DEMAND No.26
HOUSING AND URBAN DEVELOPMENT
DEPARTMENT

POLICY NOTE 2026-2027

Introduction

Tamil Nadu is witnessing rapid urban transformation, with its cities emerging as major centres of economic growth, employment, investment, infrastructure and social development. The pace of urbanization has also led to significant migration from rural areas in search of better employment, education, healthcare and living conditions. While this process contributes to economic development and cultural diversity, it has increased pressure on housing, transportation, water supply, sanitation, social infrastructure and other essential urban services. Addressing these challenges requires an integrated approach that combines effective land-use planning, affordable

housing, efficient mobility, environmental protection and adequate infrastructure.

The Government's vision is to transform these urban centres into world-class metropolitan cities through planned urban growth, sustainable development, modern infrastructure and improved quality of life. The Housing and Urban Development Department, supported by its strong, well-established and responsive institutions functioning under its administrative control, such as Commissionerate of Town and Country Planning (CTCP), Chennai Metropolitan Development Authority (CMDA), Tamil Nadu Housing Board (TNHB), Tamil Nadu Urban Habitat Development Board (TNUHDB), Cooperative Housing Societies (RCS(Hg.)), Chennai Unified Metropolitan Transport Authority (CUMTA) and Tamil Nadu Real Estate Regulatory Authority (TNRERA) plays a crucial role in ensuring planned, balanced, inclusive and sustainable development across the State.

1. TAMIL NADU HOUSING BOARD

The Tamil Nadu Housing Board (TNHB), established under the Tamil Nadu State Housing Board Act, 1961, has been at the forefront of planned urban development and affordable housing in the State for over six decades. Evolving from the erstwhile City Improvement Trust, TNHB has played a transformative role in creating well-planned residential neighbourhoods and integrated townships equipped with quality infrastructure, thereby contributing significantly to the orderly growth and urbanisation of Tamil Nadu.

TNHB is a pioneering institution that provides dwelling units with the required infrastructure, at an affordable cost. TNHB has taken up Area Development schemes across the state, which involves the development of planned layouts of plots and the construction of houses/flats for all categories, viz. EWS, LIG,

MIG and HIG in a neighborhood development concept with all amenities.

In addition, TNHB had created the Board's rental flats for the general public and acts as a nodal agency for constructing and maintaining rental flats for Government servants at an affordable rent under the TNGRHS category, with Government grants. TNHB provides quality construction by adopting modern construction technologies such as pre-fabrication, Mivan and Monolithic concrete and continues to develop more neighbourhoods. The TNHB received the award "VISWAKARMA" from the Union Government for the construction of 1500 flats using new prefabrication technology in the suburban area of Chennai, at Sholinganallur, in 2018.

1.1 Focus on Affordable Housing

Recognizing that housing is a basic necessity, the Board has introduced innovative housing solutions that cater to all income

groups. TNHB's steadfast commitment to delivering affordable housing is reflected in its targeted efforts to support the Economically Weaker Section (EWS) and Lower Income Group (LIG).

For the LIG category, TNHB offers meticulously designed 2-bedroom flats with a carpet area of 600 sq. ft. in urban regions and 900 sq. ft. in rural areas. For those in the EWS category, single-bedroom flats featuring a multi-purpose hall with a carpet area of 400 sq. ft.

1.2 Organizational Structure

The Tamil Nadu Housing Board (TNHB) functions under the Housing and Urban Development Department of the Government of Tamil Nadu. The organisation is governed by a Board, headed by a Chairman appointed by the Government, and other official Board Members. This cohesive framework lays the foundation for effective governance, ensuring strategic decision-making and optimal resource management.

1.3 Achievements

Since its inception, TNHB has developed 4,58,609 units that span across Tamil Nadu. These include plots, houses and flats all designed with access to basic infrastructure such as roads, water supply and sanitation.

1.4 Major Housing Schemes

1.4.1 Area Development Scheme

Under this scheme, TNHB focuses on creating residential and commercial plots equipped with essential amenities including roads, street lights, water supply systems, sewerage networks and overhead tanks. These plots are allocated through transparent processes such as e-lots or e-auctions. Post-completion, the developed infrastructure is handed over to local authorities, ensuring long-term maintenance and upkeep. TNHB has developed 2,31,921 plots all over the state from its inception.

TNHB is developing 229 units at a cost of Rs.12.18 crore and will be completed during the financial year 2026-2027. The details are below:

S. No.	Name of the Scheme	No of Units	Project Cost (in Cr)
1.	Tirur, Tiruvallur	46	2.06
2.	Kakallur, Tiruvallur	18	0.80
3.	Edappaddi, Salem	165	9.32
	Total	229	12.18

1.4.2 Self-Finance Scheme (SFS)

Under this scheme, the cost of the flat is collected from prospective homeowners in manageable installments throughout the construction phase. By adopting this payment structure, TNHB not only reduces the financial burden on allottees but also ensures a steady flow of funds essential for the timely execution of projects. TNHB has constructed 24,510 flats all over the state.

TNHB is developing 163 Units at a cost of Rs.140.94 crore and will be completed during the financial year 2026-2027. The details are below:-

S. No.	Name of the Scheme	No of Units	Project Cost (in Cr)
1.	Padikuppam, Chennai	80	80.24
2.	Pallavan Nagar, Kancheepuram	83	60.70
	Total	163	140.94

1.4.3 Composite Development Scheme

The Composite Development Scheme is one of the TNHB's most innovative approaches. It combines residential and commercial facilities within a single project. Each project integrates modern residential units with commercial spaces, ensuring residents have access to shops, offices and other facilities within walking distance. These projects also attract business, further boosting the local economy.

TNHB is developing 539 Units at a cost of Rs.920.02 crore and will be completed during 2026-2027. The details are below:-

S. No.	Name of the Scheme	No of Units	Project Cost (in Cr)
1.	Ashok Pillar, Chennai	217	307.89
2.	Arumbakkam, Chennai	305	588.10
3.	Besant Nagar, Chennai	17	24.03
	Total	539	920.02

1.4.4 Commercial Development Schemes

TNHB's Commercial Development Scheme plays a crucial role in generating revenue while fostering economic growth in urban areas. These commercial complexes are designed to benefit both small retail outlets and larger enterprises.

TNHB is executing 02 Units at a cost of Rs.568.72 crore and will be completed during the financial year 2026-2027. The details are below:-

S. No.	Name of the Scheme	No of Units	Project Cost (In Cr)
1.	Peters Colony, Chennai	01	540.52
2.	Hosur	01	28.20
	Total	02	568.72

1.4.5 Tamil Nadu Government Rental Housing Scheme

Government rental quarters provide affordable accommodation for State Government employees, especially in urban areas where housing costs can be prohibitively high. Since its inception, TNHB has constructed 35,157 quarters all over the state. The TNGRHS quarters are maintained by TNHB on behalf of the Government through a Grants-in-Aid.

TNHB is developing 96 Units at a cost of Rs.65.00 crore in Thalavadi, Erode and will be completed during this financial year.

1.5 Tenements for the Economically Weaker Section

Slum Rehabilitation is a crucial initiative that improves the living conditions of people living in slums by providing better housing, infrastructure, and access to basic amenities. TNHB has constructed 22,932 units and handed over to TNUHDB.

Under this scheme, 6,877 tenements at Ernavur, Chennai have been completed at a cost of Rs. 1,168.16 crore. Handingover of these flats to TNUHDB is in progress. These projects play a crucial role in improving living standards for the economically weaker sections.

1.6 Reconstruction of TNUHDB tenements by TNHB

The redevelopment of TNUHDB tenements in 10 places at a cost of Rs.483.25 crore in Chennai, Trichy and Thanjavur is being taken up by TNHB. TNHB is developing projects in 8 locations by utilising TNHB funds such as East Cemetery Road, Kodungaiyur, Karumankulam, Powerkuppam, Osankulam in Chennai District and A.V.Pathy Nagar, Old Fish Market, JJ Nagar in Thanjavur District for 2746 Units at a cost of Rs.396.32 crore. The balance 2 schemes at Kamarajar Colony in Chennai District and Kottakollai in Trichy District will be commenced shortly.

1.7 Sale Deeds

As of March 2026, there were 15,715 sale deeds to be issued by the TNHB to the allottees. Out of it, 1,490 sale deeds were issued in the last four months. Further, action is being taken to issue sale deeds to the remaining 14,225 allottees.

1.8 Action Taken to Improve Sales

TNHB has already taken various initiatives to improve the marketing and sale of unsold stock of its plots, flats and commercial spaces. An integrated software system has been developed to streamline sales and marketing. E-Marketing, advertisements in Tamil and English Dailies, Social Media Campaigns, participation in Real Estate Trade Fairs, advertisements in Metro Rails and Government Buses, etc., are some of these marketing initiatives.

At present, 9,695 units including 7,099 plots, 305 houses and 2,291 flats are available for sale under Residential Units and 1,240 units including 483 shop sites, 391 commercial sites, 176 school sites and 190 public purpose sites are available for sale under Commercial Units.

1.9 Revenue Performance and Projections

For the year 2025-26, TNHB collected Rs.981.08 crore driven by sales of residential &

commercial units (Rs.842.16 crore) installments on hire purchase (Rs.38.95 crore), Rental income (Rs.21.60 crore) and miscellaneous streams (Rs.78.37 crore).

For the year 2026-27, the organisation has launched an aggressive marketing campaign and aims to achieve a substantial increase in the sales of residential & commercial units and rental income.

1.10 IT Advancements and Digital Transformation

TNHB is leveraging digital tools to streamline operations, enhanced customer engagement and generate new revenue streams through e-commerce and e-governance systems. It is currently using the e-Procurement Portal (<https://tntenders.gov.in>) to post e-tenders and e-tender auctions for works and commercial units and has developed and deployed an online allotment software

application enabling efficient and transparent allotment processes with end-to-end integrity.

Other key initiatives ready for rollout, include the digitalisation of land records, a Project Monitoring System, a Personnel Management System, a Payroll Management System and an Accounts and Finance System. These improvements will simplify processes for citizens, ensure operational accuracy and position TNHB as a technologically advanced public organisation.

2. COMMISSIONERATE OF TOWN AND COUNTRY PLANNING

2.1 Vision

"To achieve planned, inclusive, climate-resilient, and sustainable development of urban and rural areas of Tamil Nadu through integrated spatial planning, scientific land use management, conservation of ecological resources, balanced regional development, provision of quality infrastructure and liveable human settlements, and delivery of transparent, technology-driven, citizen-centric planning permission services that minimise delays".

2.2 Mission

The Commissionerate strives to

- Prepare and implement Regional Plans, Master Plans, and Detailed Development Plans in line with the developmental aspirations of the State.

- Promote balanced and equitable regional development by facilitating growth of emerging urban centers, satellite towns, and economic corridors.
- Ensure protection, restoration and sustainable management of water bodies, ecological assets and environmentally sensitive areas through scientific planning interventions.
- Facilitate affordable housing, sustainable mobility systems and creation of quality public spaces and urban infrastructure for enhancing liveability.
- Strengthen GIS-based planning, digital governance, and data-driven decision-making for effective and transparent planning administration.
- Encourage participatory planning approaches involving local bodies,

stakeholders, and citizens in the planning and development process.

- Deliver planning permission services that are timely, transparent, and directly accessible to applicants, reducing dependence on intermediaries and leveraging AI-driven tools to identify and resolve recurring systemic delays.

2.3 Administrative Structure

Commissionerate of Town and Country Planning is functioning under the Housing and Urban Development Department with Commissioner as its head. The Headquarters of the Commissionerate is located at Chennai, and its subordinate offices are functioning in the 37 Districts of Tamil Nadu. This Commissionerate consists of two wings Administration and Technical and it carries out its activities under the guidance of the Commissioner with personnel at various levels. The District level

offices viz., Assistant Director /Deputy Director/ Joint Director, function within the respective Districts jurisdiction.

2.4 Regional Plan

Regional Plan constitutes a specialised planning framework for a homogeneous area encompassing two or more districts, aimed at fostering long-term growth and development through the integration of economic, social, and environmental goals. It ensures the efficient utilisation of resources across the entire region, thereby facilitating balanced regional development.

2.4.1 Goals of Regional Planning

- **Balanced Growth:** Preventing over-concentration of development in single nodes by identifying growth centres, new towns and cities within the region, thereby promoting balanced regional development.
- **Transport Connectivity:** Analysing inter-city traffic and transport linkages to create a

more efficient network for the movement of people and goods between rural and urban areas.

- **Environmental Protection:** Safeguarding shared natural resources through equitable and sustainable development frameworks.
- **Optimal Resource Management:** Organising economic activities, natural resources, and settlement patterns to ensure that local resources are utilised efficiently for enhanced economic well-being.
- **Infrastructure and Investment:** Facilitating targeted investment in infrastructure including transportation, communication, and public services as critical inputs for economic growth.
- **Social Equity:** Prioritising the basic minimum needs of backward areas and ensuring that social services such as healthcare and education are accessible to

all sections of the population within the region.

2.4.2 Statutory Notification

The Government has identified 12 Regional Planning Areas under Section 10(5) of the Tamil Nadu Town and Country Planning Act, 1971. The Directorate of Town and Country Planning has engaged consultants for the preparation of Regional Plans for 10 regions under its jurisdiction. The remaining two regional plans, the Chennai Metropolitan Region and the Chengalpattu Region (comprising Chengalpattu, Kancheepuram, Tiruvallur, and parts of Ranipet District) are under the expansion area of the Chennai Metropolitan Development Authority (CMDA).

Status of Regional Plans

Sl. No.	Regional Plans	Status	Year of Completion
1.	Madurai, The Nilgiris and Coimbatore	Revised Draft Regional Plans under Scrutiny for Consent	2026-2027
2.	Vellore, Viluppuram and Thanjavur	Draft Regional Plans under review.	2026-2027
3.	Tiruchirappalli, Tirunelveli, Salem and Sivagangai	Preparation in Various Stages.	2027-2028

2.5 Master Plan

A structured and forward-looking approach to urban development is indispensable for ensuring planned, sustainable, and inclusive growth across Tamil Nadu. Master Plans serve as comprehensive strategic framework that guide the spatial and economic development of urban areas over a 20-year planning horizon. They address emerging urbanisation trends, infrastructure imperatives, environmental

sustainability, and socio-economic priorities, enabling the optimal and efficient utilisation of land and resources. The planning process incorporates inputs from the public, local bodies, and line departments to ensure transparency, inclusiveness, and responsiveness to local development needs.

The DTCP is mandated to prepare and periodically revise Master Plans, providing a comprehensive spatial framework for balanced and equitable regional development. At present, 123 Master Plans are under preparation, covering 130 towns under various State and Central Government schemes. Upon statutory notification, the proportion of planned urban areas is projected to increase from 7% to 22%. Advanced technologies including GIS, Remote Sensing, UAV surveys, and web-based cloud GIS platforms are employed throughout the planning exercise.

Phase I

Under Phase I, six Master Plans are being taken up. Of these, four namely Hosur, Coimbatore, Madurai, and Tiruchirappalli have been approved. The Master Plans for Tiruppur and Erode have been accorded consent.

AMRUT 1.0

Under AMRUT 1.0, preparation of Master Plans for 18 towns (comprising 17 Master Plans) is taken up. The Master Plans for Rajapalayam and Thoothukudi have been approved. In addition, 7 Master Plans, Nagapattinam with Velankanni, Salem, Vellore, Dindigul, Karaikudi, Nagercoil, and Tirunelveli have received consent.

List of AMRUT 1.0 Master Plan

S. No.	Name of Master Plan	S. No.	Name of Master Plan
1.	Rajapalayam *	2.	Thoothukudi *
3.	Nagapattinam with Velankanni	4.	Salem

* Approved Masterplan

AMRUT 2.0

Under AMRUT 2.0, the DTCP is preparing 51 Master Plans covering 54 Class-II towns, integrating strategic spatial planning with infrastructure development. Focus areas include strengthening water supply and sanitation systems and upgrading stormwater drainage, using advanced tools like GIS, Remote Sensing, and drones.

Hill Area Master Plan

Hill towns of Tamil Nadu are characterised by unique physiography, rich biodiversity, and high ecological sensitivity. The DTCP is preparing dedicated Master Plans for hill areas namely Udthagamandalam, Coonoor-Kotagiri, Gudalur, and Nelliyalam in the Nilgiris District; Valparai in Coimbatore District; Kodaikanal in Dindigul District and Yercaud in Salem District ensuring planned, resilient, and environmentally sustainable development while safeguarding the ecological integrity of these fragile ecosystems.

2.6 Detailed Development Plan (DDP)

Detailed Development Plans (DDPs) are micro-level planning frameworks prepared in conformity with the Master Plan for urban areas. They facilitate the optimal utilization of land through the delineation of residential, commercial, industrial, and recreational zones, while also providing for the improvement of road

networks, traffic circulation, and public infrastructure.

The Department has notified 1,703 Detailed Development Plans across the State. In alignment with the newly notified Master Plan areas, Detailed Development Plans will be formulated for identified potential development areas to ensure planned, sustainable and orderly urban development.

2.7 Urban Development Authorities

Six Urban Development Authorities (UDA) have been notified in Coimbatore, Hosur, Salem, Tiruchirappalli, Madurai and Tiruppur. The UDA's will be constituted and operationalised in a phased manner.

2.8 State-wide Single Window Portal — Key Features and Latest Developments

2.8.1 Single Window Portal

The Single Window Portal has been operationalized to facilitate easy and efficient processing of planning permissions for layout,

building, and change of land use applications. The system enables local bodies to issue final permits directly through the portal.

As on 31.07.2026, the Single Window Portal has facilitated the issuance of 28,022 layout approvals and 10,807 planning permissions, significantly enhancing service delivery at the grassroots level.

All NOC-issuing departments have been integrated into the portal, with NOC processing streamlined through automatic detection based on geo-coordinates. A deemed NOC system with a fixed timeline of 30 days has been introduced, enabling faster approvals and reducing applicant inconvenience.

2.8.2 Self-Certification Scheme

The Instant Approval through Self-Certification Scheme enables instant building permit approval for residential buildings on plots up to 2,500 sq.ft. with a built-up area up to 3,500 sq.ft. (Ground Floor or Ground + 1 Floor,

maximum height 7 metres), without obtaining a completion certificate. Since its introduction, more than two lakh beneficiaries have availed its benefits. The scope has since been expanded to cover Stilt + 2 Floors up to 10 metres height.

2.8.3 Deemed No Objection Certificate

The Deemed NOC system prescribes specific timelines for NOC-issuing departments to process and issue clearances. The system-based workflow enables timely scrutiny, online submission of replies by the applicant and automatic initiation of deemed approval where action is not taken within the stipulated period, significantly reducing delays and improving transparency.

2.8.4 Centralised Help Desk

A Centralised Help Desk has been established for the Single Window Portal to ensure timely resolution of issues faced by citizens, architects, departmental users, and other stakeholders. It serves as a single point of

contact for queries relating to planning permission applications and supports rollout of new policy reforms and system enhancements.

2.8.5 Challenges in Planning Permission Processing and Measures Taken

A systematic review of planning permission processing was undertaken through stakeholder consultations conducted at both the DTCP Head Office and District Office levels. Suggestions from applicants and the officials were documented and necessary follow up action has been initiated to reduce time taken for processing applications for planning permission.

2.9 Review of Tamil Nadu Town and Country Planning Act, 1971

The Tamil Nadu Town and Country Planning Act, 1971, enacted in supersession of the erstwhile Madras Town Planning Act, 1920, provides the statutory framework for planned urban and rural development in the State. In

view of the accelerated pace of urbanisation and the increasing demand for industrial infrastructure, mobility networks, educational institutions, healthcare amenities and recreational facilities, mandates a comprehensive review of the existing planning legislation.

As part of the consultative process, detailed interactions have been undertaken with various Government Departments, academic and research organisations, and stakeholders from the real estate and construction sectors. Public consultations through Focus Group Discussions were held at Madurai, Tiruchirappalli, and Coimbatore. The new draft legislation will be finalised during 2026-27.

2.10 Simplification in change of land use rules in non-plan area

The rules for change of land use in non-plan areas in terms of dry land have been

amended as per G.O. (Ms.) No. 149, Housing and Urban Development Department, dated 31.07.2026, to ease the compliance burden on applicants. Previously, such conversions mandated obtaining a No Objection Certificate (NOC) from the Agriculture Department. Such a requirement led to delays on account of inter-departmental processing. Under the amended provision, DTCP is empowered to process and sanction such applications utilizing the same set of documents submitted earlier. This amendment is expected to streamline the approval process, reduce turnaround time, and consolidate land-use conversion functions within a single department, thereby improving administrative efficiency and reducing procedural redundancy for landowners seeking conversion of dry land in non-plan areas.

2.11 Hill Area Conservation Authority (HACA)

The Hill Area Conservation Authority was constituted as per G.O. No. 44, Planning and Development Department, dated 02.04.1990, to regulate developments in hill areas, with 43 hill area taluks initially notified under its jurisdiction.

A revised list comprising of all villages of The Nilgiris District, Kodaikanal Taluk in Dindigul District, Yercaud Taluk in Salem District and 597 hill villages of other districts was issued in 2003. Further based on the present administrative set-up, hill areas now comprise 768 hill villages in 21 districts as per G.O. (Ms). No. 49, Housing and Urban Development Department, dated 24.03.2003.

The Government as per G.O. (Ms) No. 46, Housing and Urban Development Department, dated 24.02.2026, simplified change of land use procedure up to 2 hectare in urban areas and 4 hectare in rural areas in HACA areas by allowing

similar procedures to follow as in non-HACA areas. Also, for layout and buildings in HACA areas the proposals need not be placed before HACA committee for prior clearance.

2.11.1 New Hill Area Building Rules

A comprehensive review of the existing Tamil Nadu District Municipalities (Hill Stations) Building Rules, 1993 is under progress and the review will be completed within this year and New Hill Area Building Rules will be notified.

2.12 Granting Approvals for Projects of the Guidance and Micro, Small and Medium Enterprises

Tamil Nadu is recognised globally as a prominent manufacturing hub, with extensive growth across sectors including automobiles and components, textiles, leather products, light and heavy engineering goods, pumps and motors, and electronic software and hardware. Pursuant to the Tamil Nadu Business Facilitation Act, 2018, GUIDANCE monitors and follows up on the

processing of applications related to land-use conversion, building approvals, and allied requirements submitted by micro, small, and medium enterprises through an online single-window system.

2.12.1 Reforms in Development of Industrial Projects

- Through the Single Window System, approvals for building, layout, and land use conversion applications have been streamlined, enhancing ease of doing business.
- The Floor Space Index (FSI) for industries has been increased from 1.5 to 2.0 with a provision for Premium FSI; apartment industrial buildings are now permissible; setback requirements for cottage and green industries have been reduced.
- A Self-Certification Scheme has been introduced and launched for White and

Green category industries with built-up area up to 5,000 sq.ft. on plots up to 7,500 sq.ft. and height not exceeding 10 metres.

- The front setback for cottage industries has been standardised to 1.5 metres; the side setback for green and orange category industries has been reduced from 3 metres to 2 metres.
- The minimum access road width for green and white category industries has been reduced from 7 m to 6 m in peri-urban and village panchayat areas.

2.13 Special Schemes

2.13.1 Regularisation of Unapproved Plots and Layouts

A special scheme introduced on 04.05.2017 enables regularisation of unapproved plots and layouts in plain areas where at least one plot was sold and registered on or before 20.10.2016. The scheme protects

public who had purchased plots in unauthorised layouts and facilitates local bodies in provision of basic infrastructure. A separate Government Order was issued for hill areas.

For the benefit of the public, this scheme has been further extended up to 30.06.2027 as per G.O. (Ms.) No. 148, Housing and Urban Development Department, dated 27.07.2026.

As on 31.07.2026 a total of 43,343 layout applications have been received, of which 42,314 have been disposed and the remaining 1,029 applications are under process.

2.13.2 Regularisation of Unauthorised Educational Institution Buildings

A scheme for the regularisation of unauthorised educational institution buildings constructed and functioning prior to 01.01.2011 in non-plan areas was introduced through a Government Order issued on 14.06.2018. Building approval has now been made

mandatory for obtaining recognition from the Education Department and for the renewal of such recognition.

As on 31.07.2026, a total of 4,306 applications have been received online. Of the 3,724 applications received with the required supporting documents, action has been taken on 3,360 applications. The remaining 364 applications are under process.

In order to facilitate the educational institutions in obtaining building approval, this scheme has been extended for another twelve months, from 06.07.2026 to 05.07.2027, as per G.O.(Ms) No. 137, Housing and Urban Development Department, dated.03.07.2026.

2.14 Non-Tax Receipts

Non-tax receipts of the Directorate comprise infrastructure and amenities charges, centage charges, premium floor space index charges, regularisation charges, publication charges, open space reservation charges, and

charges on conversion of land use. An amount of Rs. 1,288.40 crore has been collected during the financial year 2025-26.

2.15 State Infrastructure and Amenities Fund

Infrastructure development plays a vital role in sustaining the State's economic growth and enhancing overall quality of life. With the rapid pace of urbanisation, local bodies are increasingly facing infrastructure constraints. In accordance with Section 63-C of the Tamil Nadu Town and Country Planning Act, 1971, the Government constituted the Infrastructure and Amenities Fund in 2007, administered by the State Infrastructure and Amenities Promotion Committee.

Since its inception, the Fund has accumulated a total of Rs. 7,148.17 crore upto 31.05.2026. The fund has been used to sanction projects implemented by various departments including the Directorate of

Municipal Administration, Greater Chennai Corporation, Chennai Metropolitan Water Supply and Sewerage Board, Directorate of Town Panchayats, Tamil Nadu Urban Habitat Development Board, Chennai Metropolitan Development Authority, Highways Department, Directorate of Rural Development and Panchayat Raj, Chennai Metro Rail Limited, and others.

During 2025-26, projects for Rs. 414.66 crore has been sanctioned.

S. No.	Name of the Project	Amount Sanctioned (Rs. in Crore)
1.	Construction of flyover from Sardar Patel Road – Velachery Main Road junction to Guru Nanak College Junction (200 ft Road), Dn-172, Zone-13 in Greater Chennai Corporation.	232.50
2.	Construction of RoB in lieu of LC No. 2 near Korukkupet Railway Station, Dn. 42 & 47, Zone-4 in Greater Chennai Corporation.	52.50

S. No.	Name of the Project	Amount Sanctioned (Rs. in Crore)
3.	Additional grant for reducing beneficiaries' contribution in 10 Affordable Housing in Partnership Projects under PMAY (Urban).	72.66
4.	Improvement and O&M of water supply and sewerage infrastructure in TNUHDB tenement schemes, Chennai.	57.00
	Total	414.66

2.16 Office Buildings

The Directorate of Town and Country Planning operates 38 offices across Tamil Nadu. Of these, 15 District offices function in their own buildings, while 4 more own buildings are currently under construction. Ten offices function from Collectorate buildings and 9 continue to operate from rented premises.

Building construction is currently in progress for the Perambalur District and the

Tiruvallur office at Gummidipoondi. Land has been earmarked for construction of office at Thanjavur and construction will commence shortly. Tiruvarur office building is under construction. The Head Office continues to function from CMDA building at Koyambedu, Chennai.

2.17 Recruitment Details

2.17.1 Recruitment of Technical Personnel

To improve service delivery and enhance effective implementation of the Tamil Nadu Town and Country Planning Act, 1971, the following technical posts were filled by direct recruitment through the Tamil Nadu Public Service Commission (TNPSC) during 2025-2026 and 2026-27:

Sl. No.	Post	No. of Posts filled (2025-26)	No. of Posts filled (2026-27) upto 31.07.2026
1.	Assistant Director	04	03
2.	Architectural Assistant / Planning Assistant	03	-
3.	Draughtsman Grade III	04	-
	Total	11	03

2.17.2 Recruitment of Ministerial Personnel

The following ministerial posts were filled by direct recruitment through TNPSC during 2025-26:

Sl. No.	Post	No. of posts filled (2025-26)
1.	Junior Assistant	02
2.	Typist	08
3.	Steno-Typist Grade -III	1
	Total	11

2.18 Capacity Building Training Programme

Regular updating of skills is essential for improving work efficiency on technical aspects. The following training programmes were imparted to the technical personnel of this Department:

S. No.	Designation	Training Programme / Venue	Duration
1.	Assistant Directors	1. Town and Country Planning Organisation – New Delhi 2. National Institute of Urban Affairs 3. NCR – National Capital Regional Planning Board 4. Delhi Development Authority (DDA) 5. CEPT, Ahmedabad	05.05.2025 to 09.05.2025
2.	Research Assistant	Geospatial Intelligence: Capacity Building for the Future	27.02.2026

S. No.	Designation	Training Programme / Venue	Duration
		Anna University, Chennai	
3.	Research Assistant & Planning Assistant	Transit Oriented Development (TOD) Capacity Building Programme organised by Ministry of Housing and Urban affairs, Government of India, Indore	18.05.2026 to 22.05.2026 (Five Days)
4.	Surveyor cum Assistant Draughtsman	Tamil Nadu Land Survey Training Centre, Orathanadu, Thanjavur	19.06.2026 to 22.06.2026
5.	Assistant Directors	1.Town and Country Planning Organisation – New Delhi 2.National Institute of Urban Affairs 3.Delhi Development Authority (DDA) 4.CEPT, Ahmedabad	06.07.2026 to 08.07.2026

S. No.	Designation	Training Programme / Venue	Duration
6.	Registered Engineers, Architects and Technical Professionals	Orientation and capacity-building programmes for Registered Engineers, Registered Architects and other registered technical professionals associated with the planning permission process are proposed to be conducted by the Directorate and District officers. The programmes will focus on statutory provisions, online application procedures, planning parameters, building rules, documentation requirements and best practices for scrutiny and compliance.	2026-2027

2.19 Amendments

Reform in the Tamil Nadu Town and Country Planning Act, 1971

The validity period of planning permission has been extended from 5 to 8 years.

Reforms in Tamil Nadu Combined Development and Building Rules, 2019

- The height restriction for buildings with Ground + 2 Floors or Stilt + 3 Floors has been increased from 12 metres to 14 metres without altering setback requirements.
- The number of dwelling units exempted from obtaining completion certificates has been increased from 3 to 8 dwelling units with a built-up area up to 750 sq.m.
- The completion certificate exemption has been extended to small commercial buildings of built-up area up to 300 sq.m. and height not exceeding 14 metres.

- The minimum access road width for layouts has been reduced from 7 m to 6.5 m in Town Panchayats and from 7 m to 6 m in Village Panchayats.
- Amendments have been introduced for flatted factories, industrial parks, and dormitories within industrial layouts to promote industrial development.
- Car parking for a single dwelling unit exceeding 300 sq.m. on a plot is capped at a maximum of 4 car spaces.
- Planning permission may be issued for school buildings abutting State or National Highways, subject to formation of a service road by the school management.
- The requirement of a No Objection Certificate from the Agricultural Engineering Department for planning permission in HACA areas has been exempted.

2.20 Enforcement Cell

The primary objective of Enforcement Cell is to prevent and regulate the proliferation of unauthorised constructions and building violations. This cell comprises of 1 Joint Director, 1 Deputy Director, 1 Assistant Director, 2 Architectural Assistants / Supervisors, 2 Draughtsman Grade-III / Surveyors / Assistant Draughtsman, and 1 Steno-Typist. Till date, the team has conducted field inspections in 10 districts — Tiruppur, Tirunelveli, Madurai, Chengalpattu, Vellore, Namakkal, Dindigul, Coimbatore, Kancheepuram, and Tiruvallur. Respective District Town and Country Planning offices have been directed to take necessary action against violations identified during these inspections.

Plan of action: The role of the enforcement cell will expand significantly due to increased self-certification approvals and the introduction of third-party certification for building approvals.

To effectively curb violations and encroachments, the cell will actively conduct rigorous inspections.

GIS-based software: As a pilot project in Coimbatore, custom software is being developed that uses satellite imagery and Geographic Information System (GIS) technology to detect building violations early. Operating as a unified land and building database platform, the software processes satellite and drone imagery to automatically identify physical changes on the ground. By cross-referencing this data with existing records, the system flags unapproved constructions and dispatches automated alerts to district officers to guide targeted enforcement action.

2.21 Ongoing key activities

2.21.1 Standard Operating Procedure for Master Plans and Local Area Plans (SOP)

A Standard Operating Procedure (SOP) is being formulated to ensure a comprehensive, efficient, and integrated approach for the preparation and implementation of Master Plans across Tamil Nadu. The SOP will provide detailed guidance on data collection, stakeholder consultation, spatial planning, and other planning processes, addressing the current lack of uniformity arising from Master Plans being prepared by different agencies following diverse procedures.

2.21.2 Web GIS Portal

The Web GIS Portal integrates spatial mapping technology with the planning database, enabling users to visualise approved layouts over satellite imagery — displaying layout boundaries, plot divisions, road networks,

survey numbers, and approval details in an integrated digital environment. The portal enhances transparency in land transactions and strengthens urban governance through the digitisation of layout approval records in a centralised planning database.

2.21.3 Land Pooling and Area Development Scheme (LPADS)

The Land Pooling and Area Development Scheme (LPADS) is a progressive land management and urban development framework aimed at consolidating fragmented land parcels into integrated and comprehensively planned urban areas. The scheme enables the coordinated provision of critical infrastructure and public facilities, including road networks, open spaces, parks, and utility services, while ensuring a balanced and transparent redistribution of developed land among participating landowners. By adopting this approach, LPADS promotes efficient land

utilisation, planned urban expansion, and enhanced land value for stakeholders.

As a preliminary initiative, Hosur has been identified for the implementation of a pilot project to showcase the applicability and benefits of LPADS. In this connection, DTCP will engage a consultant to undertake the project within the Hosur New Town Development Area.

2.21.4 Land Use Information System (LUIS)

A centralised Land Use Information Portal has been proposed to provide seamless public access to land use information from implemented Master Plans, currently available only in hard copy at respective planning authority offices. The portal will serve as a GIS-based spatial land use information system integrating planning area boundaries, survey parcels, land use classification, water bodies, and road networks, enhancing transparency and utility for Government departments, investors, and citizens.

2.21.5 Institutional Strengthening

A study on the “Preparation of Strategic Institutional Strengthening Assessment and Action Plan for the Directorate of Town and Country Planning and Urban Development Authorities” is being conducted to assess and strengthen the institutional framework of the Directorate of Town and Country Planning (DTCP) and the six proposed Urban Development Authorities (UDAs) in Tamil Nadu through development of a Strategic Institutional Strengthening Assessment and Action Plan aligned with contemporary urban planning principles, sustainability goals, and global best practices. It is aimed to improve public service delivery, ensure the efficient management of resources, enhance the governance process, and support economic growth.

2.22 New Initiatives

2.22.1 Mandating the preparation, approval and adoption of legally valid GIS-based Plans

Government have issued orders in G.O.(Ms).No.157, Housing and Urban Development (UD4-1) Department, dated 11.08.2026 mandating the preparation, approval and adoption of legally valid GIS-based Master Plans, Zonal Plans and Land use Plans for all Planning Authorities. This initiative will benefit the public by ensuring accurate and easily accessible planning information, supporting data-driven decision-making, promoting transparency, and facilitating faster approvals in planning areas.

2.22.2 Integration of Infrastructure Availability and Hazard Considerations into Land Use Planning and Zoning

Government have issued orders in G.O.(Ms).No. 150, Housing and Urban Development (UD4-1) Department, dated 04.08.2026 mandating the integration of trunk infrastructure availability (water, electricity and sanitation) and hazard considerations particularly in areas where construction is prohibited due to natural hazards, into land use planning and zoning regulations. This will provide a comprehensive policy framework for defining zoning parameters, promote sustainable development, enhance public safety, protect natural resources and ensure efficient infrastructure utilisation.

2.22.3 Online Appeal and Dispute Resolution System

G.O.(Ms). No. 158, Housing and Urban Development (UD4-1) Department, dated

17.08.2026 has been issued for implementing an Online Appeal and Dispute Resolution System through the Single Window Portal, where the petitioners can file appeals against rejection of planning permission application online. This initiative benefits the public by eliminating physical visits and paperwork, reducing delay, ensuring transparency through real-time tracking, and enabling convenient digital hearings, thereby ensuring faster, citizen friendly dispute resolution system related to planning permissions.

2.22.4 Joint Inspection Dashboard

Government Order have been issued (G.O.(Ms).No.160, Housing and Urban Development (UD4-1) Department, dated 19.08.2026) to streamline the inspection procedures and improve ease of doing business, a Joint Inspection Dashboard has been introduced in the Single Window Portal to enable coordinated scheduling and conduct of site

inspections by various No Objection Certificate (NOC) issuing Departments, relating to planning permission applications.

2.22.5 Unified Statewide Online Registration System for Registered Professionals

Government Order have been issued (G.O.(Ms).No.159, Housing and Urban Development (UD4-1) Department, dated 19.08.2026) to provide for a Unified Statewide Online Registration System of Registered Professionals, enabling Architects, Engineers, Structural Engineers, Town Planners and other professionals to register on a single platform instead of registering separately with CMDA, DTCP, CMA, GCC, DTP and DRD for obtaining planning and building permission. This initiative will significantly improve ease of doing business by simplifying procedures and reducing delays.

3. CHENNAI METROPOLITAN DEVELOPMENT AUTHORITY

The Chennai Metropolitan Development Authority (CMDA) is the statutory authority responsible for planning, coordinating and regulating the orderly development of the Chennai Metropolitan Area (CMA). As the State's premier metropolitan planning organisation, CMDA plays a pivotal role in guiding sustainable urban growth through integrated spatial planning, development regulation and strategic infrastructure planning.

Initially constituted as an adhoc body in 1972 and accorded statutory status in 1975, CMDA is entrusted with the preparation and implementation of Master Plans, formulation of Development Regulations and execution of key urban development initiatives. The Authority also promotes balanced land use, facilitates infrastructure development, conserves

environmentally sensitive areas and supports sustainable economic growth in accordance with contemporary urban planning principles.

Through evidence-based planning and coordinated urban governance, CMDA seeks to create a resilient, inclusive and well-connected metropolitan Area, enhancing the quality of life of its residents while supporting the long-term economic development of Tamil Nadu.

3.1 Vision of CMDA

To enhance the quality of life of the people of the Chennai Metropolitan Area through people-centric, transparent and efficient governance by promoting sustainable, inclusive and technology-driven urban development, fostering balanced growth, enhancing livability, and creating a resilient and future-ready metropolitan region through modern planning practices and effective governance.

3.2 Mission of CMDA

To promote transparent, inclusive, and well-planned urban development across the Chennai Metropolitan Area through master planning, effective regulatory frameworks, resilient infrastructure, and digital innovation—supporting sustainable growth and improving the quality of life for present and future generations.

3.3 Organizational Set-up

The Chennai Metropolitan Development Authority (CMDA) is headed by the Hon'ble Minister for Housing and Urban Development Department. Operational functioning is overseen by a team of executive functionaries including the Vice-Chairperson, Member Secretary, and Chief Executive Officer.

The Authority also comprises representatives from various Government Departments, academic institutions, trade and commerce sectors and elected representatives. This multidisciplinary composition facilitates

coordinated decision-making, promotes stakeholder participation and enables CMDA to adopt an integrated approach to metropolitan planning and urban development.

3.4 Major units of CMDA

The following key units responsible for carrying out the statutory functions and developmental activities of CMDA:

- i. Administrative Division
- ii. Master Plan Unit
- iii. Area Development Unit
- iv. Area Plans Unit
- v. Urban Transport Unit

3.4.1 Administrative Division

The Administrative Division is responsible for all establishment matters related to the officers and other employees of CMDA.

3.4.2 Master Plan Unit

The Master Plan Unit is tasked with overseeing a range of critical functions that guide urban development and planning within

the Chennai Metropolitan Area (CMA). These responsibilities include:

1. Preparation of Third Master Plan (2027–2046) for CMA (1,189 sq.km).
2. Preparation of Master Plan for Expanded CMA (5,904 sq.km).
3. Preparation of New Town Development Plans.
4. Preparation of Land Pooling Area Development Scheme.
5. Review and amendments to Development Regulations.
6. Processing policy matters and undertaking studies relating to urban development and metropolitan planning.
7. Conservation of Heritage Buildings/Areas.
8. Preparation of any other spatial plans as may be directed by the Government.

Preparation of Third Master Plan for Chennai Metropolitan Area (2027-2046)

Rapid urbanisation, changing economic dynamics, increasing infrastructure demand and emerging environmental and climate challenges necessitate a comprehensive long-term planning framework for the Chennai Metropolitan Area (CMA). Building upon the planning strategies introduced through the First Master Plan (1976), which focused on decongesting the city, promoting Metropolitan economic growth, development of three orbital roads and implementation of Sites and Services Schemes under MUDP I & II, and the Second Master Plan (2008–2026), which promoted compact urban development, environmental sustainability, flood mitigation, conservation of water bodies, and facilitated the growth of the IT and ITES sector through dedicated corridors, the Government authorised CMDA in 2021 to prepare the Third Master Plan (2027–2046).

Supported under the World Bank-assisted Tamil Nadu Housing and Urban Habitat Development Project (TNHHDP), CMDA has undertaken extensive stakeholder consultations, public engagements and sectoral studies covering housing, economy, infrastructure, environment, climate resilience, urban design and institutional strengthening. A GIS-enabled digital base map has also been prepared using survey parcels, high-resolution satellite imagery and Differential Global Positioning System (DGPS) surveys to facilitate evidence-based spatial planning.

The Third Master Plan will serve as the statutory framework for guiding resilient, inclusive and sustainable urban development, strengthening infrastructure planning, promoting balanced economic growth, protecting environmental resources and enhancing the quality of life across the Chennai Metropolitan Area.

Preparation of Master Plan for Expanded CMA (5,904 sq.km)

The Government is committed to transforming Chennai into a world-class, future-ready metropolis. Towards this, the Chennai Metropolitan Development Authority (CMDA) is preparing the Third Master Plan for the Chennai Metropolitan Area (1,189 sq.km) and its development vision shall be integrated with its Expanded Area (5,904 sq.km) for promoting complementary and balanced growth across the entire region by 2046. To ensure the highest quality of planning, CMDA will engage an experienced planning consultant to bring global expertise and best practices to finalize the Third Master Plan for the 1,189 Sq.km and prepare a Master Plan for the rest of the CMA (5,904 Sq.km) area.

The Plan will establish a comprehensive spatial and policy framework for the entire region, integrating land use, mobility, housing,

economic activities including industrial development, infrastructure and environmental sustainability. It will be benchmarked against internationally acclaimed metropolitan planning framework.

Preparation of New Town Development Plans

To promote balanced urbanization and reduce development pressure on the core city, CMDA proposes to prepare New Town Development Plans for strategically identified growth nodes in the expanded Chennai Metropolitan Area. These New Towns are envisaged as self-sustaining urban centres with integrated residential, commercial, industrial, institutional and recreational land uses supported by quality infrastructure. The proposed New Town Development Plans will facilitate orderly urban expansion, attract investments, generate employment opportunities, create vibrant growth centres,

and promote environmental sustainability and climate resilience.

Land Pooling Area Development Schemes (LPADS)

Rapid urbanisation and the increasing demand for serviced urban land necessitate innovative and sustainable approaches to support planned urban expansion. Accordingly, CMDA proposes to implement Land Pooling Area Development Schemes (LPADS) in strategically identified growth areas across the expanded Chennai Metropolitan Area. The Scheme adopts a participatory approach by enabling landowners and the Government to jointly develop well-planned urban neighbourhoods supported by quality infrastructure and public amenities.

LPADS will establish a sustainable mechanism for infrastructure financing through land value capture, monetisation of a portion of the pooled land and enhanced development potential generated by public investments. The

Scheme will facilitate orderly urban expansion, create investment-ready land parcels, generate employment opportunities, and support the development of sustainable, well-connected and economically vibrant growth centres across the metropolitan Area.

3.4.3 Area Development Unit

The Area Development Unit (ADU) of CMDA plays a pivotal role in implementing the strategies and proposals envisaged in the Master Plans through integrated urban development projects. The Unit undertakes area-based development initiatives, including New Towns, Land Pooling Area Development Schemes and other infrastructure projects, to facilitate planned metropolitan expansion. Through these initiatives, the ADU promotes balanced urban growth and enhances the quality of life across the Chennai Metropolitan Area.

a) Planning Wing

Prepares Detailed Development Plans, layouts and project proposals to implement the Master Plan, including New Town Development Plans, and formulates implementation strategies, including land acquisition wherever required.

b) Construction Wing

Executes, supervises and monitors the construction of urban development projects planned by the Planning Wing, ensuring quality, timely completion and adherence to approved standards.

c) Finance Wing

Mobilises financial resources, manages the financial aspects of Area Development projects, and oversees project funding, budgeting, pricing and financial management.

Transport Infrastructure

To strengthen regional connectivity and decongest the existing transport network, CMDA has undertaken the development of

modern bus terminus across the Chennai Metropolitan Area.

Kalaingar Centenary Bus Terminus (KCBT), Kilambakkam, conceived under the Second Master Plan and inaugurated on 30 December 2023, was developed to decongest the Chennai Mofussil Bus Terminus (CMBT) at Koyambedu and serve south-bound mofussil buses. The terminus comprises 215 bus bays, 320 idle parking bays, parking facilities for 3,146 two-wheelers and 482 four-wheelers, along with commercial facilities, passenger amenities and universal accessibility features.

It presently handles around 1,100 State Transport Corporation buses, 550 omni buses and 781 MTC buses daily, serving nearly 50,000 passengers. CMDA has further enhanced the facility through a 16-acre Climate Park, Archaeological Interpretation Centre, dedicated police station, KCBT mobile application, additional park, an under-construction skywalk

connecting the terminus with Kilambakkam Railway Station, and provision for proposed Metro Rail connectivity to facilitate seamless intermodal transit.

To strengthen public transport infrastructure across the expanded Chennai Metropolitan Area (5,904 sq.km), CMDA has implemented and is implementing modern bus termini and other public infrastructure projects at strategic locations such as Chengalpattu, Mamallapuram and other growth centres. These projects are aimed at improving regional connectivity, supporting planned urban development, reducing traffic congestion and enhancing accessibility, thereby promoting balanced and sustainable growth across the metropolitan region

Koyambedu Wholesale Market Complex (KWMC)

To decongest the wholesale markets in the core city and provide an integrated wholesale

market for perishable commodities, the Koyambedu Wholesale Market Complex (KWMC) was envisaged under the First Master Plan and developed by CMDA in 1996. Spread over 86 acres, KWMC is one of the Asia's largest wholesale markets for perishable commodities and is administered by the Market Management Committee (MMC) under the Tamil Nadu Specified Commodities Markets (Regulation of Location) Act, 1996.

The MMC is responsible for the administration, regulation and maintenance of the market by providing essential infrastructure and civic amenities. It also issues trade licences, collects maintenance charges and fees, and coordinates with Government agencies to ensure efficient market operations.

To enhance governance and service delivery, the MMC is implementing e-governance initiatives, including digitisation of records, simplified licensing procedures and online

payment facilities. Simultaneously, efforts are being undertaken to strengthen solid waste management, improve sanitation, upgrade internal infrastructure and adopt energy-efficient technologies to ensure efficient, sustainable and environmentally responsible market operations.

Iron and Steel Market (I&SM) at Sathangadu

To decongest the wholesale iron and steel trade from George Town, the Iron and Steel Market at Sathangadu was envisaged under the First Master Plan and developed by CMDA in 1991 over an extent of 203 acres near the Ennore Expressway at a cost of Rs.17 crore. The market comprises 850 plots ranging from 2,400 sq.ft. to 12,000 sq.ft., of which 778 plots have been allotted, and accommodates major public sector enterprises such as the Steel Authority of India Limited (SAIL) and Visakhapatnam Steel Plant (VSP).

Recognising the need to meet present-day market requirements, CMDA undertook Phase-I of the market modernisation during 2021-22 at a cost of Rs.11.92 crore by developing a truck parking yard with high mast lighting and relaying bituminous and cement concrete roads. Subsequently, a consultant was engaged to prepare a comprehensive modernisation plan, based on which Phase-II modernisation works have been taken up at an estimated cost of Rs.33.35 crore.

The proposed improvements include a weighbridge, dumping yard, restaurant-cum-dormitory, Integrated Monitoring and Control Centre, CCTV surveillance, public address system, toilet blocks, backwater canal renovation and overhead tank facilities. CMDA also proposes to establish a 24×7 medical centre with ambulance service, introduce MTC bus connectivity within the market premises, and undertake extensive tree plantation, thereby

creating a safer, more efficient and environmentally sustainable wholesale trading hub.

Madhavaram Truck and Bus Terminal

To promote trade and economic activities and improve freight movement in Chennai, CMDA established the Madhavaram Truck Terminal over an extent of 80 acres at a cost of Rs.6 crore with modern facilities and amenities. Strategically located at the junction of the Inner Ring Road and GNT Road, the terminal provides excellent connectivity to the city, port and railway stations, making it a major contributor to the commercial and economic development of the city. To further improve the terminal and the surrounding infrastructure, CMDA has released Rs.30.30 crore to the Greater Chennai Corporation for undertaking improvement works in and around the terminal.

To decongest the Chennai Mofussil Bus Terminus (CMBT) at Koyambedu, CMDA

constructed the Madhavaram Mofussil Bus Terminus in 2018 at a cost of Rs.95 crore within the Madhavaram Truck Terminal complex to cater to buses operating from Chennai towards North Tamil Nadu via GNT Road. The project has strengthened regional connectivity and improved the efficiency of passenger transport services in the northern corridor of the Chennai Metropolitan Area.

Development of Exhibition Hall near Island Ground

To establish Chennai as a premier destination for exhibitions, conventions, trade fairs and business events, CMDA is developing a world-class Convention and Exhibition Centre near Island Grounds. The state-of-the-art facility will comprise a spacious exhibition hall, banquet hall, flexible meeting spaces, food court and adequate parking facilities to accommodate a wide range of events. Designed in the Indo-Saracenic architectural style, the project

harmonises with the surrounding heritage precinct while incorporating modern amenities and fire safety systems. On completion, this Centre will strengthen Chennai's position as a leading hub for commerce, tourism and international events while preserving the city's architectural legacy.

3.4.4 Area Plans Unit (APU)

The Area Plans Unit (APU) is responsible for ensuring orderly development in accordance with the land use proposals of the Master Plan. The Unit scrutinises and accords planning permission under the provisions of Section 49 of the Tamil Nadu Town and Country Planning Act, 1971 and the Tamil Nadu Combined Development and Building Rules, 2019. The major categories of development proposals processed by the Unit are:

- (a) Non-High Rise Buildings (Height of the building is less than 18.30m)

- (b) High Rise Buildings (Height of the building is more than 18.30m)
- (c) Institutional and Industrial Buildings
- (d) Layout & Subdivisions and
- (e) Land Use Re-classification in conformity with the Master Plan

Online Planning Permission System

To improve the efficiency, transparency and accessibility of planning permission services, CMDA currently processes planning permission applications through online mode. The Online Planning Permission System, operational since May 2022, enables end-to-end digital processing of applications, including online submission, pre-verification of drawings, integrated online payment and real-time application tracking, thereby significantly streamlining the planning permission process.

Building upon this digital transformation, CMDA is spearheading the development of an AI-enabled Integrated Smart Planning

Permission System as a next-generation unified digital platform for planning approvals across Tamil Nadu. The platform will integrate CMDA, DTCP, Municipal Corporations, Municipalities, Town Panchayats, Panchayat Unions and other stakeholder departments into a single-window digital ecosystem. Leveraging Artificial Intelligence (AI), Geographic Information Systems (GIS) and advanced digital technologies, the system will provide AI-driven scrutiny of building plans, automated compliance verification, intelligent deficiency detection, GIS-based land and zoning validation, digital document management, integrated online payments, real-time application tracking and management dashboards. The initiative will enable faster, more accurate and consistent planning approvals, reduce processing time, improve ease of doing business, strengthen citizen-centric service delivery and establish a transparent, efficient and data-driven planning

approval system, positioning Tamil Nadu at the forefront of digital urban governance.

3.4.4.1 Review Team and Appeal Division

Review Team

To streamline the planning permission process, ensure timely disposal of applications and strengthen decentralised planning administration, CMDA has delegated powers to issue planning permission for specified categories of developments within the Chennai Metropolitan Area (except the Cantonment Area). Under sub-section (3) of Section 9-C of the Tamil Nadu Town and Country Planning Act, 1971, CMDA may delegate any of its powers to a Local Authority for the purpose of exercising such powers. Accordingly, the Greater Chennai Corporation, Avadi Municipal Corporation, Tambaram Municipal Corporation, Municipalities, Town Panchayats and Panchayat Unions have been empowered to accord planning permission for eligible categories of developments within

their respective jurisdictions. This decentralised system facilitates faster processing of applications, improves citizen service delivery, empowers Urban Local Bodies and ensures effective implementation of the statutory planning framework.

Appeal Division

To provide a statutory mechanism for redressal of grievances relating to planning permission decisions and ensure transparency and fairness in the planning approval process, the Appeal Division processes appeals preferred under the provisions of the Tamil Nadu Town and Country Planning Act, 1971. Under Section 79 of the Act, any person aggrieved by a decision or order of the Planning Authority under Section 49 may prefer an appeal to the Government within two months from the date of such decision or order.

The appeals are examined by the Appeal Committee headed by the Principal Secretary to

Government, Housing and Urban Development Department, with the Member Secretary, CMDA as the Convener, the Commissioner of Town and Country Planning and the Additional Chief Secretary to Government, Municipal Administration and Water Supply Department as Members. The Committee facilitates objective examination of appeals and supports informed decision-making by the Government in accordance with the provisions of the Act.

3.4.4.2 Transferable Development Rights (TDR)

To facilitate timely implementation of public infrastructure projects through voluntary land surrender, the Government introduced the Transferable Development Rights (TDR) mechanism in the Development Regulations of the Second Master Plan for the Chennai Metropolitan Area in 2008. Subsequently, the provisions were incorporated into the Tamil Nadu Combined Development and Building

Rules, 2019, making them applicable across the State. TDR enables landowners to voluntarily surrender land required for public infrastructure projects, such as road widening, new roads, Metro Rail, MRTS, bus terminals, other Government-notified developments and Special TDR for Slum rehabilitation along the water channels, in exchange for Development Rights Certificates (DRCs).

To improve efficiency, transparency and ease of implementation, CMDA is developing an online TDR Portal. The portal will be integrated with the Planning Permission System, Online Registration and GIS platforms to enable real-time tracking, faster approvals, secure management of development rights and a transparent end-to-end digital workflow.

3.4.4.3 Enforcement Cell

To ensure compliance with planning permissions and building regulations and promote orderly urban development, the

Enforcement Cell of the Chennai Metropolitan Development Authority (CMDA) enforces the provisions of the Tamil Nadu Town and Country Planning Act, 1971 within the Chennai Metropolitan Area. To strengthen enforcement and improve monitoring, CMDA has delegated enforcement powers under Sections 56 and 57 of the Tamil Nadu Town and Country Planning Act, 1971 to the Local Bodies within the Chennai Metropolitan Area. CMDA continues to exercise enforcement powers for all the developments for which it has granted planning permission.

The key functions of Enforcement Cell are:

- **Enforcement of Planning Regulations:**
Monitors developments to ensure compliance with the planning permissions issued by CMDA and the provisions of the Tamil Nadu Town and Country Planning Act, 1971.

- **Issue of Completion Certificates:** Issues Completion Certificates for developments that conform to the approved planning permission and the provisions of the Tamil Nadu Combined Development and Building Rules, 2019.
- **Action against Unauthorised and Deviated Constructions:** Initiates statutory action against unauthorised and deviated constructions by issuing Locking & Sealing Notices and Demolition Notices, and undertakes locking, sealing and demolition of unauthorised structures in accordance with the provisions of the Act.

3.4.5 Urban Transport Unit

Outer Ring Road

The Chennai Outer Ring Road (ORR) was envisaged in the First Master Plan for Chennai, from Vandalur to Minjur in order to relieve the congestion within the city and also to catalyze the even dispersal of urban growth. The total

length of ORR is 62.30 Km with 6-lane divided carriageways with 25 meters of the carriageway on each side, a 22-meter central wedge earmarked for the Mass Rapid Transit System and 50 m wide strip along the Eastern side of ORR earmarked for planned development and to recover land acquisition costs incurred for the project.

The ORR is presently operational in full stretch and toll revenue from the four toll plazas along the corridor is being collected by TNRDC. To catalyse growth along the corridor, CMDA has allotted parcels of land to various Government agencies, as part of strategic development initiatives. Further, CMDA is currently pursuing the e-auction of the remaining 50-metre land strip to enhance revenue generation and promote planned urban and economic development along the ORR corridor.

Urban development is a continuous process that requires long-term planning, coordinated implementation and responsive governance. The initiatives undertaken by CMDA provide a strong foundation for guiding the future growth of Chennai Metropolitan Area in a planned and sustainable manner. By strengthening infrastructure, improving connectivity and public services, promoting balanced development and embracing technological innovation, these initiatives will address the evolving needs of a rapidly growing city. Together, they will help shape Chennai into a more livable, well-connected, resilient and economically vibrant city where people can live, work, grow and prosper with an enhanced quality of life.

4. TAMIL NADU URBAN HABITAT DEVELOPMENT BOARD

The Tamil Nadu Slum Clearance Board was established in the year 1970 to provide social housing with infrastructure for the urban poor in Chennai and later extended to other urban areas of Tamil Nadu. The nomenclature of Tamil Nadu Slum Clearance Board has been changed to Tamil Nadu Urban Habitat Development Board in the year 2021. TNUHDB is governed by the Tamil Nadu Slum Areas (Improvement and Clearance) Act, 1971 and is functioning under the control of a Chairman, Managing Director and Joint Managing Director.

Tamil Nadu has experienced rapid urbanization in the past decades due to technical advancement, industrial growth, economic diversification and rural to urban migration. The concentration of economic activities in the urban areas attracted millions of

people to migrate to cities in search of better employment, education and living standards. Due to growth in the manufacturing sector, service sector and surge of the knowledge economy, the population pressure on cities escalates. As a result, the urban centres increasingly are susceptible to the negative consequences of rapid urbanization, such as mushrooming of unplanned and substandard habitations, congested settlements, shortage of housing and basic amenities, poverty, unemployment etc. Such settlements later become slums. The proliferation of slums often accompanies rapid urbanization and poses great social and policy challenges.

Urban slums lack basic infrastructure which lead to poor living conditions and health hazards, overcrowding and substandard housing structures make slums vulnerable to fires, natural disasters, and health hazards. Social

challenges, such as poverty, unemployment, and limited access to education and healthcare, perpetuate cycles of deprivation. Therefore, making Tamil Nadu slum free and provision of affordable housing are the key areas of intervention for the Government.

4.1 Slum Free Cities

The Government emphasizes the provision of formal houses, infrastructures and land tenure to all the urban slum families to attain the vision of slum free cities before 2031.

In alignment with this vision, the Tamil Nadu Urban Habitat Development Board is committed to providing adequate housing with infrastructure to all urban poor families to achieve slum-free urban Tamil Nadu by 2031. TNUHDB conducted housing demand survey in 2014 and identified that 9.08 lakh families living in the urban areas of Tamil Nadu required housing. Against this target, 4.68 lakh

tenement/houses have been constructed till date, 72,976 tenements/houses are under various stages of progress and will be completed before 2027.

A comprehensive survey will be conducted during 2026-27 to reassess the housing demand among urban slum and poor families, enabling the formulation of targeted, time-bound schemes so as to achieve the targets within the time frame.

4.2 Social housing with infrastructure for the urban poor – Approaches

The following multi-pronged approaches are adopted to achieve the goal of resilient, safe tenements and quality infrastructure for all urban slum families by 2031.

Construction of tenements in their existing places of living

- Tamil Nadu Urban Habitat Development Board during the first decade of its

operations, concentrated on the construction of insitu storeyed tenements with provision of infrastructure such as water supply, sewage disposal, roads, street lights. Such storeyed tenements with infrastructure were constructed in Government land and allotted to the families living there earlier.

Construction of tenements in alternate locations with basic and social infrastructures

- The urban poor families living in sub-optimal conditions on the banks of waterways, road margins and Government sites required for public purposes cannot be provided with tenements in their existing places of living as the areas occupied by them are required by the land owning department. Therefore, vacant Government lands are identified nearby and multistoried tenements are

constructed and such schemes are developed as integrated townships with necessary physical and social infrastructure. The tenements constructed as multistoried buildings are developed with basic infrastructures like lift, power backup, water supply inside the tenements, sewage disposal arrangements and social infrastructure like schools, library, parks, Anganwadi centres, primary health centres, convenient shops, milk booth, community hall, etc. To facilitate livelihood support at the time of resettlement, one time shifting allowance and subsistence allowance of Rs.30,000/- are disbursed to each family. Livelihood skill training and job melas are also being conducted to upgrade their skills to facilitate employment in the resettlement areas.

Dilapidated tenements reconstruction

- Some of the tenements constructed decades ago are dilapidated, due to efflux of time, saline content in the atmosphere, exposure to vagaries of nature, regular / normal wear and tear, etc. The vulnerability of such tenements is studied by a Technical Committee and vulnerable tenements are recommended for reconstruction. Such tenements are being reconstructed with enhanced plinth area in improved and convenient designs by TNUHDB in a phased manner.
- The new tenements are allotted to the earlier occupants of the dilapidated tenements. In many of the areas additional tenements are constructed using higher Floor Space Index and are allotted to the extended families of occupants, encroachers and Economically Weaker Section (EWS) families living nearby.

Disbursement of grants to facilitate the construction of individual houses on Beneficiary Led Construction mode

- The urban poor families having land ownership and living in kutcha houses are given financial grants to construct permanent houses with concrete roof on Beneficiary Led Construction mode.

Other programmes

- All the mud-walled and thatched-roof hutments were upgraded with AC sheet roofs and brick walls on an "as is where is" basis, funded by the State. This large-scale initiative, implemented in the earlier decades across urban areas of Tamil Nadu, provided slum-dwelling families with protection against the hazards of fire accidents and natural calamities.
- Besides, pavement dwellers residing on the arterial roads in Chennai were resettled in developed plots. Cash loans

were extended to the allottees, enabling them to build homes on the allotted plots.

- The implementation of the above said programmes are not in force now.

Skill development and livelihood activities

- The urban slum development will be complete only if slum families become economically independent. Economic independence and self-sustenance are essential for the urban poor, especially for youth and women living in slums.
- Skill development training is imparted in coordination with Tamil Nadu Skill Development Corporation and reputed NGOs to promote employment. Job melas are also being organized to ensure employment opportunities.

Refurbishment Works for the tenements and habitation development programme

- The refurbishment works like painting the walls, repairs to staircases, roof slab,

water supply & sewage infrastructure etc., are being carried out for the tenements to increase the longevity and structural soundness of the tenements.

- Besides additional basic & social infrastructure like Community Hall, Library, Ration shops, Anganwadi, Playground, etc., are being provided to enhance the living conditions of the occupants of the tenements.

Adoption of Alternate Technology

TNUHDB adopts modern construction technology to build tenements. Techniques such as prefabricated concrete and monolithic concrete construction technologies using aluminium formwork, use of light gauge steel frame for doors, windows, UPVC windows and door frames are being adopted for faster construction of safe, sustainable and eco-friendly buildings.

4.3 Programmes implemented during 1970 to 2026

During the years 1970 to 2026, Tamil Nadu Urban Habitat Development Board has constructed 2.83 lakh tenements and 3.59 lakh individual houses have been completed on BLC mode.

As part of insitu plotted development programme, TNUHDB has developed and provided 1,37,386 developed plots with land tenure.

Besides, developed plots provided to pavements dwellers of Chennai city majority informal houses in urban slum areas have been converted to tiled roof houses. Home improvement loans, slum improvement works, repairs & renewal and refurbishment works and habitation development programmes have been implemented to enhance the living standards of the urban slum families.

4.4 Projects Under Implementation

The following housing and habitation development programmes are under implementation to achieve the vision of providing affordable housing and enhancing the living standards of the urban poor in Tamil Nadu within a timeframe.

4.4.1 Housing For All (HFA)

The Pradhan Mantri Awas Yojana PMAY (Urban) was formulated to address the housing requirements of urban poor including slum families. As part of this programme, storeyed tenements with basic infrastructure and individual houses on BLC mode are constructed utilizing Government of India, State Government grants and beneficiary contribution. TNUHDB has been nominated as the State Level Nodal Agency. This programme is being implemented under the following two components.

4.4.2 Affordable Housing in Partnership (AHP)

TNUHDB constructs tenements having plinth area of 400 sq.ft. with required infrastructure for water supply and sewage disposal, street lights, pavements, storm water drain at an average cost of Rs.22.00 lakhs for in-situ development, reconstruction and resettlement to ensure that the families living in dense slums in vulnerable locations are rehoused in resilient dwelling units. This programme is being implemented adopting the following funding pattern under PMAY(U) 1.0 & 2.0.

Housing for All (Urban) - Funding pattern

Sl. No	Description	PMAY 1.0 (Rs. in lakh per unit)	PMAY 2.0 (Rs. in lakh per unit)
1.	a) Reconstruction & insitu tenement schemes. Government of Tamil Nadu grant, I&A fund, Shelter fund & other sources. b) Green field tenement schemes – GoI, GoTN grants.	7.00 - 12.03	7.50 – 13.00
2.	Beneficiary Contribution	1.00 - 6.84	1.00 – 8.50
3.	Government of India grant	1.50	1.50 (If innovative technology adopted Government of India Grant 1.50 + Additional Technology Innovation Grant 0.30)
Cost per unit		9.50 – 20.37	10.00 – 23.00

Status of Implementation:

PMAY(U) - 1.0

The construction of 1,37,954 tenements in 337 schemes has been sanctioned at a project cost of Rs.16,514.01 crore of which 1,13,383 tenements in 286 schemes at a cost of Rs.13,247.03 crore have been completed in Chennai & other towns and the construction of the 24,571 tenements in 51 schemes at a cost of Rs.3,266.98 crore are in progress and scheduled for completion during 2026-27.

PMAY(U) - 2.0

The construction of 8,404 tenements in 23 schemes has been sanctioned at a project cost of Rs.1,648.54 crore of which 2,525 tenements in 10 schemes are in progress and scheduled for completion during 2027-28 and the construction of the 5,879 tenements in 13 schemes will be commenced during 2026-27.

4.4.3 Construction of Individual Houses under Beneficiary Led Construction (BLC) mode

Grants are disbursed, to facilitate poor families living in tiled or thatched houses with ownership of land to construct permanent houses with RCC roof, to ensure dignified living conditions and long-term stability. This programme is being implemented after adopting the following funding pattern under PMAY(U) 1.0 & 2.0.

Sl. No.	Description	PMAY(U) 1.0 (Rs. in lakh per Individual house)	PMAY(U) 2.0 (Rs. in lakh per Individual house)
1.	Government of Tamil Nadu grant	0.60	1.00
2.	Beneficiary Contribution	0.90	4.00
3.	Government of India grant	1.50	1.50
Cost per unit		3.00	6.50

Status of Implementation:

PMAY(U) - 1.0

The sanction has been accorded to disburse grants of Rs.2.10 lakh per family for 4,03,154 families at a project cost of Rs.12,348.66 crore of which 3,58,760 houses have been completed in BLC mode. The construction of the 44,394 houses are in roof, lintel and foundation levels and scheduled for completion during 2026-27.

PMAY(U) - 2.0

Sanction has been accorded to disburse grants of Rs.2.50 lakh per family for 7,863 families at a project cost of Rs.511.10 crore. The construction of 24 houses have been completed and 4,351 houses are in roof, lintel and foundation levels and scheduled for completion during 2026-27 and the remaining 3,488 units will be commenced shortly.

4.4.4 Redevelopment of existing dilapidated tenement schemes

TNUHDB has been constructing storeyed tenements with infrastructure since 1971 and allotted to the slum families. Due to efflux of time, wear & tear, saline content in the atmosphere, vagaries of nature, these tenements are dilapidated and pose dangers to the life and property of the occupants of the tenements.

As part of the programme to reconstruct the dilapidated tenements, TNUHDB has taken up the reconstruction programme under PMAY(U), ADB funded programmes, etc. The status on the reconstruction programme is as follows.

PMAY (U) 1.0					
Sl. No.	No. of schemes	No. of tenements	Project cost (Rs. in Cr)	Tenements	
				Completed	In Progress
1	84	28,289	4101.80	21,717	6,572
PMAY (U) 2.0					
Sl. No.	No. of schemes	No. of tenements	Project cost (Rs. in Cr)	Tenements	
				In progress	To be commenced
1	21	7,154	1399.80	2,333	4,821
Total	105	35,443	5501.60	24,050	11,393

The tenements which are in various stages of progress will be completed during 2026-27 & 2027-28.

It is now identified that additional 28,624 tenements are in dilapidated conditions and require reconstruction. It is proposed to reconstruct these 28,624 tenements in 70 schemes in Chennai & other towns in a phased manner.

4.4.5 Affordable Rental Housing Complexes for Urban Workforce

TNUHDB has been designated as the coordinating agency for the Affordable Rental Housing Complexes (ARHCs) initiative, which aims to provide dignified and affordable housing for workers near their workplaces.

Under this scheme, public and private entities are permitted to construct, operate, and maintain rental housing units and dormitories on their land, ensuring accessible and sustainable living conditions for the urban workforce.

The details of the works under implementation associated with the Affordable Rental Housing Complexes in various locations, employing alternative technologies are furnished below.

Sl. No	City	Organization	Technology Innovation Grant Amount (Rs. in Crore)	No. of Units / Dormitories Total
a) Completed				
1	Chennai	State Industries Promotion Corporation of Tamil Nadu	37.44	18,720
2	Sriperumbudur	SPR Construction Private Ltd.,	7.95	3,969
b) Partially completed				
3	Hosur	TATA Electronics Power Limited (TEPL)	28.62	13,500
4	Sriperumbudur	SPR City Estates Pvt. Ltd	36.22	18,112
Total			110.23	54,301

4.5 Externally Aided Projects - Asian Development Bank Funded Housing for Urban Poor

The Asian Development Bank provides financial assistance for the construction of affordable housing units for vulnerable communities, urban poor, and migrant workers. It is proposed to construct 5,599 tenements in 9 schemes at a total cost of Rs.1,071.70 crore as detailed below.

As part of this programme, the construction of 2,745 tenements at a cost of Rs.536.82 crore have been completed, the construction of 872 tenements at a cost of Rs.138.13 crore is in progress and the works for 1,982 tenements at a cost of Rs.395.95 crore are to be commenced in 2026-27. Thus in total 5,599 tenements will be constructed at a total cost of Rs.1071.70 crore.

4.6 Upgradation & Modernisation of the existing tenements

The board has been maintaining 2.41 lakh tenements in Chennai and other districts, carrying out periodic maintenance to uphold their structural integrity and safety. A Refurbishment Scheme has been initiated to revitalize older tenements and enhance overall living conditions.

The following refurbishment works are being carried out:

- Renewal of terrace floors, staircases, and flooring to enhance safety and functionality.
- Facade revitalization, replastering of external walls and uniform architectural aesthetics to create visually appealing and cohesive neighborhoods.
- Installation of EB panel boards to strengthen electrical safety and reliability.

- Upgradation of existing water supply systems to enhance efficiency and accessibility.
- Replacement of damaged sewer lines, chambers, and manholes for improved sanitation infrastructure.
- Provision of UPVC windows in living rooms wherever required for better ventilation and energy efficiency.
- Replacement of RCC ventilators in bathrooms to ensure adequate air circulation.

The refurbishment works in 45 tenement schemes, comprising 24,941 tenements at a cost of Rs.70.00 crore in Chennai and other towns which are in progress will be completed by December 2026.

Besides, the programme to refurbish 43,757 tenements in 85 schemes at a cost of Rs.100.00 crore has been commenced and will be completed by March 2027.

4.7 Iyothee Thass Pandithar Habitation Development Scheme – Providing additional social amenities in tenement schemes

As part of this programme, the Board has been implementing comprehensive infrastructure development initiatives, including roads, bore wells, stormwater drains, paver blocks, water supply lines, tenement block refurbishment, convenience shops, and sewer network improvements. These works are being carried out over five years at a total cost of Rs.250.00 crore.

Infrastructure development for 45,425 tenements across 32 schemes has been commenced and is currently in progress at a cost of Rs.50.00 crore.

4.8 Vada Chennai Valarchi Thittam – Construction of tenements in North Chennai

As part of the programme to provide tenements for the families living in North Chennai, the construction of 1,476 tenements in two schemes has been completed at a project cost of Rs.273.06 crore and 1800 tenements at a cost of Rs.306.00 crore are in progress as detailed below.

S. No	Name of the Projects	No. of Tenements	Project Cost (Rs. in Crore)	Status
1	Water Basin Road	700	129.50	Completed
2	Stanely Hospital (Seven Well)	776	143.56	
		1476	273.06	
3	East Cemetery Road	1,500	255.00	In Progress
4	Kodungaiyur	300	51.00	
		1,800	306.00	
Total		3,276	579.06	

4.9 Infrastructure and Amenities Fund (I&A Fund)

The Infrastructure & Amenities Fund managed by the Government in Housing & Urban Development Department has sanctioned funds for the following purposes:-

Infrastructure for water supply and sewage disposal and other basic and social amenities to the tenements constructed under the AHP component of PMAY-HFA are being provided utilizing the funding assistance from Infrastructure and Amenities fund. The details of the works programmed for implementation utilising this funding assistance are as follows.

- Payment to line departments to provide infrastructure for the tenements.
- Underground sump and pump room.
- Construction of electrical room with generator, compound wall, collection well, installation of transformer, laying of BT road, etc.

4.10 Shelter Fund

The Government has constituted a Shelter Fund to promote public and affordable housing for Economically Weaker Sections (EWS) and Low-Income Groups (LIG), as per G.O.(Ms).No.135, Housing and Urban Development Department, dated 21.07.2017. The fund is utilized for the following purposes:

- i. Partial beneficiary contribution support for persons with disabilities.
- ii. Viability gap funding for livelihood support projects under NULM and the Women Development Corporation.
- iii. Formation and capacity building of Residents' Welfare Associations (RWAs).
- iv. Educational activities
- v. Interest incentives for beneficiaries who have availed bank loans and consistently repaid interest.

4.11 Resettlement of slum families to tenements with basic and social infrastructure from the banks of Chennai city waterways

TNUHDB has identified urban poor families residing along the banks of the Adyar and Cooum rivers in coordination with the Greater Chennai Corporation, the Water Resources Department, etc., and facilitated their resettlement in tenements constructed by the Board as part of the Eco-Restoration of Chennai City Waterways initiative. As part of this resettlement process, Project Affected Families are disbursed with one time shifting allowance of Rs.5,000 per family and subsistence allowance of Rs.2,500 per month per family for one year, amounting to a total of Rs.35,000 per family. Additionally, the Government covers the beneficiary contribution for tenements constructed under PMAY-HFA. Skill training is imparted and livelihood assistance is also

provided. These resettlement schemes are developed as integrated townships with basic and social infrastructure. The current status of the resettlement of urban poor families living along major riverbanks is outlined below.

Sl. No.	Name of the waterways	Total families to be resettled	Families resettled	Families to be resettled
1.	Cooum	14,257	13,484	773
2.	Adyar	9,539	6,295	3,244
	Total	23,796	19,779	4,017

The construction of tenements under the AHP component of HFA for the resettlement of the remaining 4,017 families has been completed.

4.12 Land tenurial rights for the developed Plots

The Tamil Nadu Urban Habitat Development Board has implemented the urban habitat development programme on an "As is Where is" basis, granting land tenure to urban

poor habitations situated on Government Poramboke land and lands belonging to other departments in Chennai and nine other districts. Upon the transfer of these lands to TNUHDB, land tenure rights are formalized through the issuance of sale deeds to the urban poor families occupying these plots. 38,059 sale deeds have been issued so far.

4.13 Sale Deeds for Tenements

Action is being taken to speed up the process of issuance of sale deeds for tenements after dealing with the issues like pending dues, non-availability of records, legal heir disputes, pending litigation, subsequent & third party purchasers before 31.12.2016.

35,321 sale deeds for tenements have been issued so far.

4.14 Empowered Committee on Land Alienation for Plotted Development Schemes

To expedite the process of land alienation, the Government have constituted an Empowered Committee, which has approved land alienation proposals for 192 schemes so far and Government orders have been issued for 182 schemes and the land alienation for the remaining 10 schemes are under process.

4.15 Community Development Activities

A Community Development (CD) Wing is functioning in the TNUHDB to cater to the socio economic needs of the families resettled in the tenement schemes.

Community Development activities such as coordination with line departments for shifting of families from objectionable areas, facilitating resettlement at tenement schemes, organising camps for Social Security Schemes are conducted at the time of resettlement in coordination with line departments.

After resettlement, activities such as imparting skill trainings, Entrepreneurship Development Programmes, Conduct of Job Fairs, Children and Women Welfare Activities, Formation of Youth Clubs, Sensitisation on Prevention of Drug Abuse, Promotion of Sports Activities, Formation of Resident Welfare Associations, Issue of Scholarship through CSR, Conduct of Awareness Programmes on social issues, Tree Plantation are carried out by the CD Wing.

Co-ordination with NGOs towards education, health, economic empowerment etc., are carried out by the Community Development Wing for the enhancement of the livelihood and the life style of the rehabilitants.

Besides, the Community Development Wing coordinates with the line departments in establishing their services such as ICDS centres, primary health centres, fair price shops, schools, colleges, ITI, Police outpost / Police station,

transport, library, Aavin parlour, One Stop Centres, Playgrounds, parks, gym etc.,

It is proposed to Strengthen Skill Development and Entrepreneurship among Habitat Residents through Tamil Nadu Skill Development Corporation, Entrepreneurship Development Innovation Institute – Tamil Nadu, Tamil Nadu Urban Livelihood Mission, NGOs etc., to 15,000 persons per year.

Capacity building trainings will be imparted to the 402 Youth clubs already formed, aiming to strengthen and facilitate them to actively participate in the Nation building activities and to get them registered with My Bharat (Mera Yuva Bharat) formerly known as Nehru Yuva Kendras, to avail its benefits.

Efforts will be taken to provide scholarships through CSR from corporates, NGOs and others to students from the vulnerable families who want to pursue higher education.

Awareness programmes on importance of education, prevention of drop outs, child rights, child protection, health & hygiene, prevention of drug and substance abuse, women empowerment etc will be conducted for the betterment of resettled families.

4.16 New Strategies

The following strategies are proposed to be followed to support the vision of ensuring a slum free Tamil Nadu by 2031 by providing tenements and houses to all the families.

a) Strategic Framework Development

A comprehensive assessment of urban poor housing requirement will be undertaken, analyzing existing conditions, informal settlements, rental patterns, tenure security, and access to adequate shelter. Socio-economic factors such as affordability, income levels, employment trends, and household structures will be studied for targeted interventions. Future demand is to be projected based on population

growth, migration, and economic shifts, identifying key pressure points so as to frame the strategies and approaches to achieve the Vision of slum free Tamil Nadu by 2031.

b) Effective Utilization of Land Assets for Housing Development

The Board's land assets will be systematically mapped, categorized, and optimized for efficient utilization. Digitization of land records will be undertaken for efficient land management.

c) Maximizing FSI Potential to Improve Housing Supply for the Urban Poor

The maximum permissible Floor Space Index (FSI) will be determined and utilized to optimize land use and maximize housing supply, particularly in high-demand areas, while ensuring adequate infrastructure.

d) Urban Design Integration for Enhanced Livability

Urban design principles will be integrated into the projects to enhance the overall quality of life, climate resilience, sustainability, safety and inclusion. Adequate, well-designed and appropriately located social infrastructure including open spaces and community facilities will be incorporated to foster livable environments.

e) Dignified Housing for low income families

The Metropolitan Youth and Family Housing Scheme (My-Home) will be launched during 2026-27. The aim of the scheme would be to make safe, dignified housing accessible to low income families at reasonable cost.

The implementation of the above-mentioned programs and their continuation in the future will significantly enhance urban poor habitats across Tamil Nadu before 2031. By fostering inclusive urban development and

strengthening community well-being, TNUHDB is contributing to a more livable and thriving urban environment. These efforts align with the broader goals of resilience, equity, and economic upliftment, ensuring a sustainable and dignified future for all, reflecting a future where every resident enjoys security and an improved quality of life.

5. CO-OPERATIVE HOUSING SOCIETIES

Cooperative Housing Societies in Tamil Nadu were established by the Government with the aim of ensuring a house for every citizen in Tamil Nadu. Recognizing that housing is a fundamental need, the Government has implemented various schemes to make housing accessible and affordable to all. Since their inception in 1912, these societies have played a pivotal role in addressing the housing requirements of the population.

The Chennai Metropolitan Cooperative Housing Society was the first registered housing society in India, marking its establishment in 1912.

5.1 Organizational Structure

Cooperative Housing Societies operate under a well-defined administrative framework to ensure efficient functioning:

5.2 Functional set up of Cooperative Housing Societies: Two Tier:

There are 1,173 Primary Cooperative Housing Societies in the department. Out of which 730 societies are functioning and remaining 443 have been liquidated. The Tamil Nadu Cooperative Housing Federation is the Apex institution for the Primary Cooperative Housing Societies. Thus, functioning as a Two-Tier structure as shown below:

5.3 Primary Cooperative Housing Societies

Primary Cooperative Housing Societies primarily focus on implementing housing layout schemes for their members' benefit.

Among the 1,173 housing societies under the Cooperative Housing Department, 161 are classified as Taluk Cooperatives, 569 as Urban Cooperatives, and 443 are under liquidation.

The Source of Fund for the societies are:– Deposit mobilization, Interest income, Borrowings from the Tamil Nadu Cooperative Housing Federation and income from other commercial activities.

The following loans are issued by the societies:– House Mortgage loans, House construction loans, Jewel loans and Scheme loans.

Other services provided by the societies include Pharmacy, E-seva, College, School, Cement, Construction and maintenance of Social

infrastructures such as Marriage Hall, Community Hall and Commercial complex. Besides, these societies provide social, educational and health services to its members and their family.

5.4 The Tamil Nadu Cooperative Housing Federation

The Tamil Nadu Cooperative Housing Federation, established in 1959, functions as the Apex Society for Primary Cooperative Housing Societies across Tamil Nadu providing overarching guidance and credit support to Cooperative Housing Societies.

The Federation's primary mission is to implement affordable housing schemes for the Economically Weaker Sections (EWS) and Low-Income Groups (LIG) through issuing loans like Housing Loan, House Mortgage Loan, Construction loans and scheme loans for implementing housing layout projects. It also issues Jewel loan to the members.

It mobilizes funds through Deposit mobilisation, Income from interest received, Borrowings from Banks and other financial institutions like LIC.

The Tamil Nadu Cooperative Housing Federation has issued loans to the tune of Rs.4,946.82 crore for construction of 11,67,429 houses till 31.03.2026. An overdue amount of Rs.2026.73 crore is to be collected from 25,506 members as on 31.03.2026.

5.5 Deposit Mobilization

The Tamil Nadu Cooperative Housing Federation, along with Primary Cooperative Housing Societies, is actively involved in mobilizing fixed deposits from its members. These funds are used to provide various types of housing loans and jewel loans, thereby catering to the financial needs of the members effectively.

In 2025-2026, Deposits of Rs.1056.13 crore has been mobilized from 53,337 society

members and Deposit Outstanding as on 31.03.2026 is Rs.2166.59 crore.

Loan Disbursement

The loan disbursement from the Federation to Primary society during 2025-26 is as follows:

(Rs.in crore)

Loan Details	No. of Societies	Loan Disbursed During the Year (01.04.2025 to 31.03.2026)
Infra Structure Loan	22	0.69
Jewel Loan	20	28.40
Construction Loan	2	0.32
Mortgage Loan	8	1.17
Layout Loan	3	145.06
Total	55	175.64

The loan disbursement from the Federation directly to members is as follows:-

(Rs. in crore)

Loan Details	No. of Members	Loan Disbursed During the Year (01.04.2025 to 31.03.2026)
Jewel Loan	1472	29.20
Mortgage Loan	1	0.15
Fixed Deposit Loan	25	3.03
Total	1498	32.38

The loan disbursement from the Primary Cooperative Societies to Members is as follows:-

(Rs. in crore)

Loan Details	No. of Members	Loan Disbursed During the Year (01.04.2025 to 31.03.2026)
Jewel Loan	56604	573.49
Construction Loan	114	10.78
Mortgage Loan	2696	320.51
Layout loan	2	570.01
Total	59416	1474.79

5.6 Schemes implemented in the Cooperative Housing Sector

- **Layout Schemes**

A total of 792 Housing Layout Schemes has been implemented, resulting in the sale of 1,12,970 plots. Currently, 15

schemes are being executed at a project cost of Rs.1338.73 crore.

- **One-Time Settlement Scheme**

A one-time settlement scheme was implemented from 16.03.2015 to 02.09.2023. Under this scheme, defaulting members who agreed to repay their full loan amount were exempted from paying interest on overdue amounts and penal interest. This initiative resulted in the collection of Rs.402.08 crore and facilitated the return of 18,944 debt settlement documents to members. Furthermore, interest on overdue amounts and penal interest totaling Rs.511.82 crore was waived off for the benefit of the members.

- **Health Insurance Scheme**

The Tamil Nadu Cooperative Housing Federation has implemented a Health Insurance Scheme to benefit the

employees of Cooperative Housing Societies. This scheme provides coverage to approximately 1,500 employees and 2,500 of their family members. As of 31st March 2026, a total amount of Rs.98.93 lakh has been disbursed under the scheme, benefiting 249 employees.

5.7 Initiatives for development of Cooperative Housing Societies:

- **Establishment of Deposit Guarantee Fund**

A Deposit Guarantee Fund Scheme has been introduced to address instances where societies are unable to return deposits upon maturity. This initiative aims to build public confidence in cooperative housing societies.

Under this scheme, a designated account has been established in the Tamil Nadu Cooperative Housing Federation. Primary Cooperative Housing Societies

contribute 0.10% of the total deposit/recurring deposit outstanding as of 31st March of the previous financial year. The Federation matches this contribution equally. In cases where societies cannot repay deposits, interest-free loans are provided under this scheme to ensure timely repayment to members. As on 31.03.2026, an amount of Rs.452.78 Lakhs has been accrued in the Fund.

- **Medium-Term Loan Conversion**

Over the past 25 years, the societies have experienced a low level of loan disbursement, poor loan recovery and consequently reduced interest income. This has adversely affected their financial stability, resulting in the non-repayment of deposits made by society members, non-payment of salaries to employees, and failure to provide retirement benefits. In these circumstances, societies diverted the

income received for its businesses instead of paying back the loans to the federation causing financial imbalances.

To address this, loan accounts are being reconciled, and outstanding amounts are being converted into new medium-term loans to restore financial stability for both the societies and the Federation. Under this scheme, waiver of Penal Interest and EMI interest and 3% interest reduction are provided to the Societies. Only Principal and Interest amount have to be paid by the Societies.

Under this scheme an amount of Rs.698.54 crore were waived off for the benefit of 540 Cooperative societies.

- **Decree Interest Waiver**

Due to non-payment of loan instalments, arbitration proceedings under Section 90 of the Tamil Nadu Cooperative Societies Act, 1983 were initiated on

20.04.2021. To alleviate the financial burden on 542 societies decree interest amounting to Rs.1,241.10 crore was waived off as per Section 178 of the Tamil Nadu Cooperative Societies Act, 1983.

- **Computerization**

Steps are being taken to consolidate and computerize the accounts of the Tamil Nadu Cooperative Housing Federation and Primary Cooperative Housing Societies. This process improves efficiency, reduces manpower requirements, and allows audits of Primary Societies to be completed promptly. An integrated software has been developed to achieve 100% Computerization, ensuring streamlined administration and faster services.

Accordingly, in the first phase, the accounts of Tamil Nadu Cooperative Housing Federation have been digitalized using the new software with effect from

01.04.2026. As on 15.06.2026, out of 730 societies, in 700 societies computerisation work is under progress.

- **Price Fixation Committee**

To prevent encroachment on unsold vacant plots and enhance the financial stability of societies, the Government formed a Price Fixation Committee in 2009. This committee sets a minimum upset price for unsold plots, which are then sold through e-tendering to the highest bidder. During 2024- 2025, plots valued at Rs.69.27 crore were sold for Rs.87.61 crore. During 2025- 2026, price fixation done for plots valued at Rs.440.73 crore belonging to 88 societies and e-tender is under progress.

- **Deputation of Employees**

To address employee shortages in societies with high business activity, steps are taken to transfer employees from

overstaffed societies to those in need, either on deputation or permanent absorption. As of now, 85 eligible employees have been deputed or permanently absorbed, facilitating the implementation of new business projects.

- **Primary Societies Financial Improvement Scheme**

A special scheme, namely the "Primary Societies Financial Improvement Scheme," has been introduced to facilitate the recovery of loan dues from members who defaulted on loans availed through Cooperative Housing Societies from the Tamil Nadu Cooperative Housing Federation. Under this scheme, the societies are required to remit to the Federation only the interest accrued from the date of default up to the expiry of the original loan tenure. The societies are exempted from payment of EMI interest

and penal interest that would otherwise have been payable beyond the loan tenure. The financial relief provided under the scheme enables the societies to strengthen their operations and improve their overall financial position.

Action has been initiated to waive the outstanding interest on decrees passed against Cooperative Housing Societies under the provisions of Section 178 of the Tamil Nadu Cooperative Societies Act, 1983, subject to the approval of the respective General Bodies. Under this scheme, total amount of Rs.7.94 crore was waived off benefitting of 102 Cooperative Housing Societies.

- **Business Diversification**

- **Petrol bunks**

- A petrol bunk was established in the Adambakkam Cooperative Housing Society by Indian Oil

Corporation on a vacant plot of 15,796 sq. ft. It began operations on 14th October 2024. By 31st March 2026, 9935 Kilo liters of fuel had been sold, generating an income of Rs.99.59 Lakh.

During the financial year 2025-26, this petrol bunk achieved a milestone of being No.1 in sales among all the bunks run by Co-operative societies in Tamil Nadu and No.5 in sales among Indian Oil corporations Petrol Bunks in Chennai division.

➤ **e-Seva centers**

In the financial year 2025-2026, 38 Primary Cooperative Housing Societies provided 40,167 services and earned a net profit of Rs. 26.72 lakh.

➤ **Medical shops**

Six medical shops operated by five Cooperative Housing Societies in Salem and Madurai regions sold medicines worth Rs.332.6 lakh in the financial year 2025–26 generating a net profit of Rs.43.56 Lakhs.

➤ **Cement shops**

Two Cooperative Housing Societies in the Salem Region sold 26 metric tons of government cement, generating an income of Rs.2.37 lakh in the financial year 2024–25.

➤ **Other services**

- Marriage halls / Community Halls
- Renting of Buildings (as per PWD norms).

5.8 Educational institutions run by Cooperative Housing Societies

Tiruppur Kumaran College for Women

- In 1996, the Tiruppur Cooperative Housing Society established the Thiyagi Tirupur Kumaran College of Arts and Science for Women Affiliated to Bharathiyar University. This college is the only Cooperative women's college in India. Obtained ISO 9001:2015 certification and UGC, New Delhi certification 2(F) and 12(B). This college is ranked number one among the colleges functioning under Bharathiyar University.
- Currently, it has 2,200 students, 110 teaching staff, and 27 non-teaching staff. It offers 15 undergraduate programs, 7 postgraduate programs, and 6 research disciplines. As on 31.03.2026, 147 students have received gold medals at the university level, and 993 students have secured university ranks. On an average 800

students got their degree every year. 12871 UG, 2481 PG, 283 M.Phil Graduates and 76 Ph.D Doctorate degrees awarded so far since inception.

- The entire campus is under Wi-Fi and additional servers were installed for computer section.
- Online admission module with payment gateway and academic module software's were developed and in use.
- 7 new courses planned to start in the next academic year.
- To prepare for Competitive Examinations, students are being given training.
- It is proposed to modernize library with gallery system smart classes, laboratories and restrooms. 83 CCTV Cameras, Monitor and DVR Racks have been installed. 35 additional classrooms at a cost of Rs.8.34

crores is under construction and work is nearing completion.

5.9 Secretariat Colony Matriculation School

The Secretariat Colony Matriculation School was established in 1966 by the Madras Secretariat Cooperative Building Society(X-370) in Chennai. It expanded to include 6th standard in 1986-87 and 10th standard in 1990-91. The school provides quality education at affordable fees. In the academic year 2025-26, the school achieved a 100% pass rate for Class 10 board examinations.

Additionally, 13 school sites owned by Primary Cooperative Societies generate stable revenue through rentals.

5.10 Other initiatives

To strengthen weaker societies and guide them towards development through new business ventures and non-commercial activities, the following initiatives have been taken:

- Deposit Guarantee Fund has been created.
- Technology and Infrastructure Development Fund has been created.
- Wage revision was done for the employees of societies as per the recommendations of Wage Revision Committee.
- Primary Societies Financial improvement scheme is being implemented.

6. HOUSE BUILDING ADVANCE TO GOVERNMENT SERVANTS

House Building Advance is being sanctioned by the Government for the State Government Servants and All India Service Officers under the State Rules to regulate the Grant of Advances to Government Servants.

- An Amount of Rs.75.00 lakh for All India Service Officers and Rs.50.00 lakh for state government employees is granted as House Building Advance according to their pay eligibility and is granted to officers who have completed 4 years of service and upon completion of probation. 50% of the eligible amount is sanctioned for purchase of a plot and the remaining is sanctioned for construction of a house in the plot purchased. For enlargement / improvement of existing house, 50% of the eligible amount of HBA subject to the ceiling of 50% of the maximum amount, is sanctioned.

- An Additional House Building Advance of Rs.25.00 lakh to All India Service Officers and Rs.15.00 lakh to the Government servants is granted by the Government for purchase of flats constructed by TNHB under "Own Your Housing Scheme" at Nerkundram, Chennai.

- The Government have allowed migration of home loans availed by the existing employees from the banks/ other financial institutions to House Building Advance sanctioned by the Government subject to fulfillment of certain conditions.

- The House Building Advance is repayable in a maximum of 180 installments, with the principal recovered first, followed by the interest in 60 installments. The interest on the advance is calculated based on the monthly diminishing balance using slab rates.

- A subscription of 1% of the monthly installment amount, payable by all Government employees availing the House Building Advance,

is maintained in a separate account under the scheme called 'Tamil Nadu Government Employees House Building Advance Special Family Benefit Fund Scheme.' This fund is designed to help the families of Government employees who die while in service. In such cases, the outstanding principal and interest are waived from this fund.

- An amount of Rs.245.00 crore has been allocated in the Budget Estimate for the year 2026-2027 for sanctioning House Building Advance. Apart from this, separate allocations have been made in the Demands of the respective departments for granting House Building Advance to the employees of the Secretariat and All India Service Officers.

7. CHENNAI UNIFIED METROPOLITAN TRANSPORT AUTHORITY (CUMTA)

The Chennai Unified Metropolitan Transport Authority (CUMTA) is a statutory body established under the Chennai Unified Metropolitan Transport Authority (CUMTA) Act, 2010 to promote Urban Transport in the Chennai Metropolitan Area (CMA: 5904 sq.km) by integrating agencies/departments involved in mobility and other types of services. The main objective of Chennai Unified Metropolitan Transport Authority is to coordinate and facilitate optimal utilisation of resources.

The Chennai Unified Metropolitan Transport Authority Act, 2010 was amended for the first time in 2020 to constitute Hon'ble Chief Minister of Tamil Nadu as the Chairman of the CUMTA Authority vide Chennai Unified

Metropolitan Transport Authority (Amendment) Act, 2020 [Tamil Nadu Act No. 23 of 2020].

Further, CUMTA Act was amended for the second time in 2024 [Tamil Nadu Act 7 of 2024] to constitute Executive Committee in CUMTA under the chairmanship of the Chief Secretary to Government. Major functions of the Executive Committee are to facilitate coordination and assist CUMTA Authority in the planning and development of all Mobility Infrastructure in the Chennai Metropolitan Area (CMA).

7.1 Vision of the Chennai Unified Metropolitan Transport Authority

Moving People and Goods seamlessly through an Integrated, Sustainable, safe and Resilient Transport Ecosystem.

7.2 Organizational Structure

The Chennai Unified Metropolitan Transport Authority has a three-tier administrative structure:

- In the first tier, the Authority headed by the Hon'ble Chief Minister of Tamil Nadu.
- In the second tier, the Executive Committee headed by the Chief Secretary.
- The third tier is the secretariat of the Chennai Unified Metropolitan Transport Authority administered by the Member Secretary, Chennai Unified Metropolitan Transport Authority.

Further, to improve coordination, the Government have constituted four sub-committees under the Chennai Unified Metropolitan Transport Authority.

7.2.1 Empowered Committee

The Government of Tamil Nadu vide G.O.(Ms.) No.18, Housing and Urban Development Department, dated 31.01.2025 constituted an Empowered Committee under the Chairmanship of the Additional Chief Secretary Finance to approve and allocate funds for mobility projects in Chennai Metropolitan Area

(5904 sq.kms.) Rs.41,486.00 crore for the year 2025-26 and Rs.29,520.36 crore for the year 2026-27.

7.2.2 Other Committees under CUMTA

- a) City Logistics Coordination Committee
- b) Road Safety and Non motorised Transport Sub Committee
- c) Multimodal Integration Sub Committee
- d) Urban Mobility Resilience Sub Committee
- e) Digital Chennai Sub Committee.

7.3 Manpower

The Government have created 23 posts for the Chennai Unified Metropolitan Transport Authority (CUMTA). Out of these, 20 posts have been filled up and actions are being taken to fill up the remaining posts.

7.4 Various initiatives undertaken:

7.4.1 Comprehensive Mobility Plan for Chennai Metropolitan Area (5,904 Sq.Kms) 2023 – 2048

A Comprehensive Mobility Plan (CMP) for 25 years have been prepared to improve transport in the Chennai Metropolitan Area (5,904 sq.kms.) with a financial outlay of Rs.2.27 lakh crores and approved by CUMTA's Authority in the 2nd Authority Meeting. The same is being implemented through Empowered Committee constituted under the chairmanship of Additional Chief Secretary to the Government, Finance Department.

7.4.2 Parking Policy, Strategy and Action Plan for Chennai Metropolitan Area (CMA)

Recognizing the importance of proper parking management and its contribution towards easing mobility, Chennai Unified Metropolitan Transport Authority has formulated

a Parking Policy, Strategy and Action Plan for the Chennai Metropolitan Area. The policy has been approved by the Government in January 2025. CUMTA is further developing a Centralised Parking Information System an intelligent parking management application. CUMTA is hand holding Greater Chennai Corporation in effective Parking planning and monitoring the implementation of the Parking Plan for 20 clusters in the first Phase.

7.4.3 Chennai One App: Integrated QR Code Based Ticketing System

The project is the first of its kind in India wherein tickets for Suburban Rail System of Southern Railways, Chennai Metro Rail and Metropolitan Transport Corporation Buses are integrated under a single platform 'Chennai One' Mobile App. In Chennai a passenger can purchase tickets across multiple modes and make multimodal journey through single payment and single QR Ticket. The application

will provide real-time information to commuters and help them to use multiple public transport services using a single ticket and interchange from one transport service to another. The initiative aims to encourage people to use public transportation and increase its overall share in the transportation system. In the 11 months since its launch (September 2025), more than 20 lakh users have downloaded the app and more than 1 lakh tickets are being booked through the app every day.

7.4.4 Railway Station at Kilambakkam - Kalaighar Centenary Mofussil Bus Terminus

In order to improve the public transport connectivity to Kalaighar Centenary Mofussil Bus Terminus, the Chennai Unified Metropolitan Transport Authority (CUMTA) has proposed to construct a Railway Halt Station and connect it to the bus terminus through a skywalk. The

construction of the skywalk & Halt Station is being taken up by the Chennai Metropolitan Development Authority (CMDA) & Southern Railways respectively. The fund for the Halt Station is provided by CMDA.

7.4.5 Multimodal Integration at Chromepet Radha Nagar Subway

CUMTA facilitated and brought about effective coordination across Highways Department, Railways and Police Department which resulted in bringing about a solution to the decade old problem and the Chrompet Radha Nagar Subway was successfully inaugurated.

7.4.6 Multi-modal Integration in Guindy

Development of Bus Terminal at Guindy and integration of the same with Guindy Railway Station and Metro Station is an important recommendation of the Chennai Unified Metropolitan Transport Authority. The project aims to improve connectivity and facilitate seamless travel on different modes of transport.

The project will be implemented by Chennai Metro Rail Limited (CMRL) in association with the Chennai Metropolitan Development Authority (CMDA).

7.4.7 Taking over & Operating the MRTS by the Government of Tamil Nadu

The Mass Rapid Transit System (MRTS) is an elevated Suburban Rail System in Chennai Metropolitan Area (CMA) from Chennai Beach – Velachery-St. Thomas Mount (24 Km) which was jointly developed by the Government of India and the Government of Tamil Nadu. In order to improve the MRTS to the Standards of Metro System, Government of Tamil Nadu has proposed to take over & operate the system. In this regard, Empowered Committee was constituted to work on the Broad Principle for taking over of MRTS by Government of Tamil Nadu. Further, Railway Board has accorded in principle approval for handing over of MRTS to Government of Tamil Nadu.

CUMTA has prepared a Memorandum of Understanding for taking over MRTS, the same was concurred by Empowered Committee and also been approved by Railway Board.

7.4.8 Junction Improvement Plans

Based on the request of traffic Police and Road Owning agencies, CUMTA is studying the critical junctions using the micro simulation modeling (software application) and suggesting measures to improve the mobility. Notable recommendations are Kootu Road Junction (Ambattur), TAISHA Junction, Kuthambakkam Bus Terminus Junctions and Little Mount corridor.

7.4.9 Road Space Allocation Plan (RSAP)

CUMTA has submitted the Road Space Allocation Plan (RSAP) duly incorporating recommended Road Marking and Signages to Highways Department for East Coast Road (ECR) from Tiruvanmiyur to Uithandi. Similarly, for Anna Nagar in 25 km Road network, parking

cluster, CUMTA has submitted detailed road allocation plan to Greater Chennai Corporation for implementation.

7.4.10 Bus Transport & First/Last Mile Connectivity Improvement Plan

The Chennai Unified Metropolitan Transport Authority (CUMTA) is preparing a Bus Transport & first / last mile connectivity Improvement Plan for the Chennai Metropolitan Area. This Plan will help in identifying the gaps in the Bus Transport Services and develop strategies to improve the bus transportation. Further, this plan will help the Government in identifying first/last mile requirement with respect to Metro, Suburban & Mass Rapid Transit System and develop strategies for the same.

7.4.11 Assistance to DTCP in Coimbatore and Madurai Master Plan

Chennai Unified Metropolitan Transport Authority (CUMTA) assisted Directorate of Town Country Planning (DTCP) in Coimbatore and

Madurai Master Plans and prepared Transportation Chapters for the Master Plans duly analysing various traffic data.

7.4.12 Contribution in Madurai City Heritage Plan

CUMTA assisted DTCP in preparing the mobility component for the Madurai City Heritage Plan duly analysing the NMT and parking requirements.

7.4.13 Technical assistance in Neighbourhood Development Plan for RS Puram, Coimbatore

CUMTA prepared the Mobility Chapter for the Coimbatore RS Puram Neighbourhood Development Plan along with detailed street designs for the neighbourhood duly taking topography and pedestrian survey.

7.4.14 Digital Chennai

Digital Chennai is an important project undertaken by the Chennai Unified Metropolitan Transport Authority. This project envisions to

develop two unique platforms 1. Integrated Urban data Platform and 2. Urban Project Planning Modules these platforms will assist Government in optimal utilization of financial resources in the Chennai Metropolitan Area by avoiding repetition of works. These platforms will help in planning, developing and prioritizing investments for all infrastructure implementing agencies in the Chennai Metropolitan Area in lines with Master Plan, Comprehensive Mobility Plan, City Logistics Plan and as per the plans of the other agencies. This will eventually become a Transportation Digital Twin.

7.5 Collaborating with International Institutions and Premier Educational Institutions

In order to enhance urban mobility and planning initiatives in Chennai Metropolitan Area, CUMTA is collaborating with premier educational institutions like Indian Institute of Technology Madras (IIT), the Indian Institute of Science

Bangalore (IISc), the School of Planning and Architecture – Delhi (SPA) and the Centre for Environmental Planning and Technology (CEPT) in Ahmedabad and also with international organisations like Transport for London (TfL), Land Transport Authority of Singapore (LTA), Institute of Transportation and Development Policy (ITDP).

8. TAMIL NADU REAL ESTATE REGULATORY AUTHORITY

To promote and regulate the real estate sector efficiently and transparently, the Real Estate (Regulation & Development) Act of 2016 was enacted, which safeguards the interests of buyers of plots, residential flats and commercial buildings. To enforce this Act in Tamil Nadu, the State Government introduced the Tamil Nadu Real Estate (Regulation & Development) Rules in 2017 and established the Tamil Nadu Real Estate Regulatory Authority (TNRERA), which functions with a Chairperson and two Members.

- The key responsibilities of TNRERA include registering real estate projects and agents, as well as addressing complaints. Projects involving sales (whether freehold or leasehold), where the land exceeds 500 square meters and includes more than eight apartments (across all phases), must be registered with TNRERA.

- As of June 30, 2026, TNRERA has registered 35,673 real estate projects and issued registrations to 3,784 real estate agents. It has also admitted 4,851 complaints regarding issues such as delay in handing over possession of houses, structural defects, refunds, and compensation. Of these complaints, final orders have been issued for 3,978 complaints, while 873 are still under review.

Conclusion

Guided by the vision and policy of the Hon'ble Chief Minister and firmly rooted in the principle that "the welfare of the people is the foremost priority of the Government," this Government remains committed to ensuring simplicity, efficiency, transparency, accountability and corruption-free governance at every level.

Through planned urban growth and people-centred development, the Government is

committed to improving the quality of life, ensuring equitable economic opportunities and promoting sustainable development for present and future generations.

B.RAJKUMAR
MINISTER FOR HOUSING AND
URBAN DEVELOPMENT
DEPARTMENT

Hon'ble Chief Minister reviewed the schemes and activities of the Housing and Urban Development Department on 17.07.2026.

Hon'ble Chief Minister inaugurates 4,260 newly constructed tenements built by TNUHDB across various districts of Tamil Nadu and an air-conditioned Bus shelter constructed by the CMDA at Perambur on 04.08.2026.

Hon'ble Minister for Housing and Urban Development Department launches the Online Portal for the sale of houses/plots of the Tamil Nadu Housing Board on 12.08.2026.

Hon'ble Minister for Housing and Urban Development Department hands over appointment orders to the three Assistant Directors selected through TNPSC for the Town and Country Planning Department on 10.06.2026.
