been taken up by the Board. These schemes are inaugurated by Hon'ble Chief Minister during 2023-24 & 2024-25 and put into public use.

Further, Water supply schemes are under progress at a cost of Rs.158.22 crore in the 4 added areas viz, Manali, Chinnasekkadu, Semmenchery and Neelankarai. These schemes

will be completed and put into public use in the current financial year.

5.2.2 Improvement to existing water distribution network to reduce wastage

To ensure an equitable water supply, improvement of the existing Water Supply System in the core city has been proposed. For the improvement of water supply infrastructure in core city, CMWSSB has engaged Water Corporation of Odisha (WATCO) as PMC for study as well as DPR preparation, preparation of bid documents and supervision of the work "Improvement of existing water distribution system in all the WDS in Area-X (Kodambakkam) & Area-XIII (Adyar)".

The main components of the DPR are:

- Replacement of old pipes in the Chennai core city
- Providing supplementary pipes in uncovered streets
- Hydraulic reinforcement of the existing distribution network

- Storage reinforcement by constructing underground reservoir and elevated service reservoir
- Establishment of District Metered Areas
- Service connections and water meters

In the first phase, DPR has been submitted by M/s. WATCO for an amount of Rs.690 crore for Pallipattu & Thiruvanmiyur WDS and tender has been invited.

Further, M/s.SMEC International & 3 Institutions are engaged for study as well as for preparation of Detailed Project report for the other core areas, Viz., Tondiarpet (Area IV), Royapuram (Area V), Perambur (Area VI), Anna Nagar (Area VIII) and Teynampet (Area IX).

The study and preparation of reports for the improvement of water supply infrastructure for the entire Chennai core city is expected to be completed by 2026.

5.2.3 Rehabilitation of Water Treatment Plants – Puzhal and Surapet

Due to aging of the 300 MLD capacity Water Treatment Plant at Puzhal and 14 MLD capacity Water Treatment Plant at Surapet, CMWSSB has proposed to rehabilitate both the plants to attain maximum treatment capacity. In this regard, detailed project report (DPR) for the Rehabilitation was prepared through a consultant and the proposal is under process. Tender has been invited for Surapet plant. Regarding rehabilitation of Puzhal water treatment plant, necessary funding options are being pursued.

5.2.4 Ring Main System

At present, Water Supply to different zones (WDSs) of Greater Chennai Corporation is from 6 Water Treatment Plants and 3 Desalination Plants. Water supply from each of these plants is designed on standalone basis through Transmission Mains to the designated areas of the city. Surplus water from one source cannot be transferred to another source at times of deficit. Hence, the Ring main project (RMP)

has been proposed to connect all the WTPs for effecting equitable distribution of water to all the Water Distribution Stations in Chennai city.

Ring main 1 (GCC Area)

This Ring main will cover all the existing WTPs and WDSs in the Greater Chennai Corporation Area (426 Sq.Km) for a length of about 100 Km with pipe diameter ranging from 1000 mm to 1800 mm.

Ring main 2 (CMA)

The Ring main will be covering Chennai Metropolitan Area excluding core city (763 Sq.Km) for a length of about 135 Km with pipe diameter ranging from 1000 mm to 2000 mm.

Final DPR for Ring Main 1 (GCC area) completed by the Consultant and for Ring Main 2 (CMA area) is expected shortly.

5.2.5 Rainwater Harvesting

Rainwater Harvesting is a pioneer project of the State of Tamil Nadu and pioneer State in implementation of rainwater harvesting (RWH) programme in the country. Tamil Nadu is the

first state in India to make installation of RWH structures mandatory for both existing and new buildings.

Installation of rainwater harvesting structures has been made mandatory for all buildings irrespective of size and area, while applying for new/ renewal of water and sewer connections.

A communication strategy has been devised by CMWSSB to create awareness about the importance of rainwater harvesting and to encourage consumers to build RWH structures. The campaign is carried out every year before the onset of monsoon by sensitizing citizens about rainwater harvesting to reap maximum benefits during the monsoon season.

In Chennai city, during the year 2022-23, out of 11.05 lakh buildings, verification was conducted in 10.27 lakh buildings. In the survey, it is observed that about 6,67,736 (around 65%) premises have maintained functional RWH structures.

5.2.5.1 Proposed Awareness Programme on Rainwater Harvesting Campaign - 2025

- a)** The verification of remaining premises is proposed to be taken up with the help of TNULM Volunteers.
- b)** Issue of notices to premises for non-provision of RWH structures.
- c) Educational Campaign:** Training for Gated Community Apartments, Training for Builders and CMWSSB Contractors about the benefits and techniques of RWH.
- d) Social Media and Online Platforms:** Success stories and practical tips on the importance of maintenance of RWH through images and videos to all the CMC consumers of CMWSSB by Face book, Instagram and Whats app of CMWSSB.
- e) Community Competitions**
 - Creation of Website Organized competitions or awards for the best rainwater harvesting practices in the community to encourage participation and innovation.

- To Utilize social media, local newspapers to promote the competition; Create a website to upload RWH structures, which will enable participants to showcase their best rainwater harvesting practices and compete for awards.

f) School Programs

- **Essay Writing:** Encourage students to write essays on the importance of RWH.
- **Poster Design:** Have students create posters promoting water conservation and RWH.
- **Model RWH Systems:** Organize a competition for students to design and build the most efficient RWH model.
- **Rally:** Conducting rally, RWH Awareness campaign involving school children in all the 200 depots.

To monitor the ground water levels periodically, CMWSSB has installed digital water level recorders (DWLR) in all the 200 Depots. Observations show that there is a significant improvement in water levels and water quality after every monsoon. Readings are updated on CMWSSB website so that public can know the water levels. Also, CMWSSB has

installed automated rain gauges in all the 15 area offices for real time monitoring.

Observations from digital water level recorders (DWLR) in all the 200 Depots reveal that the average water levels in Chennai city have increased from 7.83 m in the year 2003 to 3.46 m in the year 2024, which is an increase of 4.37 m. Similarly, there is a substantial improvement in the water quality as well.

5.3 Sewerage Management

Collection, treatment and safe disposal of used water in Chennai city is another primary duty of CMWSS Board. The sewerage system in the core city was installed initially in 1917 and has been divided into Seven sewerage zones. These zones having macro system covering the entire city and have independent zonal collections, conveyance, treatment and disposal facilities. The sewage generated is collected in 356 sewage pumping stations through a 4,787 km long pipeline network. The sewage is then conveyed to sewage treatment plants and disposed safely after treatment.

5.3.1 Operation and Maintenance of Sewerage System

One of the main objective of the Government of Tamil Nadu is eradication of manual scavenging. To achieve this objective, the Board has mechanized the operation and maintenance of the sewerage system to eradicate manual scavenging. The obstructions in the pipeline are removed by jet rodding machines and the solid waste in the machine holes are removed by super sucker machines and desilting machines. At present, 601 machines are deployed for maintaining the sewerage system. The details are shown in table 5.3.

Table 5.3

Sl.No.	Machinery Details	Numbers
1	Desilting machines	299
2	Jet rodding machines (2KL, 6KL & 9KL)	181
3	Jetting cum suction machines	45
4	Super sucker machines	73
5	Sewer lorries	03
Total		601

To improve maintenance, additional machines and equipment are procured periodically, based on requirement.

5.3.2 Sewage Treatment Plants

The present installed capacity of sewerage treatment in Chennai city is 957.80 MLD. The details are shown in table 5.4.

Table 5.4

Sewerage Zone	Location of STPs	Existing Treatment Capacity (MLD)
I & II	Kodungaiyur (120+120+110)	350
III	Koyambedu (34+60+120)	214
IV	Nesapakkam (54+40+50)	144
	Nesapakkam TTUF	10
	Langs Garden	10
V	Perungudi (60+54+60)	174
VI	Sholinganallur – I	18
VII	Thiruvottiyur	31
	Modular STPs	
	Chetpet	1
	Choolaimedu	1.2
	Tod Hunter Nagar	4
	Kotturpuram	0.6
	Total	957.80

5.3.3 Construction of new STPs and improvement to existing STPs

Based on central enactments, rules, notifications and orders, the Tamil Nadu Pollution Control Board has prescribed revised discharge norms. These norms would come into effect from 26.05.2026. The details are shown in table 5.5:

Table 5.5

Standards for sewage treatment plants (STPs)		
Sl.No.	Parameters	Mega and Metropolitan Cities (Chennai)
1.	pH	5.5 - 9.0
2.	Bio-chemical oxygen demand (BOD)	10 mg/l
3.	Total suspended solids (TSS)	20 mg/l
4.	Chemical oxygen demand (COD)	50 mg/l
5.	Nitrogen-total	10 mg/l
6.	Phosphorus total (for discharge into ponds, lakes)	1.0 mg/l
7.	Faecal Coliform (FC) (most probable number per 100 ml, MPN/100)	Desirable-100; Permissible-230

According to the above norms, CMWSSB took up construction of 4 new STPs viz. Kodungaiyur-I, Kodungaiyur-II, Perungudi and

Nesapakkam and to enhance treatment capacity and to achieve new disposal standards improvement works in 7 existing STPs at a cost of Rs.923.95 crore. Details of STPs shown in table 5.6

Table 5.6

Construction of new STPs		Improvement to existing STPs	
Location	Capacity (MLD)	Location	Capacity (MLD)
Kodungaiyur -I	120	Kodungaiyur	110
Kodungaiyur -II	120	Koyambedu (120+60)	180
Nesapakkam	50		
Perungudi	60	Nesapakkam (40+54)	94
Total	350	Perungudi (60+54)	114
		Total	498

CMWSSB has completed Kodungaiyur – I & II, Nesapakkam and Perungudi STPs and they have been inaugurated by Hon’ble Chief Minister in 2023-24 & 2024-25 and are in operation. The remaining STPs will be completed in 2025-26.

5.3.4 Construction of additional 54 MLD Sewage Treatment Plant at Sholinganallur

This sewage treatment plant was sanctioned at a cost of Rs.65.97 crore. It uses sequential batch reactor (SBR) technology to treat sewage generated from added areas located along East Coast Road and Old Mahabalipuram Road in the southern parts of Chennai. Already, one unit of 18 MLD capacity has been completed and is under trial run. Another 36 MLD capacity plant is under construction and will be commissioned this year.

5.3.5 Modular Sewage Treatment Plants

As part of Chennai Rivers Restoration Trust (CRRT) works, to prevent sewage outfalls into the waterways, modular STPs have been established at Chetpet (1 MLD), Choolaimedu (1.2 MLD), ToddHunter Nagar (4 MLD) and Kotturpuram (0.6 MLD).

5.3.6 Villivakkam TTUF

The Villivakkam -Konnur lake is one of the main water body of the Villivakkam area and is located adjacent to the thickly populated SIDCO nagar and drains into the Otteri Nullah.

CMWSSB is setting up a 5 MLD Capacity TTUF Plant based on Membrane Bio Reactor (MBR) Technology adjacent to Villivakkam-Konnur lake on Design, Engineering, Procurement and Construction basis including Operation and Maintenance for 7 Years for the restoration and rejuvenation of the lake with treated water.

The necessary fund approval and administrative sanction has been accorded for an amount of Rs.17.97 crore under Singara Chennai 2.O. The work for establishing the plant commenced on 15.03.2024 and is in progress. This project will help in rejuvenating the lake by improving the quality of water besides recharging the ground water.

5.4 Sewerage Schemes

5.4.1 Schemes under implementation in added areas

Hon'ble Chief Minister inaugurated the Underground Sewerage Schemes for Ramapuram, Manapakkam, Nerkundram, Chinnasekkadu and Nandhambakkam. The schemes have been put into public use.

Underground sewerage schemes are being implemented in the following 21 added areas namely, Pallikaranai, Manali, Karambakkam, Mugalivakkam, Madipakkam, Kottivakkam, Palavakkam, Neelankarai, Uthandi, Injambakkam, Jalladampet, Puzhal, Mathur, Vadaperumbakkam, Theeyambakkam, Edayanchavadi, Sadyankuppam, Kadapakkam, Okkiyam Thoraipakkam, Semmenchery and left out areas of Madhavarm at a cost of Rs.3,015.78 crore. The above Underground sewerage schemes will be completed in coming years.

On implementation of the above projects, all added areas of Chennai city will be covered with underground sewerage system.

5.4.2 Vada Chennai Valarchi Thittam

The capacity of the existing sewage system of the Chennai Metropolitan Water Supply and Sewerage Board is insufficient to meet the growing needs of the burgeoning population in North Chennai areas of Greater Chennai Corporation. Therefore, a new project to improve the sewage and drinking water infrastructure and to reduce water pollution in North Chennai has been taken up at a cost of Rs.946 crore and works are in progress.

5.4.3 Improvement of Existing Sewerage System in Core Areas of Greater Chennai

The existing sewerage system in the core areas includes Areas IV (Tondairpet), V (Royapuram), VI (Thiru Vi.Ka. Nagar), VIII (Anna Nagar), IX (Teynampet), X (Kodambakkam) and XIII (Adyar) have been in existence for over 30 years. The capacity of the Gravity Main, Wells, Pumping Main and pumping equipment is inadequate to meet the present population requirements and hence, the sewerage system could not handle the total

sewage generated in core areas. Therefore, it is necessary to improve the existing Sewerage system in the project area for the effective disposal of sewage.

CMWSSB has engaged a consultant for the work of "Preparation of Detailed Project Reports for Improvement of Existing Sewerage System in Core Areas of Greater Chennai city (174 sq.km) and Providing SCADA for the entire Greater Chennai city (426 sq.km)". DPRs for each Sewage Treatment plant are being prepared by the consultant in a phased manner and the final DPR is expected to be submitted by the consultant by March 2025.

5.4.4 Projects under Chennai Rivers Restoration Trust

Chennai Rivers Restoration Trust (CRRT) has taken up the eco-restoration of the Chennai city waterways on behalf of Government of Tamil Nadu. CMWSSB, along with CRRT, has formulated mitigation proposals for the prevention of sewage outfalls into Cooum and Adyar rivers and Buckingham canal and its associated drains. Mitigation measures for

Cooum and Adyar rivers at a cost of Rs.186.19 crore and Rs.123.19 crore respectively have been taken up by CMWSSB and work is in progress.

In Adyar, some works (modular STP and I&D works) have been dropped due to ongoing and proposed underground sewerage schemes in added areas. The savings of Rs.64.89 crore from this is utilised for 9 works for implementation in Area X and XIII and are under progress to prevent sewage outfall in Adyar River. These works would strengthen the existing sewerage system in these areas.

The Government has given top priority to the restoration of Chennai city waterways. Accordingly, CMWSSB has taken up the proposal of plugging of sewage outfalls in Adyar and Cooum rivers, Buckingham canal and their associated drains. The proposal includes interception and diversion arrangements, strengthening / refurbishment of existing sewerage infrastructure.

The Government have also accorded revised administrative sanction for a value of

Rs.385.38 crore, for this project. Work orders were issued for 36 works. Out of 36 works, 34 have been completed and the remaining 2 works are in progress. Further, CMWSSB has taken up the plugging of 23 sewage outfalls in River Cooum at a cost of Rs.50 crore and the works are under progress.

5.4.5 Restoration of Adyar River in PPP mode

The Government has committed to create clean and green living spaces for urban residents in the State. It is also committed to revitalizing the major waterways of Chennai including Adyar, Cooum, Buckingham canal and Kosasthalaiyar. In the initial phase, the Adyar River which flows from Guduvanchery in Chengalpet district through Tambaram, Tiruneermalai, Manapakkam, Alandur and Saidapet before reaching the Bay of Bengal will undergo restoration and beautification through the Chennai Rivers Restoration Trust. This initiative, with an estimated cost of around Rs.1,500 crore, will be implemented through public-private partnership. This includes notable

features such as the installation of a 70 km long sewerage pipeline on the banks of Adyar River as an alternative channel for sewerage discharge, establishment of 14 sewage treatment plants with cumulative capacity of 110 MLD, and increasing green spaces by developing four parks along the riverbanks.

A SPV has been incorporated for implementing this project as M/s. Chennai Rivers Transformation Company Ltd (CRTCL) on 08.07.2024.

The Government have accorded both administrative and financial sanctions for this project vide G.O.(Ms) No 50, MAWS dept., dated 14.03.2024.

5.5 Recycle and Reuse

The State of Tamil Nadu is pioneer in recycling and reuse of used water. 20% of used water should be recycled and reused as per the guidelines of Atal Mission for Rejuvenation and Urban Transformation (AMRUT 2.0). As part of water conservation measures, secondary treated sewage of 23 MLD is being supplied to industries in Manali area. The secondary treated sewage is

further treated by the industries through tertiary treatment and reverse osmosis (TTRO) and product water is used for industrial purposes.

CMWSSB has also set up two TTRO plants for producing industrial-grade water.

5.5.1 Tertiary Treatment Reverse Osmosis Plants

Two tertiary treatment reverse osmosis (TTRO) plants of 45 MLD capacity each at Koyambedu and Kodungaiyur are operational and supplying water to industries. This ensures assured and sustainable water supply to industries and reduces the fresh water demand from industries.

5.5.2 Tertiary Treatment Ultra Filtration Plants

The CMWSSB has taken up construction of three tertiary treatment ultra filtration (TTUF) plants of 10 MLD capacity each at Perungudi, Nesapakkam and Langs Garden, to ensure sustainability of water resources to Chennai City. Among these, Nesappakkam and Langs Garden TTUF Plant were completed and under

operation. The product water from Perungudi and Nesapakkam TTUF are to be used to supplement the storage in Perungudi and Porur lakes respectively and the product water from Langs Garden plant is supplied to Southern Railways for wagon cleaning and to the Greater Chennai Corporation.

On completion of the Perungudi & Villivakkam TTUF plants and 54 MLD capacity STP at Sholinganallur, CMWSSB will have an overall treatment capacity of 1,026.80 MLD.

5.5.3 Tamil Nadu Urban Local Bodies and Chennai Metropolitan Area Septage Management (Regulation) Rules, 2022

The Government of Tamil Nadu has recognized the importance of Faecal Sludge and Septage Management (FSSM) as a viable method of sanitation for smaller cities, towns and outgrowths in metropolitan cities. In pursuance of the National Policy on Faecal Sludge and Septage Management, a comprehensive programme has been formulated for regulating periodic cleaning of septic tanks and transportation, treatment and disposal of

faecal sludge and septage. For the operation and movement of specified vehicles for the purpose of transportation of faecal sludge or septage, to the places identified for decantation and matters connected thereto, the CMWSSB Act, 1978 has been suitably amended by the Tamil Nadu Municipal Laws and Chennai Metropolitan Water Supply and Sewerage (Amendment) Act, 2022 (Tamil Nadu Act 34 of 2022). The Government has also issued the Tamil Nadu Urban Local Bodies and Chennai Metropolitan Area Septage Management (Regulation) Rules, 2022, vide the notification issued in Municipal Administration and Water Supply Department G.O.(Ms)No.183 Dated 31.12.2022.

The Government has approved and issued the new septage management regulations and operative guidelines to regulate the removal of septage from unsewered areas, operation of sewer tanker lorries in the local bodies, prevention of illegal discharge of sewerage, and thus protect the environment. The Faecal Sludge and Septage Management and Septage Management (Regulation) Rules, 2022, regulate

the desludging operators (DSOs), who provide collection and conveyance services by i) introducing adequate legal provisions to prevent unsafe disposal; and ii) improving receiving/treatment facilities for disposal of septage.

Some of the key features included in the new Septage Management (Regulation) Rules, 2022 are, Licence for collection, transportation and disposal of faecal sludge and septage, Rules and regulations with respect to transportation of faecal sludge and septage, vehicles are fixed with GPS for vehicle tracking system, operators are required to maintain a log book containing the septage / faecal sludge transport trip details, review of the same, Monitoring the desludging operations and prohibition of unsafe disposal, prevent any illegal disposal of faecal sludge and septage other than the locations notified for disposal, etc.

CMWSSB has notified 19 locations which can be used as a disposal facility by the desludging operators.

The licensee is required to comply with the rules and regulations specified and also ensure that each driver and worker employed undergoes annual health check-up and shall submit a record of the same to the licensing authority. Further, the licensee is also required to insure each driver and worker employed for a sum of Rs.10 Lakh towards personal accidental insurance.

Failure to comply with the rules shall attract a fine of up to Rs.25,000/-for the first violation, fine of up to Rs.50,000/- for second or any subsequent violation and seizure of the vehicles along with its equipment for continuing violation.

5.6 Capacity Building

The CMWSS Board has established its training centre in 1982 to impart various in-house training programmes, CPHEEO sponsored training programmes and special training programmes for the Board staff as well as staff from other organisations and states. Every year, around 42 courses related to the day-to-day activities of Board and 5 refresher

courses sponsored by CPHEEO are conducted. Many special training programmes including exclusive tailor-made training programmes for other Government organizations are also being conducted.

As part of the initiatives taken by the Board to support entrepreneurs /start-ups, the training centre has conducted training programme in co-ordination with Entrepreneurship Development and Innovation Institute - Tamil Nadu (EDII-TN).

It has been proposed to bring all activities of training centre under an End-to-End IT solution to introduce web based e-learning courses.

5.7 Use of Technology

5.7.1 Geographical Information System (GIS)

The work of preparation of assets and utility maps using geospatial techniques for CMWSSB under Asian Development Bank (ADB) assisted Tamil Nadu Urban Flagship Investment Programme (TNUFIP) is being carried out through a consultant engaged by Tamil Nadu

Urban Infrastructure Financial Services Limited (TNUIFSL).

Under this project, all the underground and above ground assets and utilities are being mapped in a GIS platform for optimum management and maintenance of assets and better service delivery to the citizens. This project also covers capacity building programme for the CMWSSB engineers for managing the assets using this GIS platform in future.

For the above project, administrative approval has been accorded at a cost of Rs.17.80 crore vide G.O. (Ms) No.8, MAWS dated 20.01.2023 under AMRUT 2.0 for setting up of a dedicated GIS control room at the Board's Head office at Chinthadripet. It was completed and inaugurated by the Hon'ble Chief Minister on 12.08.2024.

The GIS Project has captured 1,61,776 Machine holes covering a distance of 4,174 Km Sewer Main and 613.75 Km of Sewer Pumping Main. Also, nearly 121 WDS are captured in the 15 areas together with 1,159.92 Km of

Transmission Main and 6,222.17 Km of Distribution Main.

5.7.2 Monitoring of Water Tankers using Global Positioning System (GPS)

Water is being supplied through hired water tankers for the streets without water mains and streets with inadequate pressure either directly or by filling the HDPE tanks erected in these localities regularly. Everyday, nearly 26 MLD of water is supplied through 3,300 lorry trips. These tankers are being monitored by GPS tracking system to have continuous vigil, thus ensuring the timely delivery of water to the right people.

5.7.3 Online Services

Consumers can avail the following online services through the Board's website <https://cmwssb.tn.gov.in/>

- Public grievances and redressal system
- Payment of water tax and charges
- Apply for New water/sewer connection
- New water connection for industries
- Booking water tanker

- Booking for septic tank clearance
- Provision for groundwater license

5.7.4 Information Technology (IT) Initiatives

CMWSSB in coordination with TNeGA (Tamil Nadu e-Governance Agency) is in the process of developing an End-to-End IT implementation and new ERP (Enterprise Resource Planning) solution at a cost of Rs.3.49 crore to cover all the activities/services of CMWSSB. This project is completed and parallel process is in progress.

5.7.4.1 e-Office Implementation

In CMWSSB e-Office implementation has been taken up and all the stages has been successfully completed. Training to all staff members of CMWSSB provided by TNeGA. The implementation of e-Office application is started from 02.05.2024. All the newly arising files are created in e-office only. All the pending physical files with 25 and below pages are scanned and converted into e-file. Remaining physical files are being scanned and converted into e-file.

Total e-files created as on 31.01.2025 is 23,164.

5.7.4.2 “Septic Clearance at Door Step” App

CMWSSB has developed a user-friendly Web and Mobile application called “Septic Clearance at Door Step” for the consumers to book the Sewage Tankers and Licensed Sewer Lorry Operators to register and render their service, through Tamil Nadu e-Governance Agency (TNeGA). The application is developed to facilitate the operator to provide and the consumers to avail Septic Tank Clearance seamlessly. One of the key features of the App is to ensure that the collected sewage/septage is being properly discharged at the authorized decanting facilities of CMWSSB. This ensures that there is no unauthorized discharge of sewage in open lands and water bodies.

5.8 Chennai City Partnership Programme

The Government have accorded in-principle approval for Chennai City Partnership Program and its Disbursement Linked Indicators (DLI) vide G.O.(D)No.289,

Finance Department dated 16.09.2021. The participating agencies are Greater Chennai Corporation, Metropolitan Transport Corporation, Water Resources Department, CMWSSB and Chennai Unified Metropolitan Transport Authority. The partnership adopts a framework with three result areas to enable a transition to higher quality, sustainable and resilient services through

- strengthening and professionalizing service delivery institutions
- improving their operational efficiency and service delivery performance and
- enhancing financial sustainability.

It is a multi-sector program for results operation (PforR) linked to achievement of key results and indicators. The program development objectives (PDO) for CMWSSB are improvement in service delivery performance and increase in share of operation and maintenance costs recovered through user charges. CMWSSB has to achieve 4 DLIs during the program period.

5.8.1 Metering Policy

As part of DLI 7 of the Chennai City Partnership, CMWSSB has to adopt a policy for metering. The Board, in its meeting dated 23.11.2022, resolved to approve the metering policy.

The key objectives of the policy are:

- To promote water conservation by encouraging efficient water use
- To reduce non-revenue water (NRW) and increase cost recovery.
- To ensure fairness and equity to all consumers in charging for water services.
- To achieve 100% metering of all high-rise buildings and commercial connections by the year 2025 and to achieve 80% of domestic connections (G+2 and below buildings) by the year 2027.
- To set out roles and responsibilities of both CMWSSB and consumers in relation to the installation of metered connections, maintenance of the water meters.

Metering policy has been approved and adopted by the Board. Further, detailed project report (DPR) for the installation of smart meters (1,00,000 meters) for commercial, partly commercial, Industries, Institutions and Multi Storey Buildings (MSB) for both core & added areas has been prepared. Tenders will be called for shortly.

5.8.2 Bulk Water Metering

Water audit provides essential data for system performance studies, facility planning and evaluation of conservation measures. Bulk water metering helps in water audit and assessment of non-revenue water (NRW). Based on the proposal from CMWSSB, Government have accorded administrative approval for Rs.43.01 crore under Singara Chennai 2.0 vide G.O.(D)No.54, MA&WS Department, dated 08.02.2023 for supply, installation and commissioning of electromagnetic flow meters with IoT technology based data transfer facility and allied works in water treatment plants, water distribution stations and filling stations of the Board including comprehensive operation

and maintenance for five years. The works for installation of bulk water meters are under progress and expected to be completed by June 2025.

5.8.3 Adoption of e-Procurement Roadmap by CMWSSB

The Board, in its meeting dated 23.11.2022, accorded approval for the e-procurement roadmap. The roadmap clearly delineates the types of tenders that will be invited through e-procurement. It also states that the General Technical Evaluation (GTE) module will be adopted from April 2023 for online evaluation of tenders. Training on GTE module and evaluation of tenders under quality cum cost based selection for consulting services were conducted by NIC for the staff of Contracts and Monitoring wing during August 2022.

5.8.4 Establishment of Service Level Bench Marks in CMWSSB

CMWSSB has to establish service level benchmark (SLB) baseline through survey including household connections and hours of supply. The Board, in its meeting held on

23.11.2022, accorded approval for conducting the baseline survey work.

The following five main types of activities will be taken up to develop a robust baseline:

- Validate and update CMWSSB's consumer database
- Design and implement a household sample survey on access and quality of water services
- On-site assessment of water supply at the household level on a sample basis
- Produce baseline estimates, water-services related composite index and reporting system
- Produce a mapping and data report of un-served pockets in Chennai's core city area.

A survey of 15,000 samples along with NRW evaluation was taken up through a consultant and the entire survey is expected to be completed by March 2025.

5.9 Monitoring Consumers Grievances

5.9.1 24x7 Monitoring and Control Centre

A 24x7 monitoring and control centre (MCC) has been established at a cost of Rs.1.13 crore and was inaugurated by the Hon'ble Chief Minister on 13.03.2023. The MCC has a 24 x 7 grievance redressal cell as well as a video wall to monitor the important activities of the Board including GPS tracking of mobile water lorries and sewer maintenance vehicles, SCADA monitoring of STP, TTRO plants, desalination plants and monitoring of water filling points through CCTV cameras. Consumers can dial 044-45674567 (20 lines) and toll-free number 1916 and register their grievances/complaints. The registered complaints are immediately transferred online and by SMS to the respective Depot Engineers to rectify the defects. Accordingly, rectification of the defects is being done immediately.

24 x 7 helpline number 14420 has been introduced for sewer and septic tank cleaning process and to report any unauthorized entry into the machine holes.

5.9.2 QR code Poster

As a new model for citizen focused service delivery, a standard QR code design poster has been created. A total of 300 QR Code posters were installed in 15 Areas, 200 Depots and 85 other prominent places in Chennai city for making the grievances redressal more user friendly and easily accessible.

5.9.3 Grievance Redressal Meeting

The Board conducts Grievance redressal meeting in all the Area Offices between 10.00 A.M. and 1.00 P.M. on the 2nd Saturday of every month, to improve the service delivery to the public/ consumers. Senior officers at the level of Superintending Engineers preside over these meetings. The complaints / grievances / suggestions received during these meetings are attended immediately.

5.10 Employees' Welfare

The Board considers its employees as its major asset and therefore the Board gives due importance to their welfare. To improve the personal hygiene of field workers, various welfare measures such as provision of uniform

cloth with stitching charges, oil, bathing soap, rain coats, shoes, chappals and safety gears are provided to the employees periodically by the Board.

The following welfare measures are also provided to the employees:

- A dispensary with a full time Doctor and Pharmacist and Lab Technical Assistant with first aid equipments.
- Special medical camps for eye, ear, lungs and heart check up.
- As per the Government rules, providing conveyance allowance to all the differently-abled employees of the Board.
- As per the Government New Health Insurance Scheme, providing medical facilities to the employees and pensioners of the Board.
- Retirement benefits are paid to the employees on the next day of retirement itself.

- Immediate settlement of Death benefits to the legal heirs of the deceased employee after receipt of the claims.
- Providing all workers involved in sanitation works all essential safety equipments. The Hon'ble Minister issued Safety Gadgets to 2,149 permanent and outsourcing sanitary workers of CMWSS Board, at the cost of Rs.65.65 lakh on 12.10.2023.
- To avoid accidents during operation and maintenance of the sewerage system, conducting special awareness camps regarding safety measures to the Board's contractors and contract workers.
- Following the safety aspects for the sewer allied works as per the "The Tamil Nadu Prohibition of Employment as Manual Scavengers and their Rehabilitation Rules, 2022" issued by the Municipal Administration and Water Supply Department dated 12.08.2022, by the Board.
- Based on the above rules, the contract conditions have been modified for O&M

contracts by including the provisions contained in these rules assuring that no person is engaged as manual scavenger and they are supplied with personal protective equipment (PPE).

5.10.1 Sanitation Workers Development Scheme

For the welfare of sanitary workers, the Hon'ble Chief Minister launched the "Sanitation Workers Development Scheme" on 09.12.2022.

Under this scheme, the core sanitation workers will be identified through field survey, and they will be linked with Welfare Board and provided with ID Card to avail various welfare schemes of the Government. Survey has been conducted for 3,312 core Sanitation workers, including 563 permanent workers, and out of which, 1289 non-permanent sanitation workers have been registered in Tamil Nadu Sanitation Workers Welfare Board and provided with ID card to avail various welfare schemes of the Government. Skill Training in mechanized safety

operations will be provided to them on safety aspects.

Training has also been provided to the 988 drivers/ workers of De-sludging operators of licensed sewer lorries on safe disposal methods of septage as well as appropriate usage of PPEs, safety gear, safety tools and first aid kits.

5.10.2 Transforming Sanitary Workers into Entrepreneurs

In line with the vision and guidelines of the Hon'ble Chief Minister of Tamil Nadu, CMWSSB signed an MoU with the Dalit Indian Chamber of Commerce and Industry (DICCII) on 28.02.2023 to transform sanitary workers into entrepreneurs. This initiative enables the operation and maintenance of the sewer system for seven years using specially designed jetting cum grabbing machines. Preference was given to 39 legal heirs of deceased sanitary workers, 48 core sanitary workers, and 126 individuals from SC&ST communities below the poverty line, totaling 213 beneficiaries.

The Hon'ble Chief Minister of Tamil Nadu have ordered subsidies of 50% through the

Annal Ambedkar Business Champion Scheme to 213 beneficiaries including SC/STs, enabling them to procure machinery. This scheme is being implemented with an allocation of Rs.500 crore.

Under this scheme, the Hon'ble Chief Minister of Tamil Nadu flagged off 100 jetting cum grabbing vehicles to sanitation workers on 06.12.2024, further empowering them to become entrepreneurs.

In line with the vision and guidelines of the Hon'ble Chief Minister of Tamil Nadu, CMWSSB is committed to ensuring the socio-economic development, dignified self-employment, and sustainable livelihood of sanitary workers and their families.

5.11 Financial Position

The total revenue expenditure as per Budget Estimate for the year 2024-25 is Rs.1,614.07 crore whereas the total income is Rs.1,567.15 crore.

The details of income, expenditure and deficit for the Year 2022-23 to 2024-25 are given below in table 5.7.

Table 5.7

(Rs. in crore)

Sl. No.	Particulars	R.E	B.E	R.E	B.E.
		2022-23	2023-24	2023-24	2024-25
I.	Revenue Income				
1.	Sale of water	377.35	488.56	382.60	429.61
2.	Water & sewerage tax	425.19	446.45	461.36	467.34
3.	Sale of treated used water & sewerage charges	166.45	198.07	203.46	194.12

(*R.E 2024-25 & B.E 2025-26 yet to be approved by Board for finalization)

The details of amount payable, receivable and outstanding loan as on 31.01.2025 are given below in table 5.8.

Table 5.8

(Rs. in crore)

Sl. No.	Particulars	Amount as on 31.01.2025
		(Tentative)
I.	Payable	
1.	CMWSSB – O&M contractors	31.08
2.	Refundable deposits	39.52
3.	Contractors payment (Scheme funds)	70.92
	Total	141.52
II	Receivable (Water and sewer taxes and charges)	
1.	Local bodies	27.34

2.	Government departments	190.74
3.	Consumers	494.19
	Total	712.27
III	Outstanding Loans	
1.	a) Principal (including Rs.1,522 crore payable to Government)	2011.89
2.	b) Interest (Government due 396 crore; TUFIDCO Rs.7 crore)	403.38
	Total	2415.27

Out of total income, the income from water supply and sewerage tax is Rs.467.34 crore, sale of water charges is Rs.429.61 crore, sale of treated used water & sewerage charges is Rs.194 crore and other income is Rs.81 crore.

6. TAMIL NADU WATER SUPPLY AND DRAINAGE BOARD

The Tamil Nadu Water Supply and Drainage Board (TWAD Board) is a statutory body established on 14th April 1971 with the primary aim of providing comprehensive water supply and sewage disposal systems for the rural and urban populations of Tamil Nadu (excluding Chennai). It works as a key player in implementing essential water and sewerage services across the state.

Key Functions and Contributions of TWAD Board

1. **Bulk Water Supply:** The Board acts as a bulk water supplier to local bodies, particularly those relying on distant river sources, and over sees Combined Water Supply Schemes, benefiting multiple local bodies.
2. **Water Supply:** In addition to providing bulk water supply to local bodies; TWAD Board has also provided water supply services to various institutions, including schools, anganwadis, primary health centers, veterinary hospitals, and industries.

3. **Industrial Growth Support:** TWAD Board formulates and implements water supply systems for industrial parks set up by the State Government, recognizing the need for water resources to support industrial growth.
4. **Sewage Treatment and Wastewater Reuse:** The Board is involved in implementing underground sewerage schemes for the collection, treatment and safe disposal of wastewater. Additionally, it is exploring methods for the reuse of treated wastewater for industrial purposes, especially in light of depleting water resources.

Board of Directors:

- **Chairman:** Principal Secretary to the Government, Municipal Administration and Water Supply Department.
- **Directors:**
 - Managing Director, Tamil Nadu Water Supply and Drainage Board
 - Additional Chief Secretary to the Government, Water Resources Department

- Additional Chief Secretary to the Government, Rural Development and Panchayat Raj Department
- Principal Secretary to the Government, Health and Family Welfare Department
- Special Secretary to the Government, Finance Department
- Managing Director, Chennai Metropolitan Water Supply and Sewerage Board
- Commissioner of Town Panchayats
- Commissioner of Rural Development and Panchayat Raj
- Director of Municipal Administration
- Joint Managing Director, Tamil Nadu Water Supply and Drainage Board
- Engineering Director, Tamil Nadu Water Supply and Drainage Board
- Finance Director, Tamil Nadu Water Supply and Drainage Board

These officials collaborate to ensure the efficient functioning of the Board in meeting the water supply and drainage needs of the state.

The Tamil Nadu Water Supply and Drainage Board (TWAD Board) operates with its headquarters in Chennai, and Chief Engineers' offices located in Vellore, Thanjavur, Coimbatore, and Madurai. Under these four Chief Engineers' offices, there are:

- 16 Circle Offices
- 85 Divisional Offices
- 259 Sub-Divisional Offices

6.1 Vision of TWAD Board

- Design and implement combined water supply schemes and stand-alone water supply schemes to provide protected water supply to rural and urban areas of Tamil Nadu, with a focus on adopting the latest technologies for timely completion.
- Design and implement underground sewerage schemes in urban areas.
- Operate and maintain combined water supply schemes covering multiple local bodies to ensure an adequate water supply to both rural and urban localities.

- Install smart water meters in all Combined Water Supply Schemes (CWSS) maintained by the TWAD Board and monitor water supply through the Internet of Things (IoT), aiming to reduce Non-Revenue Water and ensure a consistent, designed water supply to beneficiaries.
- Take necessary actions for the reuse of treated waste water in underground sewerage schemes.
- Implement measures to ensure the sustainability of water sources.

6.2 Functions of TWAD Board

- Planning, designing, and implementing water supply schemes for rural and urban areas in Tamil Nadu.
- Planning, designing, and implementing underground sewerage schemes in urban areas.
- Operating and maintaining combined water supply schemes.
- Testing and monitoring the quality of water supplied.
- Engaging in research and training activities.

6.3 Schemes Completed by TWAD Board during 2024-25

6.3.1 Combined Water Supply Schemes / Stand-alone Water Supply Schemes

During the fiscal year 2024-25, TWAD Board completed 9 Combined Water Supply Schemes that cover 6 Town Panchayats and 1486 rural habitations in the following districts: Erode, Cuddalore, Theni, Tiruchirappalli, Perambalur, Tirunelveli, Thoothukudi, and Thiruvallur. These schemes, with an estimated cost of Rs.1274.28 crore will benefit a total population of 12.04 lakh and provide a protected water supply of 66.47 MLD.

The details of schemes completed are given in the table 6.1.

Table 6.1

Sl. No	Name of the scheme	Estimate cost (Rs. in crore)	Population benefitted (lakh)
1.	CWSS to 434 rural habitations in 22 village panchayats of Chennimalai union in Erode district. (15.04 MLD)	482.36	1.86
2.	CWSS to Thittakudi, Pennadam, Mangalampettai, Vadalur, Kurinjipadi and Gangaikondan town panchayats and 625 rural	479.00	6.68

	habitations in Mangalore, Nallur and Vridhachalam unions in Cuddalore district (31.26 MLD)		
3.	CWSS to 250 rural habitations in Kadamalaikundu - Myladumparai, Andipatti and Theni unions in Theni district (9.30 MLD)	162.43	1.58
4.	CWSS to Koodapalli and 97 rural habitations in Manachanallur and Musiri unions in Tiruchirappalli district (6.03 MLD)	73.97	1.02
5.	CWSS to 15 rural habitations in Veppanthattai union in Perambalur district (1.61 MLD)	34.97	0.33
6.	CWSS to Gangaikondan and 21 other rural habitations in Manur union in Tirunelveli district (1.71 MLD)	19.25	0.30
7.	CWSS to 20 rural habitations in Srivaikundam union in Thoothukudi district (1.06 MLD)	15.48	0.17
8.	CWSS to Ammambakkam and 10 other rural habitations of 2 panchayats in Poondi union in Thiruvallur district (0.25 MLD)	3.64	0.05
9.	CWSS to Velagapuram and 10 other rural habitations of 2 panchayats in Poondi union in Thiruvallur district (0.21 MLD)	3.18	0.05
	Total (66.47 MLD)	1274.28	12.04

6.3.2 Underground Sewerage Schemes

During the fiscal year 2024-25, 4 Underground Sewerage Schemes were completed, covering Thoothukudi and Nagercoil Corporations, Rameswaram and Tindivanam Municipalities. These schemes benefit a total population of 3.51 lakh and were completed at an estimated cost of Rs.571.08 crore. The schemes are designed to convey and treat 39.43 MLD of sewage.

The details of Underground Sewerage Schemes completed are given in the table 6.2.

Table 6.2

Sl. No.	Name of Scheme	Estimate cost (Rs. in crore)	Population benefitted (lakh)
1.	UGSS to Thoothukudi Corporation (Area Based Development) in Thoothukudi district (6.25 MLD)	120.53	0.54
2.	UGSS to Nagercoil Corporation in Kanyakumari district (17.66 MLD)	129.95	1.54
3.	UGSS to Rameswaram municipality in Ramanathapuram district (4.08 MLD)	52.60	0.43
4.	UGSS to Tindivanam Municipality in Villuppuram district (11.44 MLD)	268.00	1.00
	Total (39.43 MLD)	571.08	3.51

6.4 Schemes Under Implementation

6.4.1 Water Supply Schemes

To benefit the people of multiple local bodies in rural and urban areas, Combined Water Supply Schemes are being implemented using rivers, dams and reservoirs as water sources in areas where local sources have been depleted and there is a need for drinking water.

Combined Water Supply Schemes are designed to provide:

- 135/90/70 liters per capita per day (LPCD) to urban local bodies (Corporations, Municipalities, Town Panchayats)
- 55 LPCD to rural local bodies

Currently, 25 water supply schemes covering 15 municipalities, 37 town panchayats, and 13,565 rural habitations in the districts of Tiruchirappalli, Tiruvarur, Nagapattinam, Thanjavur, Perambalur, Sivagangai, Virudhunagar, Madurai, Tirunelveli, Thoothukudi, Ramanathapuram, Dindigul, Chengalpattu, Tiruvallur, Cuddalore, and Namakkal are under implementation at an estimated cost of Rs.17,452.72 crore. These schemes are

designed to supply 763.72 MLD of water and benefit a population of 115.09 lakh, with different sources of funding.

Out of 25 schemes, 24 schemes are Combined Water Supply Schemes and 1 is Stand-alone water supply scheme.

6.4.1.1 Combined Water Supply Schemes

Out of the 25 schemes, 20 CWSS covering seven municipalities, 27 town panchayats, and 11,113 rural habitations in the districts of Ramanathapuram, Dindigul, Nagapattinam, Madurai, Virudhunagar, Thoothukudi, Tiruvarur, Namakkal, Tirunelveli, Thanjavur, Cuddalore, Tiruchirappalli, Thiruvallur and Chengalpattu are under implementation at an estimated cost of Rs.14,358.41 crore under Jal Jeevan Mission (JJM) and Atal Mission for Rejuvenation and Urban Transformation (AMRUT 2.0) funding.

These schemes are designed to supply 621.38 MLD of water by providing 12,73,064 functional household tap connections (FHTCs), benefiting a population of 94.36 lakh.

The details of the schemes are given in the table 6.3.

Table 6.3

Sl No.	District	Name of the scheme	Estimate cost (Rs. in crore)	Population benefitted (lakh)	FHTCs planned
1.	Ramanathapuram and Dindigul	CWSS to 2 municipalities, 5 town panchayats and 2306 rural habitations in 11 unions in Ramanathapuram district and Oddanchatram municipality, 2 town panchayats and 1,422 rural habitations in 7 unions in Dindigul district (135 MLD)	4187.84	25.11	3,19,192
2.	Nagapattinam	CWSS to Nagapattinam Municipality, 4 town panchayats and 980 rural habitations in 6 unions in Nagapattinam district (93 MLD)	1782.49	9.66	1,42,805
3.	Madurai	CWSS to 867 rural habitations in Alanganallur, Chellampatti, Kalikudi, Thirumangalam, Thiruparankundram, Usilampatti and Vadipatti unions in Madurai district (60 MLD)	1559.07	10.93	1,16,717
4.	Madurai	CWSIS to 236 rural habitations in T.Kallupatty and Sedapatty unions in Madurai district (15.55 MLD)	240.45	2.09	44,831
5.	Madurai	CWSIS to 88 rural habitations in Kottampatty and Melur unions in Madurai district (6.46 MLD)	127.18	1.78	30,009
6.	Virudhunagar and Thoothukudi	CWSS to 1,286 rural habitations in 11 unions of Virudhunagar district and 45 rural habitations in 2 unions of Thoothukudi district (43.70 MLD)	1387.73	9.51	2,33,789
7.	Tiruvarur	CWSS to 667 rural habitations in Tiruvarur, Nannilam, Koradachery, Kottur, Mannargudi and Thiruthuraiipoondi unions in Tiruvarur district (32.35 MLD)	1127.20	5.23	43,804

8.	Namakkal	CWSS to Rasipuram municipality, 8 town panchayats and 523 rural habitations in Rasipuram, Vennandur, Namagiripettai and Puduchatram unions with bulk provision to 547 rural habitations in Elachipalayam, Mallasamudram and Paramathi unions in Namakkal district (86.04 MLD)	854.37	5.83	40,454
9.	Namakkal	CWSS to 547 rural habitations in Mallasamudram union, Elachipalayamunion and 11 panchayats in paramathi union in Namakkal district (Bulk Provision from Rasipuram CWSS)	284.04	2.41	22,582
10.	Tirunelveli	CWSS to 831 rural habitations in 6 unions in Tirunelveli district (22.79 MLD)	605.75	3.66	65,434
11.	Tirunelveli	CWSS to Kalakkadu Municipality and Nanguneri, Eruvadi, Moolakaraipatti, Thirukurunkudi, Vadakkuvalliyoor, Thisayanvilai and Panagudi town panchayats in Tirunelveli district (30.16 MLD)	423.13	2.50	49,417
12.	Thoothukudi	CWSS to 363 rural habitations in 6 unions in Thoothukudi district (16.57 MLD)	515.72	3.96	92,407
13.	Tirunelveli	CWSS to 41 rural habitations in Palayamkottai union in Tirunelveli district (4.06 MLD)	45.10	0.51	10,323
14.	Thanjavur	CWSS to 252 rural habitations in Ammapettai and Papanasam unions inThanjavurdistrict (15.20 MLD)	288.02	2.78	18,444
15.	Thanjavur	CWSIS to 214 rural habitations in Budalur, Thiruvaiyaru and Thanjavur unions in Thanjavur district (16.78 MLD)	248.67	2.25	17,075

16.	Cuddalore	CWSS to Chidambaram municipality, Annamalai Nagar town panchayat, and 36 rural habitations in 10 village panchayats in 2 unions in Cuddalore district (17.17 MLD)	255.64	1.59	2,078
17.	Tiruchirappali	CWSS to 109 rural habitations in Lalgudi and Pullambadi unions in Tiruchirappalli district (11.26 MLD)	248.59	1.90	15,454
18.	Tiruchirappali	CWSIS to 174 rural habitations in Manikandam union in Tiruchirappalli district (11.71 MLD)	119.22	1.98	6,694
19.	Thiruvallur	CWSS to Cherukkanur and 114 other rural habitations in Tiruthani and R.K.pet unions in Thiruvallur district (2.76 MLD)	44.58	0.54	255
20.	Chengalpattu	CWSS to Kovalam and 10 other habitations in Thiruporur union in Chengalpattu district (0.82 MLD)	13.62	0.14	1,300
		Total (621.38 MLD)	14358.41	94.36	12,73,064

Under NABARD and MNP funding, CWSS to 8 town panchayats and 2,452 rural habitations in 11 unions with bulk provision to 3 municipalities in Sivagangai district is under implementation at an estimated cost of Rs.2,119.07 crore. The total designed capacity of the scheme is 86.42 MLD, which will benefit a population of 16.12 lakh.

Under other source of funding, 3 Water Supply Schemes for 4 municipalities and 2 town

panchayats in Virudhunagar and Perambalur districts are at various stages of implementation at an estimated cost of Rs.866.34 crore which on completion will supply 47.35 MLD of water to benefit a population of 4.07 lakh.

The details of the schemes are given below in Table 6.4

Table 6.4

Sl. No	Name of the Scheme	Source of Funding	Estimate Cost (Rs. crore)	Population Benefitted (lakh)
1.	CWSS to Aruppukottai, Sattur and Virudhunagar municipalities in Virudhunagar district (26.94 MLD)	IUDM / SUIDF	444.71	2.60
2.	CWSS to Perambalur Municipality, and SIPCOT Industrial Complex located at Erayur & Padalur in Perambalur District (16.19 MLD)	SUIDF / KNMT	345.78	0.98
3.	CWSS to Kariapatti and Mallankinaru Town Panchayats in Virudhunagar district (4.22 MLD)	TUFIDCO/ CGF / KNMT	75.85	0.49
	Total (47.35 MLD)		866.34	4.07

6.4.1.2 Stand-alone Water Supply Schemes

The Tamil Nadu Water Supply and Drainage Board (TWAD) also implements stand-alone water supply schemes for urban local bodies. These schemes are implemented by the TWAD Board and then handed over to the local bodies for operation and maintenance.

Under AMRUT 2.0, Water Supply Scheme to Thuraiyur Municipality in Trichy district is under implementation at an estimated cost of Rs.108.90 crore. The total designed capacity of this scheme is 8.57 MLD, which will benefit a population of 54,000.

6.5 Ongoing Underground Sewerage Schemes

6.5.1 Atal Mission for Rejuvenation and Urban Transformation (AMRUT)

The UGSS in the Kurichi and Kuniyamuthur areas of Coimbatore Corporation is nearing completion, and is being implemented under the Atal Mission for Rejuvenation and Urban Transformation (AMRUT) at an estimated cost of Rs.591.14 crore. Once completed, the project

will be able to treat 30.53 MLD of waste water, benefiting a population of 5.17 lakh.

6.5.2 Underground Sewerage Schemes with State Government funding

The TWAD is also implementing two underground sewerage schemes in the Villupuram and Thiruvallur districts. These schemes are being funded by the State Government and are estimated to cost Rs.325.82 crore. Once completed, they will be able to collect and treat 11.08 MLD of sewage, benefiting a population of 1.17 lakh.

The details of schemes are given in the table 6.5.

Table 6.5

Sl. No.	Name of the scheme	Source of Funding	Estimate cost (Rs. in crore)	Population benefitted (lakh)
1.	UGSS to Villuppuram Municipality (added areas) in Villupuram district (4.56 MLD)	IUDM / SUIDF	263.00	0.60
2.	UGSS to Ponneri Municipality in Thiruvallur district (6.52 MLD)	IUDM	62.82	0.57
	Total (11.08 MLD)		325.82	1.17

6.5.3 Underground Sewerage schemes with Centrally Sponsored funding

The Tamil Nadu Water Supply and Drainage Board (TWAD) is also implementing two underground sewerage schemes in the Thoothukudi and Krishnagiri districts. These schemes are being funded by the Central Government and are estimated to cost Rs.735.83 crore. Once completed, they will be able to collect and treat 38.03 MLD of sewage, benefiting a population of 3.44 lakh.

The details of schemes are given in the table 6.6

Table 6.6

Sl. No.	Name of the scheme	Source of Funding	Estimated cost (Rs. in crore)	Population benefitted (lakh)
1.	UGSS to Thoothukudi Corporation Non Area Based Development areas in Thoothukudi District. (5.38 MLD)	AMRUT 2.0 (GOI)	153.29	0.47
2.	UGSS to Hosur Corporation in Krishnagiri District (32.65 MLD)	AMRUT 2.0 (GOI)	582.54	2.97
	Total (38.03 MLD)		735.83	3.44

6.5.4 Underground Sewerage schemes with Externally Aided funding.

The Tamil Nadu Water Supply and Drainage Board (TWAD) is implementing five underground sewerage schemes in the Coimbatore, Virudhunagar, Tiruvarur, and Chengalpattu districts. These schemes are being funded by external sources and are estimated to cost Rs.1955.56 crore. Once completed, they will be able to collect and treat 79.51 MLD of sewage, benefiting a population of 6.36 lakh.

The details of schemes are given in the table 6.7 :

Table 6.7

Sl. No.	Name of the scheme	Funding	Estimate cost (Rs. in crore)	Population benefitted (lakh)
1.	UGSS to 4 added areas (Goundampalayam, Vadavalli, Veerakeralam, Thudiyalur) in Coimbatore Corporation in Coimbatore District. (34.92 MLD)	ADB	922.16	2.40
2.	UGSS to added areas of Vellakinaru, Chinnavedampatti and Saravanampatti of Coimbatore Corporation- Zone VI (9.95 MLD)	KfW&AMRUT 2.0	318.90	0.85
3.	UGSS to Aruppukottai Municipality in Virudhunagar District. (13.24 MLD)	KfW & SBM 2.0	297.25	1.15
4.	UGSS to Mannargudi Municipality in Tiruvarur District. (10.05 MLD)	KfW & SBM 2.0	229.00	0.87
5.	UGSS to Chengalpattu Municipality in Chengalpattu District. (11.35 MLD)	KfW & SBM 2.0	188.25	1.09
Total (79.51 MLD)			1955.56	6.36

6.6 Operation and Maintenance of Combined Water Supply Schemes

Combined Water Supply Schemes covering more than one local body are being maintained by TWAD Board. TWAD Board currently maintains 548 combined water supply schemes, covering 13 corporations, 70 municipalities, 325 town panchayats, 51,048 rural habitations, and 576 industries/institutions, supplying an average of 2,286 million litres of water daily benefitting a population of 5.28 crore. The details are given in the table 6.8:

Table 6.8

Sl. No.	Name of the beneficiary	No. of beneficiaries	Earmarked quantity (in MLD)	Average supplied quantity (in MLD)
1.	Corporations	13	533	452
2.	Municipalities	70	293	253
3.	Town panchayats	325	390	345
4.	Rural habitations	51,048	1,253	1,199
5.	Industries/ institutions/ commercial organisations	576	65	37
	Total	52,032	2,534	2,286 (90%)

6.6.1 Retrofitting of Combined Water Supply Schemes (CWSS) under Jal Jeevan Mission Fund

56 Combined Water Supply Schemes in Tiruchirappalli, Ariyalur, Perambalur, Coimbatore, Tiruppur, Namakkal, Salem, Nilgiris, Chengalpattu, Thiruvallur, Cuddalore, Kallakurichi, Villupuram, Ramanathapuram, Sivagangai, and Dindigul districts were taken up for retrofitting to provide 55 LPCD of water supply to rural habitations through FHTCs under Jal Jeevan Mission Funds at a cost of Rs.1,658.35 crore (TWAD Components – Rs.1,299.85 crore and RD Components Rs.358.50 crore). At present, 52 works have been completed, and the remaining 4 works are in various stages of progress.

6.6.2 Summer Action Plan 2024

During a discussion led by the Hon'ble Chief Minister of Tamil Nadu on 27.04.2024, it was instructed that available water in dams should be utilized judiciously to meet summer demands, ensuring adequate water supply for the next two months.

For ensuring proper water supply to drought affected districts, Rs.18.70 crore was allocated to TWAD Board and administrative approval was granted vide G.O. (Ms) No.339, Revenue and Disaster Management Department, dated 04.09.2024.

One major effort taken was pumping water below the scour level of Porthiumund Dam to Pillur Reservoir via Emerald Dam and also drawal of water from upper Bhavani Dam by opening scour vent of Dam through Kerala State via the Bhavani River to address Coimbatore Corporation's water deficit in April 2024.

6.6.3 Fengal Cyclone 2024

During Fengal Cyclone (01.12.2024 to 03.12.2024), Tiruvannamalai, Villupuram, Kallakurichi, Cuddalore, Ranipet, Dharmapuri, Krishnagiri, Kancheepuram, Chengalpattu, Nilgiris, and Salem districts experienced unprecedented heavy rainfall. Consequently, infiltration wells, bore wells, pipe-carrying bridges, cables, and connecting mains in CWSS maintained by TWAD Board were submerged or damaged.

Swift restoration efforts temporarily revived 76 affected CWSS, ensuring continued water supply. Administrative approval was granted for temporary restoration works for the damages in CWSS under TWAD Board maintenance in Tiruvannamalai, Villupuram, Kallakurichi, Cuddalore, Dharmapuri, and Krishnagiri districts for Rs.5.00 crore vide G.O. (Ms) No.578, Revenue and Disaster Management Department, dated 27.12.2024.

A Post-Disaster Needs Assessment (PDNA) report was prepared by the National Disaster Management Authority (NDMA) to assess recovery and reconstruction needs. The report proposes Rs.14.95 crore for CWSS recovery efforts in Chengalpattu, Kancheepuram, Villupuram, and Kallakurichi districts, pending approval from the Government of India under NDRF and SDRF funds.

6.6.4 Northeast Monsoon Floods 2024

Following the Fengal Cyclone, a depression led to continuous rainfall in Tamil Nadu from 12.12.2024 to 15.12.2024, resulting in heavy river flow in Thamirabarani, MullaiPeriyar, Vaigai, MoolaVaigai, Vellar, Coleroon,

Thenpennaiyar, Palar, Cheyyar, and Kosasthalaiyar rivers.

As a result, infiltration wells, bore wells, pipe-carrying bridges, cables, and connecting mains were submerged or dislocated in CWSS maintained by TWAD Board across Thoothukudi, Tirunelveli, Tenkasi, Virudhunagar, Theni, Perambalur, Ariyalur, Cuddalore, Tiruppur, Chengalpattu, and Thiruvallur districts. Rapid restoration efforts revived 110 affected CWSS, ensuring continued water supply to the public.

6.6.5 Works under Ungal Thoguthiyil Muthalamaichar (UTM)

The Tamil Nadu Government launched the “Ungal Thoguthiyil Muthalamaichar” program and established district-level committees comprising Members of the Legislative Assembly, led by District Collectors, to implement constituency-level schemes.

Under this initiative, 19 works worth Rs.152.38 crore were undertaken by TWAD Board during 2023-24. Of these, 4 works have been completed at Rs.41.89 crore, 6 works are in progress for Rs.39.90 crore and 9 works are in the tender process.

For 2024-25, 3 projects amounting to Rs.56.62 crore have been planned. One such initiative involves replacing pipes and pump sets in CWSS to Kottur, Vettaikaranpudur, Odaiyakulam Town Panchayats and 38 rural habitations of Anaimalai Union in Coimbatore District at a cost of Rs.26.00 crore, currently under process for fund tie-up and administrative approval. Detailed project reports for the remaining 2 works are being prepared.

6.6.6 Announcement by the Hon'ble Chief Minister on Improvement Works in CWSS

The TWAD Board has approved the replacement of pipes and pump sets in CWSS for 645 rural habitations across 3 unions in Ariyalur and 2 unions in Perambalur districts for Rs.42.00 crore and in CWSS to 295 rural habitations in Pollachi North, Pollachi South, and Kinathukadavu unions in Coimbatore district, valued at Rs.51.00 crore and are under process for fund tie-up and administrative approval.

Furthermore, detailed project reports have been prepared for:

- improvements to CWSS in Chennimalai, Chithode, Nasiyanur, K.C. Palayam, Perundurai Town Panchayats, and 69 rural habitations in Chennimalai Union in Erode District (Rs.15.00 crore)
- improvements to CWSS in Elathur, Nambiyur Town Panchayats, and 128 rural habitations in Sathyamangalam and Nambiyur Unions in Erode District (Rs.27.00 crore)
- improvements to CWSS in Doddampalayam and 82 rural habitations in Bhavanisagar Union in Erode District (Rs.12.00 crore)

The fund tie-up and administrative sanction process is underway.

6.7 Special Scheme

Hogenakkal Combined Water Supply Scheme Phase – II

The Hon'ble Chief Minister announced on 20.01.2022 that detailed project report for implementing the Hogenakkal Combined Drinking Water Supply scheme (Phase –II) will be prepared for enhancing the present level of water supply to the people in Dharmapuri and Krishnagiri districts.

A Detailed Project Report has been prepared for the Hogenakkal Water Supply Project (Phase-II) to supply 304.83 MLD of treated water to Hosur Corporation, Dharmapuri and Krishnagiri Municipalities, 16 Town Panchayats, and 6,802 Rural Habitations in 20 Panchayat Unions in Dharmapuri and Krishnagiri Districts, with the Cauvery River as the source. The estimated cost of this project is Rs.7,955.37 crore.

The central share of the rural component, amounting to Rs.2,283.41 crore, has been approved in the State Level Scheme Sanctioning Committee (SLSSC) of the Jal Jeevan Mission on 15.06.2023. For the remaining state share of the rural and urban components, the proposal has been included in the Japan International Cooperation Agency (JICA) rolling plan. JICA is currently finalizing Minutes of Discussion (MoD) and steps are being taken to conclude the loan agreement at the earliest.

Upon completion of this project, a population of 38.82 lakh will benefit from the improved water supply infrastructure.

6.8 New Combined Water Supply Schemes

6.8.1 CWSS in Tender Stage

Administrative approval has been granted for a Combined Water Supply Scheme to serve 17 PVTG (Particularly Vulnerable Tribal Group) habitations in Velliyankadu and Tholampalayam panchayats of Karamadai union and No.24 Veerapandi panchayat of Periyanaickenpalayam union in Coimbatore district. The scheme, costing Rs.11.75 crore, aims to benefit a population of 4,000. Work orders will be issued soon, and the project will commence shortly.

6.8.2 Administrative Sanction Awaited Schemes

Administrative approval is under process for three Combined Water Supply Schemes covering Dindigul Corporation, Chinnalapatty, Sevugampatty, and Ponnampatty Town Panchayats, along with 2,084 rural habitations in Dindigul, Karur, Tiruchirappalli, and Namakkal districts. The schemes will utilize the Vaigai and Cauvery rivers as water sources to supply

103.01 MLD at a total cost of Rs.2,179.00 crore, benefiting a population of 14.21 lakh.

A Detailed Project Report has been prepared for the Combined Water Supply Scheme to 29 rural habitations in Kanai and Koliyanur unions in Villuppuram district, with the Thenpennai River as the source. This scheme, announced by the Hon'ble Chief Minister at Villupuram on 28.01.2025, will supply 1.62 MLD at a total cost of Rs.33.76 crore, benefiting a population of 37,000.

Additionally, 16 Combined Water Supply Schemes covering 1 corporation, 9 municipalities, 6 town panchayats, and 15,463 rural habitations in the districts of Tiruvannamalai, Thiruvallur, Kallakurichi, Villuppuram, Pudukkottai, Mayiladuthurai, Erode, Tenkasi, Tirunelveli, Thoothukudi, Thanjavur, Thiruvarur, Namakkal, Dindigul, Sivagangai, and Tiruppur are in the process of obtaining administrative approval. These schemes, with a total estimated cost of Rs.24,584.29 crore, aim to benefit a population of 100.92 lakh.

6.9 Research, Design, Training and Project Management Centre

6.9.1 Research and Design Unit

The following activities are being carried out in Research and Design Unit

1. Capacity Building – India and Denmark Cooperation

Under cooperation between the National Jal Jeevan Mission (NJJM) and the Danish Environmental Protection Agency, experts from Denmark visited Tamil Nadu for pilot demonstrations of energy, pump, and flow meter audits at the Pillur Head Works and Velliankadu Water Treatment Plant of the CLRA Combined Water Supply Scheme in Coimbatore District.

A "Training for Trainers" program is completed for TWAD Engineers in Tiruchirappalli and Coimbatore sub training centres.

2. Study for Shut Off Head in Gravity Mains

In TWAD Board, gravity mains are designed on the basis of Static head. When the outlet of the pipe is shut water is stagnant inside

the whole stretch of the pipeline and Shut off head is developed leading to pipe burst. This necessitates higher-class pipes, increasing project costs. To optimize costs, an analysis of the actual shut-off head in the pipeline is being conducted in the pipeline stretch between Madam and Uthangarai Master Balancing Reservoir (MBR) in the Hogenakkal Combined Water Supply Scheme (Phase-I).

3. Solar Power Plant

The TWAD Board operates and maintains 548 CWSS, supplying safe potable drinking water across Tamil Nadu (except Chennai Metropolitan Area). Electricity charges account for around 60% of total operation and maintenance expenditure.

To reduce electricity costs, it is proposed to install solar power plants for operating pump sets under High Tension (HT) connections using grid connected solar energy.

A proposal has been approved by the Board for engaging a third-party consultant to prepare a Detailed Feasibility Report (DFR) for installing a 200 MW solar power plant on land owned by

Tamil Nadu Salt Corporation (TNSC) in Thiruporur, Chengalpattu district.

Further analysis is being carried out to install solar power plants on vacant lands owned by TWAD Board at Vellalore in Coimbatore district, Kayatharu and Therkku Ilanthaikulam in Thoothukudi district.

4. Development of Software to Aid in Scheme Formulation

To design the optimal pipe diameter for pumping / gravity mains in Water Supply Schemes (WSS) and Underground Sewerage Schemes (UGSS), the TWAD Board proposes to procure upgraded Economical Cost of Pumping Main (ECP) software based on Central Public Health and Environmental Engineering Organisation (CPHEEO) norms.

5. Ductile Iron Restrained Joint Technology

As an alternative to thrust blocks for withstanding hydrodynamic forces in water supply pipelines, the TWAD Board proposes adopting Ductile Iron Restrained Joints. This innovative technology aims to reduce

construction time and minimize inconvenience to road traffic during construction.

6.9.2 Training and Capacity Building Activities

The TWAD Board has a nodal training centre at its Head Office and sub-training centres in Tiruchirappalli, Madurai, and Coimbatore. Regular training and capacity-building programs are conducted for technical and other staff through these centres.

6.9.2.1 Training Programs 2024-25

10 training programs in 45 batches have been conducted for Engineers, Hydrogeologists, Draughting Officers, Junior Water Analysts, Administrative and Accounts Staff, Drivers, and Office Assistants of the TWAD Board. These programs benefit 1,355 personnel and are funded under the Jal Jeevan Mission Support Activity Fund at an estimated cost of Rs.2 crore.

A "Training of Trainers" course on "General Pump Audit and Energy Optimization of Pumping Stations and Overall Introduction to Pump Maintenance" was conducted under the Danish Environmental Protection Agency Program. Two

batches of 15 engineers each were trained in Tiruchirappalli (02.12.2024 - 06.12.2024) and Coimbatore (27.01.2025 - 31.01.2025).

6.9.2.2 Orientation Training Programs

Orientation training has been provided to newly recruited Assistant Engineers (88), Junior Engineers (49), and Junior Draughting Officers (48), totalling 185 personnel.

It is proposed to conduct additional Orientation Training Programs for 100 Assistant Engineers/Junior Engineers and 50 Junior Assistants expected to be appointed.

6.9.2.3 Specialized Training Programs

Training has been provided to 52 officials, including Deputy Collectors and Under Secretaries to the Government, under the "Compulsory Training in Heads of Departments and District Training Programs" initiated by the Government of Tamil Nadu.

611 officials were deputed to capacity-building training programs conducted by the following institutions:

- TNUIFSL (Tamil Nadu Urban Infrastructure Financial Services Limited)
- JICA (Japan International Cooperation Agency)
- Danida Fellowship Centre, (Denmark)
- Danish Environmental Protection Agency (DEPA)
- Dr.Syama Prasad Mookerjee National Institute of Water & Sanitation, Department of Drinking Water & Sanitation, Kolkata
- National Institute of Hydrology (NIH), Roorkee
- Indian Institute of Technology (IIT), Roorkee
- The Embassy of Israel in collaboration with IIT Madras
- MoHUA (Ministry of Housing and Urban Affairs), CPHEEO (Central Public Health and Environmental Engineering Organization).

- TNeGA (Tamil Nadu e-Governance Agency), Anna Administrative Staff College, Chennai

6.9.2.4 Future Training Initiatives

To further enhance employee skills and operational efficiency, it is proposed to conduct 10 training programs for TWAD Board employees in the year 2025-26.

These research, design, and capacity-building initiatives reinforce the TWAD Board's commitment to enhancing operational efficiency, reducing costs, and adopting innovative technologies for sustainable water management.

6.10 Material Testing and Quality Control Laboratory

There are four material quality control laboratories functioning under the TWAD Board at Coimbatore, Madurai, Tiruchirappalli, and Tindivanam. The laboratories in Coimbatore and Madurai have been awarded National Accreditation Board for Testing and Calibration Laboratories (NABL) certifications.

These laboratories conduct testing on the following materials:

- Cement, steel rods, river sand, crushed stone sand, coarse aggregates, bricks, and concrete cubes, including mix design of concrete.
- Filter media.
- PVC pipes, UPVC pipes, O-PVC pipes, HDPE pipes, DWC pipes, GI pipes, stoneware pipes, and DI pipes.
- Electric cables.

During the year 2024-25 (April 2024 to February 2025), a total of 11,906 samples have been tested, with an additional 1,000 samples expected. It is proposed to test approximately 12,000 samples during the year 2025-26.

6.11 Water Quality Testing and Surveillance

To ensure the supply of safe drinking water, the TWAD Board has established:

- One state-level laboratory at Chennai.
- 37 district-level laboratories.
- 51 sub-district level laboratories.

- 24 block-level laboratories.

These laboratories test the chemical and bacteriological parameters of water to ensure quality and take necessary corrective actions when needed.

- The state-level water testing laboratory at Chennai is NABL accredited and recognized as the State Referral Institute for Tamil Nadu by the Government of India.
- Under the Jal Jeevan Mission, NABL accreditation has been obtained for 31 district water testing laboratories, and the accreditation process is ongoing for six newly formed districts.
- Additionally, NABL recognition has been obtained for 51 sub-district and 24 block-level laboratories.

For the year 2024-25, the targeted 8 lakh water samples have been tested with funding from JJM and the State Government.

In the financial year 2025-26, it is proposed to test water samples from all drinking water sources in water supply schemes, schools,

Anganwadis, and Functional Household Tap Connections (FHTCs) established under the Jal Jeevan Mission.

6.12 Hydrogeological Activities

The Hydrogeological Wing of the TWAD Board is responsible for the scientific identification, exploration, assessment, conservation, and management of water resources to ensure sustainable potable water supply for TWAD Board projects.

- Groundwater Prospects Atlas maps (Hydro Geological Maps) are generated using Remote Sensing (RS) and Geographical Information System (GIS) technologies to identify groundwater potential areas.
- These maps also aid in selecting locations for constructing recharge structures to ensure the sustainability of water sources.
- Block-wise HGM maps are prepared and used effectively for hydrogeological fieldwork.
- District-wise Firka maps have been generated using GIS technology and furnished to field hydrogeologists to visualize

spatial distribution of groundwater resources.

During 2024-25, 950 geophysical survey works were carried out to assess groundwater potential.

6.12.1 Sustainable Water Security Mission – “SuWaSeM”

The TWAD Board is a key technical service provider for rainwater harvesting and acts as the coordinator for the Sustainable Water Security Mission (SuWaSeM) to ensure sustainable drinking water supply in urban areas of Tamil Nadu.

This mission focuses on implementing various rainwater harvesting methods with a 50:50 cost-sharing model between urban local bodies and SuWaSeM. The key activities under this mission include:

- Rooftop Rainwater Harvesting (RRWH).
- Restoration and rejuvenation of water bodies.
- Campus Rainwater Harvesting (RWH other than rooftop).
- Stormwater harvesting.

The total expenditure incurred under SuWaSeM up to 2024-25 is Rs.834.63 lakh.

6.12.2 Rainwater Harvesting Awareness

The TWAD Board actively promotes Rainwater Harvesting (RWH) awareness among the general public through:

- Public campaigns and rallies in all districts.
- LED display vans traveling across Tamil Nadu for public outreach in schools, colleges, and common areas (October 2024).
- Distribution of RWH pamphlets highlighting the importance of rainwater harvesting.

6.12.3 Proposed GIS Activities for 2025-26

To improve monitoring and management of water supply schemes, the TWAD Board is leveraging GIS technology:

- **GIS Integration of Water Supply Networks**
 - The TWAD Board operates 548 Combined Water Supply Schemes (CWSS) across 37 districts. An amount of Rs.8 crore has been allocated for implementation of GIS in CWSS monitored in Tiruchirapalli

District. In 2025-26, it is proposed to bring all water supply networks and associated assets onto the GIS platform.

- A GIS web application with a dashboard will be developed, enabling senior officials to efficiently monitor and manage daily operations from their offices.

- **Development of Web-Based Mobile Applications**

- A web-based mobile application will be developed separately for engineering applications and hydrogeological activities to update daily field operations efficiently.

- **Creation of Base and Thematic Maps**

- Village, block, taluk, and district-level base maps will be hosted on a web server for easy access by field officials.
- Thematic maps, including geology, geomorphology, lithology, and structural features, will also be made available on the GIS platform.

- **Drone Surveys for River Source CWSS**

- All CWSS that rely on river sources will undergo drone surveys to accurately capture their source locations.
- Survey results will be integrated into a Geo-Spatial layer, which will include all relevant attributes of each water supply network in GIS.

These initiatives are aimed at enhancing efficiency, transparency, and data-driven decision-making in water supply management across Tamil Nadu.

6.12.4 Ground water level measurement carried out by TWAD Board

The District wise water level is being measured during Pre-Monsoon (May) and Post-Monsoon (January) seasons of every year through 1286 TWAD Board observation wells.

The district-wise average ground water level in metres during May 2024 and January 2025 (pre monsoon and post monsoon) is given in the Table.6.9:

Table 6.9

Name of the District	No. of Observation Wells	Ground water level (m) May -2024	Groundwater level (m) Jan-2025 (Tentative)	Groundwater level (m) Rise(+)/ Fall (-)
Ariyalur	27	24.17	12.20	+11.97
Chengalpattu	29	6.17	3.40	+2.77
Coimbatore	38	10.44	8.45	+1.99
Cuddalore	42	23.61	14.00	+9.61
Dharmapuri	37	11.60	5.00	+6.6
Dindigul	51	11.38	10.65	+0.73
Erode	42	12.97	5.25	+7.72
Kallakurichi	42	9.63	4.00	+5.63
Kancheepuram	17	7.25	3.90	+3.35
Kanniyakumari	16	6.68	4.76	+1.92
Karur	34	13.20	7.26	+5.94
Krishnagiri	44	7.81	4.00	+3.81
Madurai	31	4.75	3.44	+1.31
Mayiladuthurai	13	8.60	4.50	+4.1
Nagapattinam	13	2.62	1.20	+1.42
Namakkal	37	10.73	6.30	+4.43
Perambalur	16	8.01	2.20	+5.81
Pudukkottai	24	11.13	9.50	+1.63
Ramanathapuram	91	5.23	5.10	+0.13
Ranipet	20	5.73	2.95	+2.78
Salem	41	11.32	6.10	+5.22
Sivagangai	79	12.98	6.80	+6.18
Tenkasi	27	5.47	2.77	+2.7
Thanjavur	35	20.82	9.20	+11.62

Theni	20	9.33	8.56	+0.77
Tirunelveli	36	6.42	2.65	+3.77
Tirupathur	17	6.83	3.90	+2.93
Tiruppur	39	9.95	6.35	+3.6
Tiruvallur	35	6.42	3.50	+2.92
Tiruvannamalai	58	6.86	2.10	+4.76
Tiruvarur	19	12.34	4.70	+7.64
Thoothukudi	49	4.19	2.85	+1.34
Tiruchirappalli	45	20.68	12.10	+8.58
Vellore	15	6.88	3.40	+3.48
Villuppuram	47	9.20	3.80	+5.4
Virudhunagar	60	4.00	3.14	+0.86
State Average	1286	9.87	5.54	+4.33

6.13 Electronic Data Processing Wing

The TWAD Board has implemented an integrated e-Governance System, TWADNEST, to manage core functional areas, including:

- Human Resource Management System.
- Financial Accounting System.
- Payroll and Pension.
- Billing of water charges (Demand, Collection & Balance - DCB).

To strengthen Management Information Systems (MIS) in the TWAD Board, a proposal

has been made to re-engineer the existing TWADNEST software with a new, comprehensive system utilizing the latest technological advancements. This enhancement is being facilitated through the Tamil Nadu e-Governance Agency (TNeGA).

In alignment with the Business Reform Action Plan (BRAP) of the Government of Tamil Nadu, and for the implementation of Ease of Doing Business (EoDB) in TWAD Board, a new water supply connection software application has been developed. This portal is integrated with the Single Window Portal at Guidance Bureau, streamlining the process for new water supply connections.

The e-office is being implemented in the TWAD Board.

To monitor the progress of ongoing water supply, sewerage schemes and operation & maintenance of CWSS, a Project Monitoring Software System (PMS) has been deployed to ensure efficient tracking and management of these schemes.

6.14 Financial Position

The total revenue expenditure as per the Annual Accounts for the year 2024-25 up to 31.03.2025 (Tentative) is Rs.2,098.46 crore whereas the total income is Rs.2,052.84 crore.

The details of income, expenditure, Deficit and cumulative deficit for the year 2022-23 to 2024-25 (Tentative as on 31-03-2025) are given in Table 6.10:

Table 6.10

(Rs.in crore)

Sl. No.	Particulars	FY 2022-23	FY 2023-24	FY 2024-25 as on 31.03.2025 (Tentative)
I	Revenue Income			
1.	Centage Charges	307.20	632.51	528.25
2.	Water Charges	770.92	965.70	1013.98
3.	Other income (including Investigation Charges)	227.02	162.09	165.10
4.	Grants	286.77	245.18	345.51
	Income – Total	1591.91	2005.48	2052.84
II	Revenue Expenditure			
1.	Salary	110.59	112.36	129.45
2.	Pension and Retirement Benefits	397.58	421.07	468.45
3.	Maintenance of CWSSs	1115.44	1351.83	1455.51
4.	Other expenditure	30.09	32.77	45.05
	Expenditure – Total	1653.70	1918.03	2098.46
	Deficit/ Surplus	-61.79	87.45	-45.62
	Cumulative Deficit	2,862.11	2,774.66	2,820.28

6.15 Jal Jeevan Mission

The Jal Jeevan Mission (JJM) aims to provide Functional Household Tap Connections (FHTCs) to every rural household with 55 LPCD of potable water on a regular basis.

6.15.1 Components of Jal Jeevan Mission

- Creation of sustainable drinking water sources and augmentation of existing sources to ensure long-term sustainability.
- Provision of bulk water transfer where required, construction of water treatment plants, and strengthening of the distribution network.
- Development of in-village piped water supply infrastructure to provide tap water connections to every rural household.
- Retrofitting of TWAD Board-maintained schemes and execution of ongoing schemes to meet the minimum service level of 55 LPCD in rural areas through FHTCs.
- Implementation of Information, Education, and Communication (IEC) activities, human

resource development, training, water quality testing, and surveillance initiatives.

6.15.2 State Nodal Department and State Nodal Officer

- The Municipal Administration and Water Supply Department is the Nodal Department for JJM in Tamil Nadu.
- The Principal Secretary to Government, Municipal Administration and Water Supply Department, serves as the State Nodal Officer.
- The Managing Director, Tamil Nadu Water Supply and Drainage Board, acts as the State Mission Director for JJM.
- A State Project Management Unit (SPMU) has been established to assist the Mission Director in implementing JJM activities.

6.15.3 Committees for Implementation

- **Apex Committee:** Chaired by the Chief Secretary to Government.
- **State Level Scheme Sanctioning Committee (SLSSC):** Chaired by the Principal Secretary to Government, Municipal

Administration and Water Supply Department.

- **Executive Committee:** Chaired by the Mission Director, JJM.

(Constituted vide G.O. (Ms.) No.33, MA&WS Department, dated 15.02.2022.)

6.15.4 Finance

- Under JJM, the Government of India and the State Government each provide 50% funding for the implementation of piped water supply connections in rural households.
- For support activities and water quality monitoring and surveillance, the Government of India contributes 60%, and the State Government contributes 40% of the required funds.

6.15.5 Community Contribution

- To encourage public participation, 5% of the capital cost of the in-village component is collected from the public in hilly/forest areas and SC / ST habitations.

- 10% of the capital cost is collected in other village panchayats in cash/kind/manpower as a community contribution.

6.15.6 Implementation

JJM is jointly implemented by the TWAD Board and the Rural Development and Panchayat Raj Department.

6.15.6.1 Tamil Nadu Water Supply and Drainage Board (TWAD Board)

- Designs and implements Combined Water Supply Schemes (CWSS) / Multi-village schemes covering more than one village panchayat.
- Retrofitting of TWAD Board-maintained CWSS to augment water sources, improve electro-mechanical equipment capacity, and replace pipelines to enhance water supply.

6.15.6.2 Rural Development and Panchayat Raj Department

- Designs and implements Single Village Schemes (SVS), including water source creation, in-village infrastructure development, construction of overhead tanks, and FHTC provision.

- Additionally, responsible for in-village infrastructure works and FHTC provision under CWSS / Multi-village schemes implemented by TWAD Board.

6.15.7 Special Features of Jal Jeevan Mission

- Third-party inspection of all JJM works to ensure quality.
- Functionality assessment for water supply quality, quantity, and regularity.
- Implementation monitoring through the Integrated Management Information System (IMIS).
- Water quality testing using Field Test Kits (FTKs).
- IEC activities for water conservation, rainwater harvesting, water security, and water distribution awareness.

6.15.8 Convergence of Funds

JJM works are carried out using a combination of funds, including:

- Fifteenth Central Finance Commission Grant.

- State Finance Commission (SFC) Grant.
- District Mineral Foundation Trust (DMFT) funds.
- Other grant sources.

6.15.9 Operation and Maintenance Policy

To ensure uninterrupted water supply to beneficiaries, the Government of Tamil Nadu has approved an Operation and Maintenance Policy under JJM (vide G.O.(Ms.) No.26, MA&WS Department, dated 27.02.2024).

6.15.10 Present Status of Jal Jeevan Mission

Out of 125.28 lakh households in the rural areas of Tamil Nadu, so far 110.71 lakh (88.37 %) households have been provided with functional household tap connections (FHTCs). During the year 2024-25, so far 8.17 lakh (101%) FHTCs have been provided out of the total target of 8.09 lakh.

The District wise coverage of FHTCs is given in Table 6.11:

Table 6.11

S. No.	District	Total no. of house holds	FHTCs provided	% of coverage	FHTCs to be provided	Total no. of villages	Villages having 100% FHTCs
1.	Ariyalur	2,07,503	2,07,503	100	0	201	201
2.	Chengalpattu	4,15,800	4,14,818	99.76	982	359	356
3.	Coimbatore	3,72,578	3,72,578	100	0	228	228
4.	Cuddalore	5,22,440	5,22,440	100	0	683	683
5.	Dharmapuri	3,42,782	2,07,135	60.43	1,35,647	251	7
6.	Dindigul	4,52,496	3,89,778	86.14	62,718	306	84
7.	Erode	4,18,973	3,89,136	92.88	29,837	225	160
8.	Kallakurichi	3,01,829	1,83,422	60.77	1,18,407	412	57
9.	Kancheepuram	2,16,311	2,16,311	100	0	274	274
10.	Kanniyakumari	2,16,738	2,16,738	100	0	95	95
11.	Karur	2,04,464	1,85,699	90.82	18,765	157	91
12.	Krishnagiri	4,09,435	2,96,809	72.49	1,12,626	333	54
13.	Madurai	4,49,328	4,19,001	93.25	30,327	420	192

6.15.10.1 100% Coverage (Har Ghar Jal) Districts and Villages

Thirteen (13) districts—Kancheepuram, Ranipet, Vellore, Kanniyakumari, Theni, Thiruvallur, Coimbatore, Nilgiris, Ariyalur, Namakkal, Thanjavur, Cuddalore, and Mayiladuthurai—and 8,323 Village Panchayats have achieved 100% coverage of Functional Household Tap Connections (FHTCs) under Har Ghar Jal.

6.15.10.2 Details of Works Taken Up

The Government of Tamil Nadu envisions to connect every village in the state with a combined water supply scheme (CWSS) based on the sustainable river sources.

Approval has been accorded to take up 45 new combined water supply schemes, 56 retrofitting of combined water supply schemes & 21,258 single village schemes where local sources are sustainable, at a cost of Rs.18,228.40 crore. So far, 26 new combined water supply schemes, 52 retrofitting combined water supply schemes have been completed and balance schemes are under implementation.

Further, DPR has been prepared for an amount of Rs.7955.37 crore for Hogenekkal Phase – II for water supply to Dharmapuri and Krishnagiri Districts for which the rural components have been approved by the State Level Scheme Sanctioning Committee of JJM and have been included in the JICA's rolling plan for state share (Rural & Urban) fund tie up.

6.15.11 Nal Jal Mitra – Multi-Skilling Programme

Under the Nal Jal Mitra Multi-Skilling Programme, the Government of Tamil Nadu aims to skill 12,525 candidates, one from each Village Panchayat across the state. The program is implemented in coordination with:

- Rural Development & Panchayat Raj Department (RD & PR).
- Tamil Nadu Skill Development Corporation (TNSDC).
- Directorate of Employment and Training.
- Directorate of Technical Education.

6.15.11.1 Training Progress

- Classroom training completed for 3,816 candidates.
- 1,006 candidates have completed On-the-Job Training.
- 1,205 candidates are currently undergoing On-the-Job Training.
- Upon completion of training and certification, these candidates will support the Operation &

Maintenance (O&M) of in-village components of water supply schemes.

- Funds for this program are sourced from Jal Jeevan Mission (JJM) and the 15th Central Finance Commission.

6.15.12 PM-JANMAN Programme

Under Pradhan Mantri Janjati Adivasi Nyaya Maha Abhiyan programme, administrative sanction has been accorded and works are ongoing for providing water supply through CWSS to Particularly Vulnerable Tribal Group (PVTG) habitations in Velliangadu and Tholampalayam panchayats of Karamadai union and No.24 Veerapandi panchayat of Periyanaickenpalayam union in Coimbatore district with river Bhavani as Source, for an amount of Rs.11.75 crore.

6.15.13 Geo-Tagging of Water Supply Schemes

In Tamil Nadu, out of 26,210 water sources of JJM schemes, the geo information of 23,712 sources have been tagged in the JJM Field User Application by the field Engineers for effective monitoring of water supply schemes.

Further, the geo information of 20,735 scheme information boards have been tagged. In PM Gati Shakti portal, out of 101 Schemes, so far 76 Multi Village Schemes have been uploaded.

6.15.14 Extension of Mission Period

To complete the schemes under Jal Jeevan Mission early, the Government of Tamil Nadu have released an advance amount of Rs.1,300 crore to meet the expenses of the ongoing works prior to release of funds from Government of India.

In this circumstance, the Hon'ble Chief Minister of Tamil Nadu has requested the Hon'ble Minister for Jal Shakti, Government of India to extend JJM upto September 2028, to release the funds for the schemes already approved in the State Level Scheme Sanctioning Committee (SLSSC) and to approve 19 new schemes for providing balance FHTCs at an estimated cost of Rs.21,231.87 crore to ensure sustainable water supply to rural Tamil Nadu.

In addition, the Hon'ble Minister for Municipal Administration met the Hon'ble Minister for Jal Shakti, Hon'ble Minister for

Finance, Government of India and Cabinet Secretary and apprised on the same.

Taking these requests into consideration, GoI has announced extension of JJM till 2028, in order to achieve 100 % saturation in providing FHTC's as per the vision of JJM.

7. Tamil Nadu Urban Infrastructure Financial Services Limited

Tamil Nadu Urban Infrastructure Financial Services Limited (TNUIFSL) was established in November 1996, as a Public Limited Company, by the Government of Tamil Nadu with private sector participation from ICICI Bank Limited (ICICI), HDFC Bank Limited (HDFC) and IL and FS Financial Services Limited (IL and FS). The authorized capital of the company is Rs.2.00 crore and the paid-up share capital is Rs.1.00 crore, of which a sum of Rs.49.00 lakh is contributed by the Government of Tamil Nadu.

Tamil Nadu Urban Development Fund, Water and Sanitation Pooled Fund and various other Government Grant Funds are managed by TNUIFSL. It provides a spectrum of solutions towards the development of urban infrastructure, right from concept to commissioning of the projects. The main tasks of the company include project development, project appraisal, project structuring, resource mobilization and fund management. The company has been operating on profit since its

establishment and dividends are declared and paid regularly.

7.1 Tamil Nadu Urban Development Fund (TNUDF)

Tamil Nadu Urban Development is a Trust, established by the Government of Tamil Nadu, in November 1996, with private sector participation from ICICI, HDFC and IL and FS.

This fund functions as a sustainable financial intermediary that enhances the flow of private capital to urban sector in the State of Tamil Nadu and facilitates Urban Local Bodies to become capable and sustainable organisations, sensitive to stakeholders in providing highest quality of urban services.

TNUDF has a mission “to contribute to the improvement in urban quality of life in Tamil Nadu by facilitating efficient urban infrastructure asset creation and provision of urban services through innovative project development, independent appraisal and sustainable financing”.

7.1.1 Objectives of TNUDF

The objectives of TNUDF are as follows:

- Finance urban infrastructure projects, which improve the living standards of the urban population.
- Facilitate private sector participation in infrastructure through joint ventures and public-private partnerships.
- Improve the financial management of urban local bodies and enable them to access debt finance from markets.
- The financial assistance to Urban Local Bodies for implementation of basic service projects such as roads, bridges, storm water drains, sewerage and sanitation, water supply, solid waste management and commercially viable remunerative projects, such as bus stands and market complexes is provided by TNUDF.
- TNUDF is managed by a corporate trustee viz., Tamil Nadu Urban Infrastructure Trustee Company Limited (TNUITCL) and is operated by a Fund Manager viz., the Tamil Nadu

Urban Infrastructure Financial Services Limited.

- The total corpus of the Fund is Rs.199.60 crore, of which a sum of Rs.142.91 crore has been contributed by Government of Tamil Nadu and a sum of Rs.56.69 crore has been contributed by ICICI, HDFC and IL and FS.

7.2 Externally Aided Projects

The following four external lines of credit are operated by Tamil Nadu Urban Infrastructure Financial Services Limited:-

- Tamil Nadu Urban Flagship Investment Program (TNUFIP) assisted by Asian Development Bank in three Phases (viz, Phase-I, Phase-II and Phase-III)
- Municipal Infrastructure Development in Tamil Nadu (MID-TN) Grant Program assisted by KfW (German Development Bank)
- Sustainable Municipal Infrastructure Financing in Tamil Nadu-Phase-III (SMIF-TN-III) Program assisted by KfW and

- Tamil Nadu Climate Resilient Urban Development Program (TNCRUDP) assisted by World Bank.

The Funds totaling Rs.17,297.14 crore are available under the above programs with external assistance of Rs.10,691.39 crore. The details are furnished in Table 7.1 below:

Table 7.1 Size of External Lines of Credit
(Rs. in crore)

Sl. No.	Components	TNUFIP			MID-TN-Grant	SMIF-TN-III	TNCRUDP	Total
		Phase -I	Phase -II	Phase -III				
1	Loan to ULBs	356.43	487.01	294.45	0.00	2,132.75	637.98	3,908.62
2	Capital Grants to ULBs	774.60	834.10	634.57	151.43	2,132.75	1,004.88	5,532.33
3	Technical Assistance Grant / performance-based incentive / fees	179.83	120.89	25.98	7.97	68.25	847.52	1,250.44
	Total external assistance	1,310.86	1,442.00	955.00	159.40	4,333.75	2,490.38	10,691.39
4	Government and ULB Contribution	2,007.44	2,709.00	523.34	17.70	0.00	1,348.27	6,605.75
	Total	3,318.30	4,151.00	1,478.34	177.10	4,333.75	3,838.65	17,297.14

7.2.1 Tamil Nadu Urban Flagship Investment Program (TNUFIP) assisted by Asian Development Bank (ADB)

The Tamil Nadu Urban Flagship Investment Program commenced in the year 2018 with the assistance of Asian Development Bank. The objective of this Program is to develop priority water supply, sewerage and drainage infrastructure located within strategic industrial corridors of Tamil Nadu, support innovative pilots, improve urban governance and strengthen the capacity of State and local institutions to enhance environmental sustainability, climate resilience and urban livability.

Tamil Nadu Urban Flagship Investment Program has three phases (Phase-I, Phase-II and Phase-III). The assistance from ADB is US\$ 502 million for all the three phases.

The total outlay of Phase-I was Rs.3,070.33 crore (US \$477.50 million) with ADB assistance of Rs.1,099.53 crore (US \$171.00 million). The project implementation period is between November

2018 and June 2023. The project implementation period of Phase-I has been extended up to June 2025 with an revised total outlay of Rs.3,318.30 crore (US \$477.50 million) considering the funds available due to exchange rate variations. Of the above, the ADB assistance is Rs.1,310.86 crore (US \$171.00 million) and the contribution of the State Government and other sources being Rs.2,007.44 crore (US \$306.50 million). The funding assistance of Rs.1,131.03 crore has been committed for 9 sub-projects under TNUFIP Phase-I. Of the above, 3 sub-projects (Coimbatore Corporation Solar Development Project, Chennai Metropolitan Water Supply and Sewerage Board-Water Supply Scheme in 4 added areas of Greater Chennai Corporation and Rajapalayam Municipality Underground Sewerage Scheme) have been completed and the balance 6 sub-projects are under various stages of implementation. The details are furnished below:

- i. Coimbatore Corporation Underground Sewerage Scheme,

- ii. Tiruchirappalli Corporation Underground Sewerage Scheme-Phase-II,
- iii. Tirunelveli Corporation Underground Sewerage Scheme-Phase-II,
- iv. Tirunelveli Corporation Underground Sewerage Scheme-Phase-III,
- v. Vellore Corporation Underground Sewerage Scheme – Phase-II and
- vi. Chennai Metropolitan Water Supply and Sewerage Board – Underground Sewerage Scheme in 4 added areas of Greater Chennai Corporation

The total outlay of Phase-II is Rs.4,151.00 crore (US \$ 593.00 million) with ADB assistance of Rs.1,442.00 crore (US \$206.00 million). The contribution of the State Government and other sources being Rs.2,709.00 crore (US \$387.00 million). The project implementation period is between December 2019 and December 2025. The funding assistance of Rs.1,321.11 crore has been committed for 6 sub-projects under TNUFIP Phase-II. Of the above, 1 sub-project (Ambur Municipality Underground Sewerage Scheme)

has been completed and the balance 5 sub-projects are under various stages of implementation. The details are furnished below:

- i. Tiruchirappalli Corporation Underground Sewerage Scheme – Phase-III,
- ii. Tiruppur Corporation Underground Sewerage Scheme – Phase-II,
- iii. Vellore Corporation Underground Sewerage Scheme – Phase-III,
- iv. Tiruppur Corporation Water Supply Improvement Scheme and
- v. Madurai Corporation Water Supply Improvement Scheme

The total outlay of Phase-III is Rs.1,478.34 crore (US \$193.50 million) with ADB assistance of Rs.955.00 crore (US \$125.00 million). The contribution of the State Government and other sources being Rs.523.34 crore (US \$68.50 million). The project implementation period is between December 2022 and June 2026. The funding assistance of Rs.1,241.80 crore (ADB assistance of Rs.929.02 crore and Government Contribution of

Rs.312.78 crore) has been committed for 3 sub-projects under TNUFIP Phase-III and all these sub-projects are under various stages of implementation. The details are furnished below:

- i. Madurai Corporation Water Supply Improvement Scheme
- ii. Coimbatore Corporation Underground Sewerage Scheme and
- iii. Thoothukudi Corporation Storm Water Drains Project – Phase-IV

7.2.2 Municipal Infrastructure Development in Tamil Nadu (MID-TN) Grant Program assisted by KfW (German Development Bank)

The Municipal Infrastructure Development in Tamil Nadu (MID-TN) Grant Program commenced in the year 2022 with the assistance of KfW. The objective of the Program is to finance innovative projects to promote environmental protection and /or to increase climate resilience in the State of Tamil Nadu.

The total outlay of this Program is Rs.177.10 crore (Euro 22.22 million), of which

KfW's grant assistance is Rs.159.40 crore (Euro 20.00 million) and ULB contribution of Rs.17.70 crore (Euro 2.22 million). The project implementation period is between August 2022 and December 2027. The sub-projects to be taken up under MID-TN Grant Program are being identified.

7.2.3 Sustainable Municipal Infrastructure Financing –Tamil Nadu -Phase-III (SMIF–TN-III) Program assisted by KfW (German Development Bank)

The Sustainable Municipal Infrastructure Financing in Tamil Nadu-Phase-III Program assisted by KfW commenced in the year 2022 with the assistance of KfW. The objective of the Program is to finance climate resilient municipal infrastructure projects in the State of Tamil Nadu.

The total outlay of this Program is Rs.4,333.75 crore {Rs.4,265.50 crore (Euro 500 million) for implementing urban infrastructure projects and Rs.68.25 crore (Euro 8 million) for providing Technical Assistance}. The project implementation period is between November 2022 and June 2030. The funding assistance of

Rs.2,760.05 crore has been committed for 19 sub-projects under SMIF-TN-III and all these sub-projects are under various stages of approval / procurement / implementation. The details are furnished below:-

- i. Okkiam Thoraipakkam Underground Sewerage Scheme
- ii. Madhavaram Underground Sewerage Scheme
- iii. Edayanchavadi, Sadayankuppam & Kadapakkam Underground Sewerage Scheme
- iv. Puzhal, Mathur, Vadaperumbakkam & Theeyambakkam Underground Sewerage Scheme
- v. Tiruchirappalli Corporation Sewage Treatment Plant
- vi. Hosur Corporation Underground Sewerage Scheme
- vii. Mannargudi Municipality Underground Sewerage Scheme
- viii. Coimbatore Corporation Underground Sewerage Scheme in 3 added areas

- ix. Coimbatore Corporation Ondiputhur Underground Sewerage Scheme
- x. Aruppukottai Municipality Underground Sewerage Scheme
- xi. Greater Chennai Corporation Bio-mining
- xii. Madurai Corporation Underground Sewerage Scheme
- xiii. Chengalpattu Municipality Underground Sewerage Scheme
- xiv. Tiruchirappalli Corporation Underground Sewerage Scheme Phase-IV
- xv. Tiruppur Corporation Underground Sewerage Scheme in added areas
- xvi. Maraimalainagar Municipality Underground Sewerage Scheme
- xvii. Palani Municipality Underground Sewerage Scheme
- xviii. Mayiladuthurai Municipality Underground Sewerage Scheme and
- xix. Tirunelveli Corporation 58 MLD Sewage Treatment Plant

7.2.4 Tamil Nadu Climate Resilient Urban Development Program (TNCRUDP) assisted by World Bank

The loan documents for Tamil Nadu Climate Resilient Urban Development Program (TNCRUDP) assisted by World Bank has been executed on 05.03.2024. The objective of the Program is to strengthen urban management and improve access to climate resilient urban services in Water Supply and Sanitation sector in participating Urban Local Bodies in Tamil Nadu.

The total outlay of the project is Rs.3,838.65 crore (JPY 69.68 billion) with World Bank assistance of Rs.2,490.38 crore (JPY 45.20 billion) and the contribution of the State Government and other sources being Rs.1,348.27 crore (JPY 24.48 billion). The project implementation period is between March 2024 and December 2030. Of the above, Rs.3,585.22 crore is under Program-for-Results (PforR), Rs.247.20 crore under Investment Project Finance (IPF) and Rs.6.23 crore is towards Front End Fee. The funding assistance of Rs.1,609.65 crore has been committed for 28 sub-projects under TNCRUDP and all these

sub-projects are under various stages of approval / procurement / implementation. The details are furnished below:-

- i. Salem Corporation Underground Sewerage Scheme
- ii. Thoothukudi Corporation Underground Sewerage Scheme
- iii. Tiruvannamalai Corporation Underground Sewerage Scheme
- iv. Pudukottai Corporation Underground Sewerage Scheme
- v. Avadi Corporation Underground Sewerage Scheme
- vi. Avadi Corporation Water Supply improvement Scheme
- vii. Karaikudi Corporation Underground Sewerage Scheme
- viii. Karaikudi Corporation 24X7 Water Supply Scheme
- ix. Pudukottai Corporation 24X7 Water Supply Scheme

- x. Tiruchirappalli Corporation 24X7 Water Supply Scheme
- xi. Thoothukudi Corporation 24X7 Water Supply Scheme
- xii. Tirunelveli Corporation 24X7 Water Supply Scheme
- xiii. Erode Corporation 24X7 Water Supply Scheme
- xiv. Vellore Corporation 24X7 Water Supply Scheme
- xv. Cuddalore Corporation 24X7 Water Supply Scheme
- xvi. Dindigul Corporation 24X7 Water Supply Scheme
- xvii. Tambaram Corporation 24X7 Water Supply Scheme
- xviii. Nagercoil Corporation 24X7 Water Supply Scheme
- xix. Rajaplayam Municipality 24X7 Water Supply Scheme
- xx. Namakkal Corporation Underground Sewerage Scheme

- xxi. Dharmapuri Municipality Underground Sewerage Scheme
- xxii. Theni-Allinagaram Municipality Underground Sewerage Scheme
- xxiii. Kancheepuram Corporation Water Supply Improvement Scheme
- xxiv. Kancheepuram Corporation Underground Sewerage Scheme
- xxv. Krishnagiri Municipality Underground Sewerage Scheme
- xxvi. Dindigul Corporation Underground Sewerage Scheme
- xxvii. Cuddalore Corporation Underground Sewerage Scheme
- xxviii. Tiruvarur Municipality Underground Sewerage Scheme

7.3 Project Development Services

TNUIFSL is providing Project Development Services to Urban Local Bodies and other Government entities in preparation of concept plans, feasibility studies, planning studies and Detailed Project Reports through Project Development Grant Fund assisted under

Tamil Nadu Urban Flagship Investment Program, Sustainable Municipal Infrastructure Financing in Tamil Nadu-III Program, Tamil Nadu Climate Resilient Urban Development Program and funds provided by Government of Tamil Nadu. The details of ongoing assignments are furnished below:

1. Detailed Feasibility Report and Transaction Advisory Services for
 - i. Restoration of Adyar River in Hybrid Annuity Model.
 - ii. Retrofitting all the newly commissioned water supply schemes in added area through conversion of zoning system into District Metered Area (DMA) concept by taking Mugalivakkam as a pilot model for CMWSS Board.
 - iii. Reclamation of land and setting up of Waste to Energy plants in Kodungaiyur Dumping Ground and
 - iv. Integrated Waste Processing Facilities in Perungudi Dumping Ground.

2. Detailed Project Report for

- i. Forming a Water Supply Ring Mains for Chennai Metropolitan Area (One for 174 Sq.km and another for 1,015 Sq.km),
- ii. Improvement of 174 Sq.km of existing Sewerage System in Core Area of Greater Chennai Corporation,
- iii. Dedicated Water Supply Scheme for Tambaram Corporation,
- iv. Providing Storm Water Drains for Tambaram Corporation,
- v. Providing Storm Water Drains considering Integrated Climate Resilience Plan for Hosur Corporation,
- vi. Providing Underground Sewerage System for added areas of Tambaram Corporation,
- vii. Providing Underground Sewerage System on cluster basis for Kundrathur Municipality with 20 Village Panchayats,
- viii. Providing Underground Sewerage System on cluster basis for Nandhivaram-Guduvancherry Municipality with 5 Village Panchayats,

- ix. Restoration, Development and augmenting the additional source for water supply from 17 lakes in Chennai and Palar River Basins,
 - x. Improvement to the Existing Sewerage System in Core Area of 72 wards covering 51.82 Sq.km including SCADA system for entire Madurai Corporation,
 - xi. Providing Storm Water Drains for entire Madurai Corporation,
 - xii. Rehabilitation of existing 270 MLD Kilpauk Water Treatment Plant for CMWSS Board,
 - xiii. Rehabilitation / Replacement of Pumps & Machineries with energy efficient equipment after conducting a Comprehensive Energy Audit for various assets of CMWSS Board,
 - xiv. 7 lakes in Tiruchirappalli District for restoration and using them as an additional source of water supply to Tiruchirappalli Corporation and the nearby local bodies.
3. Setting up of Realtime Flood Forecasting & Spatial Decision Support System in Chennai Basin.

4. Climate resilient Master Plan for Integrated Sustainable Solid Waste Management for Kancheepuram, Avadi and Tambaram Corporation.
5. Integrated Blue Economy & Coastal Resilience Vision Master Plan for the entire shore in Nagapattinam District and Detailed Project Report (DPR) for development of two Beaches in Nagapattinam District.

7.4 Project Management Services

TNUIFSL is providing Project Management Services under the Asian Development Bank assisted Tamil Nadu Urban Flagship Investment Program through Consultants for Urban Local Bodies and Chennai Metropolitan Water Supply and Sewerage Board. The details are furnished below:

- i. Construction Management and Supervision Services for implementing Under Ground Sewerage Scheme under Phases II & III for Tiruchirappalli Corporation.
- ii. Construction Management and Supervision Services for implementing Under Ground

Sewerage Scheme under Phases II & III for Tirunelveli Corporation.

- iii. Construction Management and Supervision Services for implementing Under Ground Sewerage Scheme under Phases II & III for Vellore Corporation.
- iv. Construction Management and Supervision Services for implementing Under Ground Sewerage Scheme & Water Supply Improvement Scheme for Chennai Metropolitan Water Supply and Sewerage Board.
- v. Construction Management and Supervision Services for implementing Water supply Improvement Scheme under Phases II & III for Madurai Corporation.

7.5 Water and Sanitation Pooled Fund (WSPF)

The Government of Tamil Nadu has created WSPF as a Trust to cater to civic infrastructure needs like water and sanitation in small and medium towns by raising resources from capital markets. This Trust has been created as a not-for-profit entity.

The objectives of WSPF are:

- To provide financial assistance for setting up infrastructure projects,
- To mobilize resources from the capital market under pooled finance structure,
- To facilitate the participation of private sector in water and used water sectors through direct investment and public private partnership,
- To enable urban local bodies to access debt finance from markets and
- To act as the Nodal Agency on behalf of Union and / or State Government for water, sanitation and / or any other infrastructure projects.

A sum of Rs.302.30 crore has been mobilized through taxable bonds and tax-free bonds by WSPF. Of the above, bonds of Rs.227.30 crore have been redeemed.

A sum of Rs.624.04 crore has been availed as loan from Housing and Urban Development Corporation Limited for on-lending to Urban Local Bodies for implementing Vellore Combined

Water Supply Improvement Scheme,
Aruppukottai Combined Water Supply
Improvement Scheme, Tindivanam Underground
Sewerage Scheme and Villupuram Underground
Sewerage Scheme.

8. CHENNAI RIVERS RESTORATION TRUST

The Government of Tamil Nadu envisions providing clean, green and sustainable healthy environment for all in urban areas. To achieve this vision, the Chennai Rivers Restoration Trust (CRRT) has been set up by the Government to enhance the ecological conditions of rivers, waterbodies, creek and estuarine eco-system.

Further, the Chennai Rivers Restoration Trust has been directed to carry out the primary functions of planning, coordinating and monitoring the activities for the environmental restoration of rivers and water bodies viz., Cooum, Adyar, Kosasthalaiyar River, Buckingham Canal along with other canals, drains, estuaries and creeks in Chennai Metropolitan Area.

In this direction, the Chennai Rivers Restoration Trust is undertaking various initiatives to improve the ecology of the city by engaging various line departments in its eco-restoration projects.

8.1 Completed Eco-Restoration Projects

8.1.1 'Tholkappia Poonga'-Eco-Restoration of Adyar Creek (58 acres)

The Government of Tamil Nadu have initiated a pioneering urban coastal wetland ecological restoration project for the Adyar Creek in an extent of 58 acres under Phase-I. The Government of Tamil Nadu have accorded administrative sanction of Rs.100 crore for the restoration of 358 acres of Adyar Creek area and also to restore the Adyar Estuary area located in the eastern side of Thiru.Vi.Ka. bridge.

The Adyar creek and estuary area was degraded due to infestation of *Prosopis juliflora*, indiscriminate disposal of sewage, solid waste and debris which subsequently resulted in shrinking of water spread area, reduced tidal interaction and decrease in biodiversity.

As Phase-I, the Eco-Restoration of Adyar creek (58 acres) commenced in 2008 and the major restoration activities undertaken were to increase the water spread and tidal interaction area, plantation of native vegetation such as Tropical Dry Evergreen Forest species, mangrove

species, etc., and landscaping for interactive environmental programmes. All restoration activities were completed in 2011 and continuous maintenance is being carried out.

Tholkappia Poonga is now functioning as a Centre for environmental education and research. Regular environmental education programmes are being conducted to impart knowledge on environment to the community and primarily for students. So far, 1,12,826 students and 6,070 teachers from 1,446 schools have visited the eco-park and have been sensitized on the significance of urban wetlands restoration. Moreover, Corporate Social Responsibility (CSR) funds have been received from Tamil Nadu Urban Infrastructure Financial Services Limited (TNUIFSL) for conducting education programs for Government school students at Poonga.

General Public are allowed to visit the Tholkappia Poonga from Monday to Saturday (except Public Holidays). Thus far, a total of 32,973 persons have visited the Poonga. General Public are also allowed for walking

inside the Poonga and so far, 24,528 individuals have visited. Tholkappia Poonga is now a standing example of urban wetland eco-restoration initiative of the Government.

8.1.2 Eco-Restoration of Adyar Estuary (300 acres)

In continuation of the Eco-Restoration of Adyar creek in 58 acres as detailed above, the adjoining estuary with an extent of 300 acres was taken up by the Government.

The eco-restoration works were taken up with the components of bund stabilization, continuous removal of debris and plastics and removal of invasive species of *Prosopis juliflora*, which has now enhanced the tidal interaction and increased the water spread in the creek and estuary. Mangroves and Native riverine vegetation were planted to rejuvenate and enhance the biodiversity of riverine ecosystem.

In the restored Adyar creek and estuary (358 acres), a recent faunal survey reported around 424 species of animals such as molluscs, crabs, dragonflies, butterflies, fishes, amphibian, reptiles, birds and mammals.

This figure stood at 141 before the restoration activity.

8.2 Ongoing Eco-Restoration Projects

Under the aegis of CRRT, the Integrated Cooum River Eco-Restoration Project (ICRERP) and Adyar River Restoration Project (ARRP) have been implemented by the Government to enhance the ecological condition of city waterways.

Under these eco-restoration initiatives, various sub-projects are being executed by line departments concerned viz., desilting works, baby canal formation and construction of flood protection wall by Water Resources Department; Solid waste removal, fencing, beautification of bridges, boom deployment and plantation of native species and riverfront development by Greater Chennai Corporation, Directorate of Municipal Administration and Commissionerate of Rural Development and Panchayat Raj in their respective areas; Laying interceptor pipelines, installing modular sewage treatment plants and underground sewerage system by Chennai Metropolitan Water Supply and Sewerage Board;

Resettlement and Rehabilitation of Project Affected Families by Tamil Nadu Urban Habitat Development Board.

8.2.1 Integrated Cooum River Eco-Restoration Project (ICRERP)

The Government of Tamil Nadu have accorded administrative sanction of Rs.735.08 crore for the implementation of ICRERP for the stretch from Paruthipattu check dam to the Cooum river mouth in the Bay of Bengal for a length of 32 km. The major restoration components are river channel improvement, interception and diversion of wastewater, solid waste removal, rehabilitation and resettlement, plantation and riverfront development.

Thus far, Rs.604.75 crore has been disbursed to implementing agencies based on the work progress. All restoration works are expected to be completed soon (Except Resettlement and Rehabilitation of remaining Project Affected Families along Cooum River).

8.2.2 Adyar River Restoration Project (ARRP)

The ecological restoration of Adyar River from its origin at Adhanur lake to the river mouth for a distance of 42 km was initiated by the Government for Rs.744.60 crore. The major restoration works being implemented are sewage management, solid waste removal, river channel improvement, rehabilitation and resettlement, plantation and riverfront development.

The on-going eco-restoration activities are under various stages of implementation by concerned line departments and are expected to be completed soon (Resettlement and Rehabilitation of remaining Project Affected Families and Additional sewerage mitigation works in Adyar River). Thus far, Rs.497.36 crore has been disbursed to implementing agencies based on the work progress.

8.2.3 Restoration of Buckingham Canal and its associated Drains and Drains of Adyar and Cooum River

In order to ensure a comprehensive restoration of waterways in Chennai city, the Government have sanctioned Rs.1,281.88 crore for the restoration of Buckingham Canal and its associated drains and major drains of Adyar and Cooum River. Preliminary works such as boundary survey and boundary demarcation through Differential Global Positioning System (DGPS) survey and fixing of boundary stone are being taken up by respective implementing agencies i.e Water Resources Department and Greater Chennai Corporation.

8.2.4 Eco-Restoration of Ennore Creek

The Government have accorded administrative sanction of Rs.45.99 crore to Chennai Rivers Restoration Trust for the Eco-Restoration of Ennore Creek. Now, Habitat Restoration (Plantation) work is being implemented by Forest Department.

Forest Department has planned to complete the plantation works in 2 years

(2023 to 2025) and initiated the clearing of *Prosopis juliflora* and plantation of mangroves and its associated species. Out of 1,60,000 numbers of mangroves, 1,50,000 numbers have been planted so far. Among 2,00,000 numbers of mangrove associated species, 50,000 saplings have been planted. *Prosopis juliflora* has been cleared in 200 *ha* within Ennore Creek. In addition to that, 1,00,000 number of shrubs, creepers have been procured and planted. Based on the work progress a sum of Rs.25.00 crore has been released to Tamil Nadu Forest Department.

8.2.5 Redevelopment of Tholkappia Poonga

The Government have accorded administrative sanction for Redevelopment of Tholkappia Poonga at a cost of Rs.42.45 crore and redevelopment works are being carried out by Chennai Rivers Restoration Trust and Greater Chennai Corporation.

Under Phase-I, Chennai Rivers Restoration Trust is entrusted with the implementation of Redevelopment of Tholkappia Poonga work components viz., Entrance Arch, Watch Tower,

Visitor Centre, Viewing Decks, Pathways, Cafeteria, New Toilet block, Spillway bridge, fixing of surveillance camera, amphitheatre are completed fully and the civil miniature model, table miniature model, revamping of interpretation huts, security huts, children's interactive area, compound wall and other repair works, etc. are under progress. All the works will be completed soon.

Under Phase-II, Construction of Connecting Skywalk and Improvements to existing causeway as Box culvert in Santhome High Road is entrusted to Greater Chennai Corporation. CRZ Clearance obtained and works are under progress and completed soon.

8.2.6 Developing Semmozhi Poonga in Coimbatore

The Government have accorded Administrative Sanction for developing Semmozhi Poonga (Garden of Classical Tamil) in Coimbatore in 45 acre of the vacant land adjacent to the Coimbatore Central Prison as Phase-I at a cost of Rs.167.25 crore and works

are being carried out by Coimbatore City Municipal Corporation.

Foundation stone was laid by the Hon'ble Chief Minister on 18.12.2023. The work components viz.,

- **Botanical Garden 65% of work completed:** Ticket Complex, Amphitheatre, waterbody, Gardener Room, Retail Outlet, Eco-restaurant, road work and jogging track are under progress.
- **Convention Centre 70% of Work completed:** includes banquet hall, auditorium, compound wall works are under progress.
- **Pipeline to Semmozhi Poonga from Ukkadam STP:** 6 km pipeline fully completed and motor fixing work is in progress.
- **Surface Car Parking:** Security room, toilet block and High mast light works are completed. Car parking platforms, paver block laying work in progress.
- **Additional works in Botanical Garden:** 3 Nos of UG sump completed, irrigation and

electrical pipeline work in progress and 17 themed garden works are under progress.

- **Additional Works at Conventional Centre:** Order placed for audio, video, chair, AC and other interior works are under progress.

All these works are expected to be completed soon.

8.2.7 Detailed Project Report (DPR) for Restoration of Kosasthalaiyar River from Karanodai Bridge to Ennore Creek

In order to have a holistic approach in restoration of Chennai waterways, the preparation of a Detailed Project Report (DPR) for the Restoration of Kosasthalaiyar River from Karanodai Bridge to Ennore Creek is taken up and the Draft Final Report is prepared with the restoration components such as river channel improvement, sewage mitigation, solid waste removal, riverfront development and riverine plantation works. The Final Detailed Project Report (DPR) will be submitted to Government for approval to take up the implementation of restoration works in Kosasthalaiyar River by CRRT.

9. Tamil Nadu Urban Finance and Infrastructure Development Corporation Limited

Tamil Nadu Urban Finance and Infrastructure Development Corporation Limited (TUFIDCO) was established by the Government of Tamil Nadu on March 21, 1990, under the Companies Act of 1956. Its main goal is to support Urban Local Bodies and related agencies in developing urban infrastructure. TUFIDCO helps by offering stable funding and technical assistance to make infrastructure projects successful and to improve cities / towns across the state.

9.1 Mission Directorate / Nodal Agency

TUFIDCO serves as the Mission Directorate for key programs sponsored by the Union and State Governments. It acts as a Nodal Agency to oversee and implement the following schemes:

- Smart Cities Mission
- Atal Mission for Rejuvenation and Urban Transformation (AMRUT)

- Atal Mission for Rejuvenation and Urban Transformation 2.0 (AMRUT 2.0)
- Kalaigal Nagarapura Mampattu Thittam (KNMT)
- Singara Chennai 2.0
- Nagarapura Salaigal Mampattu Thittam (NSMT)

9.2 Fund Manager

TUFIDCO is acting as the nodal agency and Fund Manager for the following schemes:

- Urban Infrastructure Development Scheme for Small and Medium Towns (UIDSSMT) – Revolving Fund
- State Urban Infrastructure Development Fund (SUIDF)

9.3 Atal Mission for Rejuvenation and Urban Transformation (AMRUT)

The Atal Mission for Rejuvenation and Urban Transformation (AMRUT) was launched by the Union Government (Ministry of Housing and Urban Affairs) in June 2015. The mission aimed to improve urban areas by focusing on the following projects:

- Water supply
- Sewerage systems and waste management
- Stormwater drainage
- Facilities for walking, non-motorized transport, public transport, and parking spaces
- Developing and upgrading parks, green spaces and recreational areas, especially for children

In the year 2015, the Union Government has identified the following 28 Urban Local Bodies under AMRUT in Tamil Nadu. The mission period is extended upto December 31, 2025.

Table 9.1

Sl. No.	Name of the Urban Local body	Sl. No.	Name of the Urban Local body
1.	Greater Chennai Corporation	10.	Erode Corporation
2.	Coimbatore Corporation	11.	Vellore Corporation
3.	Madurai Corporation	12.	Dindigul Corporation
4.	Tiruchirappalli Corporation	13.	Nagercoil Corporation
5.	Salem Corporation	14.	Hosur Corporation
6.	Tirunelveli Corporation	15.	Avadi Corporation
7.	Tiruppur Corporation	16.	Pallavapuram Municipality*
8.	Thoothukudi Corporation	17.	Tambaram Corporation
9.	Thanjavur Corporation	18.	Cuddalore Corporation

19.	Kumbakonam Corporation	24.	Nagapattinam Municipality
20.	Kancheepuram Corporation	25.	Ambur Municipality
21.	Tiruvannamalai Corporation	26.	Rajapalayam Municipality
22.	Pudukkottai Corporation	27.	Rameswaram Municipality
23.	Karaikudi Corporation	28.	Velankanni Town Panchayat
*Pallavapuram Municipality merged with Tambaram Corporation			

Funding Pattern

The funding pattern of the Union and State Governments, as well as the contributions of Urban Local Bodies for the implementation of AMRUT projects is as follows:

Table 9.2

Sl. No.	Population	Union Govt. Share-Grant	State Govt. Share-Grant	ULB share
1.	Cities with above 10 lakh population	33.33%	20%	46.67%
2.	Cities with below 10 lakh population	50%	20%	30%
3.	Green space (all AMRUT cities)	50%	20%	30%

9.3.1 Details of State Annual Action Plan (I, II, III)-AMRUT projects

The AMRUT projects are being carried out in 28 cities and towns listed in the State Annual

Action Plans (SAAP) I, II, and III. Under this scheme an amount of Rs.11,441.42 crore have been sanctioned for 445 projects, as shown in the table below:

Table 9.3

(Rs. in crore)

SAAP	Total No. of projects sanctioned	Approved cost	GoI Share	GoTN Share	ULB share
SAAP I	111	3,245.51	1,355.29	649.10	1,241.12
SAAP II	171	3,700.45	1,531.47	740.09	1,428.89
SAAP III	163	4,495.46	1,854.39	899.08	1,741.99
Total	445	11,441.42	4,741.15	2,288.27	4,412.00

Out of the 445 approved projects, 433 projects worth of Rs. 6,785.78 crore have been completed. The remaining 12 projects, worth of Rs. 4,655.64 crore, are at different stages of implementation, as shown in the table below:

Table 9.4

(Rs in crore)

Sl. No.	Name of the Project	Project Cost
1.	Implementation of 24x7 water supply system in the core areas of Coimbatore Corporation	506.04
2.	Dedicated water supply scheme to Madurai Corporation with source at Mullai Periyar River at Lower Camp.	1,020.00

3.	Tirunelveli Corporation underground sewerage scheme – Phase – II	289.01
4.	Tirunelveli Corporation underground sewerage scheme – Phase – III	381.86
5.	Providing Comprehensive underground sewerage scheme to Manali, Chinnasekkadu, Karambakkam and Manapakkam areas of Chennai City	223.00
6.	Tiruchirappalli Corporation underground sewerage scheme - Phase II	344.00
7.	Tiruchirappalli Corporation underground sewerage scheme - Phase III	264.12
8.	Vellore Corporation underground sewerage scheme – Phase - II	343.69
9.	Vellore Corporation underground sewerage scheme – Phase – III	248.26
10.	CMWSSB- Valasaravakkam water supply scheme	67.74
11.	Tiruppur Corporation underground sewerage scheme	525.92
12.	Coimbatore Corporation underground sewerage scheme	442.00

9.4 Atal Mission for Rejuvenation and Urban Transformation 2.0

Based on the success of AMRUT, the Union Government launched a new program called "Atal Mission for Rejuvenation and Urban Transformation 2.0" (AMRUT 2.0) on 01.10.2021. AMRUT 2.0 will help all towns and cities, including 25 Corporations,

137 Municipalities and 487 Town Panchayats, to become self-sufficient and secure in terms of water.

The main goals of AMRUT 2.0 are:-
 (a) Providing piped water supply to all cities/towns, (b) Managing sewerage, waste water treatment and recycling used water and (c) Improving water bodies and creating green spaces.

9.4.1 Funding for projects

The funding pattern of the Union Government, State Government and Urban Local Bodies is as follows:

Table 9.5

SI No	Population	Union Govt. Share – Grant	State Govt. Share-Grant	ULB's share
1.	Cities with more than 10 lakh population	25%	30%	45%
2.	Cities with 1 lakh to 10 lakh population	33%	30%	37%
3.	Towns having population less than 1 lakh	50%	30%	20%

The Union Government has allocated a total of Rs. 4,942 crore to Tamil Nadu. Under this

scheme, 1,270 projects worth Rs.14,039.49 crore have been approved in three tranches, as shown in the table below.

Table 9.6

(Rs.in crore)

Sl. No.	Sectors	Nos.	Approved project cost
1.	Water supply	201	7,376.79
2.	Underground sewerage scheme	30	6,225.28
3.	Water bodies improvement	474	274.36
4.	Green space development	565	163.06
	Total	1,270	14,039.49

Out of 1,270 projects, 713 projects worth of Rs.288.26 crore have been completed. 551 projects worth of Rs.11,358.91 crore are under implementation and the remaining projects are at different stages of progress.

9.5 Smart Cities Mission

The Smart Cities Mission was launched by Union Government on 25th June 2015. The mission focuses on two main approaches. First, cities are being developed using an Area-Based Development (ABD) method, where each city chooses a specific area to improve. These areas were selected with input from

citizens and are being turned into models that can be used in other parts of the city. Second, each city has projects using technology to improve the entire city, known as Pan-City Projects. Other important parts of the mission include setting up a Special Purpose Vehicle (SPV) to manage the projects, finding different ways to fund the projects, encouraging healthy competition between cities and involving citizens in the process.

Under this mission, the Union Government selected 11 cities in Tamil Nadu through a competition. These cities are Chennai, Coimbatore, Madurai, Thanjavur, Salem, Vellore, Tiruppur, Thoothukudi, Tirunelveli, Tiruchirappalli and Erode Corporations. The Union Government has allocated Rs.5,390 crore and the State Government has provided Rs.5,500 crore for these 11 cities.

Under the Smart Cities Mission, 731 projects worth Rs.10,711.27 crore are being developed for the 11 Smart Cities. Out of these, 715 projects worth Rs.9,706.21 crore have been completed, while 16 projects worth Rs.1,005.06 crore are in the final stages of completion. The details are given below.

Table 9.7

(Rs. in crore)

Sl. No.	Name of the Smart City	No. of Projects	Project Cost
1.	Chennai	49	1,052.56
2.	Coimbatore	54	956.52
3.	Madurai	16	983.90
4.	Thanjavur	102	963.82
5.	Salem	103	965.00
6.	Vellore	52	963.40
7.	Tiruppur	28	965.00
8.	Tirunelveli	81	965.00
9.	Thoothukkudi	75	965.90
10.	Tiruchirappalli	83	965.17
11.	Erode	88	965.00
	Total	731	10,711.27

The Government of India has announced that this mission will be completed on 31.03.2025.

9.6 Kalaigiar Nagarpura Mempattu Thittam (KNMT)

The Kalaigiar Nagarpura Mempattu Thittam was launched by the Government of Tamil Nadu in 2021 to fill the infrastructure development gaps in urban local bodies (excluding Greater Chennai Corporation). The scheme focuses on providing 100% water supply tap connections to

homes, sewage lines, internal roads, streetlights, sanitation, upgrading crematoria and other community infrastructure improvements. It also aims to address infrastructure needs in underdeveloped areas, slums and newly added parts of Municipalities and Town Panchayats.

The scheme has a total budget of Rs.5,000 crore for the period from 2021-22 to 2025-26. From the year 2021 onwards, the Government of Tamil Nadu is allocating Rs.1,000 crore every year in the budget for this program.

Between FY 2021-22 and FY 2025-26, a total of 6,751 projects have been approved under the Kalaigal Nagarpura Melpattu Thittam (KNMT) for urban local bodies managed by the Directorate of Municipal Administration and Directorate of Town Panchayats. These projects, at a cost of Rs.4,112.20 crore, are taken up for improving urban infrastructure in municipalities and town panchayats across Tamil Nadu. The details are as follows:

Table 9.8

(Rs. in crore)

Sl. No.	Name of the Project	No.of works	Approved project cost
1.	Roads	4171	1386.55
2.	Metal Beam Crash Barrier	33	5.06
3.	Parks	882	198.19
4.	Crematorium	189	265.48
5.	Knowledge Centre	82	149.78
6.	Bus stands	95	226.88
7.	Markets/Shandy	105	230.35
8.	Daily Market	60	182.05
9.	Fish Market	8	7.63
10.	Community Hall	2	2.45
11.	Commercial Complex	34	41.87
12.	Ponds /Water Bodies	723	284.58
13.	Water Supply	255	907.29
14.	Battery Operated Vehicles	2	58.60
15.	Light Commercial Vehicles	1	6.57
16.	Parking	1	1.05
17.	Storm Water Drain	79	94.47
18.	Reading Room	10	2.52
19.	Science Park	6	8.85
20.	Bridge	6	5.15
21.	UGSS	2	35.00
22.	Others	5	11.63
	Total	6751	4112.20

Out of 6,751 approved projects, 4,084 have been completed at a cost of Rs.2,089.44 crore. Another 2,667 projects, costing Rs.2,022.76 crore, are under implementation.

9.7 Singara Chennai 2.0

The Singara Chennai 2.0 initiative was launched by the Government of Tamil Nadu in 2021 to enhance the quality of life for its Citizens residing in Chennai. The aim of the scheme is to make the city safer and more livable by improving basic amenities and creating a comfortable environment. The focus is on upgrading infrastructure, including water supply, sewage management, roads, streetlights and sanitation. This initiative will meet the city's growing needs and improve the overall urban experience for residents. The Government has allocated Rs.500 crore annually starting from FY 2021-22. The Greater Chennai Corporation and the Chennai Metropolitan Water Supply and Sewerage Board (CMWSSB) are implementing the projects under this scheme. The details of the approved projects are as below:

Table 9.9

(Rs. in crore)

Sl. No.	Name of the Sector	No.of works	Singara Chennai 2.0 Share
1.	Roads – BRR	209	89.66
2.	Roads – IRR	414	29.69
3.	Animal Birth Control (ABC) Centers	5	20.53
4.	Parks	156	68.64
5.	Sponge Parks	57	7.67
6.	Play fields	111	44.95
7.	Beautification of Bridges	11	10.02
8.	Storm water drain	23	766.68
9.	Crematorium	53	52.56
10.	Access pathway – Beach	2	2.13
11.	School Furniture	1	4.15
12.	School Buildings	75	168.40
13.	Beautification of Victoria Hall	1	32.62
14.	Rejuvenation of Water Bodies	37	25.63
15.	Fish Market	1	1.35
16.	Slaughter House	1	1.43
17.	Water fountain	26	1.29
18.	Dynamic Lighting	1	1.81
19.	Sign Board	1	8.43
20.	Community Hall	6	43.06
21.	CMWSSB - Water Supply	8	232.73
22.	CMWSSB-UGSS	11	376.57
	Total	1,210	1,990.00

Under this program, 1,210 projects worth Rs.1,990 crore have been approved for funding from FY 2021-22 to FY 2024-25. Out of these, 1,041 projects costing Rs.946 crore have been completed and 169 projects costing Rs.1,044 crore are under implementation.

9.8 Nagarpura Salaigal Mempattu Thittam (NSMT)

Proper road infrastructure is crucial for economic growth in urban areas and improving residents' quality of life. Many of the roads in Corporations, Municipalities and Town Panchayats that are damaged due to sewerage and water supply projects carried out by Urban Local Bodies need to be restored. Hence, it is important for these bodies to focus on road development, especially upgrading to all-weather roads.

In response, the Hon'ble Chief Minister announced in the Legislative Assembly that Rs.2,200 crore would be allocated over four years, starting from FY 2022-23, to improve the damaged roads. Based on this, the Government sanctioned Rs.2,200 crore for the implementation of Nagarpura Salaigal Mempattu

Thittam (NSMT) vide G.O.(D)No.423, Municipal Administration and Water Supply Department, dated 19.11.2022. Further guidelines for sanction of funds to the Urban Local Bodies were issued in G.O.(Ms)No.19, Municipal Administration and Water Supply Department, dated 13.02.2023.

Under this initiative, in financial year 2022-23, 8,501 damaged roads were taken up for restoration at Rs.655 crore, with 8,350 completed and 151 in progress. In financial year 2023-24, 11,265 road projects worth Rs.871.88 crore were undertaken, completing 10,822, while 443 are ongoing. In financial year 2024-25, 4,785 projects worth Rs.414 crore were sanctioned, with 2,543 completed and 2,242 still under implementation.

9.9 Urban Infrastructure Development Scheme for Small and Medium Towns (UIDSSMT) - Revolving Fund

TUFIDCO created a Revolving Fund under the Urban Infrastructure Development Scheme for Small and Medium Towns to offer interest-free loans for eligible projects. So far, 99 Urban Local

Bodies have received these loans to complete internal plumbing for urban water supply and underground sewage system projects. Details are provided in the table below.

Table 9.10

(Rs. in crore)

Sl. No.	Sector	No. of Municipalities / Corporations	Amount sanctioned from UIDSSMT Revolving fund
1.	Water Supply	73	169.58
2.	UGSS	26	193.22
	Total	99	362.80

The projects are currently in various stages of execution.

9.10 State Urban Infrastructure Development Fund (SUIDF)

TUFIDCO created a revolving fund to support infrastructure projects under the former Mega City Programme. Initially called the Metropolitan Infrastructure Development Fund (MIDF), it had a corpus of Rs.3000 crore. Later, it was renamed the State Urban Infrastructure Development Fund (SUIDF) to streamline financial support for Urban Local Bodies (ULBs). The SUIDF provides soft loans to help ULBs

address infrastructure gaps effectively and improve urban facilities.

Under SUIDF scheme, the following projects have been sanctioned.

Table 9.11

(Rs.in crore)

Sl. No.	Name of the Project	Approved Project Cost
1.	Tiruchirappalli Bus Terminal	159.98
2.	CMWSSB Madipakkam - UGSS	115.60
3.	Conversion of Street lights to Energy efficient LED lights in 8 Municipal Corporations and 77 Municipalities	342.85
4.	Providing New LED lights in 11 Municipalities	8.00
5.	Conversion of Streetlights to Energy efficient LED lights in 439 Town Panchayats.	155.56
6.	ULB Share of AMRUT 2.0 Water Supply Projects to 93 Town Panchayats	153.17
7.	ULB Share of AMRUT 2.0 Water Supply Projects to 18 Corporations/Municipalities	56.39
8.	Integrated Stom Water Drain - Kosasthalaiyar River	280.00
9.	Provision of internal plumbing for UGSS and water supply HSCs in 8 ULBs for optimum utilization of the UGSS and water supply scheme	62.95
10.	Conversion of Streetlights to Energy efficient LED lights / Providing New LED lights in 6 Corporations and 10 Municipalities	85.22
11.	Water supply improvement scheme to extended areas of Coimbatore City Municipal Corporation - Pillur-III	410.61

12.	Providing ULB Share for Water Supply Projects sanctioned under AMRUT 2.0 to 17 Town Panchayats	153.67
13.	Provision given for final instalment of AMRUT 2.0 sanctioned projects	216.00
14.	Construction of New Bus Stand in Erode City Municipal Corporation	15.00
15.	Construction of Tiruchirappalli Bypass Road along Koraiyaru & Uyyakondan Rivers	53.00
16.	CMWSSB – 150 MLD Desalination Plant – Additional Fund Request	166.57
17.	Provision of internal plumbing for UGSS service connections (HSCs) in Ponneri Municipality	2.60
18.	AMRUT 2.0 share of two water supply projects	2.21
19.	Providing Combined Water Supply Scheme to Kariapatti and Mallankinaru Town Panchayats in Virudhunagar District	30.00
20.	Implementation of 49 works (15 water works and 34 sewer works) were taken up by CMWSSB under Vada Chennai Valarchi Thittam	316.25
21.	Aruppukottai CWSS	138.59
22.	Villupuram UGSS	113.13
23.	Tindivanam UGSS	117.23
24.	Integrated Development of Multi-Modal Facility Complex at Broadway Bus Stand, Chennai	506.83
25.	Combined Water Supply Scheme to Perambalur Municipality, State Industries Promotion Corporation of Tamil Nadu (SIPCOT) Industrial Complex located at Erayur and Padalur with River Kollidam as source	190.00
26.	Providing underground sewerage system to the added areas of Tiruchirappalli Corporation-Phase III	70.00

27.	Construction of Integrated Bus Terminus and other Infrastructure at Panjappur, Tiruchirappalli	71.28
28.	Combined Water Supply Scheme to 8 Town Panchayats, 3 Municipalities, 2,452 Rural Habitations in 11 Unions in Sivagangai District	332.23
29.	Water Supply improvement scheme to Tiruppur City Municipal Corporation	40.00
30.	Comprehensive Water Supply and Sewerage Scheme - Sriperumbudur	20.74
31.	Providing Dedicated Water Supply Scheme to Madurai City Municipal Corporation from Mullai Periyar River at Lower Camp	200.00
32.	Combined Water Supply Scheme to Eraniel Town Panchayat	18.59
	Total	4,604.25

9.11 TUFIDCO Infrastructure Funding Scheme (TIFS)

The TUFIDCO Infrastructure Funding Scheme (TIFS) was created to support project execution by Urban Local Bodies and parastatal organizations/agencies. These loans are backed by shares, reserves, surpluses and bank borrowings, with TUFIDCO primarily sourcing funds through bank loans. Currently, the repayment period for TIFS loans is ten years.

10. New Tirupur Area Development Corporation Limited

The Government of Tamil Nadu, in association with Infrastructure Leasing & Financial Services Limited (IL & FS) and Tirupur Exporters Association (TEA), formed the New Tirupur Area Development Corporation Limited (NTADCL) in 1995 as a Special Purpose Vehicle (SPV) to meet the essential water needs of the industries in Tirupur area and to provide drinking water supply and sewage treatment facilities to the local bodies, particularly to Tirupur Municipality (now Corporation). The Concession Agreement was signed in the year 2000 between the Government of Tamil Nadu, New Tirupur Area Development Corporation and Tirupur Municipality (now Corporation).

The project was launched in July 2005 with an estimated cost of Rs.1,023 crore. Of the total sanctioned capital, Rs.700.30 crore was secured through bank loans, while Rs.322.70 crore was raised as equity capital. This equity capital funding also includes Rs.10.00 crore contributed by the Union Government through the Tamil Nadu Corporation

for Industrial Infrastructure Development Limited (TACID). Rs.105 crore within the equity capital funding were provided by a Special Purpose Company (SPC), the Tamil Nadu Water Investment Company Limited (TWICL), formed through a 54:46 partnership between Infrastructure Leasing and Financial Services Limited (IL&FS) (Rs.50.00 crore) and the Government of Tamil Nadu (Rs.55.00 crore).

10.1 Unique aspects of the Scheme

The Tirupur Water Supply and Sewerage Project (TWSSP) was implemented for the first time in the country under Public-Private Partnership (PPP) to provide drinking water and sewage treatment to the Tirupur Municipality (now Corporation). The scheme was designed to provide 185 MLD (expandable to 250 MLD) of water to meet the water requirement of the textile and allied industries in and around Tirupur and to provide a 15 MLD (expandable to 30 MLD) sewage treatment plant for the Tirupur Corporation. Furthermore, 31 health complexes with low-cost sanitation facilities have been set up for the urban poor through this scheme.

The water quality supplied by NTADCL is of highest standard and is tested and certified by the in-house laboratory of the company, which is accredited to the National Accreditation Board for Testing and Calibration Laboratories (NABL). Further, NTADCL also has its own in-house meter testing facilities approved by Fluid Control Research Institute (FCRI) (Palakkad, Kerala), under the Ministry of Heavy Industries, Government of India, to check any metering error to its customers. The company has been providing quality drinking water to households and industries for the past two decades without any interruption.

10.2 Support from the Government of Tamil Nadu

This water supply scheme was designed on a cross-subsidisation model. That is, water is supplied to the residential areas on a subsidized basis from the profit generated through the water supplied to the industries. However, due to the Zero Liquid Discharge Order (ZLD) issued by the Hon'ble Madras High Court in 2011, the revenue of the company was affected as the

industrial water requirement started falling below the estimated level.

In order to overcome the financial crisis faced by the company, a Corporate Debt Restructuring package was implemented in 2011-12 and the interest rates on the bank loans taken by the company were reduced. Also, a part of the loan was converted into shares. The Government of Tamil Nadu provided Rs.150 crore as Equity Share Capital and increased water supply commitments to Tirupur Corporation and nearby areas.

10.3 Domestic Water Supply

NTADCL is supplying about 106.30 MLD of drinking water for domestic use to Tirupur Corporation, Tamil Nadu Water Supply and Drainage Board (TWAD) and Village Panchayats. Out of this, 38.54 MLD is supplied to Tirupur Corporation, 11.06 MLD to Tamil Nadu Water Supply and Drainage Board and 5.65 MLD to Rural Local Bodies, totalling 55.25 MLD of water is supplied as concessional quantity and 51.05 MLD of water is supplied as additional quantity. Concessional quantity water is supplied to Tirupur Corporation at a rate of Rs.12.23 / KL

and to Tamil Nadu Water Supply and Drainage Board (TWAD) and Village Panchayats at a rate of Rs.8.95 / KL. The additional quantity of water is charged at a rate of Rs.29.28 / KL.

10.4 Industrial Water Supply

Currently, NTADCL is supplying 51.78 MLD of water to various industries located in and around Tirupur. Water is being supplied to around 650 industrial customers. This includes 644 individual customers and the following 6 industrial clusters:

1. Palladam Hi-Tech Infrastructure Private Limited
2. Palladam Water Projects Private Limited
3. Palladam Hi-Tech Textile Park
4. Somanur Water Projects Private Limited
5. Tirupur Sultanpettai Water Projects Private Limited
6. Pongalur Water Projects Private Limited

The above customers belong to various sectors/industries like textile industries, rice mills, dairy industries, educational institutions, hospitals etc. The price of water is determined depending on the classification of the above

industries. At present, the price charged for water supplied to the following 4 categories of industries is as follows:

Sl. No.	Category	Rate (Rs/KL)
1.	Dyeing and Bleaching Industries	82.00
2.	Other than Dyeing and Bleaching Textile Industries	75.00
3.	Other Non-Textile Industries	70.00
4.	Hospitals, Educational Institutions, Tankers etc	70.00

Therefore, the New Tirupur Area Development Corporation is providing approximately 158.08 MLD of water for the needs of domestic and industries.

10.5 Business expansion in Industrial sectors

New Tirupur Area Development Corporation (NTADCL) has been continuously trying to identify new customers to expand its water supply business to industries. As a result, Memorandum of Understanding (MoU) have been recently signed with 3 major industrial clusters in Tirupur zone. These include Tirupur Palladam Water Project LLP (for 5 MLD),

Senjerimalai Water Project LLP (for 4.5 MLD) and Kudimangalam Water Project LLP (for 4 MLD). These 3 major industrial complexes are expected to come into operation in the first half of FY 2025-26, thereby providing an additional 13.5 MLD of water to the industrial requirement.

Also, for the first time, the company is in the process of finalizing the agreements for supplying water to the following three Industrial Parks to be developed by the Tamil Nadu Industrial Development Corporation (TIDCO) and the State Industries Promotion Corporation of Tamil Nadu Ltd., (SIPCOT):

1. Aerospace Industrial Park, Sulur
2. Defence Corridor, Varapatti
3. New Semiconductor Industrial Park, Kethanur

It is estimated that by providing water to the above 3 industrial parks, there will be an additional offtake of 7.5 MLD of water.

Furthermore, the company is continuously exploring and implementing new business opportunities in this area.

10.6 Financial Performance for FY 2023-24 (Unaudited)

In the financial year 2023-24, the company earned a revenue of Rs.220.60 crore. This is 5% less than the previous year's revenue of Rs.232.20 crore. The main reason for this revenue decline is due to lower offtake in additional quantity of about 20 MLD by the Tirupur Corporation. Despite the decline in total revenue, the profit after tax (PAT) increased by 8.4% to Rs.108.14 crore. Of the total revenue, Rs.209.13 crore was earned from water supply. In addition, Rs.7.00 crore was earned from sewage treatment and Rs.4.47 crore from consultancy fees. The accumulated financial losses have been reduced to Rs.78.84 crore.

10.7 Corporate Social Responsibility

As part of corporate social responsibility efforts, the company has donated Rs.4.57 crore till the financial year 2023-24. In 2024-25, the company has donated Rs.1.97 crore to the Tamil Nadu State Disaster Management Authority (TNSDMA) for flood relief.

10.8 Impact of the Project

Before the implementation of the Tirupur Water Supply and Sewage Treatment Project by NTADCL, groundwater and well water were the only source of water for industrial establishments. Due to the huge growth of textile industry and its related business activities in Tirupur and its surrounding areas, sufficient water was not available to the industries. Therefore, this project has not only played a significant role in the development of the textile industry in Tirupur and its surrounding areas and in providing clean drinking water to the people of the area, but has also helped in preventing the significant depletion of groundwater in the area.

11. Tamil Nadu Water Investment Company Limited

Government of Tamil Nadu formed Tamil Nadu Water Investment Company Limited (TWIC) in the year 2000 as a Special Purpose Vehicle under Companies Act, 1956 as a water investment Joint Venture Company with Infrastructure Leasing and Financial Services Ltd (IL&FS). TWIC as an investment company had promoted New Tirupur Area Development Corporation Limited (NTADCL) which has implemented Tirupur water supply project with a capacity of 185 MLD at a cost of Rs.1,023 crore as the first Public Private Partnership in water sector.

TWIC has been actively involved in developing and implementing water projects across several sectors and has expertise in water distribution and sewerage systems, recycling, desalination, river restoration, industrial effluent management and developing projects from concepts to implementation through a model aimed at reducing life cycle costs with a sustainable framework.

TWIC provides Advisory, Project Management Consultancy (PMC) and Operation and Maintenance (O&M) services in the following fields:

1. Urban Water and sewerage systems.
2. Tertiary Treatment with Ultra-Filtration or Reverse Osmosis (TTUF/TTRO) for reuse of secondary treated sewage.
3. Sea Water Desalination.
4. Industrial effluent management and recycling including Zero Liquid Discharge (ZLD).
5. Lake and river pollution abatement.
6. Capacity building and training.

TWIC has expertise in preparation of Feasibility Reports (FR), Detailed Project Reports (DPR), bid management, project management and O&M of various facilities in water, Industrial effluent and sewerage sector.

11.1 Noteworthy projects completed

TWIC has been actively engaged in implementation of various projects across Tamil Nadu including the following:

11.1.1 Urban Water Management, Used Water Management & Reuse

TWIC works with various Municipal Corporations, Municipalities, Town Panchayats and parastatal agencies like CMWSSB, TWAD and Urban financing agencies like TNUIFSL, TUFIDCO and assisting them in establishing water supply network, Underground Sewerage Schemes (UGSS), Sewage Treatment Plants (STP), Tertiary Treatment Ultra Filtration & Tertiary Treatment Reverse Osmosis (TTUF/TTRO) etc.

The notable projects implemented by TWIC are as follows:

1. Preparation of Detailed Project Report (DPR) & Project Management Consultancy (PMC) for establishment of water supply and waste water management project for Nanded Waghala City Municipal Corporation, Maharashtra.
2. Preparation of DPR based on "Design, Build, Operate and Transfer" (DBOT) for the World Bank assisted Chhotagovindpur – Bagbera water supply scheme in East Singhbhum District, Jharkhand.

3. Advisory for comprehensive water supply schemes and District Metered Area (DMA) for all Urban Local Bodies (ULBs) in Tamil Nadu under AMRUT and Smart Cities Mission.
4. Advisory for Underground Sewerage Schemes (UGSS) and Sewage Treatment Plant (STP) for Thoothukudi and Visakhapatnam Corporations, Pammal and Anakaputhur Municipalities.
5. Advisory for water demand study, preparation of Water Reuse Policy and preparation of report on water reuse grid for the State of Tamil Nadu.
6. Project Management Agency (PMA) for water supply and UGSS under AMRUT / Smart Cities Mission for Thanjavur, Kumbakonam and Thoothukudi Corporations.
7. PMA for Tertiary Treated Reverse Osmosis (TTRO) project for used water reuse: 45 MLD capacity plant each at Koyambedu & Kodungaiyur, Chennai.

8. PMC services for implementation of 28 MLD STP for Thoothukudi Corporation under Smart Cities Mission.
9. Consultancy assignment for preparation of DPR and Tender document for 20 MLD capacity Tertiary Treated Reverse Osmosis (TTRO) Plant in 2 phases (10 MLD each) for treating Kelavarapalli Dam water and supplying it to SIPCOT, Hosur.
10. Consultancy assignment for preparation of DPR for improvement of existing water supply distribution system and to provide water supply to the uncovered areas of Avadi Municipal Corporation.
11. Consultancy assignment for preparation of DPR including design of Distribution system to 24x7 Water Supply system in Pilot water zones in Avadi, Thoothukudi, Tirunelveli, Vellore and Dindigul Corporations
12. Consultancy assignment for preparation of DPR for Underground Sewerage System (UGSS) for the phase IV left out

areas in Tiruchirappalli Municipal Corporation.

13. Consultancy services for preparation of DPR for Establishment of 100 MLD sewage treatment plant at Tiruchirappalli Municipal Corporation.
14. Condition assessment of existing 400 KLD STP at TIDEL Park, Coimbatore and consultancy assignment for preparation of DPR, bid document, bid process management for upgradation and PMC services.
15. Feasibility study for identifying suitable systems for reuse of recycled water from the proposed grids / source to cater to the recycled water demand for proposed SIPCOT Industrial Park at Tindivanam, Manaparai, Panapakkam, Ranipet, Illupaikudi, Allikulam, E.Kumaralingapuram & Vembur.
16. The R&D projects through grant from Indo- German Science and Technology Centre (IGSTC) "Smart and reliable water

and used water infrastructure systems for the future cities of India and Germany”.

17. Conducting Technical audit, verification and confirmation of the condition assessment of the plant and witness Ultra Filtration (UF) Membrane Air integrity test & Reverse Osmosis (RO) membrane probe test and to assess the overall efficiency of TTRO plant at Kodungaiyur.
18. Preparation of DPR for Water Treatment Plant (WTP) for Indian Naval Services (INS Parundu) at Ramanathapuram.

11.1.2 Common Effluent Treatment Plants with Zero Liquid Discharge (ZLD)

The Notable Projects implemented by TWIC are as follows:

1. PMA services for the development of 9 Textile CETPs with ZLD in Tirupur with the capacity ranging from 3 MLD to 11 MLD at a cost of Rs.540 crore.
2. PMA services for the upgradation of ZLD system in 8 CETPs through interest free loan from Government of Tamil Nadu. On

completion of the projects, TWIC carried out O&M of these CETPs for about 15 years from 2008 to 2024.

3. PMA services for five tannery CETPs, two at Ambur and one each at Vaniyambadi, Pallavaram and Melvisharam with a combined capacity of 11.55 MLD at a cost of Rs.143 Crore.
4. TWIC currently is an independent O&M operator for One Textile CETP in Tirupur.
5. Advisory services for establishment of Water recovery system from 11 MLD used water at TNPL factory, Kagithapuram, Karur District, including Techno-commercial feasibility cum pilot demonstration for a ZLD system with a capacity of 1,20,000 litre per day.
6. DPR for 5 MLD Effluent Treatment Plant (ETP) for Thermal Power Plant, TANGEDCO at Thoothukudi.
7. Advisory for preparation and submission of Detailed Project Report (DPR) for implementation of 42 MLD CETP with ZLD at Panipat, Haryana.

8. Project Management Consultancy for Establishment of CETP at Textile Park, Indrakaran, Sangareddy District, Telangana.
9. Advisory for the consultancy services for development of "Framework for reuse, recycle and zero liquid discharge (ZLD) of wastewater in India" for CPCB with Adelphi consult GmbH, Germany, under the Indo German Development Cooperation.
10. Consultancy services for feasibility study for establishment of combined effluent treatment plant in Konabari textile cluster in Bangladesh.
11. Preparation of DPR for establishing Common Effluent Treatment Plants (CETPs) for Textile and Tannery clusters under the National Mission for Clean Ganga (NMCG) in Rooma, Philkuwa, Mathura, Farukkabad, Bhadohi and Kanpur towns in the State of Uttar Pradesh.
12. TWIC also was engaged by the Department of Handlooms and Textiles, GoTN for preparation of DPR for establishing CETPs in

Erode, Nammakal, Karur and Salem Districts with funding under the Ministry of Textiles, IPDS scheme.

13. Consultancy for preparation of Detailed Project Report (DPR) and Estimates for establishment of 2000 KLD Common Effluent Treatment Plant (CETP) for SIPCOT Perundurai, Erode
14. Preparation of DPR for 5 MLD, ZLD CETP, for Odisha Industrial Infrastructure Development Corporation (IDCO).
15. The R&D projects through a grant from Indo- German Science and Technology Centre (IGSTC) "Effect based monitoring demonstrates efficiency of electrically driven water treatment processes to remove salts and micro pollutants from process water".

11.1.3 Sea Water Desalination

TWIC has extended Advisory Services for 17 sea water desalination plants with the capacity ranging from 0.5 MLD to 110 MLD (9 in Gujarat, 7 in Tamil Nadu and 1 in Odisha).

The Notable Projects implemented by TWIC are as follows:

1. Preparation of DPR, Environmental Report, Bid document and Bid Process Management for 270 MLD Sea Water Reverse Osmosis Desalination Plant in various locations in Gujarat for Gujarat Water Infrastructure Ltd., (GWIL) under hybrid annuity / concessionaire model.
2. TWIC has assigned the work of conducting Pre-Feasibility Report for setting up of either one number of 100 MLD or more than 1 plant of various capacity totalling 100 MLD Sea Water Reverse Osmosis Desalination Plant in Ramanathapuram by TWAD.
3. DPR and PMC for 100 MLD capacity sea water desalination plant at GIDC, Dahej, Gujarat.
4. DPR and PMC for 60 MLD capacity sea water desalination plant proposed by TWAD Board at Marakkanam in Villupuram district.
5. DPR and PMC for 60 MLD capacity sea water desalination plant proposed by TWAD Board

at Kuthiraimozhi in Ramanathapuram district.

6. DPR and PMC for 20 MLD capacity sea water desalination plant proposed by SIPCOT at Cuddalore.
7. Vetting of O&M Cost and proof checking of bid document for O&M of 110 MLD Desalination plant at Nemmeli.
8. Access, verification and comparison of quality and quantity, chemical consumption, performance and costing & claims checking report work for operation and maintenance of the 110 MLD SWRO (Sea Water Reverse Osmosis) desalination plant at Nemmeli.
9. PMC services to CMWSSB for establishment of 150 MLD capacity sea water desalination plant at Nemmeli.
10. Consultancy service for Preparation of DPR for establishing Sea Water Desalination Plants at Kamarajar Port Limited (KPL), Ennore (1 MLD), VOC Port, Thoothukudi (3 MLD) and Paradip Port, Odisha (10 MLD).

11.1.4 Restoration and Rejuvenation of Water Bodies

The Notable Projects implemented by TWIC are as follows:

1. DPR for restoration of 60 water bodies in Greater Chennai Corporation area.
2. Proof checking of the proposals and Feasibility Report for the restoration of Ooty lake.
3. PMC for restoration of Zamin Pallavaram Periya Eri and Keelkattalai Eri in Tambaram Corporation (formerly Pallavaram Municipality).
4. DPR and PMA for restoration of Mudasarlova lake catchment in Greater Visakhapatnam Municipal Corporation.
5. Advisory Services for preparation of DPRs for pollution abatement works for the selected river stretches in 9 municipalities and 18 Town Panchayats in Tamil Nadu.
6. Detailed Feasibility Reports for Restoration of Cooum & Adyar Rivers & Buckingham Canal for Chennai Rivers Restoration Trust (CRRT).

7. Preparation of DPR for restoration of Central Buckingham Canal including used water management, flood management, canal fairway development, solid waste management, Solar Power and Navigation, for Water Resources Department.
8. Identification & Quantification of Outfalls and Solid Waste Locations all along the drains (53 drains) of Adyar & Cooum Rivers and Buckingham Canal.
9. Preparation of Landscape design for GCC stretches from Chepauk to Greams Road along the Central Buckingham Canal, beyond Right of Way (RoW).

11.2 Projects under Implementation

In addition to the above works / projects which have been successfully executed, TWIC is now engaged in implementation of following works:

1. TWIC is working as Project Management Consultant (PMC) for the CETP in NextGen Textile Park at Pali, Rajasthan under Integrated Processing Development Scheme

(IPDS) of the Ministry of Textiles, Government of India.

2. PMC for the implementation of 79 water supply projects in various town panchayats under the Directorate of Town Panchayats (DTP) through AMRUT 2.0.
3. DPR for the implementation of STP / FSTP with Interception & Diversion works in 9 Municipalities under SBM 2.0.

11.3 Major Ongoing Projects

The Notable Projects being implemented by TWIC are as follows:

1. PMC for 20 MLD CETP for Jajmau Tannery Cluster, Kanpur-funded by Union Government under National Mission for Clean Ganga.
2. Sea Water Desalination Projects:
 - a. DPR and Transaction advisory (TA) for 60 MLD capacity plant proposed by SIPCOT, at Mullakadu in Thoothukudi district under Hybrid Annuity Model (HAM).

- b. PMC services for 3 MLD Sea Water Desalination Plant for VOC Port, Thoothukudi.
- 3. PMC services for upgradation of existing 400 KLD STP at TIDEL Park, Coimbatore.
- 4. PMC services in two phases (10 MLD each) for implementation of TTRO Plant at SIPCOT, Hosur.
- 5. Obtaining Environmental Clearance (EC) and Consent to Establish (CTE) from Odisha State Pollution Control Board (OSPCB), Transaction Advisory (TA), Financial closure, selection of Developer and Design, Interpretation support and Advisory for components like ZLD CETPs, Environmental planning (including solid/liquid waste management) in Industrial clusters / Parks for Odisha Industrial Infrastructure Development Corporation (IDCO).
- 6. Consultancy for preparation of Detailed Project Report (DPR) and Transaction Advisory (TA) for 2 MLD Common Effluent Treatment Plant (CETP) with Zero Liquid

Discharge (ZLD) and 3.5 MLD STP in Madras Export Processing Zone (MEPZ SEZ).

7. Project Management Consultancy services for Establishment of 100 MLD sewage treatment plant at Tiruchirappalli Municipal Corporation.
8. Transaction Advisory for 58 MLD STP for Tirunelveli Corporation.

11.4 Awards Received

1. Global Water Intelligence (GWI) Award 2014 - The Industrial Water Project of the year.
2. Water Reuse Industrial Project for the Year 2014 by the Water Reuse Association, USA.
3. The 2030 WRG Corporate Water Stewardship Award for the year 2015 by GWI, UK.

11.5 Technical Advisory Services for Union Government

TWIC is extending technical support to the Union Government in the following projects and schemes such as

1. TWIC's technology for ZLD has been recognized by the Ministry of Textiles and has been evaluated and accepted by the Department of Science and Technology (DST).

2. TWIC is extending PMC services to the Ministry of Textiles for Integrated Processing Development Scheme for implementation of Textile based CETPs in India.
3. TWIC is a Consultant to National Mission for Clean Ganga (NMCG) for preparation of DPR for setting up of CETPs for various industrial clusters in the State of Uttar Pradesh. TWIC is also a Project Engineer for setting up of the Jajmau Tannery CETP in Kanpur.
4. TWIC is joint venture partner of National Institute of Ocean Technology (NIOT) for providing consultancy services for implementation of sea water reverse osmosis desalination plants for Ports.

11.6 Turnover of the Company

The turnover of the Tamil Nadu Water Investment Company for the financial year 2023-24 has increased to Rs.33.24 crore from Rs.25.71 crore in financial year 2022-23.

12. Sustainable Development Goals

Municipal Administration and Water Supply Department is giving high priority to achieve Sustainable Development Goals through various schemes before 2030.

- a. Good Health and Well Being (Goal 3) - comprehensive healthcare services, including antenatal and postnatal care, child healthcare, basic diagnostics, and treatment for communicable and non-communicable diseases, all in one place. Under the National Urban Health Mission (NUHM) and the World Bank-funded Chennai City Partnership Programme, efforts are being made to enhance and upgrade both physical and human healthcare infrastructure.
- b. Quality Education (Goal 4) - Schools are being holistically transformed with various initiatives across the states.
 - Physical infrastructure - modernised classrooms & labs, spacious multipurpose spaces, designed toilets etc.
 - Digital Infrastructure - Establishment of Smart Classrooms / Hi- Tech labs under

various programs to enable wider reach of education & visualised method of learning.

- Sports & Extra-Curricular activities - Promotion of Self Defence Programs, Targeted Sports Coaching Programs, development of Sports facilities & provision of equipment
 - Health & Nutrition - Widespread implementation of Mid-day meal scheme and Chief Minister's Breakfast Scheme
- c. Gender Equality (Goal 5) - a slew of projects under the Nirbhaya scheme for the benefit of women, such as access to modern toilets, livelihoods, safety etc. A gender lab has been already established in GCC to look into gender issues and come up with solutions.
- d. Clean Water and Sanitation (Goal 6) – Sustainable Development Goal through sustainable water management and sanitation. Initiatives include:
- Restoring water bodies to raise water tables, promoting water conservation, and enhancing the surrounding environment.

- Integrating rainwater harvesting into new stormwater drainage systems for sustainable water capture and reuse.
 - Converting wells into recharge structures to replenish groundwater resources.
 - Modernizing public and community toilets to ensure equitable access to safe and hygienic sanitation facilities.
- e. Affordable and Clean Energy (Goal 7) - conversion of all existing streetlights to energy-efficient LED lighting completed. Furthermore, to promote sustainable transportation and improve citizen well-being, the GCC is actively encouraging a shift towards non-motorized transport options, including walking, cycling, and the use of electric bikes (E-bikes). Roadside parks, centre medians and traffic island parks are created to improve green cover for the benefit of general public. Lands reclaimed after bio-mining works for greening.
- f. Sustainable Cities and Communities (Goal 11) - measures are being taken to create more inclusive, safe, resilient, and

sustainable cities and human settlements. These measures prioritize reducing the adverse per capita environmental impact of Chennai through improvements in air quality and municipal waste management.

- g. Partnerships for Goals (Goal 17) - The Government of Tamil Nadu and the World Bank is engaged in the Chennai City Partnership Programme for achieving various disbursement linked indicators and Result Areas covering multiple sustainable development goals. These includes (a) Enhance efficiency and transparency of public procurement in GCC, (b) Strengthened health system through improved access to services and quality of care, (c) Increased availability of pedestrian-friendly multiutility streets (Complete Streets) project addressing all underground utilities covering a length of 11.6 km and so on.

Way Forward

With urbanization and the civic infrastructure demands necessitated by rapid urbanization in focus, the Municipal Administration and Water Supply Department is striving to ensure equitable growth and development of all the urban areas in the State.

Driven by the Vision of the Government, the Municipal Administration and Water Supply Department is focusing on providing quality civic infrastructure, enabling a decent and comfortable living to the citizen, while ensuring the safety and sustainability of the environment.

The department is focusing on building and improving a governance eco-system with people centric approach at its core, receptive to public demands and accountable to the citizen. The department is striving to achieve an inclusive system where access for quality and equitable civic infrastructure to every part of the town and every section of the society is guaranteed.

During the current year the department will endeavor to consolidate the achievements of

the past four years in its pursuit for a glorious urban ecosystem serving the aspirations of the people, with quality roads, stormwater drains, energy efficient street lighting, advanced waste processing systems, green spaces, knowledge centres and piped water supply etc.

Under the dynamic leadership of Hon'ble Chief Minister, Municipal Administration and Water Supply Department will continue to make significant contribution in achieving inclusive and vibrant urban areas complete with all and adequate civic infrastructure, serving as growth engines.

K.N. NEHRU
Minister for Municipal Administration

The Hon'ble Chief Minister, on 12.08.2024 flagged off 68 vehicles for the usage of Chennai Metropolitan Water Supply and Sewerage Board and Tamil Nadu Water Supply and Drainage Board.

New sewage treatment plant of 60 MLD capacity of Chennai Metropolitan Water Supply and Sewerage Board at Chennai Perungudi.

New sewage treatment plant of 120 MLD capacity of Chennai Metropolitan Water Supply and Sewerage Board at Chennai Koyambedu.

60 MLD and 54 MLD new sewage treatment plants of Chennai Metropolitan Water Supply and Sewerage Board at Chennai Perungudi.

The Hon'ble Chief Minister, on 06.12.2024 at the function held in Rajarathinam stadium handed over keys of 100 modern sewerage vehicles to sanitary workers under the scheme of making the sanitary workers as entrepreneurs.

The Hon'ble Chief Minister on 06.12.2024 handed over the vehicles to sanitary workers and the Hon'ble Chief Minister is with the beneficiaries.

The Hon'ble Deputy Chief Minister, on 11.02.2025 inaugurated a special pathway made of wooden planks at the Besant Nagar beach. The Hon'ble Deputy Chief Minister took a differently-abled individual in a special wheelchair through the sand and witnessed the joy of differently-abled persons as they dipped their feet in the sea, experiencing the pleasure of reaching the water.

The Hon'ble Deputy Chief Minister, on 11.02.2025 inaugurated a special pathway made of wooden planks at Besant Nagar Beach designed to allow differently-abled individuals to enjoy the sea.

The New Railway Over Bridge in lieu of the old bridge at Elephant Gate.

The Hon'ble Deputy Chief Minister on 09.12.2024 handed over appointment orders to 559 persons at a function held in Greater Chennai Corporation.

The Hon'ble Deputy Chief Minister, on 17.02.2025 flagged off 58 vehicles for the usage of Greater Chennai Corporation.

The Hon'ble Chief Minister on 12.08.2024 handed over orders constituting the 4 municipal corporations of Tiruvannamalai, Namakkal, Pudukkottai and Karaikkudi to the council chairmen.

The Hon'ble Chief Minister on 06.11.2024 visited and inspected the ongoing construction works of Semmozhi Poonga at Central Prison Complex, Gandhipuram, Coimbatore.

The Hon'ble Chief Minister on 06.11.2024 visited and inspected the ongoing construction works of Semmozhi Poonga at Central Prison Complex, Gandhipuram, Coimbatore.

The Hon'ble Minister for Municipal Administration on 20.02.2025 inaugurated the completed works in Coimbatore.

The Hon'ble Minister for Municipal Administration on 20.02.2025 inaugurated the Coimbatore Corporation Omni Bus Stand.

Coimbatore Corporation Omni Bus Stand.

New Bridge over the Kombu pallam canal at Old Pallipalayam Salai in Komarapalayam municipality.

New office building at Karumathampatti Municipality

Improved Kumarankulam pond at Chidambaram municipality.

The Hon'ble Minister for Municipal Administration on 15.02.2025 at a meeting held in Madurai reviewed the development works undertaken by the urban local bodies in southern districts.

Community Hall with newly constructed first floor at Elanthavilai in Puthalam Town Panchayat, Kanniyakumari District.

New Knowledge Centre at Mannachanallur Town Panchayat in Tiruchirappalli District.

Improved park at Indira Nagar, 8th Ward of Lakkampatti Town Panchayat in Erode District.

Shopping Complex at old bus stand in Avinashi Town Panchayat of Tiruppur District.

The Hon'ble Chief Minister on 07.02.2025 at Government function in Tirunelveli flagged off various vehicles including Battery Operated Vehicles for sanitary workers.

Weekly shandy and new shops including hotels at Andhiyur Town panchayat, Erode District.

The Hon'ble Chief Minister on 12.08.2024 handed over appointment orders to 5 persons as a mark of handing over appointment orders to 144 persons recruited for the Directorate of Municipal Administration, Directorate of Town Panchayats and Tamil Nadu Water Supply and Drainage Board through the Tamil Nadu Public Service Commission.

The Hon'ble Chief Minister on 21.02.2025 at Government function in Cuddalore visited exhibition halls put up by various departments.

Water treatment plant of 12.11 MLD capacity in the Combined Water Supply Scheme to 434 rural habitations in 22 panchayats of Chennimalai Union, Erode District of Tamil Nadu Water Supply and Drainage Board.

Water treatment plant of 41.12 MLD capacity at Krishnan Kovil in the Water Supply Improvement Scheme to Nagercoil Corporation in Kanniyakumari District.

The Hon'ble Chief Minister on 12.08.2024 laid foundation stone for 30 new schemes of Municipal Administration and Water Supply Department at an estimated cost of Rs.1192.45 crore at Secretariat.

The Hon'ble Chief Minister on 20.12.2024 at Government function in Erode District inaugurated 559 completed works at a cost of Rs.951.20 crore and laid foundation stone for 222 new schemes at an estimated cost of Rs.133.66 crore.

The Hon'ble Minister for Municipal Administration on 14.02.2025 reviewed the development works undertaken by urban local bodies in Chengalpattu and Kancheepuram Districts, at a meeting held in Kalaivanar Arangam, Chennai.

The Hon'ble Minister for Municipal Administration on 20.02.2025 reviewed the development works undertaken by urban local bodies in Coimbatore and Salem Districts, at a meeting held in Coimbatore.

The Hon'ble Minister for Municipal Administration on 21.02.2025 reviewed the development works undertaken by urban local bodies in Tiruchirappalli and its surrounding districts, at a meeting held in Tiruchirappalli.
